A conservative estimate of the average price of your goods would be two cents an ounce—but cut that in two. Experience demonstrates that the difference in weights between the old fashioned beam scale and the absolutely accurate Dayton average one ounce each. A low estimate of your savings in this one particular is $13 a month. You invest, let us say, $25 a month in a Dayton hardware scale. Where will you look for any other safe, sound investment that will pay you 50 PER CENT. PER MONTH without a penny of increased overhead?

A card will bring one of our representatives. A demonstration costs you nothing and entails no obligation.

BETTER PAINT SALES?

The Answer To
This Question Is

TRADE
ELASTICA
MARK.

The Complete Paint & Varnish Line
That Sells and Satisfies

An old, old riddle this—of how to secure and hold a better paint and varnish business.

But it is not insolvable. Many of Canada's most successful hardware men have found the solution in the completeness, the quality and the well merited popularity of the Elastica line of Paint and Varnishes.

Elastica Products sell because they are consistently advertised to the consumer and the consumer regards them as the standard of merit and money value in the paint and varnish field.

Are you an Elastica dealer? If you are you already know the value of Elastica as a better paint sales producer. If you are not we invite you to investigate the Elastica Agency proposition because we believe it will also solve your problem of better paint and varnish sales.

May we send you all particulars?

And Now—
THE SPIRIT OF CHRISTMAS

We are taking this opportunity to suggest to the trade the practicability of featuring Brown & Sharpe Machinists' Tools as Christmas Gifts. A part of your window showing these gifts appropriately will place them before your customer's mind and add to your Christmas sales.

These fine tools, in Morocco Cases, make an especially useful and attractive gift.

A complete stock of these fine tools where your customers will see them will add to your Christmas trade.

HOWLAND'S BULLETIN

78 Pages of Sensible, Suitable Gift Suggestions and Winter Lines.

The special Christmas number of "Howland's Bulletin" has already been mailed and all our customers should have their copy before now.

Let us glance through it and note some of the lines featured in this issue which may offer suggestions for your selling during the pre-Christmas season.

On the inside front cover is illustrated a Samson Hammer nicely done up in a holly box. This is no toy or woman's gift. It's a real man's hammer fully guaranteed and up to the Samson standard, but put up in an attractive style suitable for gift-giving. This line will help to make an attractive window display.

Among the other Christmas lines are:—
Community Silver Plate, including the new Grosvenor design. Rogers 1847 and other makes of Tableware. Eight pages are devoted to a good assortment of Pocket Knives. Pages 518-519 show English cased Carvers. There is also illustrated a fine range of Cut Glass, Pyrex, electric utensils, etc.; toys for the children, such as Kiddie Kars; winter sporting goods and the general winter lines—these and many other items are shown for quick reference in this number.

If you're in Ontario and are not receiving "Howland's Bulletin" regularly, write to-day.

UNIVERSAL

Don't Have a Vacuum in Your Cash Register Where a Profit Should Be

NATURE abhors a vacuum and buyers abhor vacuum bottles whose fillers break if looked at cross-eyed. Bottles with thin, fragile, unprotected fillers stand as much chance of surviving hard usage as a bird's egg under a road roller. Filling orders for fillers doesn't fill the till with profit. It means to make the Vacuum Bottle Department a Service Station—a place for replacements instead of sales.

REDUCE breakage risk to the irreducible minimum. That's exactly what you do in selling "Universal" Bottles. Goodness comes before cheapness in making "Universal" fillers. They are of even thickness; free from pits and blow holes, especially heat-treated for strength and toughness.

"UNIVERSAL" Patented Spacers prevent contact between the outer and inner glass walls. A Spring Steel Shock Absorber holds the filler securely in the case. A Water-Tight Gasket hugs the neck of the filler and prevents harmful vibration. These are protective features that really protect. There is no puff, bluff and piffle in making big claims for the quality of "Universal" Bottles. It is **there**—built in to stay in. There is quality in the glass, quality in the service guaranteed by the "Universal" trade mark.

Universal Vacuum Carafe No. 9822

Sell Freedom from Ice and Snow

Ice and Snow cannot interfere with the reliable and easy working of Hatch Garage Door Outfits. Show your customers the advantage of being able, in any weather, to enter or leave the garage without delay. Who wants to shovel a lot of snow away to make room for doors to open, or stop to free moving parts from ice and snow?

With Hatch Garage Door Outfits

The doors slide easily out of the way and cannot blow or swing in the wind—and cause an expensive breakage of glass, headlights, windshield, etc.

Canada's total of motor cars still grows. Hardwaremen have assured business for Hatch Garage Door Outfits.

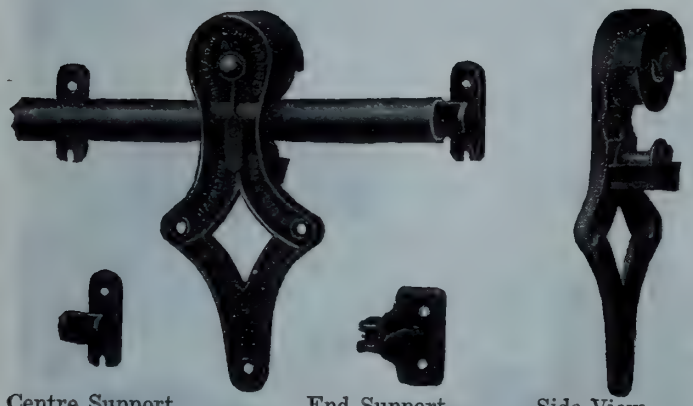
Dependable Hangers That Glide Easily and Surely Along the Tracks, and Have Distinguished Themselves as the Builders' Friends. Easiest of All to Erect.



Centre Support End Support Side View

"Reliable" Round

"Patented"

Track Door Hangers

The No. 1 and No. 2 Hangers are shown. These effective, "Reliable" Round Track Hangers are made of the best grade malleable iron frame, with upper and lower rollers. The upper roller has hardened steel bearings. The malleable iron frame is unbreakable and the upper and lower rollers prevent the hanger jumping the track.

S-B Hangers are the hangers to sell. In the coming months of winter, the hangers you sell will be severely tested. This means, in turn, that you, and your business judgment, and the reliability of your recommendations, will be tested.

Under these circumstances it is most gratifying to hardware merchants to sell S-B and know definitely that your customers' doors are sliding easily and properly.

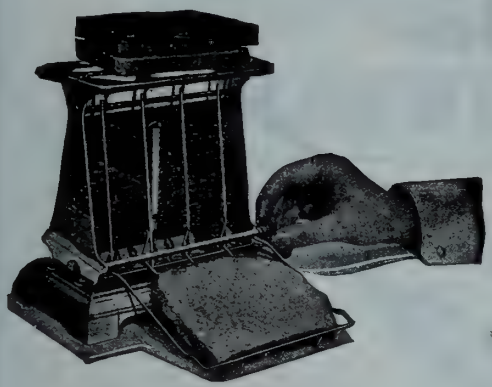
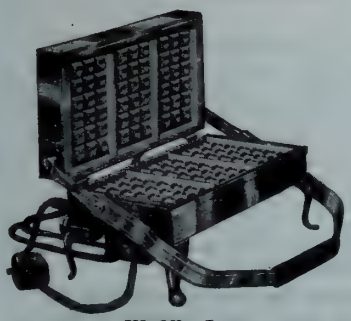
Westinghouse

Electric Household Appliances



Toaster Stove

Type "H" Iron



Waffle Iron

Percolator

HARDWARE dealers who handle Westinghouse Electric Heating Appliances know they can sell them with the confident assurance that the buyer will be fully satisfied with his purchase.

The line of Westinghouse Electric Ware includes Electric Irons, Toaster-Stoves, Turnover Toasters, Percolators, Chafing Dishes, Curling Irons, etc.

A recent addition to the line is the Westinghouse Waffle Iron. Its construction assures long and satisfactory service The griddles are cast aluminum and permit the baking of three waffles at one time. No grease is required on the griddles, therefore no smoke is created. It bakes the waffles in three minutes.

A special feature is the handle which raises and lowers the top griddle, and also permits easy carrying. The complete unit includes waffle-iron, tray, flexible cord and through switch.

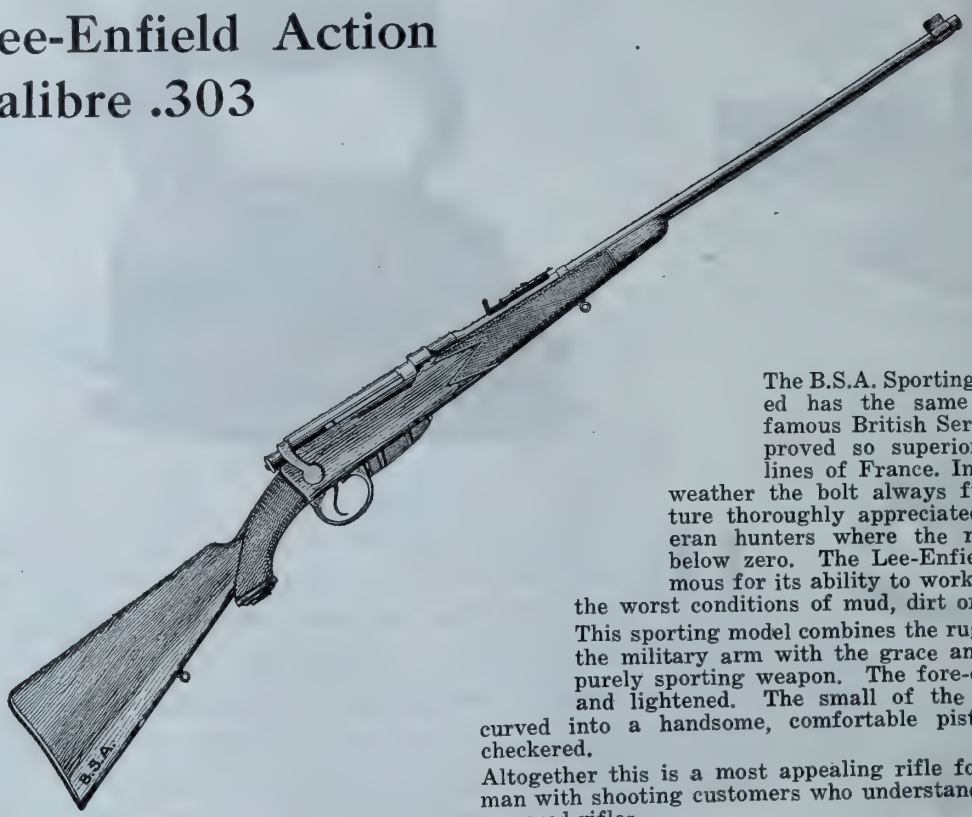
B.S.A.

No. 4 Sporting Rifles

Lee-Enfield Action
Calibre .303



The B.S.A. Sporting Rifle illustrated has the same action as the famous British Service Rifle which proved so superior in the firing lines of France. In extremely cold weather the bolt always functions, a feature thoroughly appreciated by many veteran hunters where the mercury is well below zero. The Lee-Enfield action is famous for its ability to work smoothly under the worst conditions of mud, dirt or sand.

This sporting model combines the rugged strength of the military arm with the grace and beauty of the purely sporting weapon. The fore-end is shortened and lightened. The small of the stock has been curved into a handsome, comfortable pistol grip, neatly checkered.

Altogether this is a most appealing rifle for the hardwareman with shooting customers who understand and need high-powered rifles

Specifications:

LENGTH, over all 45 in.—WEIGHT, 7 lb.—BARREL, 25 in. Enfield Rifling—ACTION, Lee-Enfield bolt pattern with safety catch on left side—MAGAZINE, 5 or 10 shot—STOCK, walnut, shot-gun, sporting stock in half pistol grip, checkered—Length from trigger to end of stock 14¼ ins.—SIGHTS, Back 100 yards fixed, folding leaves 200 and 300 yards, tangent leaf 400 to 1,000 yards—Front, bead—All parts strictly interchangeable.

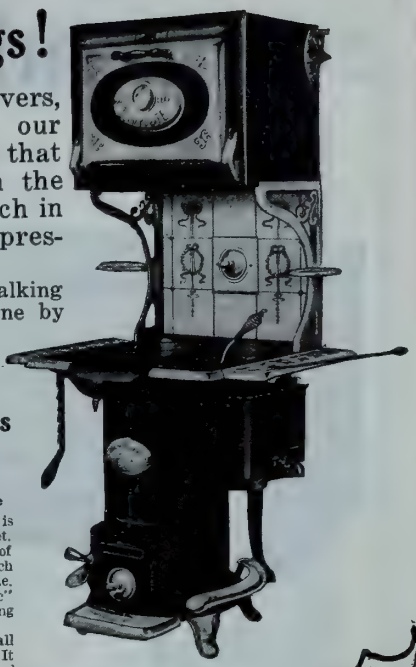
Put Stoves in the Stockings!

SINCE the time when we were little shavers, most of us looked for "something" in our stocking at Christmas time. It is a habit that we don't outgrow quickly. And although the actual stockings of the grown-ups are not much in evidence on Christmas Eve, yet Christmas presents are always welcome.

And in this age of sensible gifts when everybody is talking about "improving the home"—you will be right in line by suggesting to your clients that some member of the Maple Leaf line will be a greatly welcomed addition to any household at Christmas time.



Boost all the time--from now on--for Maple Leafs for Christmas

Maple Leaf Falcon

A steel range with all the modern attachments and appliances that the housekeeper appreciates in a kitchen range. Beautiful in design and made in several different styles. The Falcon will back up any claim that you can make.

Maple Leaf Composite

This range is unique—there is nothing like it on the market. There never will be, because of its patented flue system which makes the high oven possible. It is the peer of all "Quebec" heating, cooking and baking ranges. It occupies only small floor space. It has all the modern attachments. It burns all kinds of fuel and every woman who buys one will help you sell others.

Made-in-Galt Products

Galt Exposition Arouses Enthusiasm

Week's Demonstration of Made in Galt Products Proves Big Education Feature Among Local Interests—Visitors from Distant Points—Unexcelled Facilities for Industrial Development

WITH THE creditable idea in mind of stimulating local enthusiasm for local products, progressive manufacturers of Galt, Ontario, co-operated in the arrangement of a "Made In Galt Exposition" which was held from November 12-19 inclusive. The plan was successful beyond all expectation and its influence spread over a wide radius in Western Ontario, drawing interested visitors from such cities as Toronto, Hamilton, Brantford, Guelph, London, Montreal and Quebec.

The manufacturers of Galt conceived the idea in order to boost Galt as a manufacturing city as well as to popularize locally made goods. The movement was initiated in large part by Colonel A. J. Oliver, R. McDougall Company, but the exposition was carried on under the direction of C. A. Webster of Galt. Every day and night while the affair was in progress large crowds were in attendance. It is estimated that the attendance averaged up to 3,200 a night, and great interest was displayed in the seventy-one exhibits arranged by local manufacturers. In some cases three or four booths were occupied by one manufacturer.

Special attractions in the form of music and entertainment were provided and a dance was held each night. The revenue raised from the fifteen cent admission to the exposition and from the dancing, was handed over to local charities. In order to get the affair away to a good start, a street parade was held each evening, headed by a local band.

Wide Publicity

The crowds which visited the exposition from various parts of Western Ontario came largely as a result of the wide publicity given the affair. Mention of the dates of the affair and reproductions of the city's coat of arms were spread broadcast on letterheads used by Galt manufacturers, and distributed in hotel rotundas, on street cars and trains.

Word of the success of the affair spread so rapidly in Western Ontario that it is said there were representatives of Chambers of Commerce of nearby cities in attendance to obtain pointers for guidance in planning such exhibitions. A feature was the naming of the various days of the fair as an added incentive for record attendances. For instance there was "Retailer's Day" and Lades' Day," etc.

Local officials of the "Made in Galt Exposition" were as follows:— Colonel A. J. Oliver, R. McDougall Co., President; T. H. Watson, Canadian Machinery Corp., Vice-President; Beverly Neill, Canadian Machinery Corp., Secretary; George A. Dobbie, Stauffer Dobbie, Ltd. and Newlands, Ltd., Treasurer. The Executive Committee consisted of the following: H. C. McLaughlin, McCaskey Systems, Ltd.; R. W. Roelofson, Galt Machine Screw Co.; Chas. Turnbull, C. Turnbull, Ltd.; W. S. Fallon, Getty and Scott, Ltd.; Geo. Fisher, Canadian Brass, Ltd.; G. P. Stuart, Sheldons, Ltd.; G. E. Gardiner, P. W. Gardiner Co.; A. R. Goldie, Goldie McCulloch Co., Ltd.

Advantages of Galt

Galt manufacturers have always been very proud of their city and very jealous of the splendid industrial advantages which it offers. The Exposition served to stimulate this regard among both citizens and manufacturers. A few points in connection with Galt, as seen by Hardware and Metal when attending the exposition, will be outlined herewith.

There is no question but that the city of Galt represents the development of a highly picturesque, most orderly and prosperous industrial centre. The growth of the city has been steady with a clear-cut purpose behind all local public movements from which have developed utilities in every way creditable to the community.

Galt is admirably located, right in the

One of Galt's industrial sections. View taken from the elevation on Rose Street, showing factories and mills. Cement walks, clean boulevards and good roadways on every street. Buildings of stone, brick and cement.

Made-in-Galt Products

Main Street, Looking East From Water Street.

heart of the richest part of Western Ontario and served by Niagara electric power. It is on the main line of the Canadian Pacific Railway, Chicago to Montreal route, and on the G. T. R. north and south branch from Lake Ontario to Lake Huron. In addition Galt is the centre of a network of electric radials which bring it into very close touch with other Western Ontario centres. Soon the publicly-owned system known as the Hydro Radial will have lodgment in Galt which will make the city an electric hub with two ports one on Lake Erie and the other on Lake Ontario. Switching facilities throughout the industrial section are provided to aid distribution of manufactured products.

Educational Features

From an educational standpoint Galt holds a high place, and this is always an important feature of the industrial success of any city. This city has five public schools, a separate school, a collegiate institute and a technical school and business college. From the standpoint of social activities the citizens are well taken care of. The city's community is enriched by organizations that collectively minister to all the elements of her population. Sporting and club facilities abound for all classes of the community. No mechanic employed in Galt can truthfully say that recreation and entertainment are not open to him after work hours. The city is the product largely of the wage earner and she treats him accordingly.

The general prosperity of Galt is reflected in its numerous sites of handsome homes amid picturesque surroundings. These are maintained by home lovers who take pride in their properties. With manufacturing industries clustered on the lower levels of the city the homes on the hills present an urban appearance seldom seen in a manufacturing centre.

Business Organizations

Business associations exist for the concentration of business interests of every nature. The retail merchants have their association in affiliation with the Dominion organization and which is supported by every business house in the city. The local Board of Trade is very active, the Motor League is a wide-awake organization.

The completion of negotiations for the acquirement of the G. T. R. by the Canadian National Railways places Galt manufacturers in an unexcelled position respecting freight shipments, particularly to Western Canada. The West and also Northern Ontario are big markets for Galt products, to say nothing of the possibilities in all other directions. Added to inland traansportation facilities possessed by Galt, the advantage of two lake ports, one on Lake Ontario 27 miles distant and one on Lake Erie 50 miles distant, it will be acknowledged that Galt manufacturers are well placed to reach consuming fields.

MONTREAL WILL HOUSE FRENCH EXHIBITION

Montreal.—The French Exhibition train completed its tour of the Dominion last week, and upon arrival in Montreal samples of the many French wares were transferred to the museum of the Ecole des Hauter Etudes Commerciales, Place Viger, where plans for a continuation of the exhibition are now under way in this building. These samples, along with others which will shortly arrive from France will be displayed and ready for inspection around December 1st, continuing until some time in February next.

One of Galt's many attractive residential streets where every house owner takes a personal pride in the appearance of his home.

Made-in-Galt Products

Exhibit of GTD Galt Products

The great crowds who were afforded the privilege of visiting the "Made-in-Galt" exhibit, held in Galt during the week of November 12th, enjoyed the opportunity of viewing this complete line of Taps, Dies and Screw Plates manufactured in Galt, Canada, by the Greenfield Tap & Die Corporation.

This excellent, well-laid-out exhibit, appealed particularly to the many machinists and other workmen who were in evidence at every session of the exhibition. The "Acorn" Die, Gun Tap, Screw Plates (Little Giant, O.K. and Button Dies), Taps, Dies, Gauges, etc., figured prominently in the exhibit. It can truly be said that these, as well as many others of the extensive GTD lines, brought forth favorable comment by all who saw them.

A Suggestion: Hardware dealers who wish to make their windows and interior displays attract attention from the many good prospects for these lines, in the community they serve, will do well to take careful note of the display as illustrated. You can use it to good advantage in making many more sales of G.T.D. goods.

Made-in-Galt Products

Largest variety of Tacks and Small Nails ever exhibited in North America.

Dominion Tack & Nail Co's Exhibit

This remarkable exhibit offered an exceptionally instructive and profitable opportunity to the many merchants who attended the Made-in-Galt Exhibition.

It was an opportunity to compare one's stock in the store with the complete line.
The novel feature of the exhibit was its artistic arrangement in the form of an arch—almost royal in its proportions. Small boxes, behind plate glass, formed the basis of this display, while the Flag and Maple leaves, made up entirely of Canada's Metaline Upholsterer's Nails, added greatly to its effect.
In the arch were all kinds of cut tacks, thumb tacks, drawer glides, clinch buttons, all kinds of shoe tacks carpet tacks, trunk tacks and trunk nails, etc.
Altogether it was an exhibit of great interest, that was much appreciated by visitors, and will serve to remind many buyers, when ordering, that Dominion Tacks and Nails are made in Galt by the

A Helpful Stove and Heater Showing

Merchants who visited the Made-in-Galt Exhibition were especially rewarded for their attendance by the Galt Stove & Furnace Co., Limited, exhibit. Here were shown a most interesting and practical display of the Galt line of Stoves and Furnaces.

Of particular interest, now that so many rural people are discarding other forms of heating for the pipeless furnace, was the heating section of the exhibit.

The Banner Pipeless proved the great favorite with the crowds that it deserves to be. The Quebec Heaters, with the oven, warming closet, etc., seemed to many like an old friend grown more useful and prosperous.

Altogether the Galt Stove & Furnace Co., Limited, exhibit, left a very pleasant impression on all who saw it. Many consumers will apply their appreciation of this line's advantages by an early purchase at their local dealer's store.

An Interesting Exhibit

By Goldie & McCulloch Co., Limited

The illustration shows the Safe end (only) of the Goldie & McCulloch exhibit. To the left of the above, and occupying a frontage of 32 feet, was a most interesting exhibit of Power Plant equipment.

Much interest was shown in the Safe exhibit, which featured the sturdy construction, strong heavy walls and the many ingenious devices for frustrating the attacks of both fire and burglars. To even the casual observer among the thousands who visited the Made-in-Galt Exposition, it could readily be seen that the splendid reputation so long held by G. & McC. Safes must have been built solely on merit.

G. & McC. Safes and Vault Doors have kept their contents intact through all of Canada's big fires for forty years.

AHM System

23,000 Miles Without A Blowout

The best advertising for Ames Holden AUTO-SHOES is the remarkable mileage they are giving —enthusiastic users are the best salesmen.

Here is a typical example of AUTO-SHOE performance:

Mr. H. Parker, Carroll Street, Ingersoll, Ontario, who operates a taxi service, has recently discarded two AUTO-SHOES which travelled 23,000 miles before they were worn enough to be replaced. While using these AUTO-SHOES, **seven** other well-known makes of tires were worn out on the same car.

Needless to say, Mr. Parker is convinced that AUTO-SHOES "cost less per mile" and he will never use any other tires in future.

Every AUTO-SHOE is sold with an unconditional guarantee of "a satisfied customer"—based on previous tire experience.

If you sell tires, ask our nearest Sales Office to tell you about the unusual Ames Holden dealer policy and the opportunity there is in your district to do a bigger tire business with

Tire Companies' Statements Set At Rest Many Ominous Rumors Re Hardware Trade

Hardware Retailers Much Incensed Over Alleged Uncertain Attitude of Tire Companies Toward Them as Distributors—Air Has Been Cleared by Statements Showing New Policy of Distribution —Retail Hardware Trade to Be Encouraged in Tire Selling

For some time there have been ominous rumblings of discontent among the hardware trade concerning the alleged uncertain attitude of a number of tire manufacturers toward them as a medium of distribution. This sentiment was reaching great lengths and threatened to bring forth much heated discussion at forthcoming hardware conventions as result of which the attitude of the hardware trade would have been more clearly demonstrated.

However, within the past few days the air has been considerably cleared as result of statements made to Hardware and Metal by leading officials of the various tire manufacturers concerned. Some of these statements appeared in last week's issue and others are given herewith. These indicate that while the tire manufacturers have found it advisable to make some changes in distribution policy, they have a full appreciation of the value of the retail hardware merchant as a salesman of their product and there is no intention of eliminating him as a medium of distribution.

It would indeed be a short-sighted policy which would eliminate the retail hardware merchant as a means of distributing tires. This branch of trade is highly important as a medium of marketing and when rumors got abroad that the tire manufacturers were to adopt an unfavorable attitude, it did not take long for many retailers to commence reaching out toward new sources of supply, and only the quick action of these tire companies in coming out with a definite statement of policy has averted the disaffection of many retailers for their products.

DISCUSSING reports which have been current in the hardware trade to the effect that certain Canadian tire manufacturers were considering the elimination of wholesalers and of the retail hardware trade in connection with the distribution of tires, C. N. Candee, President of Gutta Percha & Rubber, Limited, Toronto, stated to Hardware and Metal that various hardware firms throughout the country were listed among their best customers and that no endeavor was being made to eliminate them or any others in connection with the sale of tires or other products of that Company. Mr. Candee stated that, owing to conditions which have arisen in the industry, it was found necessary to devise methods by which all avoidable expense in distribution as between the producer and the consumer might be eliminated. The Company maintains fifteen branches, extending across the continent, at which stocks of tires, tubes, and accessories are carried for the purpose of giving proper service to hardware dealers and other merchants handling its product, and any modification of policy in the distribution of its goods which may have been made was the result of changed conditions, and not with any intention on its part to eliminate any class of dealers, as has been hinted at in the trade.

Dunlop Co. Eliminates Wholesalers

Discussing with Hardware and Metal the recent developments among tire manufacturers, Colonel Paul R. Hanson, Montreal divisonal manager Dunlop Tire Co., stated that this firm were definitely eliminating wholesalers in the distribution of their tires. They would be affected considerably by this ruling in the marketing of their goods but owing to prevailing prices it was impossible to protect the jobbers with the 15 per cent. commission formerly given. The prevailing market on raw materials was outlined, it being shown that certain firms were still using 52-cent rubber in the manufacture of tires whereas the prevailing market price is about 21 cents. He stated that due notice had been given wholesalers concerning this change of policy.

Referring to reports that retail hardware merchants might be eliminated, Col. Hanson stated that this firm considered the hardware store to-day to be much ahead of the average garage man, particularly from a credit standpoint and they would by no means be eliminated in the sale of tires. In future this firm will use their fifteen branches for distribution and sell direct to the trade whether it be garage, hardware store or other retail distributor.

Better Service Through Branches

Speaking for the Ames, Holden, McCready company, Mr. Youngblood stated that in future this company will also eliminate the wholesaler as a distributor of tires. He gave it as his reason that this course would enable the giving of better service from the firm's own distributing centres. He agreed that there would be a saving in costs but stated that this was by no means the chief reason for making the change.

"Competition is very keen in tires, and will be perhaps more so from now on," said he. "Service, then, is what will count and if we feel confident that we can serve the consumer better through our own established centres, we feel that we will have accomplished not only a saving in money, but will benefit through more goodwill. It is not a case of eliminating the hardware trade," he said. "If the hardware retailer continues to prove a good live outlet for our products in any town, he will still be a distributor, and should be given the preference over the garage man in

the same town, if the latter does not appear as good an outlet."

The maintenance of prices was said to be an important factor, and must be taken into consideration by the manufacturers in the ensuing year. During the past season there was too little maintenance of price and in many cases the hardware merchant was the guilty party, although the garage man was equally responsible in many localities. In future their sales would be taken care of through the different branches and each branch manager would take the responsibility of selling what he considered the best outlet in each town, maintenance of prices and service to be taken into consideration at each place.

Hardware Trade is Important

The garage man, in Mr. Youngblood's opinion, was the proper outlet, as in most cases he was in the position to give better service, although unfortunately on the whole they would have to become better established. In saying this, however, he wanted it made clear that they had no hard feelings towards the hardware trade, and they realize that the hardware store offered an important channel in distribution, and would continue to do so as far as they were concerned.

J. R. Rudolph, Tire Sales Manager of Dominion Rubber System, Montreal, said they were little interested in the hardware trade from the jobber's point of view as they already sold their output through their own distribution stations. As far as the retailer was concerned he was of the same opinion as the other firms, namely, that he was a very important factor, and certainly should not be eliminated from the selling of tires. Although certain tire firms he said, had changed their selling policy he had no doubt that jobbing houses could still obtain their supplies from other manufacturers and he showed a list, secured by their different branch managers, showing the different tire jobbing houses throughout the country that were on the list for tires for the coming season. He said he did not know what tires they were selling but certainly they would be a prominent factor in the market for next season. Up until a year ago this firm had two jobbing houses on their list, but to-day these are cut off their list and all sales will be carried on direct.

In last week's issue of Hardware and Metal H. C. Lower, General Sales Manager, Goodyear Tire & Rubber Co., Toronto, was quoted as stating that the alleged elimination of wholesalers in the distribution of tires was something which would be of interest only to companies which did not maintain their own distributing branches as does the Goodyear Company. He pointed out that there was no attempt to eliminate the retail hardware trade from distributing tires and that many hardware merchants were among their list of selected dealers.

An official of one of the other tire companies pointed out that the decision to eliminate wholesalers was due entirely to the fact that the current recession brings values to such a point that manufacturers cannot afford to give the jobbers a discount. The new prices, it was said, did not allow manufacturers to quote prices to jobbers without entailing direct losses. There was said to be no attempt to eliminate retail hardware merchants from selling tires.

Montreal Export Club Elects Officers

Under Presidency of F. R. Whittall, A. R. Whittall Can. Co., Montreal Club Enters Upon Program for Development of Export Trade

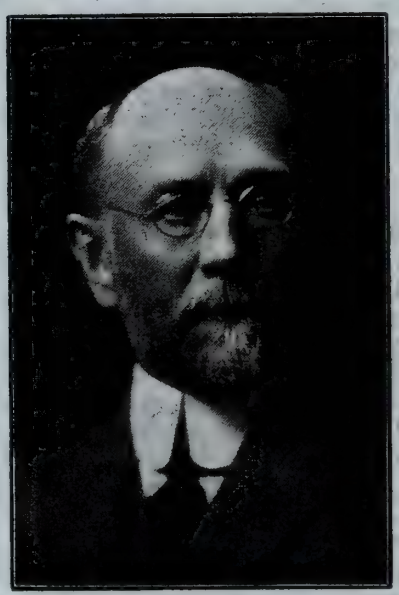
MONTREAL.—The Export Club of Montreal and district was forma'ly inaugurated at a meeting to which about one hundred business men gathered together, including members of the Canadian Manufacturers' Association which has promoted the organization, and others interested.

F. R. Whittall of the A. R. Whittall Can Co., Ltd., occupied the chair and first called upon A ex. Marsha l, of Toronto, secretary-treasurer of the National Export Clubs in affiliation with the C. M. A. Mr. Marsha'l told of the organisation of the Toronto, Hamilton and other branches, and the advantages of these clubs. H. R. Pousette, director of the intelligence department of the Department of Trade and Commerce followed Mr. Marshall, and stated the formation of these clubs was a step in the right direction and should be supported by not only exporters, but by the Department of Trade and Commerce. The various stages of export trade were outlined as applicable to Canada in the past few years, and the opinion emphasized that export business is a science, not to be learned in a day. Such points as correspondence, marking, packing and documentation were also taken up.

The meeting then received and adopted a resolution approving of the steps that had a ready been taken by the organization committee in drawing up a constitution and slate of officers, and formally approved of the establishment of the Export Club of Montreal and district.

Officers Elected

T. P. Howard was elected honorary president by acclamation. Other officers are as follows: President, F. R. Whittall, A. R. Whittall Can Co.; first vice-president, Kenneth Dawes, National Breweries Ltd; second vice-president, J. A. Lapres, Canada Cement Co.; executive, S. Gettus, Steel Co. of Canada; D. R. Arnold, Canadian Car & Foundry Co.; V. G. Bartram, Canada Electric Company; G. R. Benarriel, Canadian Consolidated Rubber Co.; R. W. Ashcroft, Ames-Holden-McCready, Ltd.; W. C. Trotter, Standard Clay Products Co.; A. D. Huff, Riordon Pulp & Paper Company; W. S. McLennan, Brandram-Henderson Limited; H. Clark, W. Clark Limited; J. Bruce Payne, Canadian Grown Tobacco Co.; A. S. Ginger, Howard Smith Paper Mills; A. C. Moore, Lake of the Woods Milling Company; and R. W. Gould, C. M. A. secretary-treasurer.



C. N. CANDEE

President Gutta Percha and Rubber Ltd., Toronto, whose statement to Hardware and Metal setting forth the position of this company in regard to the change of policy in connection with tire distribution, is outlined herewith.

U. S. CONGRESSMEN STUDYING CANADIAN SALES TAX

Montreal.—Between 85 and 90 American Congressional members are visiting Montreal this week to study the working of the sales tax as well as other special taxes imposed in Canada in connection with the cost of the war.

The Board of Trade has placed at their disposal its committee rooms and the services of its staff, also its information bureau. The board also prepared a brief resume of the application of the sales tax, which the guests particularly desired to study, together with a description of the turnover tax, which the Board advocated, but which was not adopted. The party will proceed to Ottawa from Montreal.

TRAVELERS TO DINE

The Dominion Travelers' Association have decided to hold their annual banquet at the Windsor hotel, Montreal, on Thursday, December 22nd.

The interest of children in the toy stock of the hardware store can be secured chiefly through the medium of the window display. The merchant whose window display of toys is shown herewith believes in showing a sufficiently wide range of toys appealing both to boys and girls, that toys is shown herewith believes in showing a sufficiently bought. Price cards are an important feature in the toy display as children who purchase such lines have limited means and want to know where they can purchase the article which most appeals to them, at the minimum price.

Stimulating Xmas Interest In Toys

Educational and Constructive Toys Mostly Selected by Parents—Wide Range of Stock Necessary to Attract Children—Making the Hardware Store Santa Claus Headquarters—Planning the Christmas Parade

THE PRE—CHRISTMAS season offers splendid opportunities for developing many valuable connections through the medium of the toy department. While the sale of toys in hardware stores is no longer regarded as a strictly Christmas feature, it is nevertheless a fact, that it is much easier to stimulate trade in this line under the urge of Santa Claus traditions. It should be kept in mind that connections established with the children of today means many lasting connections throughout many years in which their requirements will be many and varied.

Plans for securing toy trade at this time of year represent many varied ideas, as applied by hardware merchants. In many cases a Santa Claus parade is held chiefly with the idea of stimulating early interest in Christmas gifts and toys. Such a demonstration should be accompanied by the utmost support of the display windows and advertisements. A point should be made to have in stock something that is of benefit and interest to every child, and then take steps to encourage children to the store. This is

accomplished in one Maritime hardware store by giving the children certain liberties in connection with the toy department. They are encouraged to come to the store and look over and handle the various lines shown, and it is found that many kiddies take advantage of this very frequently, after school hours. Oftentimes they bring parents along, so a double advantage accrues. The importance of this factor is seen in the experience of the department stores which set aside special playrooms for children. These are generally located in the toy department, and by the time the parent returns from shopping, the child has got its mind set upon some toy it has seen and it is then a difficult matter for the parent to get away without making a purchase.

A Prospect List

A good way in which to secure a good list of prospects for toys is to announce the arrival of Santa Claus in town on a certain date and then suggest that the children write to him stating their wants. These letters are sent in care of the hardware store which advertises the coming visit of the patron saint, and many letters will be forthcoming because parents will not wish to give confirmation to any disbelief which the children may entertain in regard to the reality of Santa Claus, by disallowing them to write.

In order to establish a solid claim to toy business it is necessary for the merchant to display them to a certain extent throughout the other seasons of the year

though not so conspicuously as at Christmas. To back up this effort, a wide range of toys must be kept on hand as children have a tendency to buy toys in the store which offers the biggest selection to take their interest. It is generally found that even though a child will go to the store to buy a certain toy, yet it will display a keen interest in all the other toys shown and if there is not much selection in one store it will go to another where its desires may be satisfied.

Santa Claus' Headquarters

One hardware merchant sends out letters finished in red and green to a lists of prospects, encouraging them to shop for Christmas gifts at his store. By this means the children have come to look upon his store as Santa Claus' headquarters and the children bring along their parents who become prospects for the purchase of gift lines.

One means of accomplishing this end is to send letters to children in the district. These letters are ostensibly from the North Pole and signed by Santa Claus. They are designed with the idea of encouraging an answer telling what gift they desire, and pointing out that some samples have been left with the ————hardware store. The date and hour is then given when Santa Claus will be present in person at the hardware store and requesting that the children be on hand to see how Santa arrives and to look over the complete stock of toys which he has to distribute on Christmas Eve.

Educational Toys Wanted

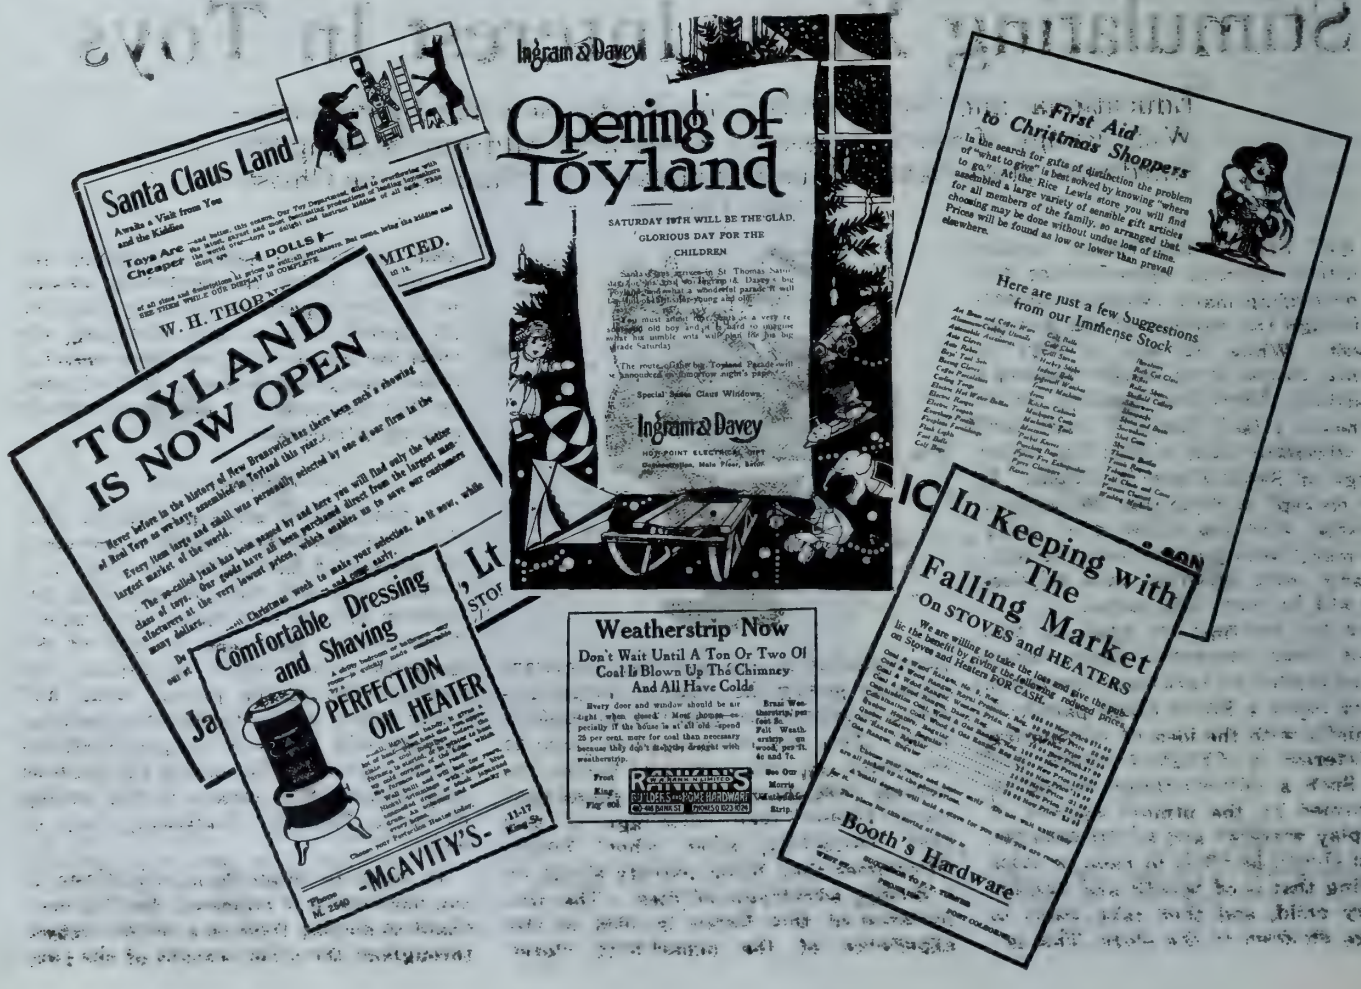
Educational and constructive toys are making a strong appeal both to children of a mechanical turn of mind and to their parents. The merchant has numerous lines of this character at his disposal, ranging from $2 to $20 and up. These are often put up in regular sets and accessory sets and it is frequently the case that a purchaser of an original set this year will return in subsequent years and purchase accessories for it. Engines, automobiles, steamboats, etc. lend themselves readily to display because they can be put in motion and offer more entertainment to the children.

The average toy buyer enters the hardware store with an open mind, it is not very often that the mind has been set upon some definite toy, largely because of the fact that the average person does not keep in touch with developments in connection with toy manufacture. This fact leaves much to the toy display and the advice of the salesmen. It has been found advisable in some stores with considerable toy business to make it the duty of a man specially fitted for the work, to meet all the children coming into the store and specially direct their attention to those toys which will likely be of special interest to them. He should give customers the benefit of his knowledge of the stock and point out what toys the children are most likely to appreciate for Christmas gifts.

TOOL EXPORTS TO BELGIUM AFFECTED BY GERMAN COMPETITION

A. S. Bleakney, Trade Commissioner in Brussels, reports that German products do not enter into direct competition with the major portion of Canada's trade with Belgium, which is mainly in raw materials, but in regard to agricultural machinery, for which Belgium has proved a good market and for hand farm implements and hand tools, the effect of German "dumping" is certainly evident.

In 1920, Canadian imports into Belgium rose from $25,017,639 in February, to $49,343,894 in August, while in 1921 the imports fell from $43,340,193 in February. to $30,518,835 in August.



Practical Hardware Gift Suggestions

Hardware Stock Offers Wide Range of Suitable Gifts for All Members of the Family—Practical Gifts Carry Strongest Appeal —Getting the Eye of the Christmas Shopper by Offering a Range of Suitable Gifts at Various Prices

THE average housewife—and the average husband—believes in giving useful and serviceable presents on Christmas—and in turn, they like to be recipients of the useful article. It is only a matter of fact because the average people today have learned the wisdom of economy and thrift during the trying periods that have just passed. During the first stage of the war the wife of the average home would consider it a crime to buy the expensive "flimsy" or shoddy gifts. She would search every store until she found the more substantial items of the serviceable kind. Utility has been the housewife's watchword ever since.

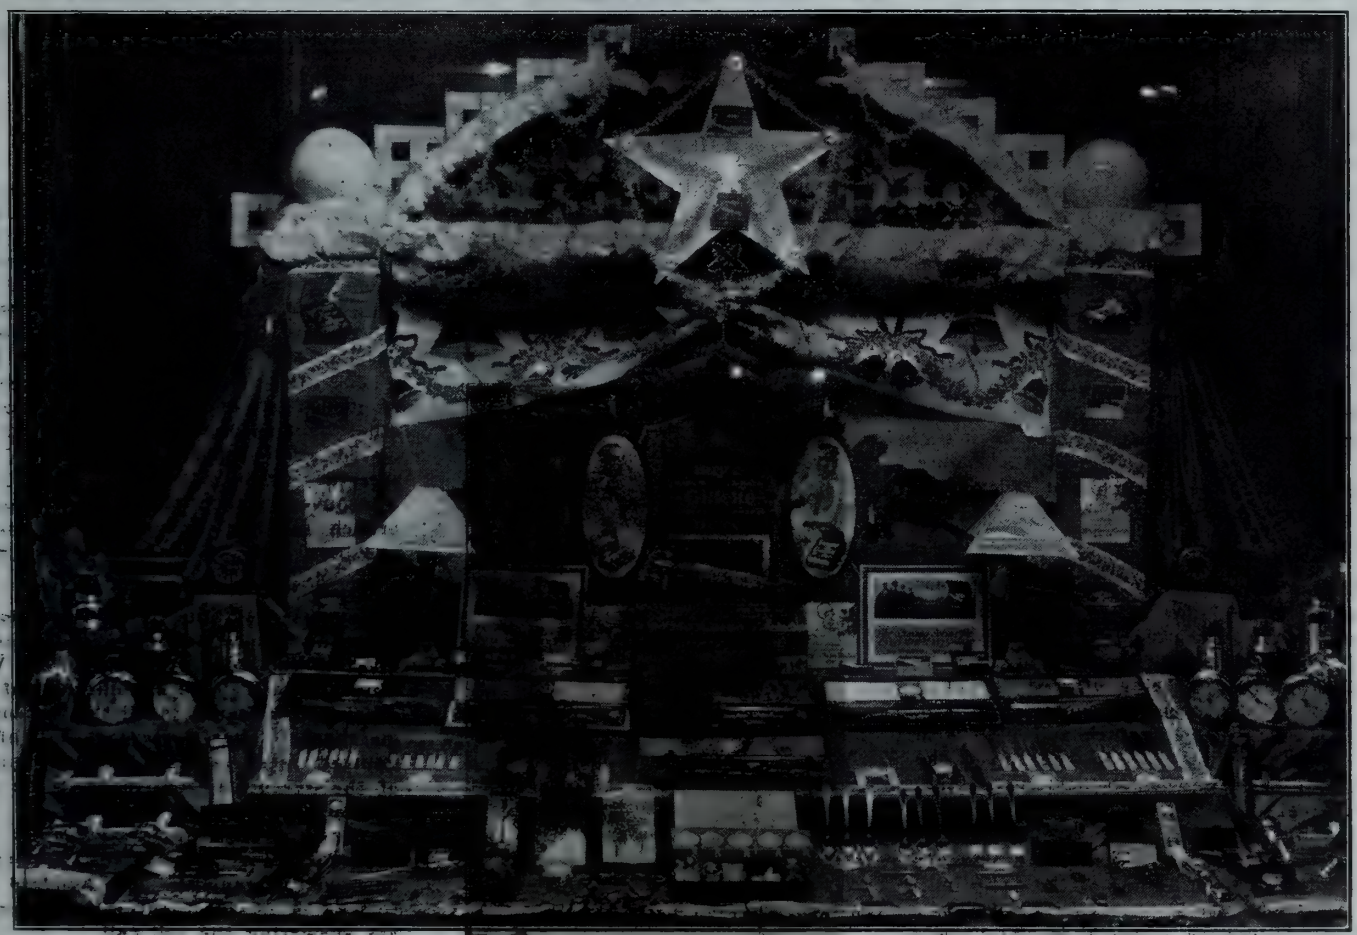
The modern husband is not the "spend-

thrift" any more. He also has had experiences during the days of strife and depression. Like the modern housewife he has acquired the habit of careful and thoughtful buying, and would not now think of going beyond his means to purchase some expensive, yet unserviceable article. Before the war the buyer would go to a store and select an article with little thought of its quality or value, but today it is different, he now wants "full value" for his money.

What Hardware Offers

In regard to Christmas Gifts, hardware is positively the most useful of any, because it offers three essential qualities, viz., serviceability, durability and economy. Hardware consists of many items—but each one serves its purpose and gives "full value" for the money.

There isn't an article in "hardware" which does not give the utmost in service. Hardware is truly the practical Christmas Gift. Therefore thrifty people have adopted it as the most suitable gift with which to extend their "Yuletide Greetings."



The window display of gift suggestions will have greatest effect if it embraces a number of suggestions of varying price range, suitable for all members of the family. To do this a study must be made of the stock in order that the most attractive lines will be shown and that the harmony of the display may be preserved. This display by E. Babineau and C. Murray of Sumner Co., Moncton, N. B., which was a runner-up in the 1920 Hardware and Metal Christmas Window Contest, shows a grouping of a wide range of suitable gift lines. Price tickets should be shown as prominently as is consistent with good taste, because the chief value of the Christmas display is in arresting the eye of shoppers who are looking for suitable gifts within a certain price range.

News of Western Canada

Christmas Buying of Hardware in B.C.

Christmas Goods Featured in Sorting Trade—Heating Appliances Stimulated, Due to Cold Weather—Builders' Hardware Movement Maintained

VANCOUVER, B. C.—Developments in the wholesale hardware trade on the coast this week, gives evidence of a start of Christmas buying as indicated by the demands of the retail trade. Cutlery and silverware are being displayed in store windows and it is expected that the power of suggestion will bear good fruit, within the next two or three weeks. Small sorting orders are filtering in due to the fact that retailers were slow in placing their import commitments.

The cold snap of the last couple of days of last week ending with a seven or eight inch fall of snow on Monday had the effect of creating a demand for heating appliances and an urgent enquiry and sale of repair parts. This was true also of the upper country where the temperature was lower than on the coast. Collections are only fair but retail accounts are being kept well in hand. Buying is being conducted on a very conservative basis on the part of the retail trade. Only those lines which are readily saleable are being stocked in quantity.

There is a continued demand for builders' hardware and with favorable weather conditions during the balance of the year, it is expected to be maintained. Prices are showing little change although spring hinges and butts took a drop of about ten per cent during the week.

Some retailers are already announcing special prices on some lines of seasonable goods as an incentive to shop early for Christmas. For instance a fine line of carving sets just in from the Old Country is being offered at $14.75 instead of the regular quotation of $20. Consisting of knife, fork and steel with iveroid handles, they are put up in the usual handsome plush-lined box. Regular $17 Shefield carving sets also consisting of three pieces are offered as low as $10.95 while two piece sets are quoted at $5.95 by one of the early holiday tradesmen.

In silverware a special is being made of a $23 twenty-six piece set at $14.95 while the same number of Nevada silver is on offer at $9.85. Aluminumware is also on display at attractive figures. For instance the double-boiler which regularly sells at around $5.50 is marked down to $3.95 for quick sale.

House brooms are quoted on a lower basis, the No. 1 quality selling at $9.50 a dozen which is a reduction of about ten per cent. Malleable iron washers are off two cents a pound to 13½ cents. Carriage, machine and stove bolts are also showing slight cuts. Higher grade Community plate is down eleven per cent. Community teaspoons are now moving at $5.14 as against the former figure of $5.74.

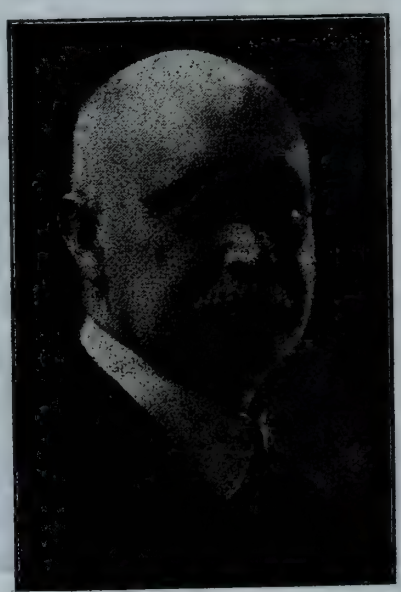
Paint dealers are taking advantage of the "Save the surface" campaign and to that end are offering attractive prices on interior paints and decorative materials, floor and furniture oils and polish and cleaners of various descriptions. There are no changes of importance in price lists.

Deliveries are coming through in much improved time as illustrated by a shipment of English goods which arrived here by rail in twenty-three days from Liverpool.

Is Now Secretary Of Vancouver Branch Of The Retail Merchants' Association

New Office is Created in the Pacific Coast City, With R. H. Fairley, Who Has Been Outside Organizer for the B.C. Board, the First Occupant.

VANCOUVER, B. C.—R. H. Fairley, who has been outside organizer for the B. C. Provincial Board, R. M. A. of Canada has been appointed to the newly created office of Vancouver secretary. Ever since the Retail Merchants' Association has been organized in British Columbia the office of the Provincal Board and the Vancouver branch have been merged in one, with the one secretary serving in the double capacity. At the last convention in Duncan, B. C. many of the representatives from points outside of Vancouver advocated the separation of the Provincial office from that of the Vancouver branch office. It was claimed by the other centres that Vancouver City received a disproportionate share of the secretary's time. It was claimed by the Vancouver branch that the Vancouver branch received a modicum of service and bore a heavy share of the expense.



R. H. FAIRLEY

The newly appointed secretary of the Vancouver Retail Merchants' Association

Will Look After Vancouver

To please all, the offices were separated and a new secretary appointed to give his undivided attention to the Vancouver branch. The appointment of Mr. Fairley is pleasing to all the Vancouver merchants. His efforts on behalf of organized retailers have, in the opinion of the executive, well merited the promotion.

A new branch of the R. M. A. has been formed at Revelstoke. Victoria is now well organized, one hundred and thirty-five of the Capital's best retailers answering the roll call.

The fight that the merchants in association are making against the Provincial Government's proposed additional taxation is greatly emphasizing the necessity for association.

WESTERN CANADA NOTES

A. H. Fraser, manufacturers' agent, Winnipeg, is on a business trip to the jobbing centres from Winnipeg to the Coast.

Grant Smith of the A. S. Smith Hardware Company, Limited, Moosomin, Sask., visited the J. H. Ashdown Hardware Company last week.

C. H. S. Bamford, sales manager of the J. H. Ashdown Hardware Company, Winnipeg, is still confined to his home with illness.

W. B. Pickard of the T. Eaton Company, hardware department, Winnipeg, has returned from a trip to the East.

Winnipeg.—A. H. Merrick has joined the staff of the A. Ramsay & Son Company, Winnipeg, and will be covering the Province of Manitoba.

F. W. Moffat of the Moffat Stove Company, Weston, Ont., was the main speaker this week at the regular meeting of the B. C. Electric Social Club. He spoke on the subject of electricity, using lantern slides for purposes of illustration.

W. B. King who represents J. H. Graham & Co., manufacturers' agents of New York in this territory made the rounds of the coast jobbing trade this week and reported a good average volume of business. Mr. King makes his headquarters in San Francisco.

Messrs. Thos. Waldon, vice-president and general manager of Marshall Wells, Ltd., of Winnipeg and his Edmonton manager "Micky" McMullen were in Vancouver this week visiting the retail trade.

An interesting police court case in New Westminster has just been decided in favor of Thos. Trapp, Jr. of the hardware firm of T. J. Trapp and Co., Ltd. Mr. Trapp recently sold a handsome residence on behalf of a Royal City resident and claimed his commission.

Now Mr. Trapp is not a real estate agent in the sense that he pays no licence fee. Members of the real estate business in New Westminster heard of the case and notified the provincial authorities with the result that the hardware firm was haled into court. The magistrate ruled that one transaction did not constitute a violation of the Act and gave judgment in Mr. Trapp's favor.

HARDWARE STORES IN FIRE AT ELROSE

Saskatoon, Sask.—Fire which broke out in Elrose, Sask., in the hardware store of Tackaberry & Norris, resulted in the total estimated damage of $75,000, fully covered by insurance. The stock was also lost.

B. C. MAY YET DEVELOP IRON AND STEEL INDUSTRY

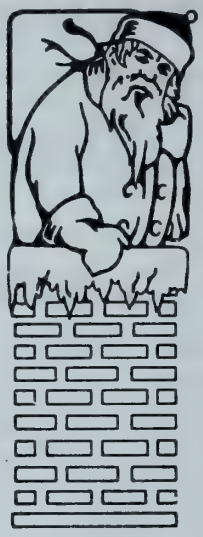
Victoria, B. C.—The establishment of an iron and steel industry in British Columbia is imminent, according to Hon. T. D. Pattullo, Minister of Lands, who said a representative of some British interests of thorough reliability was en route to Victoria to discuss the matter. Proposals were to be submitted to the Government in this regard.

IMPORTS OF ROSIN & TURPENTINE

Rosin to the extent of 6,737 barrels valued at $35,044 was imported to Canada from U. S. in September. Turpentine amounting to 70,187 gals. valued at $40,588 was imported in the same month.

Oils And Grease For Cold Weather

Rather novel was the recent display of the Capital Hardware and Sporting Goods Co., Regina, as arranged by Mr. Darke, showing an arrangement of oils and greases specially designed for cold weather work. A feature was a transmission taken from an old automobile, and driven by an electric motor. This was mounted and uncovered, showing gears in action and their lubrication. The gears were just touching, in transmission oil which formed a heavy film or cushion of oil on them. The arrangement of other greases, oil cans, etc., made a well balanced and impressive display which served to emphasize upon motorists the necessity of giving lubrication matters close attention at the change of seasons.



Christmas Window Contest

EIGHT PRIZES are offered by **Hardware and Metal** for the best window displays of Christmas lines, as arranged for this year's trade by hardware merchants or their retail salesmen.

The contest is open to anyone engaged in the retail hardware business in Canada and the displays will be given a fair and authoritative judgment.

The essential point to keep in mind is that the display will be judged on its effectiveness as a business puller. Many points outlined in past contests of Hardware and Metal as to most effective window trims, should be kept in mind in arranging the contest display. Attractiveness without effectiveness is of little use in a window trim.

Arrange a window which will, literally, draw the passers-by right into your store, then send a photo of it to be entered in the contest.

THE EIGHT CASH PRIZES

Places under 5,000		Places 5,000 and Over	
First prize	$10.00	First prize	$10.00
Second prize	5.00	Second prize	5.00
Third prize	3.00	Third prize	3.00
Fourth prize	2.00	Fourth prize	2.00

Dealers in small communities have just as much chance under this arrangement as those in larger districts. Getting selling ideas into the display is what counts.

The contest closes on Monday, January 2. Photos placed in the mail after that date will not be entered.

All matter must be addressed to The Editor, Hardware and Metal, 143 University Avenue, Toronto, and marked "For Christmas Window Contest."

Don't overlook the prizes and the honor of winning one

Help The Xmas Shopper!

FEW PEOPLE are acquainted with the wide range of gift lines for all members of the family which the hardware store has to offer.

A survey of the stock reveals numerous lines for father, mother, son and daughter, and they are of such a character as to appeal to diversified tastes.

In recent years the tendency has been growing for people to exchange gifts of a more practical value than heretofore. This has been a development of the times wherein everyone has been forced to make their money go further. Here is where the hardware store can "cash in" for it offers a wide range of useful gifts for all members of the family. But the only way to get the business is to advertise and the windows perform a most important function in advertising. Besides helping the Christmas Shopper you can also

Help Yourself

by having a picture taken of your best display and sending it in to the Hardware and Metal Christmas Window Contest, to be judged in comparison with displays dressed by other hardware salesmen in retail stores from all parts of Canada.

You have probably never been afforded an opportunity of seeing how your displays compare with those of other stores. An entry in this contest will allow competent judges to examine your display and probably point out some respects in which its effectiveness might have been increased. Such constructive comment is what every ambitious salesman desires. The benefits are great, the honor of being a prize winner is much to be desired and the benefits to all competitors well repay the attention given it.

The Editor of Hardware and Metal expects an entry from YOU.

Hardware and Metal

Canada's National Hardware Weekly

Member Audit Bureau of Circulations Member Associated Business Papers

The Only Weekly Hardware Paper in Canada

PUBLISHED EVERY SATURDAY SINCE 1868 BY

The MacLean Publishing Company, Limited

Montreal TORONTO Winnipeg

TORONTO, SATURDAY, DECEMBER 3, 1921

AT THE general meeting of the Canadian Credit Men's Trust Association held in Toronto this week, W. E. Coulter, Booth-Coulter Brass Co., Toronto, representing the Ontario Board C. M. A., stated that manufacturers in general were now operating at about 60 per cent. of normal. Replying to a questionnaire, five hundred and three manufacturers in Ontario had stated that present inventories were priced at present replacement values. It was the opinion that from this statement credit men should not be too much concerned when statements of firms showed reduced inventories. Reduction in accounts receivable might well be brought about by more careful placing of credit even more than reduced sales.

The Gasoline Tax

IN DECIDING upon ways of collecting the contemplated tax on gasoline it is to be hoped the Ontario Government will not place the onus upon merchants to collect the amount of the tax at the gasoline pump when making a sale, and make returns. One reason the sales tax was not extended to the retailer was because the Federal Government knew many had not the time or facilities for making an accurate accounting of this tax. Furthermore the average retailer in this country is called upon to devote considerable time to making Federal and municipal tax adjustments and if the provincial governments are now going to step in and place further tax responsibilities upon the merchant, it may prove to be "the straw that breaks the camel's back." The tax on gasoline is said to be a tax on motorists to raise revenue for the improvement of the roads which they use. This may or may not be a good purpose, but if the hardware merchant who sells gasoline is to figure in the matter let it be as a motorist rather than as an already overburdened tax collector for governments.

A Source of Annoyance

IT WOULD have but been natural to have assumed that the Government would have taken some steps before now to have shown definitely what stand it was intended to take in regard to the Marking Regulations to govern imports after December 31. As matters stand it appears as though the Government was fully intending to apply the regulations as they stand, but on the other hand there are several provisions which are practically impossible of execution and there has furthermore been a vacillating tendency on the part of some officials of the Government which has led some importers to imagine that the regulations are ultimately to be abandoned or considerably amended. For these reasons there are many misgivings concerning this legislation and there may be some truth in the opinion held in some quarters that were the Government representatives in Ottawa where they would hear the protests which are being made, instead of being engaged in electioneering in various parts of the country, some action would have been taken before now. Even at that it is rather difficult to imagine why the Government which is seeking re-election does not take steps to restrain the tide of unrest which is gathering as result of the Marking Act legislation. It does not even seem good politics to attempt to force such an unpopular measure upon a large portion of the business community at a time when its sponsors are seeking support from the electors.

White Lead in Paint

CONSIDERABLE interest has been attached to the recommendations of the International Labor Conference at Geneva concerning the use of white lead in paint, and though it would be necessary for the Government to take steps to enforce the plan before it would be effective in Canada, yet the subject is being considered from the viewpoint of possible later developments in regard to domestic paint trade. Even though the recommendation for prohibition has been modified to allow 2 per cent. of lead in paint, this is sufficiently negligible to indicate that the conference has upheld the French attitude of prohibition rather than the British attitude of regulation. French opinion has been such a large factor in the question that it becomes evident that the noticeable lack of lead industries in France and the profusion of zinc oxide industries in that country has had something to do with the subject.

The exercise of care in manufacturing of paint on this continent has greatly curtailed the dangers of lead poisoning from handling this product. This is evident from the fact that labor in Canada and the U. S. is not unfavorable to the use of lead in paint. It is therefore somewhat surprising that the recommendation which has been made should have been supported by Mr. Roy who replaced Sir George Perley as the official Canadian Government representative, particularly when he was aware that the Master Painters' Association of Canada assembled recently in convention, went on record as being unable to do satisfactory work with certain kinds of paint which did not contain lead.

It is very unlikely that such legislation will be enforced in Canada or in a number of other countries because there is no industrial need for any such change such as exists in France, but it will be interesting to watch the effect in that country of the use of zinc oxide or other substitutes for lead.

Wild Statements

MANY wild statements are made in connection with the election campaigns. One charge now commonly heard is to the effect that the Government Merchant Marine of Canada was begun to provide contracts for the steel companies of Canada. Whether or not such was the intention, the facts of the matter show that the steel companies of Canada made very little out of the venture. To commence with, the ship-plates which comprise about three quarters of the steel tonnage of such ships, had to be bought from the United States because there were not then the facilities in Canada for their manufacture on a large scale. A contract was subsequently made with a Maritime steel company to provide plates for five years at a price somewhere near $80 a ton which was being paid to U. S. interests. The Canadian steel plant to secure the order, agreed to spend a large sum of money extending its plate plant. When the market price on plates subsequntly fell, the Government changed the price in the contract and subsequently cancelled it entirely. A statement of claim made by the steel company is now in the Exchequer Court at Ottawa, and it is claimed rather than making any money on the Mercantile Marine venture, considerable money was lost due to making preparations for plate making and later losing the contract.

Events in the Trade

BUSINESS CHANGES

MacRobert and Sons have taken over the Elsom hardware business at Florence, Ont.

Montreal, Madison Hardware Co. is selling out to L. N. & J. E. Noisseaux.

NEW FIRMS

Frank Gingerich and R. B. Waddle contemplate opening a hardware store at Tavistock shortly in the Roth Block.

OBITUARY

James D. Waddell, for 28 years with E. B. Eddy Co., Hull, Que., is dead.

Chas. W. Stockford, hardware merchant, Atwood, Ont., is dead.

Nelson Mitchell, President N. Mitchell & Co., Ltd., Granby, Que., hardware, etc., is dead.

Gordon G. Thomson, of the hardware firm of Morton and Thomson, Halifax, N. S. is dead. Mr. Thomson had been failing since last winter, when fire destroyed the entire Christmas stock of his firm, and worry over the great financial loss caused by the fire, is thought to have brought about a complete breakdown. When the firm of Morton and Cragg was dissolved in 1915, Mr. Thomson joined with W. R. Morton and helped to build up the present business.

PERSONAL

T. F. Shurley, president of the T. F. Shurley Co., Ltd., St. Catharines, will sail early in the year on the Empress of Russia for India, China and Japan. Mr. Shurley expects to be away from six to seven months.

W. P. Buzzek, has recently been appointed to the position of sales manager, with the Ideal Aluminum Products Limited, of Toronto. Mr. Buzzek was formerly associated with the Aluminum Products Co., of the United States, in charge of advertising and sales.

Prior to his departure for Grimsby, Ont., where he recently purchased a hardware business, J. F. Richardson and Mrs. Richardson were honored by their friends in Elora. Col. D. M. Allan at a gathering held at the home of W. O. Mendell presented them with a handsome electric floor lamp and expressed every good wish for their future. W. S. Richardson who is also going to Grimsby with his father was presented with a silver tea service.

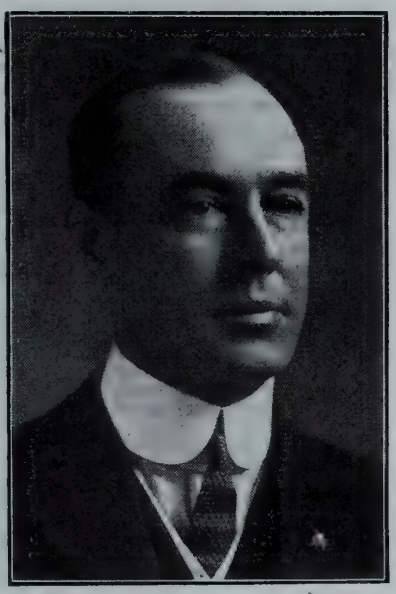
INCORPORATION

R. C. Sturgeon Co., Ltd., has been incorporated in Ontario, with capital of $100,000 and head office in Peterboro, Ont., to manufacture furnaces, stoves, ranges, boilers, pipe, plumbing supplies, etc.

Canadian Electric Floor-Waxer and Polisher Co., Ltd., has been incorporated in Ontario with capital of $100,000 and head office in Toronto to manufacture and deal in floor waxing and polishing machines.

Alliance Brass Co., Ltd., has received Dominion Incorporation with head office in Peterboro, Ont., and capital of $75-000 to manufacture metal goods

Canadian Vatu Drying and Wood Working Co., Ltd., has been incorporated in Ontario with capital of $40,000 and head office in Sault Ste. Marie, to deal in all kinds of wood and manufacture pike poles, pickaxe and shovel handles, pails, boxes, etc.



W. R. STAVERT

For the past twenty-one years associated with Jenkins Bros., Montreal, latterly as sales manager, who has severed his connection with that company and taken over the agency for the Kerr Engine Co., Walkerville, manufacturers of valves, sprinkler equipment, etc., which he will represent in district east of Hamilton including Quebec Province.

RECOVERY FROM FIRE

The E. B. Salyerds, Ltd., manufacturers of hockey sticks at Preston, Ont., report that a new building has been secured, and with the installation of new machinery, this firm expects to again be producing hockey sticks within a short period. The main factory of the Salyerds Co., was destroyed by fire, in October.

BUYS BEAVER STOVE CO.

Montreal—The La Cie de Poeles "Ideals & de Spécialtiès, Ltd.," Grand 'Mère, Que., have purchased the whole assets of the Beaver Stove & Machinery Co., Ltd. This company intends to push the manufacturing of steel and cast iron stoves and ranges, Quebec heaters, camp stoves and general foundry business. M. A. Barel has been appointed general manager of the company.

ACCIDENTAL SHOOTING

Montreal, C. W. Meakins, President of the Meakins Brush Company of this city accidentally shot himself dead on Thursday. Deceased was sixty-two years of age and was a cousin to W. G. Meakins, President of Meakins & Sons, brush manufacturers, Hamilton, Ont. He was born in Hamilton.

While in the garret of the Craig street office of the company in this city it is supposed that Mr. Meakins pulled a gun towards him while it was lying on a bench, the trigger catching on some obstruction and discharging a bullet which lodged in his breast, death being instantaneous.

STEEL COMPANIES IN MERGER

Reports that a merger of seven or more of the independent U. S. steel companies is contemplated have been confirmed. The proposed consolidation will take in all the leading producers and manufacturers with the exception of the Bethlehem Steel Corporation and the Jones and Laughlin Company of Pittsburg.

The capitalization of the various companies concerned in the proposed consolidation approximates $500,000,000. and the products of the various companies cover almost every branch of the steel and iron industry.

The companies named comprise the Midvale Steel and Ordnance Co., the Republic Iron and Steel Co., Lackawanna Steel Co., Youngstown Sheet and Tube Co., Inland Steel Co., Brier Hill Steel Co., and the Steel and Tube Co., of America.

Reports of a consolidation have been current in the trade for more than a year.

This consolidation, if effected, will be second in importance to the United States Steel Corporation, now the dominant organization in the industry.

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

STEEL FLOOR REGISTERS.

J. L. Demers, general hardware, Thedford Mines, Que.—Kindly give us the names of some manufacturers of steel japanned floor registers.

Answer—The Canada Foundries & Forgings, Limited, Brockville, Ont.; The Happy Thought Foundry Co., Brantford, Ontario; Empire Stove & Furnace Co., Ltd., Owen Sound, Ont.; Tuttle & Bailey Mfg. Company of Canada, Limited, Bridgeburg, Ontario; The McClary Manufacturing Company, Montreal, Que.; The Pease Foundry Co., Ltd., Toronto, Ont.; Clare Brothers & Company Limited, Preston, Ont.

"CROWN HURON" STOVE.

Messrs. R. Chestnut & Sons, Limited, Fredericton, N. B.—Kindly advise us the name of the manufacturer of the Crown Huron Stove.

Answer—This range is manufactured by the Western Foundry Co., of Wingham, Ont., and is sold throughout Canada by the T. Eaton Company.

DEXTER WASHING MACHINES.

Messrs. W. H. James, Gleichen, Alberta.—Would you kindly advise us, if possible, the makers of the Dexter Washing machine.

Answer—This is the product of the Dexter Washing Machine Co., of Fairfield, Iowa, U.S.A.

CATARACT REFINING CO.

The Fraser Hardware Co., Limited, Galt, Ont.—Will you kindly give us the address of the Cataract Refining Co.

Answer—The Cataract Refining Company, No. 1 Sherbourne Street, Toronto, Ont.

McCULLOUGH TUBE SKATES.

Rice Lewis & Son, Limited, Toronto, Ont.—Can you give us the address of the makers of the McCullough Tube Skate.

Answer—The McCullough Tube Skate Company, Portage Ave., Winnipeg, Man.

WEBER CHIMNEYS.

Messrs. Chas. E. Boyd, hardware merchants, Simcoe, Ont.—Can you give us the location of the Weber Chimney Co.

Answer—The Weber Chimney Company, General offices, 1452-56, McCormick building, Chicago, Mich., U.S.A.

HOOVER SUCTION SWEEPERS.

The George Taylor Hardware Limited, Timmins Branch, Ont.—Would you kindly locate for us, the address of the makers of Hoover Suction Sweepers.

Answer—The Hoover Suction Sweeping Company of Canada, Hamilton, Ont.

COAL HANDLING EQUIPMENT.

The Hall Manufacturing Company, Cedar Rapids, Iowa, U.S.A.—We would like to know the name of firms in Canada manufacturing supplies for the retail coal dealer.

Answer—The Manitoba Bridge & Iron Works, Limited, of Winnipeg, Man., are listed as manufacturers of Coal Handling Equipment.

Catalogues and Booklets

Those interested in any of the catalogues described below can procure a copy of the same by writing direct to these firms. Mention that you noticed this in Hardware and Metal

NEW BRUSH CATALOG

Messrs. Meakins & Sons, Limited, of Hamilton, Ont., announce that they have just issued a new catalog describing their many types of paint and household brushes. The book is also well illustrated, with one of the chief features being the lower prices which have recently come into effect. It is the present intention of Meakins & Sons Limited to distribute the catalog in preparation for the Spring campaign of 1922, as the quotations are likely to be effective during that period.

NEW BRIDGEPORT CATALOG

A new and revised 80-page Catalog covering the Bridgeport line of tools and hardware specialties, is now being distributed to the trade. This book is No. 21, issued by the Bridgeport Hardware Manufacturing Corp., of Bridgeport, Conn., and describes such products as nail pullers, box opening tools, crate openers, box scrapers, pliers, cutting nippers, screw drivers, tool sets, coping saws, hack saw frames, ticket punches, and trowels. Many automobile tools are also illustrated, such as valve lifters, tire tools, auto hammers, combination slip joint pliers, adjustable hack saw frames, and side cutting pliers.

NEW STANLEY CATALOG

Stanley Works, New Britain, Conn., represented in Canada by A. MacFarlane & Company, Ltd., Coristine Bldg., Montreal, Que., have issued a 376 page illustrated catalog on wrought hardware. The catalog is conveniently arranged for ready reference for the hardware buyers, is handsomely illustrated and covers a tremendously wide range of goods. In the Foreword their appears a most interesting story in brief of the history of the Company. A list of Stanley finishes is also given with comparative symbols of some other hardware manufacturers. Among a vast amount of practical and useful information is a table of the correct specification of butts for wooden doors and of metal or other doors where the approximate weight can be determined, are given in the table.

RIFLES AND AMMUNITION

Starke-Seybold Limited are distributing among the trade an illustrated booklet, very compact but complete, of rifles, guns, revolvers, pistols, ammunition and sundry supplies in demand for the fall and winter sporting season. List prices and discounts are also quoted, and offers the trade a very useful supplementary catalog for this season of the year.

NEW TUCK CATALOGUE

Tuck & Co., Ltd., London, England, for which Wm. J. Brown, of Montreal, is the Canadian representative, have issued a new catalog. It is well illustrated with half tones on coated stock. It covers their full line of packings, hose, belting, hydraulic ram leathers and rubber goods.

Trade Enquiries

Names and addresses of enquiries can be obtained only by those interested in such lines upon application to Department of Trade and Commerce, Ottawa, Canada. Please quote reference number when requiring addresses.

3532. **Hardware, leather, wood manufactures, etc.**—A London firm maintaining branches in India, Egypt, West Indies, South Africa, etc., would be glad to serve Canadian firms in the capacity of agents and factors, and are interested in hardware, kitchenware, leather, furniture, glassware, fancy goods, sporting goods, toys and wood manufactures and turnery.

3533. **Domestic hardware and woodenware**—A London firm who are buyers of domestic hardware, including enameled and aluminum ware, and also woodenware of all kinds in large quantities, invite close quotations from Canadian firms in a position to fill orders.

3534.—**Food products and wood manufactures.**—A London firm are prepared to act as buyers or agents for Canadian shippers of food products and manufacturers of wood generally.

How About Your Entry?

The Hardware and Metal **CHRISTMAS WINDOW CONTEST** for 1921 is now well under way. Many hardware merchants and retail salesmen are taking part for the honor of being a prize-winner or runner-up in the contest.

Read the details in this issue, then send along your entry.

DO IT NOW.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

LOWER prices on rubber garden hose and some higher quotations on copper products attract special attention on the current hardware markets. One premier change in the upward direction includes copper sheets, tubing and rods, while the continued strength of primary markets in this metal is reflected in an increased demand for copper scrap in various grades, with slightly higher prices resulting. Other scrap materials, such as brass and rubber, also register advanced price levels, the smallest sign of improvement from the recent waste market depression having been sufficient to cause a price reaction. There has also been announced a slight price increase on wrapping paper.

On the other hand, the tendency to lower quotations remains a phase of importance. Reductions are given on certain floor and spring hinge products, both japanned and plated. Lumbering tools and handles are now 35 per cent. off. One make of knife-handled wrenches records a further downward revision. Announcement of some easier prices on a certain grade of roofing has been made by one manufacturer, but this reduction has not yet become general on other makes. Price shading is now evident on No. 2, dry fibre; the standard price on this product having been ignored since the recent recession on other building papers. Other revisions to lower levels appear on sand paper, emery cloth and wood jacket cans.

Due to the variation in prices now evident between the two chief distributing centres in the East, an unusual situation has developed in the soil pipe markets. The wide range in discounts has been even further accentuated this week and this factor is attracting special notice. Some distributors of black and galvanized sheets in Eastern markets now show a slight reduction in prices to levels which have generally prevailed for some time past. Rumors of price shading on the 30-gallon standard range boiler, are again substantiated, although the general desire is to maintain the nominal price list. The suggested freight rate reductions are not generally considered of sufficient extent to affect prices in any noticeable degree.

MONTREAL MARKETS

MONTREAL, December 1.—Numerous price changes again attract attention in the hardware markets this week. Of particular interest is the announcement of a marked reduction in roofing products from one large manufacturer. Other sources are at present holding former quotations unchanged, but the market is decidedly easier, and further developments may be looked for. The easier trend in the steel industry in general is again shown by lower prices on black and American galvanized sheets. Although no marked change has developed in the situation at primary sources, sóme local distributors are reducing their prices, while others are maintaining former levels. A new shoefinder's list is issued to the trade with reductions shown on many lines of shoe rivets and tacks. Floor and heavier spring hinges have new lower prices, while a further revision is announced in Coe's wrenches.

Quotations on rubber lawn hose are now reduced and a new discount revision is given on lumbering tools and handles.

An advance is recorded in prices on copper sheets, this developing from the strength of copper in the primary markets. Scrap metals show a general revision, both upward and downward, with the market continuing very dull. Ingot metals have again improved, and different metals are shown this week with advanced quotations.

PRICE DECLINE ON LUMBERING TOOLS AND HANDLES

Montreal.

Lumbering tools and handles are now quoted at 35 per cent. off list, according to a current announcement. This is another substantial decline to be added to the remarkable list of price revisions to a lower level which have occurerd during the present year in hardware commodities.

COE'S KNIFE HANDLED WRENCHES NOW 20% OFF

A further revision is made in the quotations of Coe's knife handled wrenches, and these are now quoted at less 20 per cent. A reduction in these was announced only last week, but the present decline is made to compare with quotations on the Canadian makes.

LOWER PRICES ANNOUNCED ON GARDEN HOSE

Montreal.

Revised lower prices on garden hose are announced as effective immediately. The extent of the decline varies approximately between 8 and 10 per cent. on the different grades of lawn hose; while a special feature in connection with the reduction is the fact that the limit for securing advantage of the discount for early placing of orders covering spring requirements has been extended to December 31. The new price levels are also guaranteed against manufacturers' decline until May 31, 1922. Following are the revised quotations on the Dunlop makes of hose:—

GARDEN HOSE—	
Corrugated and 12-sided:	
½ inch, per 100 feet	$ 13 25
⅝ inch, per 100 feet	15 25
¾ inch, per 100 feet	18 00
Banner Sheeting Hose:	
½ inch x 3 ply	$ 9 50
½ inch x 4 ply	10 50
½ inch x 5 ply	12 00
½ inch x 6 ply	13 50
⅝ inch x 3 ply	11 00
⅝ inch x 4 ply	12 00
⅝ inch x 5 ply	13 60
⅝ inch x 6 ply	15 50
¾ inch x 3 ply	13 00
¾ inch x 4 ply	14 00
¾ inch x 5 ply	15 50
¾ inch x 6 ply	17 50
Ideal Wire Bound:	
½ inch x 4 ply, per 100 ft.	14 00
⅝ inch x 4 ply	16 00
¾ inch x 4 ply	19 00
⅝ inch x 4 ply	16 00

LOWER PRICES ON ROOFING IN SOME QUARTERS

Montreal.

A rather peculiar situation has developed locally in the asphalt roofing industry. Effective December 1st, one large manufacturer announces a decline in prices, approximately 20 per cent. on roofing in rolls, shingles showing a minor reduction because of these now being considered proportionately low. With this price development appearing, other manufacturers announce that their prices are being maintained, and although a revision is altogether probable within the near future, there is no definite indication at present of a change.

The initiative would seem to have been left to the manufacturer announcing the decreased levels, who states that coming at a time when the present season's business is now over, the removing of the obstacle of high prices for the ensuing year should act as a stimulus, and booking will commence during the present month. It is also maintained that raw materials do not warrant such a marked reduction, but in the hope of reaching the bottom level at this time, buyers can be given the assurance of a steady market for some time, probably all through 1922.

During the past 12 months two previous reductions were announced in roofing quotations, following the trend of raw materials, but owing to limited production full advantage of the easier market could not be taken. By reducing prices to within reasonable reach of pre-war levels, which it is claimed leaves little or no profit for the manufacturer, the increased production will be forthcoming.

Although a general lowering in the prices of roofing products cannot be announced at the present time, future developments will be watched with interest; as undoubtedly the market is following an easier tendency.

SHOEFINDER'S TACKS ON NEW LIST

Montreal

A new list of shoefinder's tacks has included in last week's issue, has now been issued, and lower quotations are given on cobbler's rivets, heel or shoe nails, hob and hungarian nails, channel nails, tacks and shoe tacks. This makes the second new list in as many months.

COPPER SHEETS ARE ADVANCED IN PRICE

Copper on the primary markets continues to improve with higher quotations now given. This has reflected in sheets, while rods and tubing are for the present unchanged. Both plain and plain tinned sheets are marked two cents per pound base higher. With the strength continuing in this metal, further changes in prices of the finished products will again follow. Brass goods remain unchanged with following prices being present levels:

	Base.
BRASS—	
Sheets, base	0 25
Rods, base ½ to 1 in., round	0 23
Tubing, seamless, base	0 32
F. o. b. Montreal.	
COPPER—	
Rods, ½ to 2 in.	0 30
Soft sheets, plain, 16 oz. and heavier	0 34
Plain tinned, 16 oz. and heavier	0 39
Polished and tinned, 16 oz. and heavier, lb.	0 43
Tubing, lb.	0 34
Above prices are full sheets and bars. Cut sheets and bars are 5c per lb. higher.	

REVISIONS IN WASTE MATERIALS

Montreal.

Revisions, both upwards and downwards, are recorded in the market of waste materials. Outside markets, which control the local situation, have also shown recent fluctuations but ultimately no change has resulted. Quotations are still very nominal, but an easier tendency has again developed in the market as a whole. With the exception of machinery cast prices show a varying reduction. The revision on non-ferrous scrap is slight, while malleables are reduced from $10.50 to $8.00 per gross ton, pipe scrap from $7.00 to $6.00. The market is generally in a quiet stage, consumers stating they are out of the market for the present but would be interested at a little later date. This lends encouragement and increased activity is looked for after the turn of the year. Nominal quotations are the following:

Automobile tires		0 75
Rubber shoes		0 03
Yellow brass		0 04½
Red brass		**0.08½**
Light brass		0 03
Scrap zinc	0 03	0 03¼
Lead, heavy		0 04¼
Lead, tea		0 02½
Light copper		0 07½
Heavy copper		0 10
Wrought iron, R. Rd., No. 1 per gr. ton		10 50
Malleable scrap (ton)		8 00
Pipe scrap (ton)		6 50
Heavy melting steel	7 50	8 00
No. 2 busheling,		**4 00**
Boiler plate		8 00
No. 1 machinery cast		21 50

BLACK AND GALVANIZED SHEETS SHOW SLIGHT REDUCTIONS

Montreal.

The easier tendency in the sheet market is again responsible for slightly lower prices in some quarters. Other jobbing houses are maintaining former levels, and generally quotations are nominal. Black sheets are revised from 20 to 35 cents per 100-lbs. lower, while the American galvanized sheets show a decline of a minor nature, approximating 10 cents per 100 lbs.

There is now the seasonable dullness on both the domestic and outside markets, with little change reported in primary sources. With a quiet month ahead, the mills will not, in all probability, contemplate any development until after the turn of the year. Certain indications point to brisker trade in the opening months of the year and it is thought that a firmer tone and higher prices will accompany any increased activity. Nominal quotations are as follows:

BLACK SHEETS

10 gauge	4 00	4 65
12 gauge	4 40	4 75
14 gauge	4 40	4 85
16 gauge	4 50	4 95
18-20 gauge	4 55	5 20
22-24 gauge	4 60	5 35
26 gauge	4 65	5 40
28 gauge	4 75	5 50

Sheets 3 in. wide, 20 cents per 100 lbs. extra.

FAIR DEMAND FOR FITTINGS

Montreal

Current demands for pipe fittings continue of fair proportion, one jobber stating it was surprising the call for the various kinds. Orders are small, but fairly numerous considering the advanced season. No further change is made in quotations since the reduction in Dart unions two weeks ago.

FITTINGS—		
Cast Iron fittings		20%
Bushings, cast		27½%
Do., malleable		25%
Flanges		37%
Plugs		27½%

Class C	0 14	0 21½

LEAD PRODUCTS CONTINUE FIRM

Toronto

The continued gains of metals on the primary markets holds attention to the situation of the finished lead and zinc products, but up to the present no revision is made in quotations. Tin, copper and lead are all advanced on the ingot markets and it would seem only a question of a short time until this is reflected on lead products. Sales are seas-

onably small although in the past week dealers state that business has shown a slight improvement. This is only considered temporary as the closing month of the year usually pronounces a quiet period. Following are unchanged prices:

LEAD AND ZINC PRODUCTS

Lead pipe, per 100 lbs.	12 50
Lead waste, per 100 lbs.	13 50
Note—Lead pipe is subject to a discount of 10 per cent.	
Lead traps and bends	10% off
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10½
Lead sheets, 3 to 3* lbs., sq. ft., lb.	$ 10¼
Do., 4 to 8 lbs., sq. ft.	0 09½
Cut sheets ¼c lb. extra, and cut sheets to size, ¾c lb. extra.	
Solder, guaranteed, lb.	0 25½
Do., strictly, lb.	0 23½
Do., commercial, lb.	0 20½
Do., wiping, lb.	0 21½
Do., wire, lb.	0 35
Zinc sheets, casks	0 11½
Do., broken lots	0 12

STILL LITTLE UNIFORMITY IN RANGE BOILER PRICES

Montreal.

The 30-gallon range boilers continue to attract attention on the local market. Although there is not the amount of price-shading that prevailed in the earlier fall months on this line, prices are still by no means uniform. There was an improvement noted only a few weeks ago, and it was generally thought the standard list would again be maintained. However, an unsettled condition is again brought in by some jobbing houses quoting lower prices. One local distributor stated that apparently range boilers were being offered as a "lead" to obtain other business in plumbing supplies, and with this being the case an improvement in the situation would be some time in arriving. Business is now quieter and little activity is now expected for the remainder of the year. Following is the standard list of prices:

RANGE BOILERS—	Standard.	Ex.Heavy
30 gallon	9 25	11 75
52 gallon	21 00	26 00
35 gallon	12 00	14 50
40 gallon	14 50	17 00
52 gallon	21 00	26 00
66 gallon	30 00	36 00
82 gallon	37 50	50 00
100 gallon	48 00	58 00
120 gallon	57 00	67 00

NO CHANGE IN BAR IRON AND STEEL

Montreal.

Quotations on the various grades of bar iron and steel are generally maintained, although a quotation of $2.75 on common bar iron appears from one source. This would indicate the easier tone which still prevails in the steel industry as a whole, assisted no doubt by the usual dull period at this season. No change of importance has developed at primary sources, and little further development is anticipated until after the first of the year at least. Considering the small margin of profit that mills are now working on, any increased activity in the opening months of the year is expected to be accompanied by slightly higher prices. The recent adjustment of freight rates while appreciable, is considered not of so extensive proportion as to cause any present development in prices. Following are existing quotations:

Common bar iron, 100 lbs.	2 90
Refined iron	4 40
Irish finish machinery steel	2 95
Mild steel	2 90
Single reeled machinery steel	4 75
Band steel	2 90
Spring steel	4 50
Slighshoe steel	2 90
Tire steel	3 10
Toe calk steel	3 80
Harrow tooth steel, per lb.	3 05
Mining tool steel per lb.	0 22
Black Diamond tool and cast steel, per lb.	0 22

NOTE.—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

FLOOR AND SPRING HINGES ARE REDUCED

Montreal

A reduction of approximately 10 per cent is announced in the prices of floor and heavier spring hinges, both japanned and plated.

INGOT METALS CONTINUE TO GAIN

Montreal.

The market for ingot metals has maintained its firm tone, and prices generally are somewhat higher although it is questionable whether the volume of business in some lines is sufficient to warrant prices that are being quoted. It is possible therefore that with the usual dullness prevailing during December there may be a slight reaction.

TIN.—Tin continues to advance in London and at present there is a decided scarcity of Lamb and Flag quality in primary markets. There are of course ample stocks of Straights quality, but this is not used to any extent here. Local market is firm at 36½ cents.

COPPER.—The New York market continues to advance and London is also somewhat higher. The price of electro now seems at a fairly high price considering the demand is only moderate, but producers seem firm at to-day's figuses. Local market is higher at 18 cents for electro, 17¾ cents for casting.

LEAD.—This metal is evidently well controlled and the market is very firm at present, especially in London where prices are at the highest level in over a year. The American situation is unchanged and the activity appears to be in outside markets. Local price unchanged at 7 cents.

SPELTER.—The American market is dull and there is not likely to be any activity until after the turn of the year. London market is higher, but this has no bearing on prices here at present. Quotations unchanged at 7¾ cents.

ANTIMONY.—Prices on antimony are remaining unchanged both on foreign and domestic markets, although the tone of the market is of an easier tendency. Chinese is quoted at 7 cents, high grade English at 8 cents.

ALUMINUM.—There is no change in aluminum, the market remaining dull and unchanged with price holding at 27 cents.

TORONTO MARKETS

TORONTO, December 1—The trend and development of prices on various hardware commodities continues to remain an absorbing phase of the current market reports. Some higher quotations attract special attention this week, the increases being apparent on copper products generally. These include tubing, rods and sheets, while copper scrap in various grades has attracted attention, with slightly higher prices resulting. Rubber and brass scrap materials also register advanced price levels, this development being attributed to the fact that the waste markets having been in such a depressed state, the smallest sign of improvement in demand, would cause a price reaction. There has also been a slight price increase on Kraft wrapping paper.

On the other hand, garden hose quotations register a decline, while some easier prices have been given on one grade of roofing. The reduction on roofings, however, is not yet general. Price shading is evident on certain grades of building papers, especially No. 2, dry fibre. Other revisions to lower levels appear on certain spring hinge products and also lumbering tools and handles. An unusual situation has developed in the soil pipe markets, due to the variation in prices. The wide range in discounts now evident between the two chief distributing centres in the East have been even further accentuated this week and this market is worthy of special note. Rumors of price shading on the standard range boiler are again substantiated with easier levels being quoted in some quarters. However, the general desire locally, is to maintain the nominal list.

KRAFT WRAPPING PAPER PRICES ADVANCE

Toronto.

Slightly higher prices are announced this week on Kraft wrapping paper. It will be remembered that this product registered several declines during the summer months. The current advance is of ¾ cents per lb. thus bringing quotations to 13 cents.

GARDEN HOSE QUOTATIONS REGISTER DECLINES

Toronto.

Further reductions have been announced in the current quotations on lawn, or garden hose. This change is in keeping with the easier tones which have recently prevailed in the rubber markets generally; and the revisions represent a decline of approximately 8 per cent. New hose prices are as follows:

HOSE, LAWN—	Toronto
Corrugated, ½ inch, 100 ft.	$13 25
Do., ⅝ inch, 100 ft.	15 50
Do., ¾ in., 100 ft.	18 00

Less 5 per cent. for full reels, 500 feet.

SOME EASIER QUOTATIONS GIVEN ON ROOFING

Toronto.

Lower price levels on certain grades of roofings are announced in some quarters, but the decline in this class of products has not yet become general. Whether the reduction will be generally followed by other manufacturers, in the near future, is stated as likely to depend upon the degree of activity which develops in placing early bookings for next season's requirements at the new low levels. In view of these facts, quotations on all grades and makes of roofing are being closely followed.

PRICE SHADING EVIDENT ON NO. 2, DRY SHEATHINGS

Toronto

Unsettled conditions still apparently prevail in the market for building papers and sheathings. In the new range of prices which recently became effective, it was noticeable that some products did not register any official change. Since then, price cutting has developed on some of these lines, more particularly the No. 2, dry fibre, which is nominally quoted at 70 cents per roll. There is now no standard recognition of this price level, and quotations of 65 and even 60 cents are reported to be common. It is suggested that some distributors are selling this product at prices even lower than the above. How long this situation will continue, is difficult to ascertain, but an unsettled condition has been evident in the markets for both sheathings and roofings during the past few weeks.

REVISED PRICES ON CERTAIN SPRING HINGE PRODUCTS

Toronto.

A general adjustment in prices to a lower level is announced by the Chicago Soring Butt Co., on their various lines of hinge products. The changes apply particularly to spring hinges and door springs.

LOWER QUOTATIONS GIVEN ON LUMBERING TOOLS

Toronto.

According to an announcement made this week, lumbering tools and handles will now sell under the revised quotation of 35 per cent off list.

HIGHER PRICES ON COPPER PRODUCTS MATERIALIZE

Toronto.

In conjunction with the strength recently apparent in primary copper circles, and the increased price levels on this metal—both in the ingot and other stages of manufacture also,—the quotations on copper sheets now register the expected advance. These copper products such as rods, tubing and sheets, are generally two cents per lb. higher than formerly, while the price levels on similiar brass products remain unchanged. This situation indicates that the copper markets are recovering from the recent depression, stated one manufacturer, but according to this opinion, in the case of brass there remained fairly large quantities of scrap material still to be absorbed. The new prices are as follows:

BRASS—	
Sheets, base, per lb.	$ 0 22
Rods, base, per lb.	0 20
Tubing, base, per lb.	0 25
COPPER—	
Rods, base, per lb.	0 28
Soft sheets, plain, 16 oz. and heavier, lb.	0 30
Do., plain tinned 16 oz. and heavier, lb.	0 37
Do., polished and tinned 16 oz. and heavier, lb.	0 42
Tubing	0 29

NEW NET LIST PRICES ON AUTOMOBILE TIRES

Toronto.

As announced in last week's issue of Hardware and Metal, lower prices have now become effective on automobile tires. The new net price list, on the Gutta Percha makes of auto covers and tubes, which became effective November 22, is as follows:

AUTOMOBILE TIRES—

Cord Covers and Tubes.

Size.	"Cross" Tread Cord Covers	High Grade Gray Cord Tubes	High Grade Red Cord Tubes
30 x 3½	$2400	$4 00	$4 40
32 x 3½	34 00	4 70	5 15
32 x 4	43 00	6 00	6 60

DOOR KNOB PRICES LOWER

Toronto.

There has been a slight reduction in prices on the porcelain rim and mortice door knobs.

SOIL PIPE MARKETS STILL SHOW VARYING PRICES

Toronto.

While the quotations on soil pipe and fittings are still unchanged on the local markets, the question as to probable future developments is naturally receiving a great deal of attention throughout the trade. One distributor expressed the opinion that if the prevailing low levels are maintained in Montreal for any length of time, such a situation was more or less bound to directly affect the Ontario markets, and future discount changes are looked for. On the other hand, the expectation prevails in some quarters that quotations in eastern centres will again be revised to the previous existing levels, as soon as the current stocks of soil pipe are disposed of at the prevailing discounts. Another viewpoint covered the possibility of these easier price levels being offered on soil pipe and fittings in order to attract other business in similiar commodities. Whether such a condition would meet with much sucecss, cannot be immediately ascertained. However, the current situation provides an extraordinary precedent in the wide range now evident between quotations given on the two chief distributing centres in Eastern Canada. Nominal unchanged discounts on soil pipe and fittings are as follows:

SOIL PIPE—	
2 inch	25%

PRICE SHADING APPEARS ON RANGE BOILERS

Toronto.

To state that the nominal price list on range boilers is apparently again in danger, would indicate that some distributors of these products are quoting prices on the 30-gallon standard size boilers at a lower level than those recently established. Quotations of $8.50 and $8.75 on this size, are reported to have made their appearance in certain quarters, and when this is compared with the nominal price of $9.25, the disturbing elements which developed in the range boiler markets some weeks ago, are again revived The majority of the local distributors, however, are maintaining the nominal list, which is as follows:

RANGE BOILERS—	Standard	Ex. Heavy
30 gallon	$ 9 25	$ 11 75
35 gallon	12 00	14 50
40 gallon	14 50	17 00
52 gallon	21 00	26 00
66 gallon	30 00	36 00
82 gallon	37 50	50 00
100 gallon	48 00	58 00
120 gallon	57 00	67 00
144 gallon	.....	76 00

COPPER SCRAP OFFERINGS ATTRACT INTEREST

Toronto.

While dullness continues to reign in most sections of the scrap material markets, the exception is at present in copper and other similar metals. Scrap rubber is also showing more life, this factor being attributed to the demand from southern markets.

Higher offerings have appeared for copper scrap, and quotations have generally moved up on copper wire, yellow brass, and heavy lead. The iron and steel scrap, continues quiet. Following are the average dealers' nominal quotations for fairly large quantities :

Gross Tons— Scrap Iron		
Heavy melting steel (Hamilton)	9 50	10 00
Borings and turnings	2 50	3 50
Rerolling rails	10 50	11 50
Scrap pipe	6 00	7 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	5 50	6 00
Agricultural malleable	10 00	11 00
Railroad malleable	11 00	12 00
Net tons—		
No. 1 cast	15 00	16 00
Stove plate	11 00	12 00
Grate bars	10 00	11 00
Standard car wheels	13 50	14 00
Scrap Metals.		
Heavy copper and wire	9 50	10 50
Light copper	7 75	8 25
No. 1 composition	8 25	8 75
No. 1 comp. turnings	6 25	6 75
Light brass	3 25	3 75
Heavy yellow brass	5 25	6 00
Heavy lead	3 75	4 00
Tea lead	2 00	2 50
Scrap zinc	3 50	4 00
Scrap Rubber		
Boots and shoes	2 50	3 00
Lumbermen's rubber boots	1 50	2 00
Auto tires	0 50	1 00
Solid tires	0 75	1 25

BAR IRON AND STEEL HOLDING AT RECENT NEW LEVELS

Toronto.

No further changes have been made on bar iron and steel prices since the revision to lower levels announced recently. There are easier tones reported from primary market centres, but the seasonal quietness is now approaching and both inquiries and demand are described as being of a very moderate character. Following are the current quotations:

Mild Steel bars, base	3 00	3 25
Mild steel bands, 3-16 in. base	3 50	3 75
Bar iron, base	3 00	3 25
Angle iron, base	3 10	3 35
Horseshoe iron	3 75	4 10
Tire steel	3 50	3 75
Spring steel	5 50	6 00
Crucible cast sheet steel	30 00	35 00
Mining drill steel		18 50
Cast tool steel, high grade	20 00	23 00
Cast tool steel, medium	30 00	36 00
Sleigh shoe steel	3 00	3 25
Hoop steel	4 50	5 00
Toe caulk iron	4 00	4 50
Norway iron	12 50	15 00

SHADING NOMINAL PRICES ON CANADA PLATES

Toronto.

Some lower prices have appeared on the local markets on Canada plates. This situation is attributed to certain endeavors on the part of some dealers to reduce stocks on hand. A quotation of $5.35 for Canada plates was recorded in one quarter, while the nominal level on the ordinary 52's is $5.60. It is stated, however, that such price cutting was not surprising where stocks may be heavy; and where an attractive inquiry offered a special inducement to lower levels. Following are the nominal prices on these products still prevailing:

PLATES, CANADA—	
Dull 60 sheets	$5 65
Ordinary, 52 sheets	5 60
PLATES, COKE TIN—	
I.C., 20 x 28, 112 sheets	16 00
IX, 20 x 28, 112 sheets	19 00
1X, 20 x 28, 56 sheets	12 00
PLATES, CHARCOAL TIN—	
1X, 20 x 28, 56 sheets	14 00
1XX, 20 x 28, 56 sheets	16 00
PLATES, TERNE—	
1C, 14 x 20, 112 sheets	12 00

SHEET MARKETS NOW LACK THE OCTOBER "SNAP"

Toronto.

While fluctuating conditions prevail on the primary steel markets, the current demand for sheets and plates is naturally of a slightly modified nature. The tone of these products has been well maintained throughout recent weeks having provided the brightest feature of the industry. The difference between the prevailing attitude in the sheet markets, and the strength evident during October was described by one distributor in the statement that "the market lacks snap."

The demand for sheets in primary circles has also undergone a decrease, but the domestic situation is said to be holding fairly well. Following are the average nominal quotations on sheets and plates at present prevailing on the local markets:

BLUE ANNEALED—		
10 gauge, base	4 00	4 50
12 gauge	4 05	4 55
14 gauge	4 10	4 60
16 gauge	4 15	4 65
BLACK—		
18—20 gauge	4 55	5 05
22—24 gauge	4 60	5 10
26 gauge	4 65	5 15
28 gauge	4 75	5 25

Charge of from 25c per 100 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—

	Queen's Head	Fleur-de-lis
28 gauge	9 25	8 75
26 gauge	9 00	8 50
24 gauge	8 40	8 10
22 gauge	8 05	7 65
18 and 20 gauge	7 35	7 50
Premier and Apollo.		
10¾ oz	6 50	7 00
U. S. 28 base	6 10	6 60
U. S. 26	5 80	6 30
22 and 24	5 65	6 15
18 and 20	5 50	6 00
16	5 35	5 85
12 and 14	5 20	5 70

An extra 40c per 100 lbs. is charged for Keystone and Premier brands copper-bearing sheets.

An extra is now charged on galvanized sheets, 10 3-4 oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

FIRM TONE RECORDED IN LEAD AND ZINC GOODS

Toronto

A firm market tone continues to prevail in lead and zinc products, with prices on these lines at present holding unchanged. The various fluctuations recently evident on the primary tin and lead markets have not been of sufficient extent to directly affect prevailing domestic quotations on these products, and the manufactured articles are marking time. Manufacturers and distributors report a fairly brisk demand, with the current volume of business as satisfactory for this season of the year. The quotations follow:

LEAD AND ZINC GOODS—	
Lead pipe, list, per lb.	0 12½
Lead waste pipe, list, per lb.	0 13½
Do., over 3 in., list, per lb.	0 14½
Lead pipe is subjected to a discount of	10%
Lead traps and bends	10%
Lead sheets, 4 to 6 lbs. sq. ft. in rolls, lb.	09½
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, per lb.	0 29
Do., strictly, lb.	0 22
Do., commercial, lb.	0 20
Do., guaranteed, lb.	0 24
Do., wiping, lb.	0 20
Zinc sheets, per lb.	0 13

VACUUM SWEEPERS AND ELECTRIC IRONS IN SEASONAL SALE

Toronto.

Current reports from dealers indicate that vacuum sweepers are enjoying a good Christmas demand. Many merchants are meeting with fair success by including these products among the foremost of seasonable suggestions.

Another Christmas line at present showing marked activity is electric irons and toasters. Wholesalers record these lines among the many winter goods with an increase in the volume of sales.

TOY MARKETS REGISTER EARLY ACTIVITY

Toronto

The primary toy markets are now fairly active. Stocks generally, both wholesaler and retailer, are now in good shape, and prepared for an active season. Early Christmas shopping is being advocated, and exhibitions of toys attract prompt attention. Many dealers report a fair proportion of sales, and generally anticipate a brisk volume of activity in toys and specialties.

BRISK SEASON FOR MANY SPORTING SUPPLIES

Toronto.

Sporting goods are attracting marked attention at this season of the year; this activity being accentuated by the advent of winter, coupled with the approach of the Christmas season. Hockey outfits, particularly sticks and skates, are in strong demand. Indoor gymnasium supplies such as shoes, nets, volley and basket balls, boxing gloves, and indoor baseball goods, all share in this movement.

BRISK DEMAND FOR TWINES; ROPE MOVEMENT SLOW

Toronto.

Twines continue to be in fairly good demand, with prices holding at recently revised levels. On the other hand, the current rope movement is described as slow, which is usual at this time of the year. Stocks are said to be fair, with rope and cordage quotations unchanged.

BRISK MOVEMENT STILL NOTED IN STOVE ACCESSORIES

Toronto.

Stoves, furnaces, stove pipes, elbows, and other stove accessories continue to enjoy good sales during the seasonal movement in these products. Prices are at present holding unchanged.

LONDON MARKETS

LONDON, December 1.—Price changes on the current hardware markets cover many lines of Disston saws; knife handled wrenches; agricultural wrenches; sand paper, and emery cloth. There is also another new list on shoefinder's tacks, while wood jacketed cans are quoted at slightly lower levels. Splitting wedges also have reduced quotations this week.

Business is reported to be steadily good again, with a seasonable increasing demand for Christmas lines. The mild weather has somewhat retarded the sale of cold weather goods, but winter commodities are registering a fair movement, and the total volume of trade is looked upon as generally satisfactory.

MANY LINES DISSTON SAWS RECORD EASIER PRICES

London, Ont.

Among the price reductions announced this week, is a decline on the Henry Disston line of saws. The reduction recorded on these products is of varying extent on the separate lines, being as high as 10 per cent. on tenon saws; with a variation on other grades between 5 and 10 per cent., such as compass saws; and a change of around 5 per cent. only on hand, rip, panel, and butcher saws.

Following are some of the new prices on popular lines:—

DISSTON SAWS—
No. 8 Hand Saws—18 in., $30.25 doz.; 20 in., $33.30; 22 in., $3585; 24 in., $38.40; 26 in., $40.35.
Back Saws—No. 4 x 10 in., $25.30 doz.; 12 in., $28.60 doz.; 14 in., $32.40; 16 in., $35.85.
Compass Saws—No. 4 x 12 in., $7.65 doz.; 14 in., $7.90.
Brick Trowels—No. 5 x 10½ in., $19.60 doz.; 11 in., $20.65; 11½ in., $21.40. No. 10, $21.40; 11 in., $22.35; 11½ in., $23.35.
Plastering Trowels—No. 21, 11 in., $23 doz.; 11½ in., $24. 25; 12 in., $25.60. No. 121, 11 in., $23; 11½ in., $24.25; 12 in., $25.60.

KNIFE HANDLED WRENCHES ALSO LOWER IN PRICE

London, Ont.

A reduction has also been made in knife-handled wrenches, and the new prices represent a decline of approximately 20 per cent. Following are new quotations:

KNIFE HANDLED WRENCHES—6 in., $10.50 doz.; 8 in., $12.60; 10 in., $15.40; 12 in., $19.60; 15 in., $26.50; 18 in., $33.50; 21 in., $40.50.

REVISED DISCOUNT ON AGRICULTURAL WRENCHES

London, Ont.

Agricultural wrenches are again lowered in price through a revision in discounts. The new quotation is list less 50 per cent., and following are some of the new net prices on this line. They are in the neighborhood of 20 per cent. lower than former prices:

AGRICULTURAL WRENCHES—6 in., $5.00 doz.; 8 in., $6; 10 in., $7; 12 in., $9; 15 in., $12.

ANOTHER NEW LIST ON SHOEFINDER'S TACKS

London, Ont.

Another new list on shoefinder's tacks has now been issued. This further revision gives lower quotations on various lines such as brass wire rivets. heel or shoe nails; hob and hungarian nails; channel nails and also shoe tacks. The recent list which was issued in October is naturally superseded.

WOOD JACKETED CANS AT SLIGHTLY EASIER PRICES

London, Ont.

The wood jacketed cans are quoted a little lower in price this week, and the revised range of quotations are as follows: 2-gallon size, 75c. each: and the 5-gallon size, at $1. each.

SAND PAPER AND EMERY CLOTH PRICES LOWER

London, Ont.

A reduction of approximately 5 per cent., has been announced in prices on sand papers, and also emery cloth. The new quotation on sand paper is list less 5 per cent., compared with the previous quotation of net list: while the emery cloth discount is changed from list plus 33-1/3 per cent., to list plus 25 per cent. The current sale for these products continues to be of a fairly satisfactory nature for this season.

SPLITTING WEDGES HAVE REDUCED QUOTATIONS

London, Ont.

Splitting wedges are slightly lower in price this season, for both the Common and Truckee patterns. The Canadian make is quoted at 16½ cents per lb.

SHOE CAULKS IN DEMAND DUE TO ICY ROADS

London, Ont.

Many dealers report that the icy conditions of roads during the past few days has stimulated the sale of Neverslip shoe caulks. Prices are holding unchanged on this line. with the following quotations prevailing:

SHOE CAULKS—No. 1 and No. 4 x 5-16 inch, $3.10 per 100; ⅜ inch, $3.10; 7-16 inch, $3.30; ½ inch, $3.30; 9-16 inch, $3.50; ⅝ inch, $3.50.

COMBINATION STORM DOORS IN FAIR DEMAND

London, Ont.

The combination line of storm and screen doors are proving popular, at this season, and a good demand for these products is recorded. Quotations on the Sanderson-Harold make, No. 80, continue at the recent revision of $64. per doz.

ELECTRICAL APPLIANCES ENJOY SEASONAL SALE

London, Ont.

Dealers report a good seasonal sale for electrical appliances at present, including such products as electric irons, heaters, toasters, and grills. The quotation on the Canadian Beauty line of irons and toasters remains at list, less 27 1-2 per cent. While the Majestic heater prices are as follows: No. 7, $11.00 each: No. 8, $16.00 each, both quotations are less 27 1-2 per cent.

KIDDIE KARS RECORD GOOD CHRISTMAS DEMAND

London, Ont.

Among the numerous Christmas toys enjoying a good seasonable movement, are Kiddie Kars. Dealers report a good sale for these products at present. Quotations remain unchanged as follows; No. 3, $1.75 each; No. 4, $2.08 each.

BRISK SEASONAL MOVEMENT IN WEATHER STRIP

London, Ont.

The current sale of weather strip continues good, and prices remain unchanged. This seasonable line is recording a fairly brisk movement at present. The quotations on the Frost King, are $5.00 per dozen packages: while wood and felt, remain at 45 per cent. off list.

MERCHANTS READY FOR ICE SKATING SEASON

London, Ont.

Sorting orders for skates are reported as very good during the past week, as many merchants are now getting their stocks into shape in preparation for the approaching skating season. Prices are holding unchanged; the quotation on the Starr line remaining at list less 30 per cent. Bobs sidewalk skates are priced at 47 cents per pair.

TURPENTINE QUOTATIONS NOW STEADY: DEMAND FAIR

London, Ont.

The quotations on turpentine remain unchanged this week, with the market tone firm and the strength in primary circles remaining in fair evidence. The current demand is only fair. and the following quotations prevail:

TURPENTINE—	Imp. Gal.
1 barrel lots	1 25
2 and 4 barrel lots	1 24
5 gallon lots	1 40

LINSEED OIL SALES IN SMALL QUANTITIES

London, Ont.

Linseed oil quotations still hold unchanged on the local markets, with present sales only in small quantities The prevailing price levels on both raw and boiled are as follows:

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrels, per Imp. gal.	0 87	0 90
3 to 5 bbls., per Imp. gal.	0 86	0 89
6 to 9 barrels., per Imp. gal.	0 84	0 87

Less barrels add 15 cents gallon.

PUTTY MOVEMENT CONTINUES IN FAIR PROPORTIONS

London, Ont.

A good movement is reported in putty, and quotations continue to remain unchanged at recent levels. Following are prevailing prices:

PUTTY—	
Standards, 100-lb. drums, per 100 lbs.	6 30
Standard. 25 lbs., per 100 lbs.	6 55
Pure, 100 lb. drums, per 100 lbs.	7 80
Do., 25 lb drums, per 100 lbs.	8 05

WINNIPEG MARKETS

WINNIPEG, December 1—Some important price changes are recorded this week in the hardware markets. A feature in the revisions provides lower quotations on many lines of galvanized products, such as corrugated sheets, eavestrough, conductor pipe, metallic siding, and shingles. Other reductions appear on rope, genuine crescent wrenches, general purpose wrenches and brass ladder chain.

PRICES ON BRASS LADDER CHAIN SLIGHTLY LOWER

Winnipeg

Prices are slightly lower this week on Brass Ladder Chain. Following are the latest quotations:

BRASS LADDER CHAIN—	
No. 17, per dozen yards	$ 1 30
No. 18, per dozen yards	1 15

WRENCH QUOTATIONS REVISED TO LOWER BASIS

Winnipeg.

New lower prices are quoted this week on general purpose wrenches. Following are the revised prices:

WRENCHES—	
No. 75, per dozen	$ 1 95
No. 76, per dozen	2 50
No. 77, per dozen	3 14
No. 78, per dozen	4 10
No. 79, per dozen	5 40

REDUCED PRICES APPEAR ON SIDING AND SHINGLES

Winnipeg.

A decline of approximately 6% has been announced on metallic siding and metallic shingles. This change is also in accordance with the recent revision in prices on other lines of sheet manufacture. Following are the revised net prices;

SIDING AND SHINGLES—	Per square
Galvanized metallic siding, medium	$ 7 65
Painted metallic siding, medium	5 85
Galvanized metallic shingles, medium	9 00
Painted metallic shingles, medium	6 98

DOWNWARD REVISION IN CORRUGATED SHEETS

Winnipeg.

Another downward revision of prices has been announced on corrugated sheets. This decline is attributed to the easier tone in the markets generally, particularly on galvanized sheets. The new quotations are as follows:

CORRUGATED SHEETS—	Galv.	Painted.
28 ga., per 100 sq. ft.	6 75	5 63
26 ga., per 100 sq. ft.	7 43	6 30

GENUINE CRESCENT WRENCHES SHOW PRICE REDUCTION

Winnipeg.

New lower quotations are now given on the various sizes of genuine crescent wrenches. Following are the net prices in effect.

CRESCENT WRENCHES—	
4 inch, per dozen	$ 9 40
6 inch, per dozen	9 40
8 inch, per dozen	11 60
10 inch, per dozen	14 40
12 inch, per dozen	21 60
15 inch, per dozen	32 50
18 inch, per dozen	46 80

SLIGHTLY LOWER PRICES ON ROPE AND CORDAGE

Winnipeg.

Quotations on rope have been reduced this wek; the extent of the decline however, showing slight variation. Following are the revised price levels:

SISAL—¼ and 5-16, 20½c per lb.; ⅜, 20c; 7-16, ½ and 9-16, 19½c; ⅝, 19c; ¾ and larger, 18½c.

BRITISH MANILA—¼ and 5-16, 22½c per lb.; ⅜, 22c; 7-16, ½ and 9-16, 21½c; ⅝, 21c; ¾ and larger, 20½c.

PURE MANILA—¼ and 5-16, 26½c per lb.; ⅜, 26c; 7-16, ½ and 9-16, 25½c; ⅝, 25c; ¾ and larger, 24½.

SISAL LARIAT—3 x 7-16, 23½c per lb.; 4 x 7-16, 24½c.

MANILA LARIAT—3 x 7-16, 29½c; 4 x 7-16, 30½c.

LATH YARN—18½c per lb.

LOWER QUOTATIONS ON EAVESTROUGH AND PIPE

Winnipeg.

The winter weather has had its effect on the current movement of these lines. Sales are reported as falling off. Prices have been reduced which is in keeping with the easier markets. Following are the revised prices:

EAVESTROUGH—O. G. sq. bead— 8 in., $5.48 per 100 ft.; 10 inch, $6.08; 12 inch, $7.29; 15 inch, $1013.

CONDUCTOR PIPE—Round or corrugated — 2 inch, $6.69 per 100 ft.; 3 inch, $7.70; 4 inch, $9.72; 5 inch, $13.77.

PITTSBURG MARKETS

PITTSBURGH, December 1st.—Despite the allegedly dull steel market in the past six weeks production is fully up to the rate in October, and of course the production is entirely against orders since the mills would not think of stocking any steel. It is a matter of comment in the trade now that there is quite a divergence between the tales that are told of the market being "dull" and the circumstantial evidence of the actual production. One point that helps to explain is that a few weeks ago, when mills were making a drive to fill up so that they could advance their prices, there was some business placed for delivery to the end of the year, and the mills are making shipment of such tonnage now while the buying does not count as present day business.

Rate of Production

The Steel Corporation has been operating at between 50 and 55 per cent in the past three weeks. Some independents are running at approximately this rate, while rates in other cases range down to 40 per cent.. and as for many months past a number of small independents are closed entirely. All told, the steel industry seems to be operating at fully 45 per cent of capacity, or within a couple of points either way of that figure. October showed an average operation of 44 per cent, the highest rate since last February.

At the beginning of October sheet mills showed the highest operating rate among finishing departments, wire mills and pipe mills coming next and being approximately on a level with each other. Since then sheet mill operations have fallen off very considerably while wire mill operations have fallen off a trifle, pipe mill operations have greatly increased, so that the pipe mills are well in the lead of other finishing branches. There has been consistent improvement in demand both for standard pipe and for oil country goods generally, while there has been very fair buying of line pipe. The pipe mills are operating at an average rate of 70 per cent or higher, while sheet mill operations fall somewhat below 70 per cent. and wire production is lighter still. Tin mills are running at between 60 and 65 per cent. Operations at bar, shape, plate and rail mills are decidedly light, but on the whole have improved a trifle in the past few weeks.

Last Friday the American Sheet & Tin Plate Company (Steel Corporation) opened its books for first quarter businnes in sheets, prices being 2.25c for blue annealed sheets, 3.00c for black sheets and 4.00c for galvanized sheets. Prospects are that these prices will hold and the market be stabilized. If the independents cut the prices the Steel Corporation wil experiment with lower and lower prices until it finds a schedule the independents do not cut. A week before the announcement was made that books were open for first quarter business some independents were quoting black sheets at 2.75c, possibly less in a few instances, and galvanized at 3.75c, but the extreme prices were withdrawn, presumably in fear that the corporation would name them for first quarter. The black and galvanized sheet prices are those reached by the advance in September, but the blue annealed is the old price, ruling prior to the September advance, which did not hold. It is needless to remark that the advance attempted in October by some independents, to 2.75c for blue annealed, 3.25c for black and 4.25c for galvanized, turned out a joke. If an advance of a reasonable amount had been attempted there is a bare possibility it would have succeeded.

Prices on standard steel pipe and oil country goods are maintained by Steel Corporation pipe subsidiary and are being cut a trifle by nearly all the independents, though perhaps no more deeply than a few weeks ago. The difference is not enough to draw trade away from the corporation. In line pipe the cutting is very deep, below the regular cost of production, but the mills taking business at the extreme prices probably count upon the increased operation reducing their costs in the aggregate, and thus making up in that manner.

Bars, shapes and plates are a shade easier each week, though there are no regularly quotable declines. There is merely a gradual softening.

Developing Trade In Specialty Lines

Good Margin of Profit on Specialties Should Maintain Revenue in Paint Department in Cold Weather—Selecting Various Specialty Lines for Special Treatment—Stimulating Sales of Stovepipe Enamel—Pre-Christmas Business

THE SEASON for many paint and varnish specialty lines is now in full swing and much of the work which necessitates the use of these lines will be done between now and the Christmas season. Many folks like to brighten up the home for the festive season with its usual homecomings of the various relatives, and there is also much work of a protective nature to be undertaken in and out of doors before the rigors of winter definitely settle upon us.

Bearing out the predictions which have been made, and responding to the stimulating slogans which have been prepared for 1922 paint business, it is likely that next year will see a great volume of paint business possibly greater than has been enjoyed this year. But while it is right to go ahead with plans for 1922 it should not be overlooked that the month of December presents the last month in which to round out a good paint year for 1921 and there are splendid possibilities to be developed in connection with paint business in December. These will be touched upon briefly.

Pride In Home

Firstly, pride in the home encourages the owner to take steps to give it the best possible appearance for the Chirstmas season. Many visitors come at this season of the year and neighbors who at other times may be distant in a social way, flock in, in response to the Christmas urge and interest in Christmas decorations, gifts, etc. Hence the appeal to the pride of the housekeeper will result in considerable pre-Christmas trade in many specialties The use of circular letters to certain well known customers, the use of "ads" and window and store displays can be applied with this idea in mind. The percentage of profit on specialty lines is generally greater than on house paint and staples, and so when the cold weather curtails the sale of the latter there is no reason why profits cannot be maintained in the paint department by stimulating the sale of the specialties.

Stove pipe enamel is a line which comes in for much use at this season of the year. Stove and furnace pipes have but recently been taken from the cellar and pressed into service for another winter. In many cases these pipes will be slightly rusted, or perhaps a new section or two is required and which it is found does not match with the finish on the old pipes. A new coat of enamel must be applied to all such pipes in order to give a uniform appearance. A good opportunity is also presented to sell paint brushes to apply the enamel. It is particularly necessary to have a good brush in order to get the best effect from the application of enamel.

W. A. A. CHOWN

Who, as announced in the last issue of Hardware and Metal, has been elected a director and appointed assistant general manager of Beniamin Moore and Company, Toronto.

Display of Enamel

A store or window display can be arranged to demonstrate effectively the value of stove pipe enamel. A rusted section of pipe can be half painted with enamel to show the contrast. Window cards can then be used to advantage to direct attention to the money which can be saved by renovating pipes and keeping them in shape from season to season. A display of brushes suitable for applying this enamel can be shown in conjunction. A good way of selling these lines is to show a brush with a pint can of the various lines and quote a price on the outfit, mentioning the various uses to which the line can be put. Few people will not be led to ask themselves "What could I refinish with that outfit?" This plan used for selling stovepipe enamel might be supplemented with some information as to the number of feet of ordinary pipe which could be covered with a pint of enamel.

It would pay the hardware merchant to take a certain specialty line such as enamel for stovepipes and make a consistent drive upon its sale for certain days, using window displays, demonstrations, etc. The value of keeping interest in paint products alive during the winter combined with the opportunities for the sale of specialty lines and brushes, and of bringing many customers to the store where they may be influenced by displays of other lines, justifies any such concerted action which may be taken by the merchant.

Other specialty lines will be dealt with similarly in the next and succeeding issues of Hardware and Metal.

SERVICE

CONFIDENCE

FAIR DEALING

Significant Words These!

"Words are like money; there is nothing so useless, unless when in actual use."
—Samuel Butler.

TWO mornings previous to this writing there came to us a few words from The P. Hymmen Company, Limited, one of the largest and most modern Hardware Establishments in Kitchener.

Free from effusiveness, but in the simple, direct, pithy style, characteristic of his manner, Mr. Homer Hymmen, Vice-President, wrote:

"Nothing gives us more satisfaction in the selling than your products. By this I mean to convey the idea that we have such *explicit* confidence in your goods, that when a customer talks paint we immediately get enthusiastic—because we know that we are endeavoring to sell a line that will give him perfect satisfaction. This confidence goes a long way to increase sales. Our customers have repeatedly exalted the performance of 'High Standard' Paint."

Gratefully we make useful Mr. Hymmen's words—which are but the instruments through which he expresses a sentiment—that they may increase in value as they are read.

Not our *claims*, but the other fellow's *experience*, is what you want to know. Not Paints and Advertising, but RESULTS is what you wish to buy.

We appreciate this.

Prohibition Of White Lead In Paint

Memorandum Presented at International Labor Conference at Geneva Concerning Use of White Lead in Paint Was Partisan in the Extreme According to Canadian Manufacturers—Propaganda Favoring White Zinc Has Had Little Effect

Written for Hardware and Metal by R. H. Monk, Vice-President McArthur, Irwin, Ltd., Montreal.

AT THE International Labor Conference, which met at Geneva on October 25th, one of the questions discussed was the prohibition of the use of white lead in paint. The duty of the International Office was to issue to the countries taking part in the Conference a fair presentation of the facts and arguments for and against prohibition, especially as quite a few of the representatives were not conversant with the pros and cons of the subject. The memorandum actually issued can best be described as partisan in the extreme, having the ear marks of haste and inefficiency. It is exactly propaganda designed by parties interested in the rival pigment, zinc oxide. This fact should be borne in mind in considering the outcome of the discussion on this subject at Geneva.

The argument to be presented for the use of white lead may be summarized under the following heads:

(a) As the main source of poisoning is the creation of dust, the choice between White Lead and other pigments is not a choice between a poisonous pigment and a non-poisonous pigment.

Nothing has been more definitely established during the investigation than that the problem of paint poisoning is essentially one of dust. The paramount importance of dust, especially metal dust, is emphasized in all medical literature on the subject.

Dr. Legge, H. M. Medical Inspector of Factories, writes in his report for the year 1918 that "on the practical side little more is to be learned as to how lead poisoning is caused, and it can be taken as axiomatic that all risk lies in the inhalation of dust or fumes. These removed or prevented there would be no lead poisoning."

Going further still, Sir Kenneth Goadby has shown that while lead is a specific poison, zinc products are not innocuous, and when inhaled in the form of dust produce definite changes in the body, their pathological effects and their rate of development being slower and more insidious than for lead. This view is strikingly confirmed by the rapid and continuous decrease of cases of lead poisoning in white lead factories, due to the introduction of regulations to prevent the inhalation of lead dust. In 1899, 388 cases fell to 19 cases in 1919, a decrease of 97½ per cent.

(b) That the volatile constituents of the liquids used in painting are responsible for sickness among painters to a greater degree than the pigments during the application of the paint.

Risk From Volatile Thinners

It has become common knowledge that when painting in confined spaces workers are subject to grave risks from exposure to the vapors from volatile thinners, such as turpentine and its substitutes. These are the constituents of all paint, with a metal base, whether lead or zinc, and as the painter usually stands within 18 inches of the surface to be painted, the toxic effects resulting have a very important bearing upon the statistics of painters' poisoning.

Sir Thos. Oliver in "Disease of Occupation and Vocational Hygiene," says: "The symptoms of severe headache, nausea and sickness developed too soon after exposure to the paint for lead to be their cause. The symptoms must, therefore, be due to the inhalation either of the vapors of turpentine alone, or combined with the emanations from Linseed Oil." Kidney diseases, especially Bright's disease and gout, while common to painters, are almost unknown among workers in White Lead factories, who are directly exposed to the dangers of lead.

(c) That the comparative mortality in the different occupations shows that the death rate for the painters' group is in no way excessive or abnormal; it has been decreasing more rapidly than the total mortality rate and is much lower than the mortality of other groups ordinarily considered to be healthy.

It is not possible for reasons of space to publish many valuable statistics to show that the general health of painters and lead workers compares most favorably with that of other group occupations. It must not be forgotten that the diagnosis of lead poisoning is most difficult and requires special training and experience, and it is irrefutable that very many cases of sickness are wrongly attributed to lead poisoning. If the individual has been a lead worker it is easy, but frequently erroneous, to conclude the symptoms owe their origin to the worker's occupation. A test recently carried out showed that only 38 per cent. of the cases ascribed to lead poisoning were actually due to this cause.

Little Lead Poisoning.

The most striking figures which could be cited are those obtained from the statistics of one of the best known benefit societies which includes among its members all classes of artisans. This gives a comparison of 1651 painters, with 32,033 other workers, with the following results:

	Percentage Claiming Benefit	No. of Days Sickness per member at risk
General Group ..	18	5.8
Painters	11.1	4.1

Only one case of sickness was ascribed to lead poisoning, and three cases to colic among the painters' group.

The death rates among the painters at the time of the last English census were at every age period lower than those of the group "Occupied Males of Industrial Districts."

A general examination of the mortality figures shows that there is every reason to believe that the risk of paint poisoning is not more than an ordinary industrial risk.

The subject of lead poisoning has been investigated by commission of inquiry in a number of European countries. Of these investigations, the general conclusions arrived at in that of Geneva are characteristic. They were as follows:

(1) White Lead as used for painting does not constitute a social danger necessitating a measure so extreme as prohibition.

(2) White Lead is a necessity for which Zinc Oxide is not an all round substitute.

(3) Lead dust may be avoided by the use of White Lead ground in oil, and by preventing scrubbing down or dry pumice-stoning, or burning off of all paint.

(Continued on Page 64)

R. H. MONK

Vice-President McArthur, Irwin Limited, Montreal, who gives Hardware and Metal readers a comprehensive review of the facts concerning the use of white lead in paint, particularly in view of recent labor agitations for its curtailment in paint manufacture.

"If is a matter of great surprise that Mr. Roy the Canadian Trade Commissioner in Paris, supported, at the Geneva Conference, the resolution prohibiting the use of white lead.

"When the Master Painters' Association of Canada assembled in convention this year, at Ottawa, they unanimously passed a resolution placing themselves on record that they could not follow their vocation and do satisfactory work without white lead. This body of men represents the house-painter and decorators of the Dominion of Canada and are the users of white lead. Surely their view should have been supported by Mr. Roy, who, it is known, has not made a particular study of the subject."

—R. H. Monk.

HILLCREST
A GUARANTEE OF QUALITY

Double Use For Xmas Sales

Intensive displays, advertising, and sales are going to make your Christmas sales a very telling, profitable part of your year's business. Well and good, but why not make it do still more for you?

In the aftermath of war many businesses have high-priced stock in which good capital is held an idle prisoner. To release this capital means more money available for the quicker sales of well-bought goods on the present market. Clear your shelves—keep moving. Make room for more Hillcrest sales.

WE ALSO MANUFACTURE:

Hillcrest Colors in Oil; Hillcrest Colors in Distemper; Hillcrest Colors in Japan; Hillcrest Porcelain White Enamel; Hillcrest Ebony Black; Spanish Enamel; Hillcrest Bath Enamel; Hillcrest Motor Car Enamel; Hillcrest Paste Filler; Hillcrest Crack Filler; Pearcy's Pure Prepared Paints; Hillcrest Barn Red Paint; Hillcrest Outside Gloss White; Hillcrest Inside Flat White; Hillcrest Aluminum Paint; Hillcrest Carriage Paint; Hillcrest California Gold Paint; Hillcrest Graphite; Machine Paint Liquid; Hillcrest Orange Shellac; Hillcrest White Shellac; Hillcrest Oil Stain; Hillcrest Varnish Stain; Hillcrest Shingle Stain; Cottage Shingle Stain; Hillcrest Varnishes:—All kinds. Hillcrest Pure Lead; Hillcrest Bronzing Liquid.

Need Goverment Action Re Lead

Without Governmental Support Recommendations of Labor Conference Will Not Be Effective, Says Paint Manufacturer—Desire to Stimulate Zinc Industry at Root of Discussion—Canadian Labor Not Unfavorable

DISCUSSING with Hardware and Metal the recommendations of the International Labor Conference at Geneva concerning the restriction or elimination of white lead from paint, W. S. Fallis, vice-president and managing director of the Sherwin Williams Co., stated:—

"It appears that what the International Labor Conference has done at Geneva is to practically sustain the French case for prohibition, as against the British case for regulation, as these were the two countries which took the lead in presenting these alternatives. It is true that the recommendation for prohibition has been modified to permit the use of 2% of lead in paint for exterior work, but this percentage is so small as to be quite negligible.

"It is not necessary to enter into a discussion as to the respective merits of lead as a paint pigment, or the substitutes which supporters wish to have adopted, because extended investigations have been made in Europe and also in America, and results have been obtained which can be verified by anyone sufficiently interested in the matter. The important part to note is that the action taken by the International Labor Conference is not binding in any country until definite action has been taken upon the Conference's recommendation by the country's Government. In the case of France, and those continental countries where the lead industry is not important, such Governmental action will in all probability be taken. On the other hand, it is extremely improbable that in Great Britain, or in the United States, or in any country where the lead industry is an important one, the Government will confirm the recommendation of the International Labor Conference.

"The supporters of prohibition base their argument upon the poisonous properties of lead, but as a matter of fact, they made use of this argument only because it has been the basis of all previous agitation for prohibition.

"Unquestionably they wish to stimulate the zinc industry, which is an important one in such countries as France and those which lent their support to the case of prohibition.

"The attitude of Labor in general on this side of the Atlantic is not unfavorable towards the use of white lead in paints, and its use in paints has been so safeguarded by careful processes of manufacture that cases of lead poisoning are extremely rare. It is difficult to see why action should be taken by either the Canadian or American Governments unless they are urged thereto by some responsible body of opinion.

"I think this agitation is made in the wrong direction. If the delegates attending this Geneva Conference had passed resolutions requesting Labor to use more white lead as a protector against the climatic conditions, such as temperature changes, rasping winds, excesive heat and moisture which visit their homes continually, carrying on destructive waste night and day, never ceasing, then I would say they had taken some action in protecting their hard earned savings, and taking into consideration the value of white lead, let us hope that it may continue to be with us and in a 100% pure form—J. H. Conover, General Manager Martin Senour Co., Montreal.

No such opinion appears to exist at the present time, and it is therefore, quite unlikely that the recommendation of the Conference will—as far as the paint trade on this continent is concerned—become anything more than an abstract question."

J. H. Conover, general manager, Martin-Senour Co., Montreal, discussed this matter as follows:

"My personal memory and experience, covers a period of twenty-five years of direct contact with lead products, and during the last sixteen years have been associated with a large staff of operators who handle this product in all states of manufacture, from the pig lead to the liquid form, including as well the application through the various services, and I cannot recall one specific case of serious injury to the hundreds of operators who have spent many years in this particular occupation. We sometimes hear of "painter's colic," but this is due more directly to the volatile liquids used in the manufacture of paint products and usually in paints that contain no white lead at all.

"To prohibit the use of white lead, which is the base of all reliable films, would not only cause most serious loss to any country, but the disagreeable fumes would still be with us, and in my opinion, while the fumes are not of a health-wrecking nature, some are very disagreeable to the operator when applying."

Royal Cluxton, manager of The Canada Paint Co. Montreal, points out that the general opinion is that the recommendation as sponsored by France that the pure white lead in oil be limited to 2% of the ingredients of paint for exterior work, and prohibited for interior use, was put forward purely from a selfish standpoint as France produces no white lead whatever but on the other hand enjoys a very substantial Zinc oxide business. The appeal was also said to have been made on the grounds of white lead being injurious to the health. "Moreover, this is an appeal to ignorance as modern medical practice has proved that the white lead and painting industry maintains as high an average of health as any other trade or profession," said Mr. Cluxton.

"This whole proposition has been tabled for six years and even at that time if the Labor Board could succeed in securing favorable consideration from the allied Governments, it would have to have the individual approval of Canadian Government before becoming effective and it is not at all likely that either the Canadian Gavernment or the American Government would approve of any such measure."

Want High Quality in English Cutlery

MONTREAL—"The aim of the English cutlery manufacturers today is to attain the highest possible excellence of quality through superiority of workmanship," said H. Laughton, representing George Butler & Company, Ltd., Cutlery and Electro-plate manufacturers, Sheffield, England, to HARDWARE AND METAL.

According to Mr. Laughton, England had lost much of her standing as a chief exporter of cutlery. and other steel products, during the war years. She was now out to regain her position, and the best way considered was to reach a further standard of quality. At present the body of cutlery was of better quality even than pre-war output, but the finish of the article must be improved. During the war, and even up to the present, the workmanship was handicapped because skilled labor was not as plentiful as before 1914. This would however, soon be overcome.

"We must admit German competition can excel us on the finish of her cutlery, but we find that the body or quality is not there. German goods can be seen on the English market, but not to any extent," replied Mr. Laughton to the question of the re-establishment of German cutlery trade.

The return to normal in England was stated to be gradual. The chief obstacles in the past being labor difficulties. However, the improvement if slow, was described as of a healthy character, offering encouragement even if a good amount of patience was required.

Only 20 Days to Christmas!

Just enough time to bring the Agate Family to the Front. This wonderful little family will make cheerful the homes of your customers.

It just needs your pleasant suggestions of how the scratched and marred furniture or woodwork can be made ready to add extra cheer to the Christmas home-coming.

Remember the profit to you for the happy suggestion.

Don't forget, the jolly Agate Family makes Christmas happiness.

We can make express shipments if you are short.

Weekly Paint Markets

MONTREAL

MONTREAL, December 1.—The firm tone in turpentine continues, while local quotations remain unchanged during the week at $1.15 per gallon. A revision was anticipated before this date, but owing to cheaper supplies being available due to light demand, prices have remained at former quotations. Southern circles report a slight improvement in demand, notwithstanding the recent price advance, and a further gain is expected assisted by a better foreign buying movement. Little change has developed in linseed oil, prices holding and the market very dull at present.

Shellac is unchanged in price, but the undertone of the market is firm owing to the present strength of gum shellac. White lead in oil and putty are seasonably dull with quotations remaining steady. With the season now well advanced for window glass, no shortage of any account will be felt, and dealers' orders that have been delayed in shipments are now being gradually forwarded. Prices remain at Montreal list.

TURPENTINE FIRM BUT PRICES HOLD

Montreal.

The quotation of $1.15 still holds on the local market for turpentine in one barrel lots. The anticipated revision to higher levels did not appear during the week, due undoubtedly to the light demand at present prevailing. Supplies of the cheaper turpentine are yet available, whereas in a more active season these would have been exhausted before now. Although the higher quotations caused a temporary slackening of interest on the part of buyers in Southern markets, an improvement is now reported and prices are well maintained. A revival of foreign buying is also anticipated at a not far distant date. A fair demand in Southern circles continuing will keep the market from declining to any extent, and the fact that little supply will be coming in during the next few months should also assure a fairly steady situation from now until Spring buying.

Local dealers state that while prices should advance in the near future, for the present following are existing quotations:

TURPENTINE—	Imp. gal.
1 barrel	$1 15
2 to 4 barrel lots	1 13
Broken lots	1 25

QUIET PERIOD FOR LINSEED OIL

Montreal.

Current quotations on linseed oil are again holding at previous levels, with the demand of a very moderate character. With the month of December to follow, linseed oil sales are expected to show little improvement until after the turn of the year. Local sales are small and none too numerous, with paint manufacturers apparently well supplied in the meantime. This is only considered a temporary lull, and both the trade and manufacturers of paint and other sundry lines will require supplies, buying usually commencing early in the year.

Much the same situation obtains in outside markets, although a slight recession was made in oil prices earlier in the week, due to lack of demand. Foreign oil is offered in United States markets at a lower figure than the domestic supply, but with little response, buyers apparently feeling the foreign products is not cheaper when quality is considered. Following are local prices:

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrel lots, per gal.	0 83	0 85
3 to 5 barrel lots, per gal.	0 81	0 83
Less barrels, add 10 cents per gallon.		

FIRM TONE IN SHELLAC

Montreal.

Local prices on shellac are holding with a steady to firm undertone. Gum shellac continues very strong in tone, assisted by an active demand at present. Spring bookings of paints, varnishes and specialties generally include fair supples of shellac and distributors are well satisfied with the present movement. Following are general quotations although a slight variation exists among the different supply houses:

SHELLAC—	
Orange shellac, in barels	$4 15
Do., in one gal. jugs	4 50
White, in barrels, or 5 gal. jugs	4 65
Do., in one gal. jugs	5 00

SEASON ADVANCING FOR WINDOW GLASS

Montreal.

There is little change in the local window glass situation to report this week. Prices are unchanged with the tone of the market still rather uncertain. The season is now advanced to the stage where no serious shortage will be felt owing to short shipments from Belgium, and although a delay has been caused in dealer orders, jobbers feel no serious loss of business will be entailed. Distributors of the output from our new home industry state that first arrivals will be required for orders now on hand, and little surplus can be expected from this source this season. Montreal net list will be found on current market pages.

WHITE LEAD AND PUTTY STEADY

Montreal.

White lead in oil and putty are now on a dull market, with the season for the latter now well spent, and little improvement is expected until the usual Spring demand. White lead bookings are fair and compare favorably with last year, in most cases being in advance. Quotations on both products are holding unchanged since the revision in the late summer months.

TORONTO

TORONTO, December.—Turpentine quotations again feature the current paint markets, having recorded a decline of 5 cents per gallon. This change, however, is stated as hardly being a correct indication of basic conditions at present prevailing in this product, but is attributed to the fact that some lower offerings on the domestic markets have practically forced local distributors to meet this competition, and reduce their quotations also. The firm tone still prevails in primary turpentine markets, and while some fluctuations were experienced, they only proved to be of a minor nature, and recovery soon followed.

The linseed oil markets are providing a price feature this week, quotations being lowered three cents. Requirements are described as being of a light nature at this time of the year; and similar conditions apply to the by-products.

With the season for window glass now registering a quieter tone, the fears which were evident in some quarters that a shortage in glass might develop, have now practically subsided. Current requirements are being filled, and while some delay was experienced owing to the lack of an adequate supply in certain sizes, this situation has been relieved through the arrival of Belgian shipments.

The mild weather that has been experienced in local circles, has been capitalized by some merchants in pointing out further opportunities for paint activity. Although late in the season for this

TORONTO PAINT MARKETS

(Continued from page 62)

class of work outdoors, yet the many indications where painting is required, all serve to support the contention that the degree of work in these lines next season should be of a heavy nature. One merchant pointed out a number of warehouses in his vicinity, some of these on the opposite side of the road, which had apparently never been painted since the outbreak of the war. Others, which were not quite so delapidated, had evidently been neglected throughout the past two or three years. With the anticipated revival in trade conditions generally, it is expected that some attention will likely be paid by business houses to such matters.

DEMAND FOR LINSEED OIL OF LIGHT NATURE

Toronto.

With the current demand continuing of a light nature for linseed oil, quotations are lowered 3 cents per gallon this week. The requirements for linseed are indicated by the fact that with English oil being offered on the market at prices below the level quoted on the domestic products, prices on the latter have been reduced from former levels. Some hopes for improvement in the linseed oil situation are generally entertained with the contracting for spring requirements in paint manufacturing circles, while linoleum makers are also stated as contemplating a return to the market. The demand for cake and meal is also very light at present, with indications that this tone is likely to continue. The current quotations on raw and boiled linseed oil are as follows:

LINSEED OIL—		
1 to 2 barrel lots, per gal. ...	0 84	0 87
3 to 4 barel lots, per gal.	0 83	0 86
6 to 9 barrel lots, per gal.	0 81	0 84

Less barrels, add 15 cents per gallon.

LOCAL TURPENTINE PRICES REGISTER DECLINE

Toronto.

A drop of 5 cents per gallon is recorded in turpentine quotations this week; but in announcing this decline, distributors state that this change is not due to any easing of primary costs, but is merely a reflection of certain elements in the domestic markets. It is noticeable that the firm tone in southern turpentine supply centres is being well maintained, and that no price recessions of note have been recorded. Owing to certain lower prices, however, appearing in some markets, jobbers have been practically forced to reduce their current quotations in order to meet this competition. The chief cause for this condition is attributed to one distributor having on hand some stocks of turpentine which were secured prior to the recent advances. When such supplies are exhausted, it is thought probable that quotations will again register an increase, for with local distributors having very little turpentine on hand, the fluctuations apparent in primary markets are more directly reflected. The current demand is described as seasonably light, and the revised price levels are as follows:

TURPENTINE	Imp. gal.
1 barrel lots	$ 1 20
2 to 4 barrel lots	1 19
5 gallon lots	1 35

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $15 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton London, Brantford, Collingwood, Guelph, Windsor, or Montreal, but freight may be equalized from any of these points.

Car load lots of 70 bbls. Price on application.

Less than 1 barrel lots, 15 cents per gallon additional.

NO SERIOUS SHORTAGE IN WINDOW GLASS MARKETS

Stocks of some sizes of window glass are still very scarce on the domestic markets, but current requirements for these products are being covered through the arrival from time to time of further Belgian glass shipments. The prevailing volume of trade in window glass has now reached the height of the seasonal business in this commodity, and brisk activity is generally reported. A strong tendency to relieve any serious shortage in window glass that might have developed is found in the expectation that glass from Canadian manufacturing sources is considered likely to appear on the domestic markets in the near future. The price trend is therefore firm, with quotations unchanged at the net list, to be found on current market quotation pages.

PROHIBITION OF WHITE LEAD IN PAINT

(Continued from page 58)

White Zinc Propaganda

In spite of the propaganda of the manufacturers of White Zinc, practically no impression has been made upon the users of White Lead. Painters have for many years been using white lead for exterior painting, not because they are unfamiliar with the existence of so called substitutes but because they have found that white lead gives them the satisfactory results upon which their trade depends. Moreover, the very extensive and embracing tests carried out in the United States by the paint manufacturers association in locations where climatic conditions have a maximum variation, have given results which demonstrate, without fear of contradiction that in order to produce a satisfactory outside paint not less than 50 per cent. of White Lead must be adopted as a base upon which to construct the pigmentary portion of the paint.

It is to the interest of the master painter to turn out good work, and if substitutes had all the advantages claimed for them by advertisement, they would long ago have superseded White Lead upon their merits. During the war many buildings were painted with substitutes for White Lead. These buildings are now in a deplorable condition and the painted surface is such that it is now difficult to put on a new protective coating.

The agitation in favor of the use of Zinc Oxide, as a paint pigment to replace White Lead is not now just coming into existence. It dates back to the beginning of the nineteenth century. The manufacturers of Zinc Oxide in attempting to assail the very strongly intrenched position of White Lead could not, without reason, claim for their pigment that it was an effective substitute for lead, and, naturally, attacked it on the grounds that White Lead was the cause of disease and mortality among its workers and users. The White Lead manufacturers have every reason to be thankful for all the enquiry it has been the means of bringing into being. We know, as a consequence, more to-day about the properties of the two pigments than we might have known for centuries. More information that is authentic is now available to the paint manufacturers than ever before. The public are benefiting. Paint offering better protection, and giving longer service is purchasable from every reputable manufacturer.

Worker Benefits.

The worker also has benefited. Lead poisoning has practically disappeared from the factories owing to the establishment of more sanitary conditions of labor, and the introduction of regulations to ensure cleanliness. The painter knows that whether he uses lead paints or zinc paints he must adopt careful habits, and those methods of application which safeguard his health.

The result of continuing the agitation cannot be harmful providing that no restraint is put upon the natural process which rejects the false and unfit, and holds to the fittest. If Zinc Oxide is all that is claimed for it, it will be as impossible to prevent its adoption and the final elimination of White Lead, as to keep back the dawning of the morning. Let those who are interested be content with this law of truth. On the other hand, if the interests of certain financial and commercial monopolies are the power behind the interference with the White Lead industry, then the present refusal of the painter to use Zinc Oxide which has persisted for 100 years, in spite of all the propaganda that has been published, will live and continue. We are a free people; the painter is as free as anyone He has, as new materials and methods have been introduced, changed almost all his painting practices, except for exterior painting. If there is reason for so doing then without compulsion he will cast aside White Lead as a worn out thing, but without this reason he will continue to use White Lead wherever his daily bread depends upon the results he produces and the value he gives."

DEPARTMENT OF THE NAVAL SERVICE.

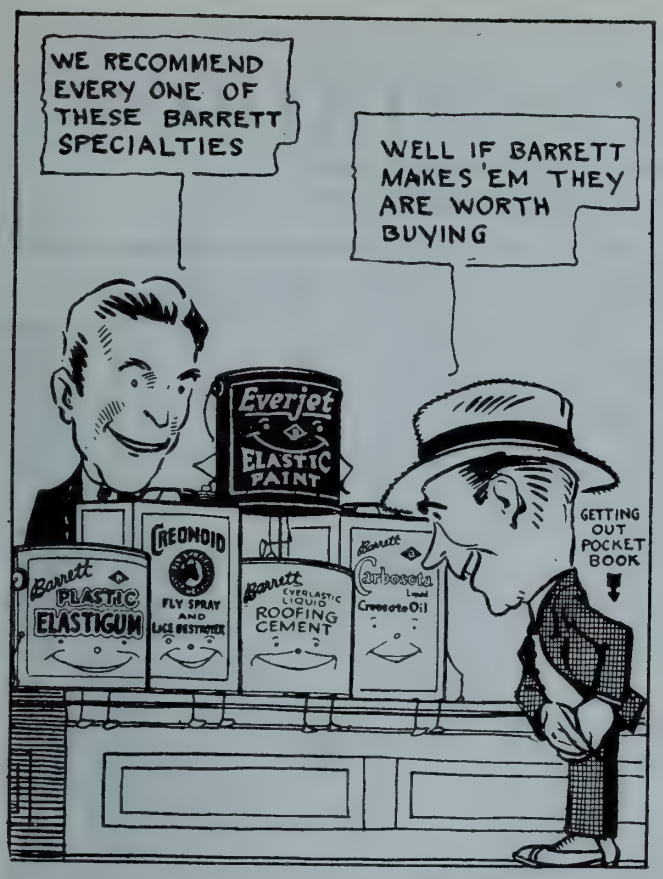
SALE OF PACKING

SEALED tenders addressed to the Undersigned and endorsed on the envelope "Tender for Packing" will be received up to noon of Tuesday the 27th day of December, 1921, for the purchase of the whole or any portion of approximately 25,000 pounds Packing of various sorts, at Halifax Dockyard.

Tender forms and samples, together with particulars as to terms and quantities, may be obtained on application to the Undersigned, or to the Naval Store Officer, H. M. C. Dockyard, Halifax, N. S.

G. J. DESBARATS,
Deputy Minister of the
Naval Service.

Ottawa, Ont., November 25, 1921.



You make the first sale—then the Barrett Specialties bring in the customers and sell themselves

Big nation-wide advertising and a reputation for dependable products have made the name "Barrett" a tremendous selling force. It's like a magnet drawing trade into your store. And when a customer buys the famous Barrett Specialties, he'll find them so far ahead of competitive brands that he'll be sure to tell his friends about them—and come back for more himself.

Our records show that the popularity of these high-grade Barrett Specialties is increasing by leaps and bounds. Lay in a sufficient supply of them—and *your* sales will soon show profits piling up at a rate that will do your heart good.

There is Creonoid, the ever popular fly-oil, lice-destroyer and cow-spray, which makes the farmers' profits greater by ridding livestock and poultry of troublesome flies and lice.

There is Everjet Elastic Carbon Paint—a glossy, black, durable paint, which prevents rust on all outdoor metal work, and prevents corrosion in metal exposed to the action of steam, acids and alkalies. A proven protective paint for every purpose.

And Plastic Elastigum—a "plastic cement of a hundred uses." It repairs leaks in roofs and flashings, re-lines gutters, stuffs cornices—and does a multitude of other things. It is water-proof, plastic and extremely durable.

Old prepared and "rubber" roofs can be made as good as new with Everlastic Liquid Roofing Cement. Easy to apply and dries quickly, closing up the small holes, making the roof waterproof and weather-proof.

Carbosota is a liquid creosote oil used for the preservative treatment of structural timber, by means of Open Tank process or surface treatments. It offers a practical means of reducing losses from wood decay and may be employed by anyone.

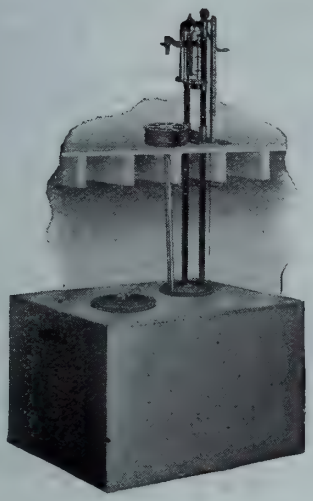
Save That Cent On Every Gallon



Write for Illustrated Booklet C-16

Over a half-million Bowser Kerosene Tanks are in use by merchants throughout North America. The consensus of opinion of these users is that before economizing by the purchase of a Bowser, it cost them at least two cents on every gallon of kerosene they handled.

This cost is made up of interest, depreciation, waste from inaccuracy and spilling and labor.

By reducing the time and eliminating all waste, a Bowser Tank reduces the cost of handling to less than one cent per gallon. The Bowser therefore pays a clear, added profit of one cent per gallon.

Invest in a Bowser and save that cent.

Bowser Equipment is MADE IN CANADA by
S. F. BOWSER CO., Ltd., 1668 Fraser Ave., Toronto, Ont.

BOWSER

PISTON-TYPE MEASURING PUMP

GLASS

Service can only be effectively rendered by co-operation. By anticipating your needs ahead of time—you can depend upon getting your glass on time. If you have an unusual specification you require in the near future, let us get busy for you "RIGHT NOW."

A WORD TO THE WISE

From east to west of Canada, there is a serious shortage of glass. Reports from Europe state that there is only about a 10 per cent. of capacity production. We jealously guard our customer's interest by protecting ourselves well ahead of time, and by receiving your advice as to your requirements—you will be protected accordingly.

The Service that Co-operates, and Costs no More

Ontario Plate Glass, Limited

Hamilton, Ontario.

A Ready Seller

The sale of every pair of skates provides an opportunity to sell, also, a pair of

C·C·M· Perfection Ankle Supports

They will improve the skating of practically every wearer. So designed, that by means of a hinge and sliding attachment the ankle may bend forward or backward, but **cannot bend sideways.**

Now made in the C.C.M. Factory.

Orders mailed now will be filled promptly.

The Test In Zero Weather

The No. 208 Double Needle Torch has wonderful generating power and produces the maximum heat. This with other improved features makes it the most dependable torch for use in extremely cold and windy weather. Burner orifice is automatically cleaned by upper needle, lower needle regulates. Burns gasoline or kerosene by changing the jet block. Impossible to ruin the burner by enlarging the orifice as with other makes having sharp pointed needle. Always reliable. Jobbers supply at factory prices. Send for catalogue now.

TINKER TOM'S TALKS.

No. 341

HURRY-UP ORDERS!

No, we're not a candidate for life-saving medals at all, but in the last few weeks we saved many a tinker's life (for the moment) by shipping real quick

Premier Galvanized Sheets

on his jobber's order.

Unfortunately our stock at times was somewhat "shot," but we certainly made a lot of small hurry-up shipments for friend jobber.

That's what we're here for—it helps you and it serves the jobber and it kept us busy, so keep it up and you'll save money and maybe we'll make some.

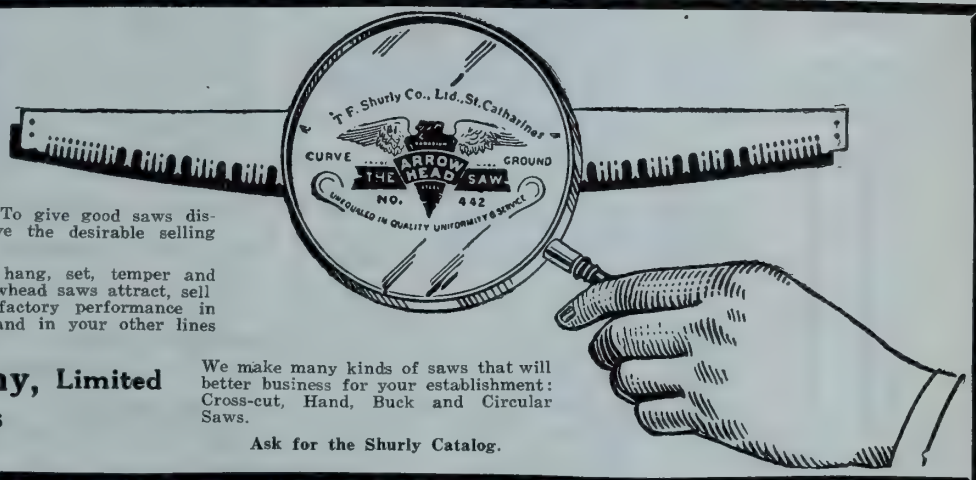
Arrowhead Saws

Vanadium Steel

How you sell saws depends partly on your salesmanship. You can sell a poor saws but once; to sell saws successfully and build yourself a permanent business you must sell good saws. To give good saws distinction and individuality they must have the desirable selling points of superior saws.

Arrowhead saws have those points; the hang, set, temper and finish are right, and they sell right. Arrowhead saws attract, sell and satisfy your customers. Their satisfactory performance in service creates confidence in your store, and in your other lines of goods.



T. F. Shurly Company, Limited
St. Catharines
Ontario

We make many kinds of saws that will better business for your establishment: Cross-cut, Hand, Buck and Circular Saws.

Ask for the Shurly Catalog.

Wa-Ko-Ver Stain
Beautifies All Woodwork

Not only does it beautify, but it wears like iron. You will find it pays in future sales always to recommend Wa-Ko-Ver Stain whenever your customers have worn floors or scratched woodwork to renovate. It restores the freshness of the floors or woodwork, pleases your customers, and makes permanent business for you. The established reputation of this effective, serviceable stain makes it a pleasure to sell. Good displays in your windows, on your counters, or other conspicuous places, remind visitors to your store, and people that would otherwise be "passers-by," of their need for sales-maker will handsome-Wa-Ko-Ver Stain. This ly reward a little sales-effort on your part.

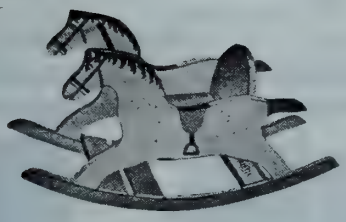
DIAMOND A BRAND ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

Wakyte Toys

For Good Christmas Sales

No. 100 — Is practically unbreakable. The frame, brace and axle made of iron, the steering gear is one solid piece of wood with two wheels in front, making it difficult to upset. Painted with best auto enamel and artistically finished in red and dark green enamel. Length 21½ ins., height of steering gear 18 ins., height of seat 9 ins., three in crate.



No. 103 — Of a very superior quality and finish and cannot be compared with other cheaper rockers. The rockers are made from 1¼ in. kiln dried hardwood. Finish: red, white and black enamel, length 33½ ins., width 13 ins., height 17 ins., three in a crate.

No. 105 — Pony Car; like the Buster Car, this also has an iron frame and axle, making it very durable. It is finished in red, dark green and black enamel, length 18 ins., height of seat 9 ins., three in a crate.

No. 101 — With iron box and legs, finished in dark green and red enamel, length over all, 31 ins., size of box, 14 x 10 x 4 ins., three in a crate.

Good displays and local advertising will boost your Christmas trade.

JOHNSON Ideal HALTER Co. Sarnia, Ont.

—a self-fluxing solder for automotive and general work. Flux and solder are applied in one operation, because the flux is contained inside the hollow wire of solder. In great demand by all solder users because it saves half of the workman's time and gives a strong bond the first time. Comes in convenient packages and spools that are easily stocked. Write for free sample—investigate this easy-to-sell, easy-to-use, easy-to-stock solder.

Kester Rosin-Core Wire Solder is also manufactured for delicate electrical work.

CHICAGO SOLDER COMPANY
4225 Wrightwood Ave. Chicago, U. S.A.

FOR LARGER FAMILIES

Style "C" Super-Service Ash Can

Many of your customers have large families—and when they buy garbage or ash cans, they want ones of good capacity.

To meet this "large family" trade, REED'S Style "C" SUPER-SERVICE Ash and Garbage Can was created.

It's a sturdy can, strongly built of heavy, galvanized steel. The bottom is well set off the ground and two iron bands reinforce it at points of most wear. Non-rusting milk can handles are fitted to this can. All joints are hand riveted and hard soldered —details which ensure extra strength and durability. The cover is close fitting.

Taking it all 'round, "SUPER-SERVICE" Style "C" has many features which will win instant approval, and which will make satisfied customers.

DEALERS!

You cannot afford to be without REED'S "SUPER-SERVICE" LINE. It's made in Canada—this fact alone will save you money on duty, exchange and freight and give you a greater margin of profit.

KEEP CANADA BUSY

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

Perhaps, a different choice of stock—

Will make a change. Maybe things haven't been going just right. Things have been a little slow. Possibly you have been asked to try out some new or obscure lines that haven't "panned out."

Your business is worth every help you can give it by searching for the right goods and co-operation to stimulate trade and keep things moving.

If you have the least doubt about the way things are going with you, try Thos. Birkett & Sons, Co. Limited. We assure you real interest, real service, real live goods and real promptness.

Just a postcard will put you in touch with us. Perhaps a "shuffle and a new deal" is just what you need.

Limit Hack Saws to one Line

Sell one line of hack saws, and you have a smaller investment, a quicker turnover, and larger profits.

The leadership of Star Hack Saws for 38 years makes them the logical brand for you to push.

Every hack saw customer who comes into your store recognizes the saws in the famous green box as the standard blade of highest quality.

Star Saws are sold direct from the factory in Middletown where they have always been manufactured.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

JARDINE TOOLS

TIRE UPSETTER NO. 2. This durable machine has a very quick grip, both the eccentrics being raised and lowered by one lever. It has a strong and sure grip. The eccentrics and jaws are faced with tempered steel. The tire cannot slip.

It is extremely durable, because it is made of heavy castings, strong enough to stand the very heavy work for which it is designed. All the pivot pins are of steel; the eccentric strap is a heavy forging. In fact, the whole machine is well and substantially made throughout.

This machine upsets tires up to four inches wide. We have on hand repair parts to replace those worn out in use on this and other Jardine Tools.

Tire Upsetter No. 2. Ask for Catalogues.

HESPELER, ONT.

FROST KING

Weatherstrip

Saves High Priced Coal

Coal prices are still up, and it pays your customers to stop all the drafts around windows and doors with Frost King Weatherstrip.

Frost King is not "just weatherstrip;" it is an efficient and reliable way to keep out the cold and conserve the warmth of the house. This desirable, quick-selling weatherstrip is made of felt that stops the wind and is extremely durable and neat.

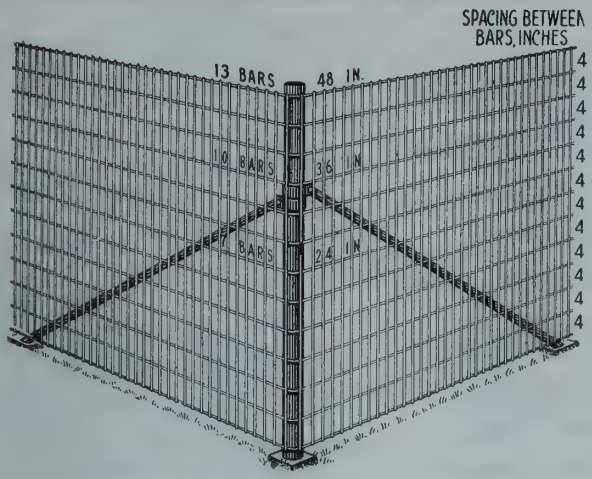
This Fence Sells Itself



Electric Weld Fencing

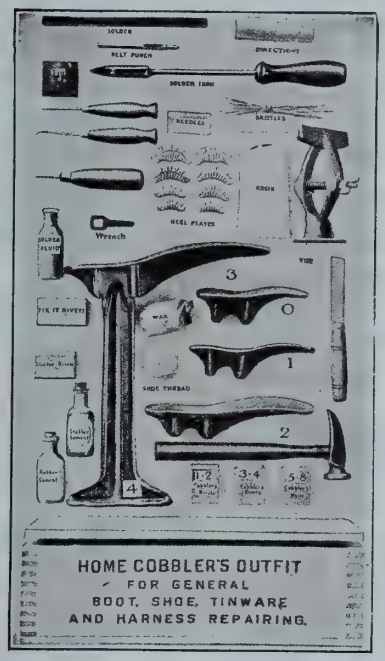
This fencing carries a guarantee that wires will not separate, the weld will hold, and the welding does not injure wires. Used extensively for Stall Guards, instead of wood, for enclosing gardens, orchards, for grape arbors, tree and window guards, tennis courts, etc. Ideal for partitions in stock rooms, factories and warehouses.

Keep it in stock—A Dandy, Easy Seller.

Made of No. 11 wire, 1⅞ inches between stays, 24, 36, 48 inches high. **Write for Prices and Terms to Dealers.**

A. R. Lundy 572 King St. W. Toronto

"ECONOMIZERS"



There are always some lines that sell better in quiet times. Analyze what these products are, and you'll invariably find they come under the category of "Economizers."

The line illustrated is particularly adaptable to the conditions of to-day. You will find a lively demand for this Outfit, because it means such a saving in footwear and footwear repairs—tinware and harness repairing. "Preferred Position" for this set in your Store and a "punch" from yourself will prove a fine investment.

TRADE A&M MARK

Roofing and Building Papers That Continually Boost Your Store

Building Papers, Tarred Felt, Sheathings and Tar Products, and Wrapping Paper of all kinds that give service in use, reflecting credit on the dealer and inspiring confidence in all the lines he sells—that's the McArthur line.

Drop us a line for an interesting little booklet on Roofing Materials. It will tell you of each one of our lines—reasons why they sell, and serve the consumer so that you hold his future trade.

We cannot tell of all the lines here, but, for instance, "Black Diamond" Tarred Felt is pure wool tarred roofing felt, from selected woollen rags saturated with pure coal tar, producing the most durable roofing felt possible to make.

Toronto.

Real Profit in Canadian Veneer Chair and Toilet Seats

We are talking about real, tangible profit that comes in particularly freely in the Fall months because there is a little extra demand now.

These splendid, three-ply veneer seats are made in a pleasing variety of patterns, carefully shaped, corners rounded, and fastened with genuine water-proof cement. They will not warp, curl, crack or come apart.

Everlasting 7- and 11-Ply Toilet Seats

These are expertly joined in 7 and 11-ply veneer. They cannot come apart and will outlast any other seat on the market.

Write to-day and let the extra profit come to you as soon as possible.

Canadian Veneering Company, Incorporated

ACTON VALE, QUE.

"OAKEY'S" WELLINGTON KNIFE POLISH

The original and only reliable preparation for Cleaning and Polishing Cutlery, etc.

John Oakey & Sons, Ltd.

Manufacturers of

Emery, Black Lead, Emery Glass and Flint Cloths and Papers, etc.

Wellington Mills, London, S.E.I. Eng.

Agents:

John R. Anderson, 36-38 St. Dizier Street, Montreal, Que., Sturgeons, Ltd., 64-66 Richmond Street East, Toronto; Frank Manley, 290 McDermott Ave West, Winnipeg; Sankey & Manson, 839 Beatty Street, Vancouver, B. C.

It Saves:

Money, Time, Trouble, Coal, Clothes, Annoyance, Dust, Fuss, and Dirt!

The Samuels Dustless Ash Sifter far more than pays for itself! It's a good investment that quickly pays for itself and then pays dividends in coal, time, money and clothing saved. It does its work efficiently and promptly. All the dust stays in the barrel. It can be kept right in the house.

There's money in a Samuels Agency. Write today for particulars.

WANT ADS

If you want a buyer, clerk, salesman, traveler, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An one word. When panels are desired a charge of $2.20 is made for a panel 1 inch deep by 2⅛ inches wide. additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

FOR SALE

FOR SALE—HARDWARE BUSINESS IN GOOD Western Ontario town. Stock from five to six thousand. This is a good, progressive town. Apply to Box 111, Hardware and Metal

SITUATIONS WANTED

TWO AND A HALF YEAR RETAIL SALESman open for engagement immediately. Not afraid of work. Best references. Wages sixteen dollars per week. Box 18, Hardware and Metal.

EXPERIENCED HARDWARE SALESMAN wants two or three popular priced every-day selling lines on commission. Calling hardware and grocery stores. For all Ontario territory north and east of Toronto. Beginning in January. First-class references. State terms, etc. Box 37, Hardware & Metal.

HARDWARE CLERK FULLY EXPERIENCED in all lines of retail hardware business is looking for a steady position in a good town or small city. Box 33, Hardware & Metal.

YOUNG MAN WITH OVER FIFTEEN YEARS' experience in retail hardware and kindred lines, reliable, energetic, desires a position on the road. Open for engagement January first. Box 17, Hardware & Metal.

ATTENTION BROKERS AND MFG'S AGENTS: Stenographer with considerable experience, would like charge of clerical work whether to be done at their office or at her own. Apply Box 162, Hardware & Metal.

MISCELLANEOUS

NICKEL PLATING—ORDERS EXECUTED promptly. Prices on application. Communicate with F. W. Higginson, 173 William St., Montreal. Telephone Main 8144.

Quick Results

If you want to buy or sell a business, dispose of overstocks, hire a clerk or manager, use the "Wanted" page of HARDWARE AND METAL. There is no other way in which you can get in touch, more quickly or thoroughly with the best prospects, than by using the "Wanted" page of HARDWARE AND METAL. Cost is only two cents per word, with 10c additional for Box Number.

HARDWARE AND METAL is the logical medium to use if you have a message for the Canadian hardware trade.

HELP WANTED

WANTED — EXPERIENCED HARDWARE Clerk, for town in Eastern Canada. Good salary and permanent position for suitable man. State clearly in first letter age, experience, whom worked for, salary wanted, and when ready to take up position if application is accepted. Apply to Box 44 Hardware & Metal.

WANTED FOR WEST — FIRST-CLASS sporting goods man; to look after district club business; must be a keen salesman and good mixer. State experience, age and salary required. Box 51, Hardware and Metal.

AGENTS WANTED

A FIRM OF SUCCESSFUL HARDWARE brokers with offices in Vancouver, B.C., and Calgary, Alta., having adequate warehouse and selling facilities open to represent manufacturers of one or two first-class lines. In the first instance write care of Hardware & Metal, 314 Carter-Cotton Bldg., 198 Hastings St. W., Vancouver, B.C.

HARDWARE & METAL is the only weekly hardware paper in Canada and is read by practically every worthwhile buyer, both wholesale and retail, in Canada. HARDWARE & METAL is the logical medium to use if you have a message for the Canadian hardware trade.

TRADE MARKS

Any trade-mark shown on this page, when stamped on an article of hardware, is the manufacturer's personal "O.K.," guaranteeing the quality of the product.

Metal Stamping and Press Work to Order

Also name plates, embossed trade checks, time checks, badges, steel stamps and stencils or anything in steel or brass lettered or embossed to order.

CHRISTMAS GIFT BUSINESS

All the force of the Savage consumer advertising for December 1921, is being devoted to the Christmas Gift Idea.

The above is a reproduction of the December Savage Sporting Magazine copy that will co-operate in closing Christmas sales.

Savage Rifles, Shot Guns and Pistols have always been a popular Christmas Gift for men and boys, and the Savage policy of taking advantage of the gift season in devoting all its advertising space to the Gift Idea is a co-operation that every live dealer will take advantage of. A window display of the various Savage models surrounding a reproduction of the above advertisement will go a long way in bringing seasonable business.

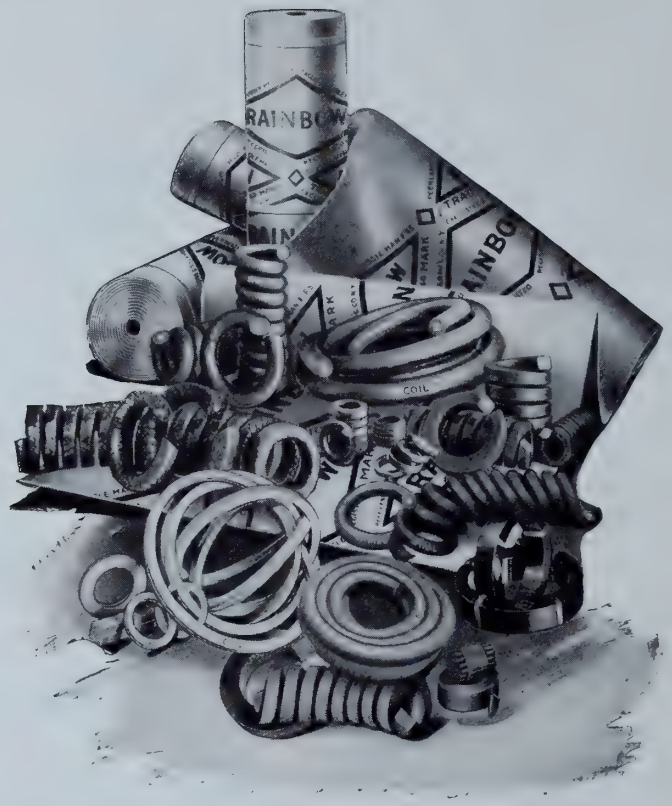
SAVAGE



Rainbow Sheet Packing

is the *original* red sheet packing. For more than 30 years it has held the confidence of the mechanical world because it has never failed to give satisfactory service.

The steam engineers in your vicinity know from experience that a gasket cut from genuine Rainbow is their best assurance of a permanently packed flange.

You cannot afford to overlook the remarkable sales possibilities of Rainbow Sheet Packing.

All Rainbow Sheet is red, but all red sheet is not Rainbow. Identify the genuine by the Diamond Rainbow trade-marks on every yard.

Genuine Rainbow is made in Canada. Your jobber will help you order a balanced stock, or write direct.

SCRAPERS

The handiest, most efficient scraper on the market is the Starrett No. 194 Universal Scraper here illustrated.

Has eight sharp, hard cutting edges adjustably mounted on a suitable handle. A ball joint with spring plunger makes quick adjustment easy. By slightly turning the handle the blade is instantly released or locked.

A substantial and practical grip guard, made to fit the hand, is provided and so designed that it may be instantly slipped on or off either side or end of the blade.

Hatch
Garage Door Outfits

To be reliable, serviceable and efficient, a set of garage hardware doesn't have to cost almost as much as the automobile. The Hatch Garage Door Outfit has all the qualities the heart could desire in a dependable outfit—yet it is low priced. Low priced, that is, for the high quality. Try it on your own garage; then you'll realize why the customers are delighted.

The Set Includes

3 Special Swivel Door Rollers; 22 feet of Track; 3 Pairs Special Garage Door Hinges; 3 Stay Rollers (floor guides); 2 Extra Heavy Garage Door Handles; 1 Safety Hasp (for fastening doors outside); 1 Hook and Eye (for hooking back swinging section inside.)

The track comes in separate bundles—two 8-foot and one 6-foot lengths. Screws and bolts for everything. Japan finished and all neatly packed in a wooden box. Ask for prices and details.

'RICE LEWIS' NEWS

Mr. and Mrs. Santa Claus, do not pass up the hardware store to-day.

With changing conditions came changes even in the staid old hardware store of a few years ago. Though "Xmas" trade has always been important in the hardware store, to-day, owing to the increase of women's patronage, this business has become a real factor.

Practically every order from hardware stores for the past month or so included lines suitable for Christmas gifts—lines such as: *Pyrex Ovenware, Silverware, Cutlery, Electric Appliances, Skates, Sporting Goods, etc.*

If your stocks are becoming depleted, let us help you sort up. Write, wire or 'phone your needs and we will give your requests, large or small, our prompt, careful attention.

Are You Getting This Business?

If you could multiply the number of oil heaters and oil stoves, lamps and lanterns, tractors and stationary engines, incubators and brooders in your territory by the amount of Imperial Royalite Coal Oil each consumes, you would be amazed at the market for this product.

Your trade knows from experience that Imperial Royalite Coal Oil is the most economical and dependable coal oil they can use. They are inclined to buy exclusively at the store where they can purchase their supplies of this superior quality fuel.

To add to their convenience and satisfaction and at the same time **make them your exclusive customers,** you should carry Imperial Royalite Coal Oil in stock.

Make your store the Imperial Royalite depot. Regular tank wagon delivery from a nearby Imperial warehouse enables you to always maintain adequate supplies for your customer's needs.

Phone our nearest branch and have the Imperial tank wagon call.

Special Notice to Retailers about THERMOS Prices

January 1st to June 30th, 1922

guaranteed against our own decline during this time

New Price List for 1922 ready for mailing December 2nd. Reductions on many of the popular numbers of Pints, Quarts and Kits.

Thermos Company plays fair with their dealers by advising them in time to reduce stocks before changes in retail prices take place.

On all goods shipped from our warehouse during December, new prices will be charged to allow for delivery.

There will be more THERMOS sold this December than ever was sold at a similar season. Customers everywhere are spending their cash on the economy product. THERMOS saves for all. Pays for itself in a few trips and gives best service. Season's gifts are in order. Display THERMOS and emphasize the saving they mean to the user. Mention THERMOS in your holiday advertising. Profits are good for the dealer. Get your share. Act now. Electros of THERMOS products sent on request. Make your display of THERMOS products now in stock and thus reduce and make way for new priced goods and some new numbers. Order these new lines now direct or through your Jobber.

A New Number

Full corrugated case, Butlers finish, at popular prices:

No. 25 Pint retail $3.00
No. 2525 1½ Pint retail..... 4.00
No. 250 Quart retail 4.50
No 25½ Pint retail 2.50

Pints ready for delivery December 1st. Other sizes about January 1st, 1922.

Dealers' discounts from retail prices quoted 25 and 10%—2% 30 days.

Quantity discounts quoted on request.

New one and a half pint bottles and kits recently introduced are proving good sellers. Note new prices in effect January 1st, 1922:

No. 1111 1½ Pint size, aluminum trim $3.00
No. 1414 1½ Pint size, nickel trim. 3.50
No. 2525 1½ Pint size, corrugated nickel, Butlers finish 4.00

Don't Be Afraid of Overstocking the Eveready Christmas Stocking

The record breaking Christmas demand for Eveready Flashlights and Batteries will leave some merchants with empty shelves at the height of the Holiday rush.

While Eveready Jobbers have provided for just such emergencies and are prepared to give prompt service on last minute orders it is better business to carry an adequate stock.

Will Your Eveready Stock See You Through?

This is going to be the biggest Eveready Christmas on record—be sure your supply of both Flashlights and Batteries is large enough—don't be afraid of over-stocking.

STRATHCONA is a new Rogers Anchor brand pattern of unusual beauty and distinction that will quickly appeal to your discriminating trade.

Rogers Anchor brand is priced midway between the costly extra heavy plate and the low priced ware.

It has a base of fine nickel silver; it is heavily plated and staples are reinforced with still heavier plate at all points subject to hard usage.

Strathcona has a beauty and dignity of line rarely found in anything but sterling silver. And this combined with the long wearing quality and reasonable price of Rogers Anchor brand makes Strathcona the most attractive value you can offer your trade today.

"Please send me," he said,

and we mailed him the book. This is the letter he wrote us:

Dayton, O., June 2, 1921.

"Henry Disston & Sons, Inc.
Philadelphia, Pa.

"Gentlemen:—I want to thank you for your 'Saw, Tool and File Book,' which I received several days ago, and with which I am very much pleased.

"Your Book is just what I need, I have six of your saws, but the way I have been filing them I think I shall need a jointer.

"I feel very good toward you for your courtesy to me! in fact, I think you are just about as fine as your saws. I don't think that I could pay you a higher compliment.

"I am fifty-five years old, and in all my years I have heard only two men praise any but the 'Disston Saws.'

"I am not familiar with your other tools, and, frankly, I didn't know that you made any others, but I shall get acquainted with some of them very soon.

"In conclusion let me again thank you for the Book; it has so much valuable information in it, and so many fine illustrations that I hardly know which to praise more—its utility or its art. I like both, and am immensely pleased.

Yours truly,
WM. BENZING,
1220 Wyoming Street."

When a man gives us a compliment like that, do you wonder that we want to talk about it? We wish you would read the book. If you would like a copy, or several for your clerks and customers, write your name and address on this page, and mail it to us. Address the envelope to Desk No. 2. We will send you the book free of charge.

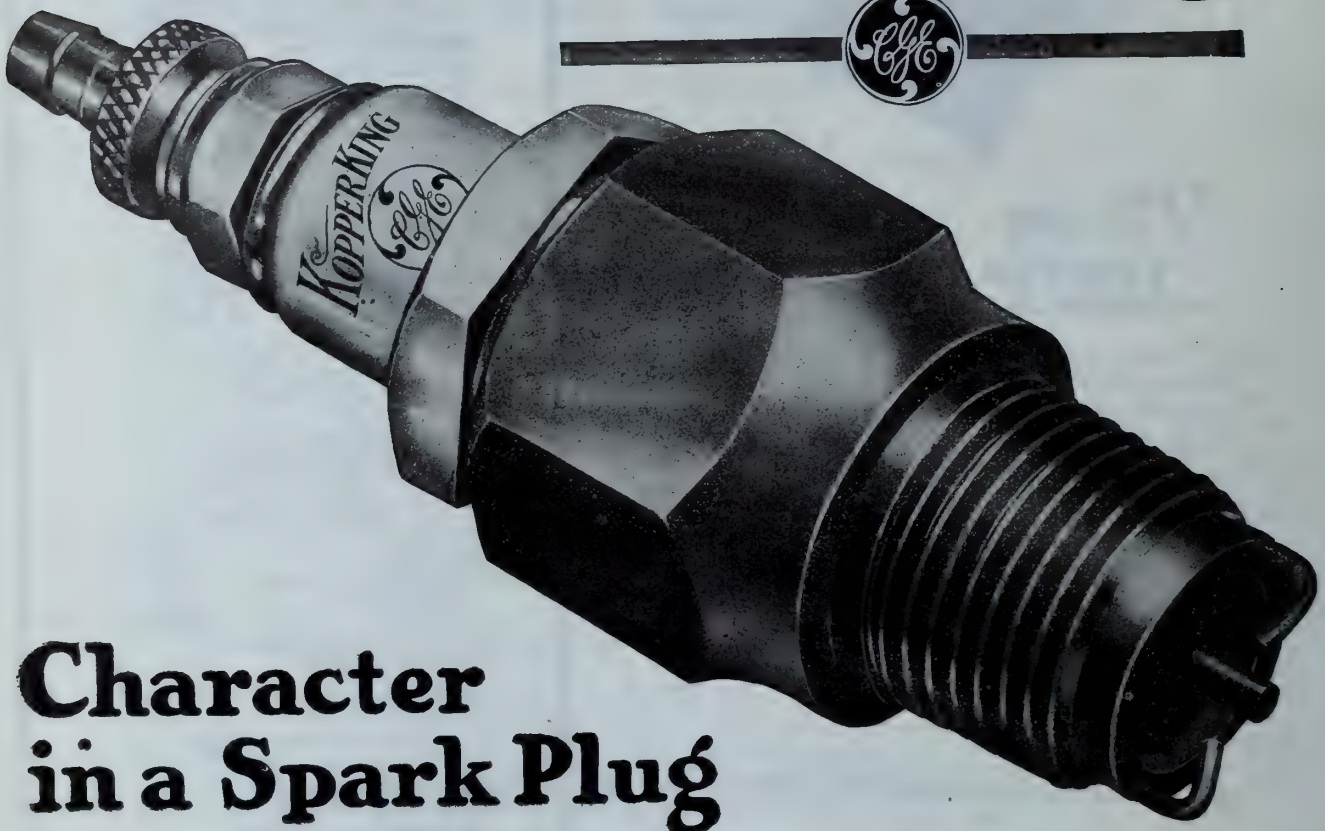
Kopper King



Character in a Spark Plug

FIRING the gas vapor, driving down the piston-head hour after hour with an exploding sheet of flame, demands character—not mere metal and insulation—character expressed in design, in construction methods and workmanship.

The Kopper King is a prestige builder. Incidentally, it shows the Dealer a greater margin of profit than any competing plug. The Rust-proof Copper Surface prevents Carbon deposits; carbon will not adhere to copper under Electrical Heat. The Kopper King is without a peer among Spark Plugs. It is a quality plug from first to last.

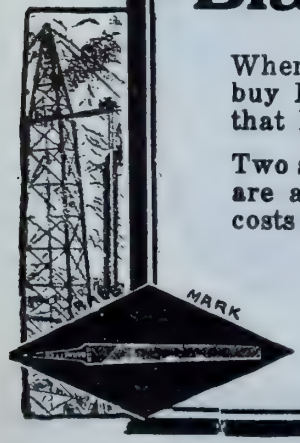
Black Diamond for Cutting



When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

THE CONNOR ELECTRIC WASHER
No. 2

HAS MANY IMPROVEMENTS THAT MAKE WASHING EASIER

With the balanced tilting tub the last drop of water can be drained out of the tub without any lifting.

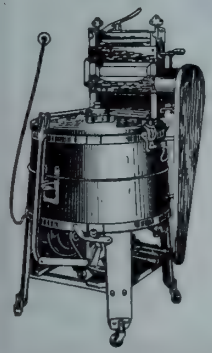
With the swinging wringer, the operator can wring out of rinse tub while the machine is washing.

The basket rack folds under the tub. The steel stand is galvanized to prevent rust. It is mounted on large piano casters.

The tub is of 1¼-inch cypress. Keeps the water hot and will last longer than metal machines.

Connor Electric No. 2, List Price $140.00

Connor Power No. 1, same machine as above for belt drive, list price $80.00.



The Economy Electric is just what its name implies. It is cheap in price, stationary wringer machine, cut gears. The workmanship is first-class. List price $110.00.

The Economy Power for belt drive, list price $60.00.

The regular 30 per cent. discount applies. These machines will satisfy your customers. Write for samples.

Again in Demand

The wooden tub is back—the high cost of the metal is largely responsible, but a wooden tub has other advantages.

There is no galvanizing or plating to fall off. No rust to spoil clothes, and hot water retains its heat longer.

Cane's wash tubs will be favored. They last a lifetime and are built with the workmanship that has made Cane's Woodenware popular for over thirty-five years.

Order a supply of Cane's Tubs from your dealer for a source of Good Revenue

THE GENDRON MANUFACTURING CO., LIMITED

JARDINE TOOLS

This is a remarkably efficient machine that one man of medium weight can operate with ease on the heaviest work. It has the usual direct leverage for upsetting light to medium tires, and, in addition, a geared leverage that increases the power more than three to one for heavy tires and axles. The jaws are of tool steel, the teeth are machine cut and carefully tempered. This powerful machine upsets any tire up to four inches by one inch, and axles up to one and one-quarter inch.

The LYON RESILIENT BUMPER

OUR designers have made of the Lyon Resilient Bumper for motor cars—front and rear—a thing of unusual beauty as well as the most effective protection for cars in collision.

The Lyon Bumper is so designed as to suit any car, whatever its make. It can be attached in a few minutes with ordinary tools and without the drilling of holes.

The Lyon Bumper is scientifically formed to secure the greatest attainable resiliency and tensile strength. It is made of high-grade spring steel; heat-treated and tempered in oil.

The Lyon Resilient Bumper is constantly on its job of protecting YOUR car. It is built to take enormous punishment. In collisions the car equipped with Lyon Resilient Bumpers is the car that is damaged the least and does the least damage.

Every well-known dealer and garage owner can sell you Lyon Resilient Bumpers. Specify them by name, and look for the name "LYON" on every bumper.

Unbeatable

Here are three Simms Paint and Varnish brushes that can't be beaten at any price. You'll find them well known to the painters in your vicinity. Just display them on your counter or in your window and the name Simms will sell them.

If you find a painter who hasn't tried them before, just let him feel the long, even bristles. Let him examine the ferrule and hold the brush in his hand. He'll know that these are perfectly-balanced brushes—that they are made for long and satisfactory service.

The final proof of quality of course is in actual use. The bristles can't budge from the vise-like grip of the rubber setting, and in every particular they are brushes that will last a long time.

There are many good brushes. These are "Better Brushes".

Vol. XXXIII DECEMBER 10, 1921 No. 50

Developments in The Roofing Industry

Some Lower Quotations Recently Announced Attract Keen Interest—Manufacturer Predicts Roofing Industry Should Shortly Reach Firm Basis for 1922—Must Reduce Production Costs—Raw Material Conditions

Based on interview of Hardware and Metal with Herbert Kennedy, General Manager, The Ruberoid Company, Ltd., Montreal.

RECENT DEVELOPMENTS in certain departments of the asphalt roofing industry, have attracted considerable attention among the trade in general. Dealing with this situation and the fact that prices on certain lines of roofings now show varying reductions ranging up to 20 per cent., Herbert Kennedy, General Manager, The Ruberoid Company Montreal, stated to Hardware and Metal that these new low prices recently announced by certain manufacturers of these products, had been established for the purpose of placing the industry on a firm footing for 1922 business.

Mr. Kennedy pointed out that producers are generally convinced that some lower price levels are now available, and the declines already indicated are expected to be effective for several months, if not throughout the whole of next year. During the past season, two separate declines were generally announced on roofing products, which were in keeping with the trend of raw material prices and other production costs.

"For next year," stated Mr. Kennedy, "the plan of directly reaching bottom values is being adopted with the intention that if the prevailing cost levels of basic materials are maintained, future revisions will likely be of an upward nature. At present, however, we feel, as roofing manufacturers, that every endeavor must be made to place producing operations on a more economical plane than ever before."

"For some time past, manufacturers have been striving to this end, and results attained up to the present, should enable the introduction of these lower prices, which would compare very favorably—under existing circumstances—with those quotations recorded in the industry during pre-war days," said Mr. Kennedy.

Raw Materials on Healthy Basis

Rags and asphalt are the chief ingredients in the making of roofing products, and both these raw materials are now on a steady to firm basis. It was pointed out that rags in the United States are already showing a slightly upwards trend, supplies being none too ample, In this country they have been at such low levels that collection has dropped off and available supply is so slow that if buying commenced they would undoubtedly appreciate in value.

Asphalt has already dropped in the United States from 8 1-2 cents per American gallon to approximately 4 1-2 cents. Considering present labor costs and crude oil, which is now showing gains, it did not seem possible that lower prices on these products could obtain in 1922.

Speaking of the trend of their products during the present year when raw materials were on an easier market, Mr. Kennedy stated that the manufacturers had endeavored to follow the tendency and in the course of the past twelve months two reductions were made.

"Roofing has been subjected to two not inconsiderable reductions during 1921, but on account of high manufacturing costs, because of limited production, these have not been representative of the declines which have taken place in basic materials."

It was Mr. Kennedy's opinion that the manufacturer was willing to make every sacrifice at the present time to establish their enterprises on a stable basis. In the roofing industry prices that will obtain at the end of this year were such as would show a much smaller profit than formerly, in fact left very little for them. If adequately supported by the jobber and retailer, the public could not help being convinced that e time for buying is right now with us. The closing months of this year offered a time to overcome undoubtedly the greatest obstacle, that of convincing the buying public, and if the method of reducing profits was adopted, from the manufacturer to consumer, 1922 should prove an active year in the industry.

"To sum up," said Mr. Kennedy, "during the month of December, certain products of the asphalt roofing industry will be available to the public at a lower price than has existed since 1914, or than will be available during the entire ensuing year. We believe that manufacturers are willing, in order to keep their mills running during the dull months of December and January, to offer prices that are little more than equivalent to cost of

(Continued on Page 60.)

HERBERT KENNEDY
General Manager, The Ruberoid Co., Ltd., Montreal, who gives herewith some interesting data concerning the roofing industry in Canada.

Wholesaler Speaks On Tire Situation

Says Decision of Certain Tire Manufacturers to Eliminate Wholesalers Will Not Prevent Them Quoting Retailer's Equivalent Prices on Same Quality Tires—Wholesalers Said to Have No Quarrel With Manufacturers—Marketing Expense May Be Increased

Continuing the discussion of the tire situation as introduced in November 26 issue of Hardware and Metal and continued in the December 3 issue, the article herewith gives the wholesaler's opinion of the action of certain tire manufacturers in eliminating this medium of distribution.

DEALING further with articles which have appeared in recent issues of Hardware and Metal, in connection with the decision of certain automobile tire manufacturers to eliminate the wholesale firms in the distribution of these products, it is now learned that the wholesalers are still able to provide tires to the retail trade at the same price levels consistent with quality which certain makers are selling direct to the retailers.

This information was imparted to Hardware and Metal when discussing the prevailing tire situation with certain wholesalers and is indicative of the general position of the jobbers under the revised selling conditions applying to tires.

"There is no quarrel between wholesale houses and tire makers," stated one wholesaler, "and if certain manufacturers have decided to market their product direct to the merchant, that surely is their own prerogative. We then have nothing to say in the matter, and cannot presume to dictate as to the how or why of their selling methods. However, the jobbers can still handle automobile tires, if they so desire, and we certainly intend to continue."

Turn To Other Makers

It was pointed out that if the source of supply from certain makers is shut off in one quarter, such a condition is only considered of a temporary nature, as wholesalers in general will naturally turn to other tire makers, who evidently still prefer to maintain the method of distributing through wholesale firms.

"It makes no material difference to the jobber, as long as the same guarantee covering mileage, quality of product, selling conditions, and market values are available. The prices at which some tire manufacturers are selling direct to the retailer, are identically the same as the quotations which the wholesale houses are now giving, and while these price conditions continue unchanged, the retail merchant is not affected to any extent whatever."

Another important factor introduced with this topic was the opinion that conditions under which tires are marketed, only commence to interest the retail trade when some variation in prices is obtained. At present the selling agent is placing the goods into the hands of the merchant at the same prices at which the producers are selling direct. It was inferred in one quarter, that to consider eliminating the wholesalers failed to place tires in the hands of either the merchant or consumer at easier prices for the proportion of selling expense still remained.

Marketing Expense Increased

"In selling direct, this ratio is more liable to be accentuated," commented another wholesaler, "because of the vital fact that such selling expense is applicable only to the one product; whereas, when marketing through the wholesaler, practically the same amount of expense is distributed over an extensive number of items."

Asked whether the tire manufacturers can sell direct to the trade at lower costs than when quoting special discounts to wholesale distributors, it was pointed out that such is a consideration which can only be proved by experience. Some of the tire producers are adopting this method, and in the meantime, both wholesalers and manufacturers are quoting identical prices to the merchant, on similar grades and qualities of tires, with the advantage of the recent declines.

No Quarrel With Manufacturers

Referring to the alleged original cause of the development affecting the decision of certain tire producers to eliminate wholesalers as a medium of tire distribution, the necessity of lower prices due to competition was considered as a possibility in this direction. When it was pointed out that some suggestion had been encountered to the effect that wholesalers had been selling auto tires indiscriminately and that this constituted the real reason for the revised methods being adopted by certain manufacturers, Hardware and Metal was informed by wholesalers that no quarrel existed between the producers and the jobbers. It was inferred that the personal element did not enter into the situation, but that efforts of the manufacturers to locate easier distributing costs in keeping with lower production and market values, was perhaps the primary cause for the change.

Canada's Steel Imports From U.S. in October

Canada Remains Principal Export Market for U.S. Mills, Taking 32,358 Tons in October — Increase of 10,000 Tons Over September

CANADA was the principal export market for U. S. steel mills in the month of October taking 32,358 tons. Canada bought largely of steel sheets, structural iron and steel, tin plates, barbed wire, nails and steel plates, and tool, 2,084 tons of scrap iron out of the month's total exports of 3,293 tons. Comparison with September export market gives an increase of nearly 10,000 tons for Canada.

Exports for October sustain the general opinion that the domestic iron and steel industry is recovering from the depression witnessed this year, during which period monthly oversea shipments continually declined until the turning point was reached in September. The industry seems to be in a better position to combat the drastic price cutting of the British iron and steel manufacturers and the advantage derived by Germany from the low rate of exchange.

Exports of iron and steel from the United States during October amounted to 102,532 long tons, exceeding those of the previous three months.

Although a decline from the 1920 tonnage is shown in all other items during October, steel plates gained 3,802 tons over the previous year, advancing from eighth place in 1920 to the leading position in 1921.

Structural iron and steel and steel rails dropped in importance from second and third places for October, 1920, to fourth and fifth in 1921; and while most of the articles retained a relative position nearly the same, billets, ingots, etc., fell from eleventh place to the foot of the list. Steel sheets, steel plates, wrought pipes and fittings, structural iron and steel, steel rails, steel bars, and tin plates, which led the October, 1921, exports also headed the list for the first 10 months of 1921, although not with the same relative position toward each other. Wrought pipes and fittings exported during the first 10 months of the current year were 100,652 tons in excess of the corresponding period last year, an increase of approximately 45 per cent.

Comparison of October, 1921, exports with those of September, 1921, shows increases in all but seven items, namely, steel rails, structural iron and steel, pig iron, cast pipes and fittings, billets, ingots, etc., bolts, nuts, etc., and ship

Reflecting The "Santa Claus" Spirit Through The Hardware Store

SOME very effective business bringing methods are being employed by certain hardware firms in connection with Christmas business and it is not too late for others to make use of some of these ideas.

Ingram & Davey, Ltd., St. Thomas, Ont., ran a series of ads during the week prior to the Annual Toyland opening. Wireless messages were started on Monday and were changed every night until Wednesday. The first one read "Will be in St. Thomas at your Toyland this week. Are you ready?" The second message used on Tuesday night read, "Have been delayed but will be at Toyland as soon as possible. Will wire you exact date tomorrow." The third one appearing on Wednesday night read, "Arrive 9.30 Saturday morning. Would like to drive around city."

On Thursday a small announcement was used and on Friday a full page appeared telling about the forthcoming parade.

The parade held on Saturday was led by a man dressed in a fancy red robe with a large steel helmet. carrying an announcement of the opening and followed by a Kiltie band. Then came a truck decorated with a 7 ft. Santa Claus, flags and pictures representing Mother Goose rhymes. Then came a number of boys dressed in red uniforms and steel helmets carying large pictures representing Mother Goose rhymes, then a number of men dressed in green uniforms on horseback carrying flags, and then a house with an immense chimney built of wall board over a truck, standing 18 ft. high, painted red and bricked off to represent a chimney. In the top of the chimney Santa Claus was perched, throwing away balloons and other trinkets.

The parade started from the railway station, went around town and then back to the store, and while the band played Santa Claus climbed from the chimney to the top of the store and disappeared.

Opening Toyland

Up to this time no one was allowed in Toyland but as soon as Santa disappeared over the building Toyland was opened and by far the largest crowd of any year was experienced.

"Our sole idea this year has been to instil in everyone's mind that Ingram & Davey's store is the only toy store and we think we did, judging from the crowd we had," said G. L. Davey to Hardware & Metal.

"We devote our entire second floor to toys and electrical appliances and everyone going to the toy department has to go through the other part of the store where they see everything prominently displayed and ticketed, and we feel confident that our toy department is the biggest drawing card we can get for Christmas shoppers.

"For a number of years we have decorated our store with holly, etc., but this year on the main floor we used a large Santa Claus cut out and painted on wallboard and large winter scenes all painted on wall board. In our toy dept. we used nursery rhyme pictures and pictures that amuse the children, which helped to put the customers and our clerks in a much livelier mood."

Planning the Ads

The full page ad dealing with the

(Continued on page 38)

Winter Sport Goods In Xmas Display

Winter sports offer a wide range of lines suitable for Xmas gifts to all members of the family, and can be featured prominently in most Xmas displays. T. S. Tait and Sons, Campbellford, Ont., show, in the above display, how such lines can be featured as gift suggestions. Sporting lines shown include skates, sleighs, snow shoes, guns, etc. The evergreen tree in the background gives a seasonable atmosphere. The store salesmen suggested to customers the purchase of various sporting goods lines and the combination was found effective in stimulating Christmas trade. F. Menzies of this firm won fourth prize in places under 5000 in the 1920 Hardware and Metal Xmas Window Contest.

REFLECTING THE "SANTA CLAUS" SPIRIT THROUGH THE HARDWARE STORE

(Continued from page 37)

opening of Toyland on the Saturday, was replete with illustrations of Christmas trees, holly, and Santa Claus. The announcement of the parade was as follows;—"Santa Claus arrives at 9.30. What a wonderful parade it will be. First, the band. Won't everyone dance when they hear that old familiar 'Scots Wa Hae' and see them all dressed up. Then the big Santa Claus truck, and then, before you stop wondering, the Mother Goose parade comes along. Then the funniest, most ridiculous clowns and then while you are still laughing at their antics, outriders in gay uniform and then Santa Claus coming right out of an immense chimney." The route of the parade was then given.

A large number of suitable gift suggestions were illustrated, including dolls, wagons, construction toys, drums, games, sleighs, wheel goods of all kinds, in addition to a list of practical gift suggestions for men, women, boys and girls. Invitation was extended for out of town people to send in their orders for goods advertised. A plan was also outlined whereby an article would be held until Christmas for the payment of a small deposit.

Santa Claus in Aeroplane

A rather novel plan of stimulating Christmas shopping interest has been employed this year by one of the business men's associations of Toronto. This organization planned for a Santa Claus parade along the street each Saturday afternoon before Christmas and a number of novelties were introduced. Santa Claus arrived in an aeroplane and after gliding up and down the street sufficiently to allow the children to see his popular garb, he landed in a park nearby, where a special reception committee waited upon him and introduced him to the crowd. With greetings over a procession formed up and led by a band, it proceeded along the business section. Two or three hardware merchants were active in connection with the planning of this event.

In recent advertising on Christmas goods, J. S. Neill & Sons, Ltd., Fredericton, N.B., in an attempt to stimulate early interest in shopping, framed their mesage as follows. "Yes," Santa says, "Shop early. He knows that gift buyers can do best by following this advice—shopping early in the day and early in the week enables customers to choose while the stocks are complete and when stores are not crowded. We can give you much better service if you do what Santa says. Our Toyland is filled with toys never shown in New Brunswick before—the real sensible kind that would gladden the heart of any kiddie. This year we have devoted an entire store to toys alone—toys that have been personally selected from the largest makers in the world. We want every person in this part of the province to come in and see this wonderful collection."

Gifts of Beauty and Utility

An ad by W. H. Thorne & Co., Ltd., St. John, listing a number of useful gift suggestions says, "Gifts in which beauty and utility are happily combined are much favored again this season. Never in our history have our Christmas Gift displays been so large and complete as you will find them this year. Only a careful inspection will enable you to fully appreciate both the qualities and values."

Vacuum bottles, motorists' lunch sets, safety razors, smokers' stands, flash-

(Continued on page 60)

Selling Gift Lines For Children

London, Ont.—A simple little plan that is producing excellent results from a Christmas business standpoint is worked out in connection with the window display in a down-town hardware. The idea is to appeal to the fathers or mothers or others who are looking for something really useful, handsome, serviceable and reasonably priced for the kiddies. Arranged in a little section by itself at one side of the main display nad marked off by a border of red Christmas decoration and silver tinsel are shown such plated goods as children's cups, knives and forks in attractive boxes, knife, fork and spoon in a gift box, baby pushers and similar lines. A Christmas touch is given to the children's display by a ruddy-faced Santa Claus head of pasteboard placed at the top.

Even in a windowful of seasonable articles the little special display for the children not only stands out well but carries an instant appeal and it has brought buyers into the store in numbers asking for the lines shown.

"The articles commenced to move almost as soon as we had them in," said the manager to Hardware and Metal, "and we have suggested by the display gifts that will be really appreciated. Quite a number of men and women have commented on the display as having helped them solve their problem of what to buy for a child. From our standpoint the profits in the lines shown have been very satisfactory."

Arrival of Santa Claus at Blain's Hardware, Brampton, Ont.

In the above picture Santa Claus is shown arriving at Blain's Hardware, Brampton, Ont., where he introduced the Christmas selling season. This proved to be a highly popular means of stimulating interest and arousing the Christmas spirit. The event is said to have proved a very great success and the children fully enjoyed meeting Santa Claus in the store's Toyland. Both sides of the street were lined to witness the arrival of the patron saint and only a portion of the crowd is shown herewith. Santa Claus is ascending the ladder to enter Toyland through the window.

"A Real Christmas-Business Getter"

This description is applied to the above display of Xmas gift suggestions by Wm. Haire of the Tourtellot Hardware Co., Port Arthur, Ont., which was a runner up in the 1920 Hardware and Metal Xmas Window Contest. A fairly wide range of gift suggestions is shown and in most cases price tickets have been used. The display has been arranged in three units, the larger one in the centre having two elevations and bearing a group of clocks, flashlights, electrical goods, etc. The unit on the right carries a display of safety razors, brushes, strops, etc. On the left are various cutlery lines shown in gift boxes. The decorations in the upper part of the display served admirably their purpose of giving a Xmas atmosphere and interesting the gift seeker.

Says Trade Is Much Understocked

Many Hardware Merchants Unprepared For Brisk Trade in Seasonable Lines Which Follows Sudden Change of Weather—Manufacturers Have Trouble Estimating Spring Requirements.

LONDON, ONT.—"The average retail merchant all over Canada is very much understocked at the present time," said J. J. Foote sales manager of the McClary Manufacturing Co., in discussing the business outlook with Hardware and Metal. "Most of the retailers are entirely unprepared for any demands which might be made on them for seasonable lines. For instance one night during the past week snow fell very heavily in many sections of Ontario. Hundreds of people found themselves compelled to hunt up their snow shovels. Many of them did not succeed in finding one. Many others found shovels battered from the wear of former winters and called up their hardware merchant to send up a new one. Hardware merchants who did not have any in stock called up their jobbers. The jobbers who did not have any in stock either called up somebody else or a manufacturer, or somebody in a city sixty miles away. Before the shovels could be delivered the sun had done the work and much loss of profits and good-will resulted.

"Many manufacturers have reduced prices in proportion to costs of raw materials and production costs but this has apparently made little difference as far as the retailer is concerned. Looking back over the trend of business during the past six to nine months one sees a period in which there has been very little business for manufacturers. This is difficult to understand, as manufacturers have known that retail stocks are low, and that purchases are made covering the requirements of short periods only. Also this constant drainage of short period stocks, has assisted in reducing other overstocked lines, with the result that all surpluses normally held in retail stores are exhausted.

"While I would not advise merchants to overstock, I would strongly urge all dealers to appreciate the position of manufacturers in having to anticipate spring requirements months ahead. To be sold and shipped ready for Spring business of 1922, the goods must be manufactured in 1921. Materials must be purchased and trimmings assembled ready for manufacture, and for this reason I advise merchants to book spring goods ahead, and give the manufacturers an opportunity to be prepared for the call which will undoubtedly come in the Spring of 1922. and avoid delay and loss of business which must otherwise result."

Hardware and Metal

Canada's National Hardware Weekly

Member Audit Bureau of Circulations Member Associated Business Papers

The Only Weekly Hardware Paper in Canada

PUBLISHED EVERY SATURDAY SINCE 1888 BY

The MacLean Publishing Company, Limited

Montreal TORONTO Winnipeg

TORONTO, SATURDAY, DECEMBER 10, 1921.

SOME INDICATION of the trend of prices in general in Canada is found in statistics which show that in October wholesale prices continued the decline which commenced in May 1920 though this decline has been less drastic since June 1921. In retail prices there was a fall during the month from prices of August and September, in which months the decline which started in July 1920 was temporarily reversed. The index figure of wholesale prices was down to 229.2 for October, compared with 232.7 for September, 317.6 for October 1920, and 138.7 for October 1914. Declines in leather, house furnishings, chemicals, etc., were noted in October while there were advances in certain metal lines, gasoline, coal oil, etc.

The Election

MUCH INTEREST has been taken in the Federal election by merchants and others, and it is to be expected that now with the contest settled, business will be rid of one element which has been acting as a brake upon business. No political party is blamed for this condition, but it is a well known fact that the detraction of interest from normal pursuits and the uncertainty which immediately precedes a general election tends to restrain normal business activity.

It will be interesting to see what the incoming Government will do with various items of irritating legislation now on the statutes. The defeat of the administration redoubles the chances of some change being made in the Marking Act which is now scheduled to go into effect on December 31. The tariff question will no doubt be dealt with but it is the general opinion that despite much wild pre-election talk, no action of a drastic nature and which might have serious effect on business, is likely to be taken. This department will likely be under the control of Hon. W. S. Fielding.

In any case the election has served to clear the air and as result a healthy volume of Christmas trade should be enjoyed and a stimulus given business for 1922.

Steel Industry Expansion

THE EXPANSION in steel production during the past month or two has evidently effected a considerable reduction in stocks of pig iron, judging by recent reports from U. S. interests to the effect that there has been a rapid movement toward the blowing in of many additional furnaces. The merging of seven important independent steel mills in the U. S., as outlined in last week's issue of Hardware and Metal, is another movement which is occasioning much interest. This merger will represent every form of rolled products with the exception of tin plate and the mills represented in the consolidation will have about 20 per cent. of the country's steel capacity while the Steel Corporation is said to have about 45 per cent.

An echo of the claims recently made that British mills were bia is found in the report this week which indicates that whereas Welsh mills secured orders for 1,500,000 boxes, the Steel Corporation has just taken orders for 2,500,000 boxes for Pacific Coast points. It will be recalled that after the Welsh plate mills booked the B. C. business at a nominal Welsh plate mills booked the B. C. business at a nominal price of $4.90 a box the leading U. S. producers lowered prices from $5.25 to $4.75. This reduction has probably had an influence in the securing of the business on the Pacific Coast.

The Business Paper Gets at the Facts

A STRIKING illustration of the service the technical or trade paper renders its readers and of the difference in the reliability of the information it supplies and that furnished by the average daily newspaper is afforded by an article in a recent issue of the "Railway Age Gazette" with reference to Henry Ford of automobile fame and railway management.

Mr. Ford as many of our readers will have learned from the newspapers, recently purchased the Detroit, Toledo and Ironton Railway, a small road which was practically in a state of bankruptcy. In the same papers they will also have read how Mr. Ford put in his management in March, and in April the net operating income had risen from $78,000 to $276,000. For several months past the various newspapers, magazines and labor publications of the States have been jumping at conclusions and drawing deductions from this one month's figures, enlarging upon the fact that, in spite of higher wages, Mr. Ford had succeeded in making his railway a paying proposition, and in many cases it was hinted that here was the man who could straighten out the railway systems of the country and place them upon a stable and profitable basis.

The "Railway Age Gazette," however, was not content to accept these hastily drawn conclusions as decisive and started an investigation on its own account, with the result that when the figures for several months of Mr. Ford's regime were examined a very different tale was unfolded. The income of $276,000 in April had dropped to $187,000 in July and in August to $70,000, lower than it was when Mr. Ford took the road over. Expenses, moreover had increased from 52.7 per cent. to 59.7 per cent. in July and 71.8 per cent. in August—this in spite of the fact that gross earnings which were $713,000 in June had increased to $744,000 in July and still further to $763,000 in August. Moreover, while the operating had thus increased 46 per cent., those of the ordinary railways of the country had increased only one per cent.

The point in this incident which immediately concerns our readers and ourselves is not so much the success or failure of a railroad as that to a business paper is due the fact of the truth being made known. During the last few years occurrences of this nature have been frequent in connection with the series of trade and technical publications of which this paper is one. Inaccurate and misleading information giving rise to serious complaints has been published on one subject or another by the daily papers. The public have been worked up to a pitch of indignation by some statement which upon investigation has been found to have no foundation, and it has been left to the business paper to show that the complaint was therefore groundless. It is the reliability and accuracy of all information published that differentiates the business paper from the ordinary newspaper and makes it of such high value to its readers.

News of Western Canada

Lower Freights Help B.C. Hardware Trade

Enable Closer Competition on Prices of Roofing, Wire Nails, Etc., With Eastern Manufacturers — Christmas Acting as Stimulus to Hardware Movement

VANCOUVER, B. C. Hardware firms on the coast have commenced in a slight degree to feel the annual demands of the Christmas trade. While this is as yet not so noticeable in this city, orders have been largely placed for upper country delivery. It is stated that the volume of business is at least equal to that of last year. Okanagan fruit growers have generally had a good year although prices were less than in 1920, but the crop was so much heavier. With 4,400 carloads shipped out of this district, it may be taken as a natural consequence that demands would be made on the hardware trade which, in that section of the country, reports collections fairly prompt. On the coast distributors say that accounts are in good condition and that they have no complaint as to the manner in which returns are being made this week. At the same time, they state that there might be some improvement.

Cutlery and silverware are moving out in satisfactory volume although it is nothing like the pre-war demand. Merchants are paying closer attention to their stocks which are much smaller than in former days. At the same time most retailers have a good supply of those articles in keenest demand.

One enterprising retailer in an effort to stimulate trade to a greater degree than usual, and in celebration of his twentieth anniversary of trading on Granville street is making a special sale. With a carload of ranges on his hands he is offering a half ton of coal or goods to the value of $10 with every range sold. He is also making a special of eggbeaters at 25 cents (only one to a customer). The regular selling price is a dollar. Steel wool which sells ordinarily at 20 cents is marked at fourteen cents. Razor blades are selling at 80 cents instead of a dollar a dozen. A long list of other items are similarly reduced.

With the recent lowering of the thermometer, retailers are again pushing the sale of a wide range of stoves and heaters. For instance the Perfection oil stove, two burner, is marked down to $21.45 instead of the regular $27 quoted price. Moffat heaters and Herald box stoves also come in for "specials," at sharply lower prices.

The reduction in freight rates as announced by the Canadian Pacific and Canadian National lines, effective on December 1 was received with general appreciation by that section of the hardware trade which manufactures on the coast. For instance it will enable roofing and wire nail manufacturers to make a closer quotation on their product in the Crow's Nest and Southern Alberta districts in competition with the Montreal and Toronto interests.

Opens New Premises for Hardware Lines

WINNIPEG, Man.—J. B. Buckham who has recently been appointed sales agent and distributor for the Boeckh Co., Toronto, brushes, and for Valentine & Co., varnishes, colors, etc., of New York, has opened up an office and warehouse at 664 Broadway. Mr. Buckham was with the J. H. Ashdown Hardware Co. for four years, prior to which he was in the trunk and leather goods business in Winnipeg under the name of Winnipeg Trunk and Bag Co. He subsequently became a salesman of the Sherwin Williams Co. of Canada. In 1915 he enlisted for war service and returned to Canada in 1919 when he rejoined the Sherwin Williams Company. He suffered from ill health and subsequently resigned the position, some time later joining the staff of the T. Eaton Company from which he resigned when appointed representative of the products mentioned.

J. B. BUCKHAM

For some years associated with various branches of the hardware trade of Western Canada, who has opened new premises in Winnipeg to handle his recently secured representation of certain hardware lines

WESTERN CANADA NOTES

C. C. Craig Company have moved from their former quarters and are now located in a larger warehouse and office in the Stobart Building, 281 McDermot Avenue, Winnipeg.

Charles R. Thompson of the C. C. Craig Company, Winnipeg, has just returned from the Prairie Provinces and states that taking into consideration what the farmers received for their wheat this year, business is as good as can be expected.

C. H. S. Bamford, sales manager of J. H. Ashdown Hardware Company, Winnipeg, has recovered from his illness and ha returned to active work.

Mr. Westgragh, of the firm of Craven & Speeding Bros. of London, England, has been on the Pacific coast during the week and during his investigation here, will call upon the larger logging camps with a view to placing the Westgraph rope which was invented by his father.

The Vancouver Paint and Hardware Co., on Commercial Drive has ceased to function as a company and Walter H. Rowlands, one of the principals has formed the Rowlands Hardware and Paint Co.

A. D'Arcy McBride and W. Hunter Wells have formed a partnership under the name of the Pacific Wire & Supply Co. in Vancouver.

Archie MacFarlane of the Archie MacFarlane Co., Ltd., of Montreal, direct manufacturers' representatives was a visitor to the Pacific Coast this week.

Events in the Trade

BUSINESS CHANGES

Kitchener, Ont.—George G. Bucher, Hardware, has sold out to Karl Bornhold, formerly representative of Ideal Aluminum Products Co.

FIRE LOSS

Montreal—Damage estimated at over $50,000 was caused by a fire which broke out at the factory of the Montreal Hardware Manufacturing Company, 1493 Notre Dame street east, Hochelaga. A. G. Yon, general manager of the company, stated that the apparent damage would total over $50,000. The building was amply covered by insurance.

OBITUARY

Thomas Craik Irving, formerly general manager of the Bradstreet Co. for Western Canada, and who was vice-president of the Independent Cordage Co. died recently at his home in Toronto.

Thomas B. Dowsley, one of the oldest residents of Owen Sound, died at the age of 87. He first started to manufacture carriages in Owen Sound in 1854. The Dowsley carriage spring was invented by him and he was for fourteen years president of the Dowsley Spring and Axle Company of Chatham.

PERSONAL

Ross Munroe, for several years with A. B. Bissett, Kincardine, Ont., has taken a position as clerk in the hardware of W. C. Farley.

E. Fielding, senior member of the firm, E. Fielding & Son, Manufacturers' Agents, Toronto, has been confined to his home for some days due to an accident. Mr. Fielding celebrated his 82nd birthday last August.

OPEN MONTREAL PLANT

Canadian Wire Bound Boxes, Ltd., Toronto, are opening a new plant at 17 Mill St., Montreal, to serve the trade in Montreal and points east.

SPRAMOTOR CO. BUYS PLANT

London, Ont.—W. H. Heard, of the Spramotor Company, has purchased the plant and business of the Aylmer Pump and Scale Co., at Aylmer, Ont.

NOT CANADIAN TRADE COMMISSIONER

In an article written for the last issue of Hardware & Metal by R. H. Monk, Vice-president, McArthur Irwin, Ltd., Montreal, Mr. Roy was referred to as Canadian Trade Commissioner in Paris. This should have read "Mr. Roy, who replaces Sir George Perley, the official Canadian Government representative."

FORMS ADCOCK AND CO., LTD.

C. E. Adcock, of Adcock & Brewer, Limited, Montreal, a firm organized in 1920 to act as direct selling representatives of manufacturers, has now completed arrangements to take over Mr. Brewer's interest in this company and change the name to Adcock & Company, Limited.

Mr. Adcock through many years connection is well known to the trade throughout Canada. The new company

C. E. ADCOCK

A former member of the firm of Adcock and Brewer Ltd., Montreal, which has been re-organized and is now known as Adcock and Co., Ltd.

will be located at the old address for the time being at 222 St. James Street, Montreal, where they maintain offices and sample rooms.

Mr. Adcock will have a staff of salesmen calling on all the important distribution points in Canada, in the interest of the lines he represents.

NICKEL CO. EXECUTIVE RESIGNS

The announcement is made of the resignation of executives of the International Nickel Company of Canada, namely, A. D. Miles, president, G. E. Sylvester, assistant to the president, and W. M. Bennett, treasurer. The resignations have not been accepted as yet, and until the board of the parent company in New York meets the local organization will be managed from the New York office. While the demoralized condition of the nickel market and the clouded prospects created by disarmament proposals are given as reasons for present complications it is suggested that possibly other reasons will be discovered in due course. The Sudbury plant was closed down several months ago.

PRESENTATION TO GARFIELD HOOD

Officers and employees at the Swansea, Ont. office and factory of the Steel Co. of Canada, recently presented a silver meat platter to Garfield Hood, upon the occasion of his resignation to take over the position of Sales Manager, of the Ontario Steel Products Co., Gananoque, Ont. Mr. Hood has been associated with the Swansea office of the Steel Co., for a number of years.

Members of the western sales organization, together with several other representatives, showed their appreciation of their old business associate at a dinner given by W. W. Rowland, Works Manager at the Engineers Club. A ladies club bag was presented on this occasion to Mrs. Hood.

IRON FOUNDRIES TO OPERATE THIS WINTER

Fort William, Ont.— Charles L. Jobb, General Manager of the Canada Iron Foundries said in an interview that the company would operate its Fort William plant during the winter. It had been rumored the plant would close down. Mr. Jobb said the appointment of A. C. Adams as manager of the local plant was permanent. Mr. Adams was chosen following the death of D. W. Davies, heretofore manager for 15 years.

CAUGHT WEASEL IN HARDWARE STORE

Stratford, Ont.—J. R. Myers and Sons, hardware merchants. recently had in their store an animal which is very seldom seen in this part of the country, and especially in the heart of the city. It is what is known as a golden weasel. For some time this one had been in the store, but it was not until a short time ago that Mr. Myers found out what it was. and then a trap was set for it. Being very sly, the weasel ate the bait and then made off. but when the second trap was set, the animal was caught, but it made a strong fight for liberty and had to be shot.

INCORPORATION

Samuel & Benjamin, Ltd., composed of S. Samuel, merchant, George T. Pepall, manager. C. Miller, H. M. Samuel and W. T. Louden all of Toronto and F. D. Benjamin of London, England. has been formed to purchase the business carried on in metals in Toronto under the firm name of M & L. Samuel Benjamin & Co. Capitalization of the new company is $2,000,000, head office in Toronto.

J. D. CHAPLIN ELECTED TO PARLIAMENT

Among the successful candidates who were elected to the Federal Government in the election just concluded is J. D. Chaplin, President The Welland Vale Mfg. Co., St. Catharines, Ont. Mr. Chaplin is Conservative member for Lincoln, Ontario.

CYCLONE FENCE CO. POSTPONE OPENING IN CANADA

Following the recent announcement of the expected opening of a Canadian plant in Hamilton, Ont. for the Cyclone Fence Co., Waukegan, Ill., rumors were current that this extension was not to take place. On making enquiries Hardware and Metal has been informed by the head office of this company that it was planned to have machinery ready for shipment and in operation in Hamilton by November 1, but it has been found necessary to retain this machinery in Waukegan to take care of U. S. trade. The company states that it will be at least a year before it will have additional machinery ready to manufacture its wire products in Canada.

F. R. WHITTALL PRESIDENT MONTREAL EXPORT CLUB

Montreal—F. R. Whittall, managing director the A. R. Whittall Can. Co. has been elected president of the Export Club of Montreal and district which was recently organized under the direction of the Canadian Manufacturers' Association and endorsed by the Department of Trade and Commerce. The Montreal Export Club is a branch of the National Export Clubs and is affiliated with the C. M. A.

F. R. WHITTALL

T. P. Howard was elected honorary president by acclamation; Kenneth Laws of the National Breweries, 1st vice-president, and J. A. Lapres, of Canada Cement Company, 2nd vice-president.

Congratulations!

J. FRANK WHITE

London Rolling Mills Co., London, Ont., who has been elected Conservative member of the Federal Government representing London. (Photo by courtesy International Press Ltd.)

JOSEPH HARRIS

W. Harris and Co., Toronto, manufacturers of glue, etc., who was elected Conservative member for East York in the Federal election.

E. B. EDDY CO., TAKES OVER DOMINION MATCH CO.

Management of the Dominion Match Company is now being assumed by the E. B. Eddy Company of Hull, Que., which purchased the factory of that concern at Deseronto, Ont., in July, 1920. Changes in management are now being made.

W. S. Morden, who was President of the Dominion Match Company, has severed his connection with the company and could not state what policy the Eddy firm would adopt in connection with the Deseronto factory.

NEW PREMISES FOR HARDWARE FIRM

N. Pelletier & Fils hardware merchants, Drummondville, Que., are building a new block of three stores and six apartments on Main St. Drummondville. It is the intention to move the business to the new block and carry on the present store as a branch. The new block is modern in every respect.

BELGIAN FAIR TO BE HELD

The "Third Official Commercial Fair" will be held at Brussels from the 3rd to the 19th of April, 1922. Belgium ranking among the important customers of Canada—the total exportations of Canadian produces to that country, during these last 12 months, amounted to nearly 30 million dollars—it is expected that Canadian manufacturers and producers will be interested in this commercial event.

E. B. RYCKMAN ELECTED

E. B. Ryckman, Vice-President Dunlop Tire & Rubber Co., Toronto, was elected Conservative member for East Toronto in the Federal election.

HIGHER LINOLEUM PRICES SAYS BRITISH MANUFACTURER

A. H. Dewar, Managing Director of the Greenwich Inlaid Linoleum Co., Ltd., London, England, was a visitor to Toronto recently. He is making his first business trip to Canada and the United States, although his company has done business here for some years past and has a branch organization in the United States. Mr. Dewar is accompanied by the firm's manager. Speaking of conditions in the linoleum industry in the United Kingdom, he stated that the relations of employers and employees are harmonious. Asked as to whether the price of British linoleums are likely to decline, Mr. Dewar expressed the hope that this would be the case in the comparatively near future. He added that the price of linoleum in the United Kingdom, however, had never risen to the percentage extent as had the prices of raw materials entering its manufacture, including cork, canvas and linseed oil. Mr. Dewar also visited Montreal in company with his Canadian representative, J. B. Jamieson of Toronto.

"Hardware & Metal Christmas Window Contest"

Christmas Window Contest

EIGHT PRIZES are offered by **Hardware and Metal** for the best window displays of Christmas lines, as arranged for this year's trade by hardware merchants or their retail salesmen.

The contest is open to anyone engaged in the retail hardware business in Canada and the displays will be given a fair and authoritative judgment.

The essential point to keep in mind is that the display will be judged on its effectiveness as a business puller. Many points outlined in past contests of Hardware and Metal as to most effective window trims, should be kept in mind in arranging the contest display. Attractiveness without effectiveness is of little use in a window trim.

Arrange a window which will, literally, draw the passers-by right into your store, then send a photo of it to be entered in the contest.

THE EIGHT CASH PRIZES

Places under 5,000		Places 5,000 and Over	
First prize	$10.00	First prize	$10.00
Second prize	5.00	Second prize	5.00
Third prize	3.00	Third prize	3.00
Fourth prize	2.00	Fourth prize	2.00

Dealers in small communities have just as much chance under this arrangement as those in larger districts. Getting selling ideas into the display is what counts.

The contest closes on Monday, January 2. Photos placed in the mail after that date will not be entered.

All matter must be addressed to The Editor, Hardware and Metal, 143 University Avenue, Toronto, and marked "For Christmas Window Contest."

Don't overlook the prizes and the honor of winning one

The Suitable Present

THAT is what every Christmas shopper is looking for. The hunt for gifts is now at its height. The window of Christmas gift suggestions now has the best opportunity of "pulling" customers into the store.

Most shoppers are looking for practical gifts, those articles which the recipient will appreciate as being of some real usefulness and value. Hardware represents many suitable lines for all members of the family and effective window trims can be made of lines which will appeal to all classes and types of people.

The dressing of a window of Christmas goods which will comprise the selling points necessary to stimulate such trade is

A Real Accomplishment

If you are proud of your display, enter it in the Hardware and Metal Xmas Window Contest. Participation in this contest will give you an opportunity of comparing your window dressing with that of other salesmen. You will learn many valuable pointers and you have a good chance of securing the honors attached to the winning of the eight prizes.

Do not be too busy to overlook sending in a photograph of your best Christmas display as an entry. If you are just now planning on your best display for the Christmas season, make a note to have a picture taken at the first opportunity and send it to the Editor.

Preserve the memory of your best Christmas display by having it recorded among the honored ones in the Hardware and Metal Christmas Window Contest.

Time is getting short.
Arrange NOW to enter a photo in this year's CONTEST.

For the Man Behind the Counter

Selling Satisfaction With Each Item

A Sale is Not Complete Unless the Customer is Rightly Convinced. Four Progressive Steps in the Sale of an Article.

NOT so many years ago salesmanship simply meant selling something. To the man behind the the counter it conveyed the idea that he must relieve the shelf of an article, transfer it to the hands of the man or woman he was serving, and in return get it face value in cash. Returns in the cash drawer at the close of the day, with no thought of under what conditions the sale was made, was his whole ambition.

Salesmanship prevailing at that time has had to undergo some severe revsion to be applicable to the science of selling as it is now oractised. Not that the total sales registered in one day's work has lost any of its importance, for that is still the most significant factor. However, selling satisfaction with each item now accompanies the art of extracting money from the consuming public. The return of goods pays no credit, and com plaints against merchandise sold under the least bit of doubt or misunderstanding are certain to produce a come-back in more ways than one, reflecting on both store proprietor and salesman. The The return of a satisfied customer rather than goods, is really the aim of the present-day successful salesman.

It is said there is no mystery about salesmanship. Perfection in selling is merely the application of common sense, carefully attending to details, a thorough knowledge of the goods to be sold, and most important, to be your own critic, noting whether you are doing things right in the course of a day's work. For the purpose of analysis four steps in the making of a sale are suggested; namely, greeting, showing, convincing and closing.

Greeting

The approach to a customer, if prompt and of such a manner as will convey willingness to serve, will always cause a lasting impression. Bearing, personal appearance, attitude toward customer's wishes and tone of voice are other manners to be present. The salesman's approach is practically the selling of himself to the customer.

Showing

After having had time to judge the quality or grade of merchandise you think the customer will want, it is well to show this line, but follow by offering a better quality immediately after. If the price is within means, it is always well to sell the highest quality possible.

A variety of goods for selection and placing these within easy reach is always appreciated, and assists toward a deeper impression being created.

It is yet to early for too many questions to be asked. Demonstrating the use of, and offering suggestions, are more opportune at this period. Your method of showing and what you have to say should create interest at once, and the interest will be apparent if the customer handles the different articles. The next step in the sale comes as a matter of course by following up any interest aroused by your first remarks.

Convincing

Be positive in your statements regarding quality. This is here mentioned because you are entering the most important step of the sale. Interest aroused in the showing may be intensified by further pointing out reasons why the customer should buy the apparent choice. Compare this selection with other goods and demonstrate beyond question, the fact that the article, or goods, are exactly as represented. Answer questions promptly. Asking others will often help to overcome faults which the customer may think he or she has found. A liberal use of selling points, through knowledge gained by studying beforehand, so as to be prepared for any unusual questions, will usually bring forth a decision to buy.

Closing

When the customer is thinking favorably about the goods it is well to commence closing the sale, but tact and careful handling is necessary at this period. Very often too much haste is apparent on the part of the salesman and there is here a danger of losing all. There may be one or two other customers waiting, but one sold is often worth two unsold. The customer should be in-

(Continued on page 60)

Neighbor Brown's Reason

"How is it that you never trade at the fine Billville Hardware Store?" I said to my grizzled old neighbor, Farmer Brown; "I notice that you trade with Joe Sundstrum, the same as I do."

"Well," said my shrewd old neighbor, "I will tell you. You remember that time when nails were as scare as hen's teeth. Joe ran out of eights. 'Mighty sorry,' says he; 'I'm as dry as the Great Sahara! Wish I could get 'em for you, but I can't. Try that new outfit up the street.' That's Joe all over; he will get anything possible for you, or send you to a competitor's, or do anything under the sun to help you!

"So in I went to the new Billville Hardware Store. Nice looking store but that dudish young clerk looked at me as if he would like to have said: 'Say, but you are small potatoes and mighty few in the hill.' By the time that fellow had given me the twice over I was sure that I was a worm of the dust, just as those old hymn writers say. Why, I had to screw up my courage before I said: 'Three pounds of nails, eights.'"

"That young fellow looked at me as he might have done if I was a highway robber, or had been caught stealing sheep. At last he spoke, and this is what he said: 'Nails; eights, at that! We have an awful time to keep our regular customers supplied with eight penny nails!' 'John,' he called to another clerk, 'are there any eight penny nails left in that bin?'

"'Why, yes; quite a supply in the bin;' replied the other young fellow—who really appeared human!

"'You are a lucky man;' said my clerk—rubbing it in some more—as he jammed the nails into a paper, and left a fringe of them standing out, like quills on a porcupine. Had to stand up in the car, going home, and I jabbed a strange lady in the ribs; don't suppose that she has forgiven me yet!

"Anything more?' said he, in a voice as cold as the North Pole and as juiceless as a frozen orange.

"'No,' said I, 'I had thought of buying a new cultivator, and a washing machine, and a few carpenter tools, but I am afraid tht you will not have enough for your regular customers.'"

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

LOWER quotations of varying extent are recorded on some line of builders' hardware this week, while other price recessions include malleable fittings, both black and galvanized pound goods being reduced. Lower prices are also effective on rubber belting, this change following the recent declines in other rubber products. Thermos goods, carborundum stones, adjustable implement brackets, narrow brass butts and one line of ash sifters, also register downward price developments. Western markets report easier quotations on post hole augers, wrought steel shelf brackets and Potts' sad irons.

Due to the continued strength of certain metals on the primary markets, all grades of solders are quoted at advanced price levels. Tin, lead and spelter have been much firmer during the past few weeks and this upward tendency is now more pronounced with slight price gains on some ingots. Increased quotations are also noted in certain non-ferrous scrap metals, while other waste material prices are considerably firmer.

The roofing market has undoubtedly developed an easier trend and the outcome of the prevailing price situation is awaited with interest. Some settlement in the industry is generally anticipated. No further revision has occurred in soil pipe and fittings, price levels remaining at the wide range offered recently. With the current demand exceptionally brisk, a scarcity of hockey sticks is now reported from some quarters. There is also an active buying movement in snow shovels, with the wooden scoops registering a slight shortage, but supplies of the steel products being good.

Winter goods in general are now recording a fair degree of activity, while business in Christmas wares is generally quoted as very brisk. Hand sleighs, glass ovenware, flashlights, cutlery, brass goods, plated ware, electrical goods and carving sets, are among the seasonably active lines.

MONTREAL MARKETS

MONTREAL, Dec. 8—Price developments, both upward and downward, again feature the current market reports. The trend of the market in general continues to be in the downward direction, although from time to time an advance in quotations is encountered. This week all grades of solders are quoted higher, due to the continued strength of metals on the primary markets. The asphalt roofing situation still attracts attention, with the lead of one manufacturer—who announced a substantial reduction on December 1st—followed by other sources, although the extent of the decline is not so extensive.

A general revision in prices on the various lines of builders' hardware, with an approximate reduction of 10 per cent. on some lines, features the markets, while rubber belting also has new lower prices on the different qualities. A revision is announced on Carborundum stones, with a slight reduction made on many kinds. Pound goods are reduced in some quarters, while other pipe fittings are remaining unchanged. Christmas trade is now being carried on in earnest throughout jobbing circles, and other lines with usual winter demands are selling quite satisfactorily. There is a shortage of wooden snow shovels and hockey sticks, but relief is expected in the near future.

SOLDERS SHOW PRICE ADVANCE

Montreal.

Through the continued strength of metals chief in their manufacture on the primary markets, solders are this week advanced in price one and one-half cents per pound on all grades. Other lines, such as lead traps and bends are holding at unchanged figures for the present, but it would not be surprising if the firm tone in the market would result in a further development, covering these lines. Tin, lead and spelter each show marked strength on the ingot markets, price advances being named in each case this week. The tendency of lead products has been on the firm side for a past number of weeks, pending further strength in the primary sources, and it has been generally believed for the past few weeks that any price development would be in the nature of an advance. The buying movement is seasonably slow at present, with following prices now quoted:

LEAD AND ZINC PRODUCTS

Lead pipe, per 100 lbs.	12 50
Lead waste, per 100 lbs.	13 50
Note—Lead pipe is subject to a discount of 10 per cent.	
Lead traps and bends	10% off
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10½
Lead sheets, 3 to 3* lbs., sq. ft., lb.	$ 10¼
Do., 4 to 8 lbs., sq. ft.	0 09½
Cut sheets ¼c lb. extra, and cut sheets to size, ¾c lb. extra.	
Solder, guaranteed, lb.	0 27½
Do., strictly, lb.	0 25
Do., commercial, lb.	0 23
Do., wiping, lb.	0 23
Do., wire, lb.	0 36½
Zinc sheets, casks	0 11½
Do., broken lots	0 12

SOME LINES OF BUILDERS' HARDWARE ARE REDUCED

Montreal.

A revision in prices is announced by manufacturers of builders' hardware, and while the reduction varies, some lines are affected to the extent of a 10 per cent. lowering in prices.

SLIGHT REDUCTION IN CARBORUNDUM STONES

Montreal.

A revision in the prices of the various kinds of Carborundum stones is announced, with a slight reduction on almost all lines. Following are new quotations on some of the better known stones:

Carborundum Stones, dozen—No. 117, $17.00; 121,, $13.20; 23, $13.20; 43, $7.40; 44, $7.40; 112, $9.75; 180, $10.40; 182, $10.40; 76, $5.40; 78, 10.80; 330, $5.00.

LOWER PRICES ON RUBBER BELTINGS

Montreal

Following other products of rubber manufacture, rubber belting is now quoted at lower figures. Through the general revision, the reduction varies from 7 to 15 per cent. on the various qualities. Following are the new discounts on the Dunlop line:

RUBBER BELTING—	
Gibraltar Red Special	47%
Acme Red Special Light Duck	52%
Regular Rubber Covered Belting—	
Peerless	47%
Reliance	55%
Banner (6" and under only)	58%

POUND GOODS NOW HAVE EASIER TONE

Montreal.

An easier tone has again developed in the market for pipe fittings and is thi week pronounced in a slight reduction made in pound goods in some quarters. A reduction of one cent per pound is announced by some jobbing houses, but owing to still lower quotations formerly existing in other quarters, prices quoted below are nominally unchanged. Other pipe fittings are for the present unchanged, and following are present discounts:

FITTINGS—	
Cast Iron fittings	20%
Bushings, cast	27½%
Do., malleable	25%
Flanges	37%
Plugs	27½%
Flange unions	22½%
Malleable unions	42½%
Dart unions, black	33%
Do., galvanized	13%
Nipples, ⅛ to 4 in, close and short	50%
Do., long	60%
Do., 4½ to 8 in., close and short	40%
Do., long	50%
Couplings, 4 in. and under	30%
Do., 4 in. and longer	10%

	Black.	Galv.
Class A	0 53	0 65
Class B	0 21½	0 28¼
Class C	0 14	0 21½
POUND GOODS—		
Class A	0 53	0 65
Class B	0 20½	0 28¼
Class C	0 14	0 21½

SHEET MARKETS NOW MUCH QUIETER

Montreal.

The current demand for sheets and plates shows a further slackening with the approach of the holiday season and the close of the year. Outside merchants are undoubtedly desirous of bringing their stocks to the minimum for the stock-taking period and the commencement of the new year. The immediate situation at primary sources is little changed, light demand and competition still causing a weakness in the market.

Local distributors are looking to the new year with a certain amount of optimism. Reports from the mills state that unusual interest is manifest for the first quarter and first half, and this it is felt will reflect to an extent on the local market. Although the question of prices is very uncertain, it is generally believed the heavier buying movement in the opening months will automatically bring about a steadier situation, with higher quotations not unlikely. Present prices remain nominally unchanged.

BAR IRON AND STEEL PRICES UNCHANGED

Montreal.

Prices and the general tendency of the market for bar iron and steel is little changed this week. There is a slightly easier tone again in primary circles but little development is looked for until after the close of the year. A brighter outlook is forecast for the opening months of the new year, as reports from the mills indicate a steadier market through the interest shown for the first quarter. The general position of the industry was outlined by one large local dealer, who stated that only a limited amount of buying should stiffen the market in the earlier part of the new year. Undoubtedly the requirements, both domestic and foreign, are great, and with a fair buying movement the tone of the market should be much better than has prevailed all during the year. Prices are now at a much lower level than for the opening of the present year, this alone thought to be the strong factor to produce a greater volume of business.

Common bar iron, 100 lbs.	2 90
Refined iron	4 40
Irish finish machinery steel	2 95
Mild steel	2 90
Single reeled machinery steel	4 75
Band steel	2 90
Spring steel	4 50
Slighshoe steel	2 90
Tire steel	3 10
Toe calk steel	3 80
Harrow tooth steel, per lb.	3 05
Mining tool steel per lb.	0 22
Black Diamond tool and cast steel, per lb.	0 22

NOTE.—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

NO FURTHER CHANGE IN CORRUGATED SHEETS

Montreal.

No further change has taken place in the situation on corrugated sheets since the reduction in all gauges three weeks ago. The plain galvanized sheets are still on an easier trend, and prices on these are again slightly lower in some quarters. However it is thought a more marked reduction would have to appear before a reflection would be cast on corrugated sheets, and a continued easier trend in the sheet markets is necessary before any further change can be made, especially at this season when business is seasonably dull. Following are list prices and discount:

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 7½ per cent.

Lighter than 24 gauge and wider than 27 ins., 75c a square extra.

SCARCITY OF HOCKEY STICKS IN SOME QUARTERS

Montreal.

Supplies of many grades of hockey sticks are now exhausted in some quarters. Jobbers state the present season has been very active for sticks, and with a curtailmeint in production, they have not been able to keep pace with the brisk demand. Further supplies are expected in the near future, before any serious shortage is felt.

ASPHALT ROOFING STILL UNSETTLED

Montreal.

Following the announcement of one large manufacturer, that a substantial reduction would be made December 1st, on their asphalt roofing, is the information that other manufacturers have put into effect new prices, but varying in extent. Others again are still withholding any announcement, apparently awaiting full developments in other sources of the industry.

The situation has developed into a very unsettled feeling, and up to the present it is problematic whether other manufacturers will follow the lead of an approximate 20 per cent. cut in many lines. The booking for next year commences this month, this making the situation more complicated, as it would not seem likely that other factors in the industry would maintain higher prices and allow one source to obtain a good percentage of the business at lower levels. The trend of the market is undoubtedly in the downward direction, but the extent of a decline, resulting from the present unsettled conditions can not be given as generally effective.

BRASS AND COPPER GOODS UNCHANGED BUT FIRM

Montreal.

Copper sheets, rods and tubing are unchanged since the price advance recorded last week in sheets. The undertone of the market is still very firm, and copper on the primary markets this week is quoted at higher figures. Brass goods do not display the same amount of strength as their allied products, but the tendency on these is also one of steady to firm owing to the improved position of metals in general on the ingot markets. Following are unchanged prices:

	Base.
BRASS—	
Sheets, base	0 25
Rods, base ½ to 1 in., round	0 23
Tubing, seamless, base	0 32

F. o. b. Montreal.

COPPER—	
Rods, ½ to 2 in.	0 30
Soft sheets, plain, 16 oz. and heavier	0 34
Plain tinned, 16 oz. and heavier	0 39
Polished and tinned, 16 oz. and heavier, lb.	0 43
Tubing, lb.	0 34

Above prices are full sheets and bars. Cut sheets and bars are 5c per lb. higher.

ACTIVE DEMAND FOR SNOW SHOVELS

Montreal.

Jobbing circles report a very active demand for snow shovels, the early fall of snow, extending very general over the country, providing this spurt in sales. Stocks are well sorted in steel shovels, and quite ample to meet the increased demands, but there is a noticeable shortage in some quarters of the wooden shovels at present. An improvement in this connection is expected in the very near future, as further supplies are expected to arrive at any time.

NO FURTHER CHANGE IN SOIL PIPE

Montreal

Quotations on soil pipe and fittings remain unchanged since the reduction of a few weeks ago. Although local quotations are considerably lower than on western markets, dealers state there is no immediate sign of revising to a more comparative level with other centres, and the market continues fairly steady for the present. Following are local discounts:

SOIL PIPE—	
2 and 3 inch	47½%
4 inch	50%
5 and 6 inch	47½%
Fittings—	
2 to 6 inch	50-10%

CHRISTMAS WARES REGISTER ACTIVITY

Montreal.

There is the usual brisk demand among jobbing circles for cutlery, brass goods, plated ware and electrical goods with the approach of the holiday season. Carving sets, which were very hard to procure last season, are enjoying an unusually active buying movement. With two full weeks ahead, jobbers are satisfied that a good season will be had this year, and compare favorably with last year.

DEALER TRADE MODERATE IN AXES AND CROSS-CUT SAWS

Montreal.

The movement of axes and cross-cut saws among the dealer trade is so far fairly satisfactory. There is a falling off in requirements of the larger character for the lumbering industry in the province, owing to the cutting of timber not being carried on as extensively this year. It is expected, however, if the present movement is maintained, that sales will have reached a satisfactory record at the close of the season through the channel of the smaller dealers.

RANGE BOILER MARKET STILL UNSETTLED

Montreal

There is little change in the situation on range boilers, the 30 gallon boiler still attracting attention through the variation in quotations among the jobbing houses. The price of $9.25 is being maintained by some wholesalers who state that a fair amount of business is being done at this figure. However, $8.75 and $9.00 are still being quoted on this standard size. Following is standard list of prices:

RANGE BOILERS—	Standard.	Ex.Heavy
30 gallon	9 25	11 75
52 gallon	21 00	26 00
35 gallon	12 00	14 50
40 gallon	14 50	17 00
52 gallon	21 00	26 00
66 gallon	30 00	36 00
82 gallon	37 50	50 00
100 gallon	48 00	58 00
120 gallon	57 00	67 00

BOILER TUBE PRICES ARE HELD

Montreal.

Current quotations on the various sizes of boiler tubes are holding with the buying movement displaying little activity. The close of the year is now at hand, and little increased activity is looked for, although the winter months usually bring a fair demand for repair work. Following are prevailing prices:

BOILER TUBES—	Seamless.	Lapweld.
1 inch	26 00	.....
1¼ inch	27 25	.....
1½ inch	26 25	.....
1¾ inch	29 75	25 00
2 inch	28 00	22 00
2¼ inch	32 00	25 00
2½ inch	40 00	27 00
3 inch	44 00	35 00
3½ inch	60 00	40 00
4 inch	75 00	56 25

ADVANCES IN SOME INGOT METALS

Montreal

Ingot metal markets remain quite firm in tone with some lines showing marked strength. It is to be hoped that the advance generally will not be too rapid as it will only keep buyers from coming into the market. Generally speaking, the situation can only be described as strong.

TIN.—London continues strong and has now had a straight advance of nearly £15 per ton without any reaction to speak of. It is possible there might be a slight easing off, but the market is certainly firm to-day. Quotation is advanced to 38 cents.

COPPER—The New York market is firm and prices have touched the highest level in many months. Electro is there quoted at 13¾ cents. Locally, electro is quoted at 18 cents, castings at 17¾ cents.

LEAD.—London continues very strong and there is evidently a scarcity of prompt lead in that market. This is reflected to some extent on this side, and all markets are firm. It is a question however, whether present prices can hold indefinitely. Local price advanced to 7½ cent.s

SPELTER.—The American market is firm and while demand is light at present, offerings are also limited. A substantial premium is asked for futures. Local quotation is slightly increased to 8 cents.

ANTIMONY.—This metal has not responded as others have done, and the market is comparatively dull with no change in prices. Chinese is quoted at 7 cents, high grade English at 8 cents.

ALUMINUM—No change is recorded in either price or market tendency of aluminum. This metal has remained !!d cedr!! vsa?rea GSgt!! pvn, auauaa featureless on the market for some months. Present quotation is 27 cents.

TORONTO MARKETS

TORONTO, Dec. 8—Price changes, including both increases and recessions, again appear on the current hardware markets. New builders' hardware quotations are prominent among the declines, while the manufacturers of Thermos products announce a reduction of from 10 to 20 per cent. on kits and bottles. Lower prices are also given on one line of ash sifters, while another reduction is recorded in pound goods, both black and galvanized showing a concession of one cent per pound.

Advanced price levels are recorded on all grades of solders, this change reflecting the firmer market on metals entering into the manufacture of these products. Slight price gains are noted on non-ferrous scraps and other waste material levels are also firming up. Both solid and sectional sash weights register small price increases.

LOWER PRICES ON ONE LINE OF ASH SIFTERS

Toronto.

The manufacturers of the Samuel "Dustless" line of ash sifters have announced that prices on these products will be reduced to the trade for one month only, commencing December 15, until January 15, 1922.

ADVANCED PRICE LEVELS QUOTED ON SOLDERS

Toronto.

Metals entering into the manufacture of solders show recent gains in price on the ingot markets, and consequently quotations on solders of all grades have been advanced in proportion. The extent of the increase is 1½ cents per lb., and is a reflection of the firm tone which has recently prevailed in the market for lead and zinc products generally. Following are the revised price levels:

LEAD AND ZINC GOODS—	
Lead pipe, list, per lb.	0 12½
Lead waste pipe, list, per lb.	0 13½
Do., over 8 in., list, per lb.	0 14½
Lead pipe is subjected to a discount of	10%
Lead traps and bends	10%
Lead sheets, 4 to 6 lbs. sq. ft. in rolls, lb.	09½
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, per lb.	0 20½
Do., strictly, lb.	0 23½
Do., commercial, lb.	0 21½
Do., guaranteed, lb.	0 25½
Do., wiping, lb.	0 21½
Zinc sheets, per lb.	0 12

THERMOS PRODUCTS SHOW SUBSTANTIAL DECLINE

Toronto.

A new retail price list is now being distributed by the Thermos Bottle Co., announcing revised lower prices on various Thermos products, effective January 1, 1922. This change particularly affects bottles and kits, and the reduction varies in extent from 10 to 20 per cent on the different lines.

BUILDERS HARDWARE NOW SHOWS PRICE DECLINE

Toronto.

According to a current announcement by the manufacturers, prices on builders hardware now show another reduction. The actual extent of the decline, affecting each particular product, records some variation, but is generally expected to be in the neighborhood of 10 per cent.

SLIGHT PRICE INCREASE ON SASH WEIGHTS

Toronto.

Some slight advances are announced locally in prices on sash weights. The revision brings quotations on the solid type to $2.50 per 100 lbs; while the ½ lb. sectional is now priced at $2.85.

SLIGHT PRICE GAINS IN NON-FERROUS SCRAP

Toronto.

Additional higher prices have appeared in the scrap material markets, these changes chiefly affecting heavy melting steel, and steel turnings; also non-ferrous metals such as heavy copper and wire, light copper, heavy yellow brass, and scrap zinc. There is a little more activity reported, but the degree of improvement has been very slight; the higher quotations resulting from the strength apparent in certain primary markets, together with a feeling of confidence. Dealers average buying prices for fairly large quantities are as follows:

Gross Tons— Scrap Iron		
Heavy melting steel (Hamilton)	$11 50	$12 00
Borings and turnings	2 50	3 50
Rerolling rails	10 50	11 50
Scrap pipe	6 00	7 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	6 50	7 50
Agricultural malleable	10 00	11 00
Railroad malleable	11 00	12 00
Net tons—		
No. 1 cast	15 00	16 00
Stove plate	11 00	12 00
Grate bars	10 00	11 00
Standard car wheels	13 50	14 00
Scrap Metals.		
Heavy copper and wire	10 50	11 50
Light copper	8 00	9 00
No. 1 composition	9 00	10 00
No. 1 comp. turnings	6 00	7 00
Light brass	3 25	3 75
Heavy yellow brass	5 50	6 50
Heavy lead	4 00	4 50
Tea lead	2 00	2 50
Scrap zinc	4 00	4 50
Scrap Rubber		
Boots and shoes	2 50	3 00
Lumbermen's rubber boots	2 00	2 50
Auto tires	0 50	1 00
Solid tires	0 75	1 25

FAIR ROPE BOOKINGS FOR SPRING BUSINESS

Toronto.

Manufacturers and distributors of rope and cordage report that the proportion of booking for spring business has been fairly active. Quotations are unchanged, with the prevailing price levels guaranteed against decline until April 1, 1922.

A firm situation has recently developed in the American rope markets, with manilla fibre recording a strong movement. Some price advances have been reported from these quarters.

LOCAL SOIL PIPE QUOTATIONS REMAIN UNCHANGED

Toronto.

No further change has developed in the market for soil pipe and fittings, and the general local situation remains as outlined in last week's issue of Hardware and Metal. Prices remain steady on the domestic products, with the local distributors hoping for an early improvement in the Montreal trade conditions. Indications that a settlement will be made as regards the recent lower quotations, are prevalent; while business is seasonably dull in these products. Following is the local discount list:

SOIL PIPE—	
2 inch	25%
3 inch	30%
4-inch	30%
5 and 6 inch.	30%
8 inch.	net
FITTINGS—	
2 to 6 inch fittings	40-10%
8 inch fittings	net

ANOTHER REDUCTION IN MALLEABLE FITTINGS

Toronto.

Another minor reduction is recorded in malleable pipe fittings, this change affecting all classes in both black and galvanized. The extent of the decline is one cent on each grade, and the revised quotations are included in the lists given below.

PIPE FITTINGS—	Per cent.
Cast iron fittings	25%
Plugs, cast iron	28%
Do., solid	28%
Do., countersunk	28%
Bushings, mall	28%
Bushings cast	28%
Unions ¼ in. to 2 in.	45%
Unions, ⅛ in., 2½ to 4 in.	45%
Flanged Unions	25%
Dart Unions, blk., ⅛ to 2 in.	33½%
Do., ⅛ in., 2½ in. and larger	23%
Nipples, blk., and galvd. ⅛ to 4 in., close and short	50%
Do., 4½ in. and larger	40%
Do., long, ⅛ in. to 4 in.	60%
Do, 4½ inch and larger	50%
Do., running thread	30%
Couplings, 4 in. and under	30%
Do., 4½ in. and larger	10%

MALLEABLE FITTINGS—	Black	Galvanized
Class A	0 54	0 67
Class B	0 22	0 32
Class C	0 14	0 22

SHADING OF RANGE BOILER PRICES NOT GENERAL

Toronto.

An odd instance or two of price shading on range boilers continue to be reported from various quarters, but it is claimed that there is no general prevalence of this situation. Market conditions in these products are quieter at this season, due to the inventory period being at hand. The nominal price list remains unchanged, as follows:

RANGE BOILERS—	Standard	Ex. Heavy
30 gallon	$ 9 25	$ 11 75
35 gallon	12 00	14 50
40 gallon	14 50	17 00
52 gallon	21 00	26 00
66 gallon	30 00	36 00
82 gallon	37 50	50 00
100 gallon	48 00	58 00
120 gallon	57 00	67 00

BUSINESS IN CORRUGATED BECOMING QUIET

Toronto.

No further changes have been announced in the corrugated sheet market since the revision to lower price levels recently effective. The primary sheet markets continue to register easier tones, but whether further recession will show development in the future is considered contingent upon the current demand. Business in corrugated is naturally entering upon the quiet season, as the prevailing weather conditions mitigate against outdoor activities at this season of the year. Current quotations follow:

Corrugated—	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50
Less 7 ½ per cent.	

Lighter than 24 gauge and wider than 27 ins., 75c a square extra.

ONLY MODERATE SALE FOR CONDUCTOR PIPE

Toronto

The current sales for eavestrough, conductor pipe and elbows are naturally becoming less prominent as regards volume, owing to the advanced season. The recent discounts are remaining in effect as follows:

TROUGH (Eave)—
O. G. Square Bead and half round. Size in girth:

	Per 100 ft.
8 in.	15 90
10 in.	17 70
12 in.	21 20
15 in.	28 80
18 in.	36 50
Less 70 per cent.	

PIPE (Conductor)
Plain, round or corrugated.

	Per 100 ft. in 10 ft. lengths.
2 in., in 10 ft. lengths, list	18 40
3 in. in 10 ft. lengths, list	22 30
4 in. in 10 ft. lengths, list	29 60
5 in. in 10 ft. lengths, list	40 00
6 in. in 10 ft. lengths, list	49 00
Less 70 per cent.	

ELBOWS (Conductor)	
2 inch, list	5 25
3 inch. list	6 00
4 inch. list	10 50
5 inch, list	24 00
6 inch, list	29 00
Less 60 per cent.	

TREND OF CRUDE OIL PRICES REFLECTED IN REFINED PRODUCTS

Toronto.

Quotations on gasoline, lubricating oils, and oil products generally, are reported holding at revised levels. At this season of the year, consumption of gasoline is decreasing in volume, and the ratio of burning oil consumption is on the increase. However, these factors are not considered of such vital importance on the domestic markets, compared with the trend of crude oil prices at primary centres. The recent upward price movement has been more or less directly reflected in local quotations, and with refiners maintaining present figures, recessions from the prevailing levels are not loked for at this season.

Activity in the export markets is not so marked as previously anticipated, although the fact that the Standard Oil Co., of New York, recently awarded a contract to the Cunard Steamship Co., for the transportation of 1,000,000 cases of refined oil to Mediterranean, and other European ports, indicates that there exists a certain proportion of

foreign business. The higher prices now prevailing, however, are described as retarding active development of the markets available in this direction.

Gasoline is generally considered as the most important factor among refined oil products, and with the expansion in the automobile industry, the growth in the motorist trade has been measured year by year in the increased demand for gasoline.

REPORT FAIR SEASONAL SALE FOR ICE SKATES

Toronto.

While dealers report that a fairly satisfactory movement of ice skates has already been recorded, yet the demand has not reached the general heavy seasonable proportions. Current stocks are described as fair, and equal to cover early requirements. With the advent of winter, and the commencement of winter sport activities generally, an improvement is looked for in the volume of sales for these products.

CURRENT PIPE MOVEMENT DESCRIBED AS FAIR

Toronto.

The demand for tubular goods has shown no material change, the movement continuing somewhat irregular in demand, and spasmodic in quantity. Dealers describe current sales as fair for this season of the year, and piping prices are unchanged, with list No. 53 remaining in effect.

In jobbing circles there is reported to be some signs of more activity; producers are stated to be operating up to very fair proportions of capacity. On the whole, of course, there has recently been a slight recession in demand, this being a seasonal change in that direction. Pipe list No. 53, is contained in the current market quotation pages.

ONLY MODERATE DEMAND NOW FOR CEMENT

Toronto.

The movement in cement is reported to have registered a falling off from the degree of activity apparent a few weeks previous. The current demand is therefore, more routine, with only moderate sales anticipated. Prices are holding unchanged, at present, but the opinion has been presented in some quarters that recessions may develop with the end of the present season. The prevailing quotations follow:

CEMENT—Car load lots.	Toronto
Per barrel	4 00
Less car lots.	
Per barrel, f.o.b. yard	4 75
Per barrel, delivered	5 00

Single bags, $1.25 each; 4 bags to barrel.
Extra charge of $1.50 per load on less than 24 bag lots.
Rebate of 20 cents for empty bags.

STRENGTH SUBSIDES IN COTTON MARKETS

Toronto

Although the firm tone in the raw cotton circles has now subsided, the material situation as regards cotton waste prices has registered no change. The strength in the cotton markets merely served to maintain current levels on waste, and prevented further recessions at that time. Owing to the fact that waste prices were not advanced in keeping with the higher quotations on manufactured cotton goods, the easier market tone in primary cotton circles is therefore not directly reflected on waste.

COPPER AND TIN ACTIVE IN INGOT MARKETS

Toronto.

Copper prices are hardening in the primary markets, and the general tendency at present is maintaining the strength of the recent upward movement. It is generally claimed that excess supplies of copper are going into consumption channels, but whether this trend will develop permanent stability and thus be reflected in local circles, is difficult to ascertain. The domestic markets are of a hopeful nature, with little change reported. Tin is the only other ingot metal to report signs of definite activity.

COPPER.—The long anticipated and frequently heralded upward movement of copper has evidently materialized during the past few weeks. The strength of the primary markets continues to hold fairly well, and recent price gains remain in evidence. The local situation, however, records very little variation; it being generally described as dull, but hopeful. Prevailing quotations are also unchanged at 17 cents.

TIN.—This metal has recently measured brisk activity on the primary markets, and prices generaly have reflected this development with an upward movement. The average local price is back again at the level of 37 cents, and the undertone is of a firm nature.

LEAD.—The lead markets remain quiet, but the general situation in this metal is also firm. The southern distributing centres report a fair proportion of activity, but no exceptional or unexpected condition. Local price of $6.50, still prevails.

SPELTER.—Quotations on spelter in southern markets are advancing, but these higher levels are attributed to the fact that leading producers of this metal have recently withdrawn from the market as sellers. Some reports indicate that should an improvement in demand materialize at this time, then quotations would go correspondingly higher. However, the price locally shows no change at present, the level of $7.00 being generally maintained.

ANTIMONY.—This market remains quiet, with both conditions and prices unchanged from former levels. From 8 to 10 cents marks the extent of current quotations.

ALUMINUM.—The dullness which has characterized this metal during recent weeks is still in evidence. Prices continue at the previous level of 28 cents.

LONDON MARKETS

LONDON, Dec. 8—Christmas hardware goods are commencing to take due prominence in the current markets. The volume of seasonal trade has recently shown some improvement and with the advent of colder weather, this movement is expected to extend to many other winter lines which are in light demand at present.

Price revisions appear on some narrow brass butts and adjustable implement brackets. Linseed oil and turpentine attract more than passing interest this week, both products being lowered in price. Collections are reported as good in this district.

REVISED QUOTATIONS ON SOME BRASS BUTTS

London, Ont.

Recent new prices announced on narrow and middle brass butts, are approximately 20 per cent. lower than previously. The revised quotation is list plus 20 per cent.

PRICE REDUCTIONS ON ADJUSTABLE BRACKETS

London, Ont.

Adjustable implement brackets are now quoted at reduced price levels. This change affects the No. 31, brackets, which are now revised to $8.15 per doz.

LOWER QUOTATIONS SHOWN ON MOPS AND STICKS

London, Ont.

New lower quotations are announced this week on both mops and mop sticks. These changes include the self-wringing mops and also the crank style. The revised prices are as follows:

MOPS—	Doz.
Self Wringing Mops	4 50
No. 6 Best Mop Stick	2 60
No. 10 Crescent Mop Stick	2 75

LOCAL TURPENTINE PRICES REGISTER DECLINE

London, Ont.

A drop of 5 cents per gallon is recorded in turpentine quotations this week; but in announcing this decline, distributors state that this change is not due to any easing of primary costs, but is merely a reflection of certain elements in the domestic markets. The revised quotations follow:

TURPENTINE—	
1 barrel lots, Imp. gal.	1 20
2 to 4 barrel lots, per Imp. Gal.	1 19
5 gallon lot, per Imp. Gal.	1 35

LINSEED OIL QUOTATIONS AGAIN LOWERED

London, Ont.

The linseed oil markets are providing a price feature this week, quotations being lowered three cents. Require-

ments are described as being of a light nature at this time of the year; and similar conditions apply to the by-products. Following are the new price levels:

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrels, per gal.	0 84	0 87
3 to 5 barrels, per gal.	0 83	0 86
6 to 9 barrels, per gal.	0 81	0 84
Less barrels, add 15 cents gal.		

LAWN HOSE PRICES BASED ON RECENT DECLINE

London, Ont.

As announced in last week's issue of Hardware and Metal, another revision has been made in spring booking prices on rubber lawn hose. The new lower quotations are as follows:

GARDEN HOSE—	
Corrugated—	
½ inch, per 100 feet	$ 13 25
⅝ inch, per 100 feet	15 25
¾ inch, per 100 feet	18 00
Fabric—	
½ inch x 3 ply	$ 9 50
½ inch x 4 ply	10 50
½ inch x 5 ply	12 00
½ inch x 6 ply	13 50
⅝ inch x 3 ply	11 00
⅝ inch x 4 ply	12 00
⅝ inch x 5 ply	13 50
⅝ inch x 6 ply	15 50
¾ inch x 3 ply	13 00
¾ inch x 4 ply	14 00
¾ inch x 5 ply	15 50
¾ inch x 6 ply	17 50
Ideal Wire Bound:	
½ inch x 4 ply, per 100 ft.	14 00
⅝ inch x 4 ply	16 00
¾ inch x 4 ply	19 00
⅝ inch x 4 ply	16 00
Less 5 per cent. in 500 ft. reels.	

HAND SLEIGHS IN BRISK CHRISTMAS TRADE

London, Ont.

Merchants are generally revising their stocks of hand sleighs in preparation for the big Christmas rush. These products have proven popular lines in the present seasonal trade. Quotations on the Canadian Buffalo sled make remain unchanged at list less 35 per cent.

GLASS OVEN WARE IN POPULAR DEMAND

London, Ont.

Exceptionally good sales are reported at this season for glass oven ware. Many of the new designs in the transparent Pyrex line, including fish platters, biscuit pans, and cake dishes, are now offered to the trade. The quotation remains at list less 30 per cent. Following are the list prices on some of thes products:

GLASS OVEN WARE—	List.
Square cake dishes, No. 809	1 75
Do., No. 810	2 00
Oval fish or meat platters, No. 313......	2 00
Do., No. 315	2 75
Oblong biscuit pans, No. 234	1 40
Do., No. 235	1 75
Square casserole, No. 800	3 50
Covered baker, No. 110	3 50
Vegetable dish, No. 130	2 00
Less 30 per cent.	

SEASONABLE SALE FOR CATTLE CHAINS

London, Ont.

A good seasonal sale is reported for cattle chains, this movement continuing throughout recent weeks in fair proportions. Quotations remain unchanged at list less 3-1/3 per cent. Following are the list prices on some of the most popular lines:

CATTLE CHAINS—
Open Ring, Closed Ring and 3 Chain—No. 1, $2.40 doz. list; 1|0, $2.90; 2|0, $3.20; 3|0, $2.50; 4|0, $4.40; 5|0, $5.60; 6|0, $7.00; 8|0, $8.30.
Plus 37½ per cent.

FLASHLIGHTS PROVE GOOD CHRISTMAS LINE

London, Ont.

Flashlights and batteries have been in big demand throughout the Fall, and this line is now enjoying a good Christmas trade. Quotations on the Eveready Daylo line of batteries and cases remain at list, less 33-1-3 per cent. Following are some of the list prices on these products:

FLASHLIGHTS—
Batteries—No. 791, 40c each. list; 790, 40c: 705, 60c; 750, 40c; 751, 45c; 703, 45c.
Cases Only—No. 2602, $1.30 each, list; 2630, $1.55; 2604, $1.65; 2631, $1.85; 2612, $1.85; 2632, $2.15; 2616, $2; 2634, $2.45; 2619, $2.15; 2674, $4.75; 2658, $3.60; 2638, $3.65. Less 33 1-3%.

PUTTY STILL REGISTERS ACTIVE MOVEMENT

London, Ont.

Dealers report that putty is still enjoying a fairly brisk seasonal sale, with prices holding firm at the revised levels announced in the Fall. These quotations follow:

PUTTY—	
Standards, 100-lb. drums, per 100 lbs. ..	6 30
Standard, 25 lbs., per 100 lbs.	6 55
Pure, 100 lb. drums, per 100 lbs.	7 80
Do., 25 lb drums, per 100 lbs.	8 05

LIGHT DEMAND FOR WHITE LEAD

London, Ont.

The prevailing movement of white lead in oil continues of a light nature. This is usual at this season, however. Prices also remain unchanged at the following levels:

WHITE LEAD IN OIL—	Tons.	Less Tons.
Pure, Per 100 lbs.	13 30	13 65
Elephant, per 100 lbs.	13 80	14 15

STILL FAIR MOVEMENT IN WINDOW GLASS

London, Ont.

Sales of window glass continue to be fairly numerous, although the brisk seasonal activity is now declining. Quotations are firm, but unchanged from the following levels:

WINDOW GLASS—	
Single Diamond	Net List
Double Diamond	Net List
Cut Lights	75% off Light List

NAIL MOVEMENT CONTINUES IN GOOD PROPORTION

London, Ont.

Current sales of nails continue fairly good, especially considering the fact that building activities are now fast declining in volume owing to the lateness of the season. Quotations remain steady at the following levels:

NAILS—	
Wire nails, per case	4 25
Cut do., per case	4 95
Miscellaneous wire, list, less 70%.	

WINNIPEG MARKETS

WINNIPEG, Dec. 8—A number of price declines again appear on the current hardware markets. These revisions affect such products as Potts sad irons and handles; the Vaughan line of post hole augers; Coe's knife handled wrenches; wrought steel shelf brackets; hat and coat hooks; shoe rivets, and bridge spikes.

Other primary markets remain unchanged, with present quotations dependent upon basic conditions. There is a notable briskness in demand for Christmas lines, while other winter goods are also registering a fair share of activity.

LOWER LEVEL IN QUOTATIONS ON DOOR BUTTONS

Winnipeg.

Prices have been reduced on some sizes of cast door buttons. Following are the revised levels:

DOOR BUTTONS
Cast 1½ in., 80c per gross; 1¾ in., 95c; 2 in., $1.10; 2¼ in., $1.55; 2½ in., $1.75.

LOWER PRICES ON HAT AND COAT HOOKS

Winnipeg

Japanned hat and coat hooks are lower in price this week. Following are the revised quotations:

HAT AND COAT HOOKS
No. 21, $6.50 per gross; OC21, $6.50; 102, 85c doz.; 103, $1.05; 104, $1.20.

WROUGHT STEEL SHELF BRACKETS REDUCED

Winnipeg.

A reduction in prices of wrought steel shelf brackets has been announced. Following are the latest quotations:

SHELF BRACKETS
Wrought Steel, No. 792—4 x 5 in., $1.30 per doz.; 5 x 7, $1.95; 6 x 8, $2.35; 7 x 9, $2.85; 8 x 10, $3.35; 10 x 12, $4.75; 12 x 14, $7.50.

NOMINAL SHEET PRICES AWAIT MILL CHANGES

Winnipeg.

Sheet prices are unchanged this week, although prices are considered more or less nominal and further price concessions are offered in some quarters for fair sized orders. Mill prices are being watched with interest, but here too, reductions are not thought likely for some time, not until conditions change regarding labor and transportation. Following are the present quotations:

SHEETS
Black, per 100 lbs.—10 ga., $5.70; 12 ga., $5.70; 14 ga., $5.80; 16 ga., $5.90; 18 ga., $6.30; 20 ga., $6.30; 22 ga., $6.35; 24 ga., $6.35; 26 ga., $6.40; 28 ga., $6.65.
Galvanized—16 ga., $6.75; 18 ga., $6.90; 20 ga., $6.90; 22 ga., $7.05; 24 ga., $7.05; 26 ga., $7.20; 28 ga., $7.80; 10¾ oz., $8.20.

KNIFE HANDLED WRENCHES ARE AGAIN REDUCED

Winnipeg.

A good seasonal sale is reported for week on Coe's knife handled wrenches. They will now sell at 10 per cent. off list.

BOAT SPIKES NOW SHOW REVISED QUOTATIONS

Winnipeg.

A reduction is also made in the prices of boat or bridge spikes. This week's quotations are as follows:

BOAT SPIKES

¼ x 4 in., $8.50 per 100 lbs.; ¼ x 6 in., $8.25; 5-16 x 5 and 6 in., $7.75; ⅜ x 6, 7 and 8 in., $7; ½ x 8, 9, 10 and 12, $6.75.

PRICE REDUCTIONS ON BRASS SHOE RIVETS

Winnipeg.

Lower quotations are recorded this week in brass shoe rivets. Following are the present prices:

BRASS SHOE RIVETS

No. 3, 94c per lb.; 3½, 80c; 4, 77c; 4½, 77c; 5, 76c.

POST HOLE AUGERS HAVE LOWER QUOTATIONS

Winnipeg.

Among the reductions in prices for this week are the revised quotations on Vaughan Post Hole Augers. Following are this week's quotations:

POST HOLE AUGERS

5, $14.65 per doz.; 6, $15.40; 7, $17.40; 8, $19.50; 9, $21.30.

SAD IRON QUOTATIONS REGISTER DECLINE

Winnipeg.

A reduction on Mrs. Pott's sad iron is recorded this week. Following are the new quotations:

No. 50, ... $2.20 per set
No. 55, ... 2.10 per set
Sad iron handles, common, $1.80 per dozen.

PITTSBURGH MARKETS

PITTSBURGH, December 8th. — The past week has brought no important developments in the steel trade, market conditions being much the same as for several weeks past. Production has receded a trifle. Prices on the whole show a less distinct sagging tendency.

Current estimates are that the rate of steel ingot production lies between 40 and 45 per cent. of capacity, this comparing with a rate of about 50 per cent. early in November, and an average of 44 per cent. in October, which had shown the highest rate since last February. As the steel market, taking it as a whole, has been relatively dull since the middle of October the rate of production is really very good under the circumstances, and points to a considerable volume of business having been placed some time ago, for execution during the remainder of the year. In a number of cases mills made drives for business, representing to their customers that they would cover them to the end of the year at close prices and that they intended to advance prices after they had made the rounds of customers. In most cases the predicted advances did not occur, and where they did occur prices are back to the old level. An instance of this is hoops, bands, and hot rolled strips, which were nominally advanced to $2.25 a few weeks ago after business had been booked at $2.00 and thereabouts, the open market price having lately gone back to $2.00.

While steel production is being supported in part by recent contracts, it is not to be supposed that there will be any decrease in production January 1 on account of contracts running out, for buyers are taking only such steel as they absolutely must have, desiring to keep inventory down, and there should be heavier production in January than in December, rather than lighter production.

The Question of Prices

The regular prices on sheets have been holding pretty well up to date. On November 25, as reported a week ago, the American Sheet and Tin Plate company opened its order books for the first quarter of the new year, at the prices it had previously been quoting for this year, $2.25 for blue annealed, $3.00 for black sheets and $4.00 for galvanized. Independents had previously withdrawn cut prices. Bookings are running rather light. The American Sheet and Tin Plate company still has an advantage over the independents by reason of its old contracts, many being more than a year old, but still not completely specified. While the independents have to make sales as they go along, the leading interest gets a considerable part of its business by entering specifications against the old contracts, simply adjusting the price as occasion requires. Contract prices themselves are not revised, merely prices to apply on shipments as specified.

The $4.75 tin plate price, announced November 3rd, by the leading interest to apply on prompt orders and contracts with jobbers for first quarter and manufactuing consumers for first half, is holding quite well. There is a little shading by one or two mills which do not have a reguar clientele, but this is not taken seriously by the larger mills.

Tubular goods show no particular change in the matter of prices. The National Tube Co., (Steel Corporation) is adhering to its regular prices while as for many weeks past independents are shading slightly. In line pipe the cutting is quite deep, to levels which are said to be below the cost of production.

Bars, shapes and plates are quotable generally at $1.50 to $1.60, depending on size of order, specifications, etc. Prices are hardly any weaker on these lines than a fortnight ago, but they certainly are not stiffening, and the probability is that eventually buyers will be able to develop slightly lower prices when they are in position to offer larger orders and for more extended delivery. The mills would probably welcome an oppotunity to drop prices a trifle, to book a good volume of business and then make an advance.

How About Your Entry?

The Hardware and Metal **CHRISTMAS WINDOW CONTEST** for 1921 is now well under way. Many hardware merchants and retail salesmen are taking part for the honor of being a prize-winner or runner-up in the contest.

Read the details in this issue, then send along your entry.

DO IT NOW.

Developing Trade In Specialty Lines

Good Margin of Profit on Specialties Should Maintain Revenue in Paint Department in Cold Weather—Selecting Various Specialty Lines for Special Treatment—Pre-Christmas Business in Gilt Paint for Window Frames, Radiators, Etc.

CONTINUING the series of articles on the sale of various specialty lines during the seasons when ordinary house paint is not moving very rapidly. it should be thoroughly realized by every merchant who applies any such plans as are outlined, that careful enquiry and a close watch on local developments will, provide many excellent opportunities for developing this class of trade. Very frequently the suggestion is all that is needed to awaken in the customer's mind the thought that a certain specialty line can be used in the home to good advantage. Appeals to pride are always effective, particularly where opportunity is presented of indicating that any improvements made by the use of such specialties will be noticed by those to whom the prospect may wish to convey a good impression.

Such a sentiment can be taken advantage of at the Christmas season, and though many people are busy at present shopping for Christmas presents, they can be shown readily that the use of some stove enamel, gold paint, floor stain, or other woodwork or wall finish, will give their home a much better appearance for the pending visit of relatives and friends coming for the Christmas festival season. Some ideas for the displaying of stove enamel were dealt with in the last issue of Hardware & Metal. Some possibilities for the sale of gold paint are outlined herewith. A window display can be very effectively arranged showing a number of pictures borrowed from various homes. These can frequently be secured on the promise of returning them with a new coat of gold paint. A painter might be placed in the window to do the gilding of these pictures. These frames might be half finished, leaving the other half done for comparison. A neat card might be used stating the name of the person who loaned the picture. When the frames have been left in the window for a few days in this condition, have the painter finish them up and the effect of the display will be considerable. People have got in the habit of watching the window for any advancement to be made in the operations and they will be agreeably surprised when they see the window filled with frames all newly gilded and note the improvement which a little gold paint will make on picture frames.

One merchant who had followed this plan announced by means of a card in the window that an interesting art exhibit will be on view between certain dates. This secures much interest before the start is made and following the plan already outlined will result in maintaining this interest throughout and probably pull much business in gold paint and other specialties as result of enquiries.

In the window at the same the demonstration is proceeding, should appear a group of cans of gold paint and brushes suitable for its application. Some cards might be lettered drawing the particular attention of women customers to the ease with which picture frames, radiators and other articles may be re-touched to good advantage.

In planning windows of this kind it is possible for the dealer to induce the local newspaper to run a news story about the unique art exhibit.

It is more than likely that his display will sell a good big supply of gold paint—and it also serves as an ideal method of inducing the women of your territory to come into your store to get acquainted.

Sells Other Lines

A selling point which dealers can capitalize occurs here. Once a woman starts to buy it usually is fairly easy to sell her a few additional items. Of course. the success of a developed plan to sell extra items depends largely upon the ability of the salesman who has charge of the sale.

The foregoing item might be published for a period of one week during the fall months. That aggressive campaigns of this kind will increase volume and add to profit is without a doubt.

There are many other items in the painter's store which can come in for special attention in the winter months, some of which will be treated in later issues.

"SAVE THE SURFACE" CAMPAIGN OFFERS GOLDEN OPPORTUNITY SAYS A. B. HAY

In an inspiring address before the guests and members of the Buffalo Paint, Oil and Varnish Club, at a dinner and meeting, Hotel Iroquois, A. E. Hay, Manager Canadian Sales, Pratt & Lambert-Inc., urged all interested to constant, enthusiastic effort that 1922 may be the greatest paint and varnish year in the history of the industry.

"There are three heads under which this campaign may properly be discussed," said Mr. Hay. "First, a great need; Second, a golden opportunity; Third, a glorious objective. The need is apparent and appalling. Only a quarter of the potential market is being supplied with surface-saving materials. We are going to apply ourselves earnestly to the advancement of this movement during the next five years so that we will double the industry by 1926."

"It is well to keep the purpose of the campaign alive and fresh within our minds so that at all times we may be filled and thrilled with wonder of its great possibilities and intrinsic value. There is a great danger of getting so used to a thing of this kind that it begins to sound to us as a tale that is told. We become so familiar with it that we get hardened in the process; our admiration cools off and fails to affect us as it once did; we lose the vision and miss the goal."

SERVICE

CONFIDENCE

FAIR DEALING

A Short Story

"Three things are great;
Conscience and Will
And Courage to Fulfill
The duties they create."

THE Gentleman was the proprietor of a large and successful Establishment in one of the young, flourishing towns you know so well.

Courteously business-like, he was speaking to Mr. Scratch, our representative.

"I have heard many good things about your Firm and their products," he was saying, "and, altho I am satisfied with my present Paint connection, if you wish it, I will see your proposition."

An hour later he spoke again.

This time there was a ring of enthusiasm in his voice, and a sparkle in his eyes that was not noticeable at the introduction.

"Scratch, I am most grateful to you for your visit. Your offer has great merits and the comparison is astonishing. I will think it over."

Three days later we gladly received the outward expression of his good will and confidence—his Opening Order.

That was a year and a half ago.

Today—well—today he is one of our most enthusiastic, loyal and profitable friends with every prospect of a continuity of our happy relationship.

Such, we think, is *real growth*—to grow naturally and steadily, fertilized by dealer satisfaction and friendship.

Our many similar experiences have a happy significance.

Sell Brushes as Practical Christmas Gifts

Featuring Brushes in the Household Goods Department Encourages Housewives to Realize Sanitary and Labor-Saving Value of the Many Types of Brushes

A COMPARATIVELY new department in the hardware trade, in which brushes of various kinds are holding an important place, is the housefurnishing department. In many stores such a department has been started to handle the many articles which are classed as conveniences, sanitary equipment and labor-saving equipment. Lines classed under these headings are popular with the women who use them in making the home more comfortable with the minimum of effort. Among the most indispensable articles which appeal particularly to housewives of to-day are brushes for cleaning, which have revolutionized housework and made a pleasant task of the old time drudgery.

The far-seeing dealer will not be slow to seek the favor of the ladies by suggesting and demonstrating the advantages of the many lines of labor-saving brushes and floor brooms, such as are designed and manufactured by the leading Canadian brush manufacturers who study the possibilities of modern household demands which tend to lighten the duties about the home.

It, however, is often considered that brushes are such a general commodity that all that is necessary is to carry a stock, sometimes in an out of the way corner of the store, and that prospective customers will ask for what they need. The dealer whose conception of brush profits does not go beyond this antiquated idea will surely not get his share or anything like the increased brush sales that would come to his store.

If he will try the display method (most people need the "show me" suggestion to get them to buy the proper assortment of cleaning brushes) the dealer will quickly realize the advantages of same and the opportunity he has of making new customers and permanent customers. Remember, cleaning brushes are used every day in the year in not only the moderate thrifty homes, but in every home where sanitation and comfort hold forth—also there are the demands of hospitals, clubs, public buildings, offices, factories, etc., which have to be met. This business is within the scope of every dealer's trade.

These appeals carry considerable weight at the Xmas season. Brushes are a practical gift and should be pushed for this purpose now.

Imperial Varnish & Color Co. Convention

Sales and Executive Staffs Express Optimism Concerning Future of Paint Trade—Educational Effort Much Appreciated at the Sessions—Much Enjoyment at Theatre Party and Dinner

THE annual convention of the Imperial Varnish & Color Co. was held at the head office on Morse Street, Toronto, for three days from November 28 to December 1, inclusive Both the sales and executive staffs were optimistic concerning the outlook for paint trade and an increased quota of sales was set for 1922. The sessions of the convention took the form of practical demonstrations of the various products, and details given concerning the industrial processes involved in their making. This phase of the work was highly valued by the staff and it was felt that the education along such practical lines would be very helpful to all concerned.

T. Moneypenny, Sales Manager, presided over the sessions, assisted by H. E. Mitchell and G. C. McEwen, Works Manager. In addition to the local sales staff there were present the following; Roy Beaumont, Sales Manager, Miller Morse Hardware Co., Winnipeg, (Western distributors) and Harry Hart, Manager Paint & Varnish Ltd., Montreal, (Eastern distibutors). It is significant that there was 100% representation of the sales and executive staffs.

A theatre party to the Princess Theatre was provided on Wednesday evening following on Thursday evening with a dinner at the Carls Rite Hotel at which there was much wholesale enjoyment comprising stories, songs or speeches from everyone attending.

Executive and sales staffs of the Imperial Varnish and Color Co., Toronto, assembled for the annual convention which is outlined herewith: Back Row—Left to Right—T. F. Newberry, L. B. Gillespie, Thos. Roulston, C. J. Archer, C. Chapman, E. E. Sparrow, E. C. Guest, D. L. Davidson, F. C. Charlot, M. E. Gooding, R. C. Holder, G. B. Chapman, S. Littlewood, J. N. Hill, D. D. Spellen, J. R. Houle, F. C. Price, H. E. Mihell, Sales Promotion Manager. Front Row—Left to Right—J. I. Shields, W. B. Cookson, R. Beaumont, Sales Manager, Miller-Morse Hardware Co., Winnipeg; T. F. Monypenny, Vice-President and Sales Manager; J. M. Sparrow, President and General Manager; G. C. McEwen, Works Manager; H. Hart, Manager Paint and Varnish Limited, Montreal; W. J. Roulston, H. E. Worsell.

Boeckh's Brush News

Improved Production

CARE, watchfulness and experimenting are continually evolving better ways of doing things at the minimum cost of production—that is, to produce an article of real merit to sell at a reasonable price.

Speaking for ourselves, we have been making brushes in Canada for over sixty-five years. The brushes we made sixty-five years ago were the best brushes made at that time, but they were far behind the brushes we have been making during recent years.

We have learned better ways because we have not been mind-bound.

We are continually keeping in touch with the requirement of painters and at any time are prepared to make an improvement in our lines should the occasion arise, though it does seem that, in the brushes we are now making, perfection has already been attained.

All this is introductory to the present method of making Boeckh's "RUBBER SET" brushes for use in paint, varnish, kalsomine, etc.

The bristle in all our painters' brushes is of the highest grade and is prepared by our special process, which retains the elasticity and softens the ends, the part of a brush upon which good results and long, satisfactory wear depend.

Each individual bristle is held securely by genuine rubber, not a rubber mixture containing mostly pitch or other cheaper ingredients.

The butts of the bristles are completely covered with genuine rubber in a semi-liquid state which is then vulcanized by steam heat until it is absolutely hard—(not gas heat, which often burns and shortens the life of the bristles)—and will not under any circumstances permit of the bristles coming out.

By the use of many labor-saving machines and processes, and also owing to the large volume of business, we are able to give extra value and also to supply brushes which give long wear and which make satisfied customers.

As we have been making brushes for over sixty-five years we know how to combine quality, style and finish at the lowest possible cost, and to supply the trade with guaranteed goods that in all cases give absolutely satisfactory service.

Weekly Paint Markets

MONTREAL

MONTREAL, December 8. — An advance recorded in the flax market and a resultant firming of the oil market again attracts attention in the paint industry with local prices however, remaining at formal figures. The firming undertone in seed was gradual at the beginning of the week, but towards the latter end a more substantial gain was recorded, and the market now stands at a very much improved position. The turpentine market continues with a firm undertone with local quotations also unchanged at last week's figures, namely, $1.15 per gallon in one barrel lots. Southern circles report much the same situation, although one important centre states that due to interest on the part of foreign buyers, the market showed a price advance, with expectations of a further improvement before the new season in the spring.

The current demands for window glass are still very satisfactory, the open weather no doubt extending the busy season. First shipments of the new Canadian product arrived on the local market, but were soon exhausted owing to orders awaiting fulfillment. Little change has developed in the Belgian market, the season now practically closed so far as this field is concerned, owing to the close of navigation. On the whole the present season has been very satisfactory, notwithstanding fears that were evident earlier in the season that a shortage might develop.

Next year's bookings are still causing activity among paint and varnish manufacturers, and the volume of business still coming to hand promises well for the ensuing year. Prices on all lines of paint, varnish and white lead are remaining steady with little price development expected in any of the products.

LINSEED OIL HAS FIRMER UNDERTONE

Montreal.

The undertone of linseed oil was strengthened this week by the advance of flax seed. The seed market at the commencement of the week began a gradual climb, and in the latter part the gain has been more pronounced, particularly in the past two days. Whether this is another turn in the fluctuations prevalent in the market for some time remains to be seen, but some dealers are of the opinion that linseed oil will show a firmer tone from now on, more particularly after the first of the year.. The improved demand, usual after the turn of the year, will, it is thought, provide the necessary factor in the maintenance of a higher standing.

The improvement in the market seems to be very general as outside markets continue firm and strong, following the advance of Argentine flax seed. Current demands are seasonably dull, with enquiries from domestic crushers fair, and that from European buyers very active. Local business is quiet with prices holding as follows:

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrel lots, per gal.	0 83	0 85
3 to 5 barrel lots, per gal.	0 81	0 83

Less barrels, add 10 cents per gallon.

TURPENTINE MARKET CONTINUES STRONG

Montreal.

Turpentine continues with the undertone firm at its recent higher standing. Local supplies are none too heavy, but ample to take care of present business, as demands are very light. This however is expected as the month of December usually proves an extra quiet period. Paint manufacturers are causing the most activity in turpentine at present, and sales in this channel are expected to increase with the opening of the new year. As the demand would seem to be the controlling factor in the maintenance of prices, there is every likelihood of a firmer market for the opening of increased business in the New Year. In Savannah markets, the increased interest on the part of foreign buyers, coupled with a fair demand on the domestic market in the past two weeks is said to be responsible for the now improved tone. With a further improvement in demand anticipated, and inasmuch as the producing seems practically over, with present supplies not very large, it is believed that there will be further advances for the new season. Following are local prices:

TURPENTINE—	Imp. gal.
1 barrel lots	$1 15
2 to 4 barrel lots	1 13
Broken lots	1 25

STILL ACTIVE SALES OF WINDOW GLASS

Montreal.

Current business in window glass is continuing in fair volume, notwithstanding the season is now advanced over the usual more active period. The recent open weather, and the inability on the part of jobbing houses to complete shipments are said to be the reasons for the continued briskness. Stocks are still low, especially in the best selling cuts, but recent arrivals of Belgium shipments, and also from our own home industries, are keeping stocks from becoming depleted to the serious stage. The local markets received their first shipment from the new home plant, but these were soon exhausted in fulfilling orders that had been held up owing to scarcity. Quotations are continuing at Montreal net list, which will be found on current market pages.

SPRING PAINT BOOKINGS VERY ACTIVE

Montreal.

Booked orders for spring requirements continue to cause activity among paint and varnish manufacturers. Without exception, orders received are very satisfactory, and in most cases exceed last season's demands at this time. That a more active season will develop in the coming year is now promised, if the early buying movement counts for anything. The general tone of the market is also very steady, with little price development expected. This condition would apply to white lead in oil, and also putty, as well as the numerous lines of paint, varnishes and specialties.

TORONTO

TORONTO, December 8—While prices on both turpentine and linseed oil now remain at the recent revisions, developments in these markets continue to attract interest. The flax seed prices recorded a slight advance recently,, thus resulting in a tendency to firm up the oil markets. These current gains in flax seed quotations are generally considered in the light of fluctuations which have been apparent during recent weeks, and thus unchanged oil prices are in effect; although a substantial improvement is recorded in the primary situation.

The current turpentine quotations are firm, with prices on producing circles also unchanged this week. Foreign buying interest is stated in some quarters as responsible for the current market strength, coupled with the fact that the non-productive period confines available supplies of this product to prevailing market offerings. Although production of turpentine during the season 1920-21, has been of greater volume than in recent seasons, yet the current stocks remaining on hand at Savannah are of

TORONTO PAINT MARKETS

(Continued from page 58)

smaller proportion than at this period last year.

CURRENT TURPENTINE NEEDS OF SMALL VOLUME

Toronto.

With the average quotations on turpentine at primary centres remaining unchanged this week, the local price level also retains the lower revisions recorded last week. This change is stated by distributors to be primarily based upon competitive prices appearing in certain eastern markets. The current cost of turpentine is dependent upon Savannah quotations, as the small demand for the product at this season, gives distributors little encouragement to carry stocks. Buying therefore continues from hand to mouth, covering immediate needs only.

The opinion has been expressed that should any improvement materialize in the demand for turpentine, further changes in price are likely to develop. It is considered probable in certain reports from the primary markets, that an increase in foreign buying would serve to strengthen the present firm tendency. The quotations prevailing locally are as follows:

TURPENTINE—	Imp. gal.
1 barrel lots	$ 1 20
2 to 4 barrel lots	1 19
5 gallon lots	1 35

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $15 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph Windsor, or Montreal but freight may be equalized from any of these points

Car load lots of 70 bbls. Price on aplication.

Less than 1 barrel lots 15 cents per gallon additional.

LOWER PRICES ON LINSEED REMAIN IN EFFECT

Toronto.

The new lower prices announced last week on both raw and boiled linseed oil, continue to remain in effect locally. Although some slight advances have been recorded in prices on flax seed, this condition at the present time, is generally being looked upon as another fluctuation. Whether the upward movement in seed prices will develop into a permanent trend, remains to be seen; and quotations on oil are steady but firm at the following levels:

LINSEED OIL—	Per Gallon.	
1 to 2 barrel lots	0 84	0 87
3 to 4 barrel lots	0 82	0 86
6 to 9 barrel lots	0 81	0 84

Less barrels, add 15 cents per gallon.

FIRM SITUATION EVIDENT IN SHELLAC MARKETS

Toronto.

As reported in previous issues of Hardware and Metal, some higher prices on shellac have been given on the l cal markets due to the firm undertone now apparent in this commodity. On the other hand, some easier price levels are also being maintained in certain quarters. The prices, therefore, which appear on the current market quotation pages, covering both white and orange shellac, represent the average quotations appearing on the domestic markets.

The steady situation continues to remain evident in shellac circles generally, and is attributed to the fact that primary markets still develop firmness on shellac gums. This strength is reflected in both pure orange and pure white, and and it is stated that while these primary conditions continue, there is thought to be little chance for price recessions from the prevailing levels.

SELLING SATISFACTION WITH EACH ARTICLE

(Continued from page 46)

duced to agree that what you have said about the merchandise is true, and this approval should be referred to in closing. It may be that decision rests between two articles, and it is up to the salesman to simplify by himself choosing the one more applicable, with most consideration to quality. In some instances it may be suggested that a decision has been reached, and the asking as to delivery, quantity, or "what next" may be used. However, if this method of closing a sale is employed it must be very tactfully used so as to avoid any semblance of trying to force a purchase. There are times in the toils of the man behind the counter when an accelerator would be most useful, but it must be remembered that patience is a virtue in producing satisfied customers.

REFLECTING THE "SANTA CLAUS" SPIRIT THROUGH THE HARDWARE STORE

(Continued from page 38)

lights, etc. are mentioned as suggestions. In another ad by this firm electrical goods are featured for Christmas gifts. This ad says "Make an Electric Christmas. As surely as your good wishes are reflected in the gifts you bestow, just so surely will you bring to wife or mother more pleausre, more convenience, more time for rest in presenting electric household appliances of which we are showing a comprehensive range of the latest designs embodying all the most recent improvements. Here we can offer but a few suggestions; Coffee machine sets, hot water kettles, toasters, stoves, grills, immersion heaters, vacuum cleaners, curling tongs, irons, etc."

CANADA'S STEEL IMPORTS FROM U.S. IN OCTOBER

(Continued from page 36)

and tank plates. Increases of 5,233 tons for steel plates and 4,481 tons for wrought pipes and fittings brought those articles from fourth and fifth places to second and third places, while barbed wire and several items of less importance (wire nails, wire rods, railroad spikes, and bar iron) more than doubled, and cut nails advanced to almost five times September's figures.

DEVELOPMENTS IN ROOFING INDUSTRY

(Continued from page 35)

manufacture. It is natural therefore to assume that these conditions will not obtain for any length of time and that when normal spring business develops, prices may advance until a minimum profit is secured. This opinion is of course further strengthened by the almost certain advance in basic materials."

When asked as to the maintenance of quality in their products, Mr. Kennedy said he fully believed the quality of materials at present produced by Canadian manufacturers was distinctly in advance of anything hitherto made in this country. At a time like the present, with the desire to place before the buying public prices within reasonable reach of pre-war levels, there was the danger of low standards to guard against. Immediately following the war a strict adherence to this could not be watched as closely because of heavy demands, but manufacturers, he was sure, were now producing the highest standard possible. "Business to-day demands quality as well as lower prices," he said.

In conclusion, Mr. Kennedy stated that the recent reduction in freight rates was appreciable to them. Their lines were of the heavier class, and were greatly affected by transportation costs. However, the decline would not bear upon the immediate situation as this had already been taken into consideration.

WHO MAKES KILLAMETAL?

Hardware & Metal is in receipt of an inquiry as to the manufacturer of "Killametal." This is evidently a compound for the purpose of nullifying the chemical reaction of metals. Any information as regards the name of the manufacturer, or where this product can be secured, will be welcomed by the Editor.

DEPARTMENT OF THE NAVAL SERVICE.

SALE OF PACKING

SEALED tenders addressed to the Undersigned and endorsed on the envelope "Tender for Packing" will be received up to noon of Tuesday the 27th day of December, 1921, for the purchase of the whole or any portion of approximately 25,000 pounds Packing of various sorts, at Halifax Dockyard.

Tender forms and samples, together with particulars as to terms and quantities, may be obtained on application to the Undersigned, or to the Naval Store Officer, H. M. C. Dockyard, Halifax, N. S.

C·C·M·

Automobile Skates

Are You Running Short of Certain Models?

This is the big month for skates.

The skating season is here. And Christmas buying of skates for presents is in full swing.

Very likely you are in danger of soon being sold out of some sizes?

Sorting orders mailed now can be filled promptly and complete in all sizes and models.

Made in Canada by

Canada Cycle & Motor Co., Limited

Montreal, Toronto, WESTON, ONT., Winnipeg, Vancouver

Also Makers of

C.C.M. Perfection Ankle Supports and C.C.M. Bob Skates

Rosin Core Solder

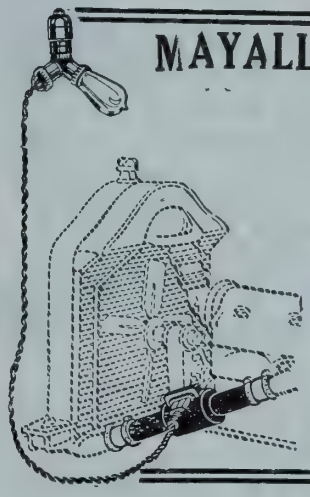
"The Solder with the Flux in the centre."

Acid Core Solder

Also "Imperial Soldering Paste." Small tins.

The CANADA METAL CO., LIMITED
SOLDER EXPERTS

MAYALL MOTOR HEATER



This solves winter engine trouble! Connected with any lamp socket it maintains heat and circulation in the car's water system, prevents freezing, assures easy starting and is installed in a few minutes.

Motor Sundries Corp. Limited

Head Office and Factory:
414 Eastern Ave., Toronto

Also manufacturers of Hurst Motor Heater, Float-a-Ford Shock Absorbers, Mayall Flat-Spring Bumper.

CARTER'S

Carter's Genuine Dry Red Lead

A pure, uniform and economical paint and preservative for metal work, steam pipes, etc. Made from the highest grade of Canadian Pig Lead, highly oxidized and very finely ground. Used with pure Linseed Oil, it is very easy to apply and has unusual covering capacity. Every sale of Carter's Genuine Dry Red Lead assures you a satisfied customer and a good profit.

Ask for price on this and the other Carter lines—Carter's Genuine Dry White Lead, Carter's Genuine Orange Lead and Carter's Litharge.

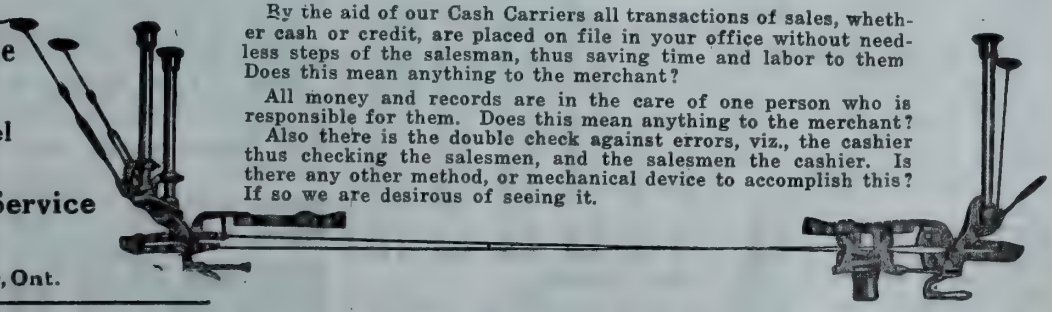
The Carter White Lead Co. of Canada, Limited, 91 Delorimier Ave., Montreal.

Why Not Have a Double Check on all Sales?

Al kinds of Cash and Parcel Carriers

Gipe-Hazard Store Service Co., Limited

113 SUMACH ST., TORONTO, Ont.



By the aid of our Cash Carriers all transactions of sales, whether cash or credit, are placed on file in your office without needless steps of the salesman, thus saving time and labor to them Does this mean anything to the merchant?

All money and records are in the care of one person who is responsible for them. Does this mean anything to the merchant?

Also there is the double check against errors, viz., the cashier thus checking the salesmen, and the salesmen the cashier. Is there any other method, or mechanical device to accomplish this? If so we are desirous of seeing it.

If interested tear out this page and place with letters to be answered.

Put these Barrett Money Makers on the job--

Over 35,000,000 advertisements featuring Barrett Specialties are reaching customers of every class throughout the Dominion.

They will bring a big volume of business to every dealer who is ready to supply the demand.

Don't tie up your money in stock that won't move quickly—make every dollar earn other dollars for you.

The Barrett Products which are being featured in this big consumer advertising campaign include the following Specialties:

Everlastic Liquid Roofing Cement

Unequalled for re-surfacing worn-out prepared and "rubber" roofs. Has the consistency of thick molasses; is easy to apply and dries quickly into a hard, elastic, wonderfully durable coat. Proof against moisture, acids, alkalies and fumes. Has same base as Barrett Specification Pitch, which is famous for its waterproofing qualities. Comes ready for use in packages ranging from 1-pint tins to 40-gallon barrels and steel drums containing 43 gallons.

Everjet Elastic Carbon Paint

A proven protective black, carbon paint for industrial purposes. No other paint on the Canadian market has ever enjoyed the same popularity. Everjet Elastic Carbon Paint is made for use on exposed metal and wood, particularly on surfaces subject to severe conditions; for use on boilers, smokestacks, machinery, piping; in fact, metal work of all kinds. It is also used extensively for painting metal roofs. It successfully resists the corrosive action of acids, alkalies, fumes and vapors.

Put up in: 1-Gallon Cans, Lithographed (cases of one doz.), 5-Gallon Cans, 1-2 barrels (about 20 gallons), Barrels (about 40 gallons) and steel drums (43 gallons).

Creonoid (Fly Oil) Lice Destroyer and Cow Spray

Order Creonoid now and take advantage of the new low prices with special quantity discounts quoted in our October 15th Price List. These low prices are guaranteed against further reduction during the coming fly season. Shipments made any time between January 1st and May 1st, 1922. Invoices dated May 1st.

Creonoid comes ready for use in Steel Barrels (43 Gallons), Steel Half-Barrels (25 Gallons), Wooden Barrels (approximately 40 gallons) and in Wooden Half-Barrels (approximately 20 gallons), Five Gallon Cans. Also packed in attractive gallon and half-gallon cans.

Plastic Elastigum Patching Cement

"The Plastic Cement of a hundred uses"—the most convenient patching and repair material ever placed on the market.

Plastic Elastigum Patching Cement is tough, durable, acid-proof and waterproof. It sticks tenaciously to either wet or dry surfaces; can be used in all kinds of weather; is easy to apply; low in price, and comes all ready for use.

To stop leaks in roofs, repair flashings, reline gutters, stuff cornices—for these and innumerable other purposes, Plastic Elastigum is in a class by itself.

Put up, ready for use, in packages of various sizes, from 1-lb. tins to barrels of about 600 lbs.

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

Beautify Walls Economically

Silkstone beautifies walls at less cost than wall paper. It can be washed easily without rubbing off. Its soft, silky finish gives an artistic effect much appreciated by home lovers. The economical side of Silkstone, its beauty, its durability and gratifying service are all factors in the splendid sales it enjoys. It sells profitably with mutual satisfaction to merchant and customer.

The satisfaction it gives is a delight to the conscientious merchant who tries to serve his customers well and build permanent trade. Silkstone fills the bill for the Canadian housewife. She has tried it and liked it, and uses it whenever walls need beautifying, without regard to season. Silkstone is a year-round seller. Let us show you what's in it for you—write.

The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

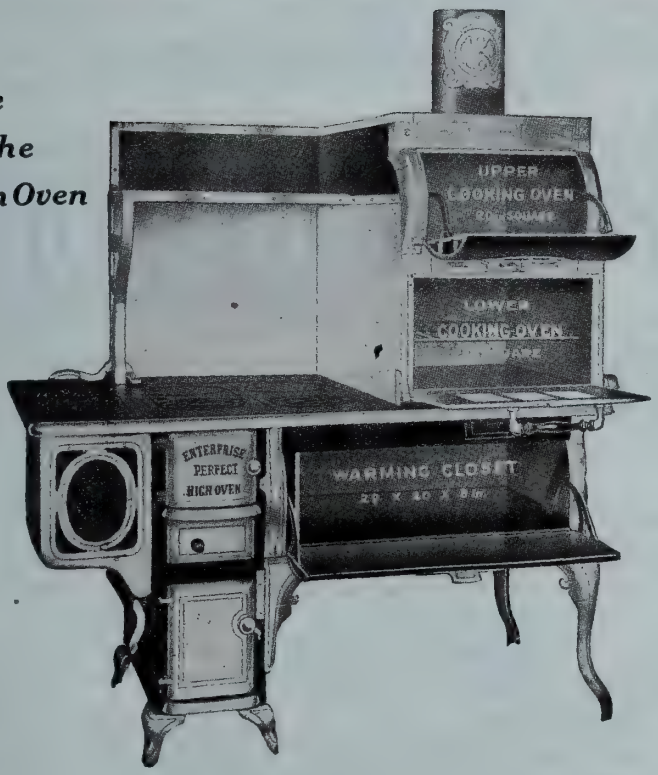
ENTERPRISE

Ranges, Stoves and Heaters

20,000 Users are Delighted with the "Perfect" Double High Oven

The Enterprise "Perfect" Double High-Oven Range has two large 20-inch ovens. You will note that these are not merely one oven and a warming closet but two big, fine ovens for baking and roasting—both are equally good. However, there is a big, roomy warming oven besides. Perfect satisfaction is assured through the special flue construction. Finished in spotless white enamel and lustrous nickel, it is surely a range "de luxe."

When you see the name "Enterprise," good quality and efficiency is there.



This Range Displayed Means Sales Half Made

Here is an opportunity to help boost your Fall and Winter stoves sales. We have chosen these ranges and heaters for distribution on account of their high market value. Their proven ability and efficiency both to merchants and consumers is now recognized and steadily increasing.

The range and heater illustrated in this advertisement represents the high quality that the Enterprise line of products possesses.

You can count on their good selling points to close repeat sales for you.

Orders placed with Ashdown's will receive the same courtesy, attention, promptness and co-operation for which this house has been famous over half-a-century.

Coupled with the above service, we have a Commission Department with a competent staff, operating throughout the entire West.

This department will execute any buying or selling commissions for you.

This Combination of departments offers a service that is unique.

THE H. L. PERRY CO. LTD.
214 Princess St. - Winnipeg

O-Rib-O

Volcano Chimney Top

The Deflector — the lower slanting part shown — receives wind through the sloped opening, directing it over the chimney on the "blow-pipe" principle, creating and maintaining a continuous draft.

Cures the worst chimneys. Homes, stores, churches, factories are all prospects.

O-Rib-O
Manufacturing Co.
Winnipeg, Manitoba

When Writing to Advertisers Kindly Mention This Paper

For sale by Leading Wholesale Houses.

"Super-Service"
Garbage & Ash Cans

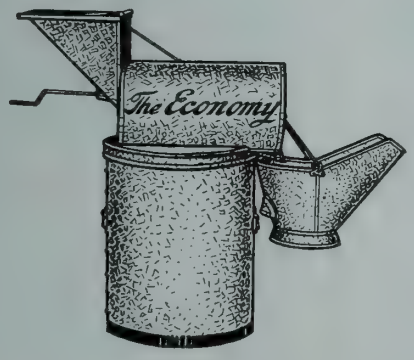
DEALERS!

Save money on duty and exchange by purchasing your heavy weight Garbage and Ash Cans in Canada.

REED'S "SUPER-SERVICE" line is a winner.

These cans are made of 22 to 18-gauge galvanized steel (depending on size and style).

Every can is hand rivetted and stoutly reinforced. All joints are hand soldered — NOT galvanized HOT.



The "ECONOMY" Rotary Ash Sifter was created to meet the demand for a sifter of this type which would LAST. It's built on the same lines as the "Super-Service" Cans. Fits any can or barrel 16 to 18 inches in diameter.

There's a good margin of profit on these lines. Write or wire us for prices.

Geo. W. Reed & Co.
LIMITED
MONTREAL

NAILS
Heavy up to 12-inch.

WIRE
Hard, Soft, Tinned, Coppered.

BALE TIES
Any length — soft tough wire.

STRAIGHTENED RODS
WIRE HOOPS

We manufacture. Do you use?

SPEAK UP!

THE GRAHAM NAIL WORKS
Operated by
THE CANADA METAL CO., LIMITED
Toronto.

Special Offer to the Trade

To keep the factory staff busy during the winter months, the

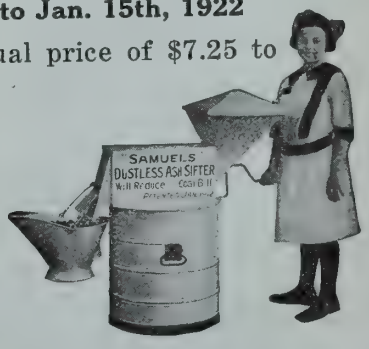
Samuels' Dustless Ash Sifter

will be reduced in price for one month only—

Dec. 15th to Jan. 15th, 1922

from the usual price of $7.25 to

$6.00



Take full advantage of this offer. Get them either through your jobber or direct from

J. Samuels
275 Queen St., W. Toronto

WANT ADS

If you want a buyer, clerk, salesman, traveler, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $2.20 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

FOR SALE

SPECIAL SALE. PRICE TICKETS, SHOW-cards. M. Moorby, Newmarket, Ont.

FOR SALE — TWO ONE HUNDRED DOLLAR shares in Merchants Consolidated Limited, Winnipeg, Man.; five one hundred dollar shares in the Canadian Supply Company, Limited, Saskatoon Sask. What offers? Glover Bros., Windthorst, Sask.

SITUATIONS WANTED

EXPERIENCED HARDWARE SALESMAN wants two or three popular priced every-day selling lines on commission. Calling hardware and grocery stores. For all Ontario territory north and east of Toronto. Beginning in January. First-class references. State terms, etc. Box 37, Hardware & Metal.

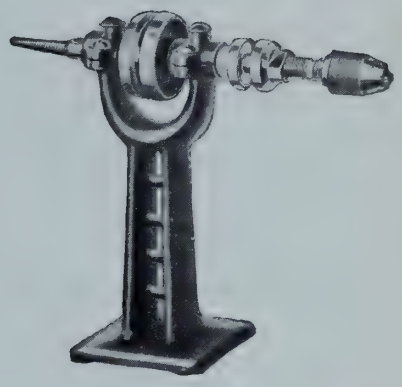
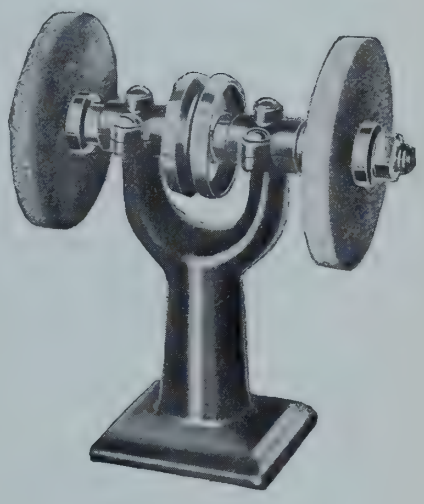
GOODELL-PRATT
1500 GOOD TOOLS



Moving Displays
Move these tools rapidly

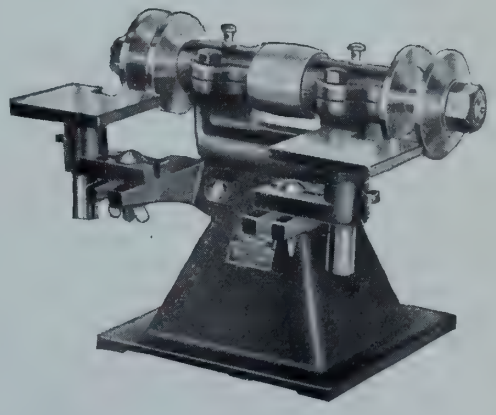
Most good hardware stores handle these little polishing and grinding heads. They are always steady sellers, in winter or summer, good times or bad; because in spite of their low price they will do real work and give long service. You will find these tools everywhere from the largest factories to the smallest home workshops.



You have hundreds of prospective customers for these polishing and grinding heads

Do these prospective customers for these devices know that you have them in stock? Put some in your window. Hook them to a small motor and watch your stock move. A moving display is easily arranged. Five or six of these heads can be driven from the motor by one shaft. The shaft is just a plain piece of round steel. You probably have suitable material in stock to use for pulleys and hangers.

If you haven't the materials in stock or don't know how to fix up a display like this, write to us and we will gladly tell you how other live dealers have done it.



This plan has paid others
You try it now!

GOODELL-PRATT COMPANY *Toolsmiths* Greenfield, Mass., U.S.A.

IT WILL HELP YOU TO TAKE STOCK

THE INTERNATIONAL DAYTON IS THE BEST HARDWARE SCALE ON THE MARKET WITH A SPECIAL COUNTING SCOOP ATTACHMENT. THE COUNTING SCOOP IS INVALUABLE AT STOCKTAKING TIME. LET US EXPLAIN TO YOU HOW IT AUTOMATICALLY COUNTS NAILS, SCREW-BOLTS, ETC.

The Vital Point is PERCENTAGE

THE man who has 28 cents has the power to borrow $4 for one year. That is OPPORTUNITY.

If he buys goods with his $4 and sells them for $6, making 50 per cent. gross profit, he is on the way to become a man of wealth. That is BUSINESS.

If he buys goods, instead, at $4 and sells them at $4.10, making only 2½ per cent. gross profit, that is BANKRUPTCY.

Business success is not determined by gross sales, but by the percentage of profit that lies between gross costs and gross returns.

The vital point to watch is percentage —not ESTIMATED percentage, but ACTUAL percentage.

In a store equipped with Dayton Hardware Scales, business becomes a science of EXACTNESS. Certainties take the place of speculations. Profit percentages do not trickle away in faulty or careless weights. Place a Dayton in each department of your store and you insure PROFIT PERCENTAGES.

MARTIN-SENOUR
100% PURE PAINT & VARNISHES

Christmas Greetings

TO the hardware dealer himself—to the man behind the counter—to each and every individual in the Canadian hardware trade we extend, in warmest friendship, our sincerest wishes for a Happy Christmas and a Bright and Prosperous New Year.

While our good wishes are tendered to all we wish to greet in a very special way those among you who are associated with us in the selling of Martin Senour 100% Pure Paint and Varnishes. May the coming year be to every one of you, our Dealer Agent friends, a year of unhampered business progression surpassing in prosperity all that have gone before.

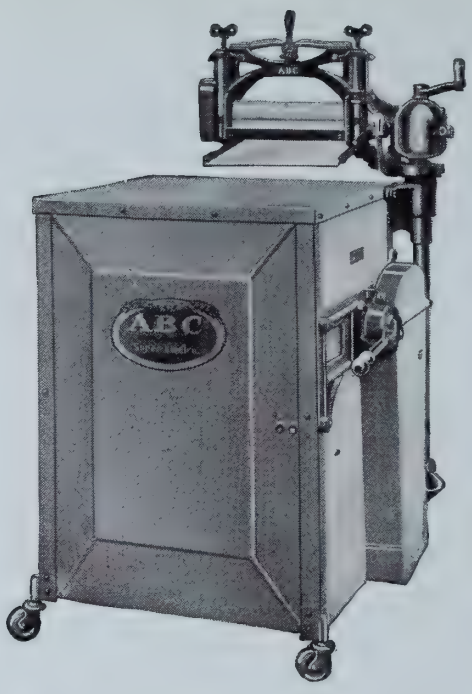
"Save the surface and you save all"—Paint & Varnish

The new 1922 model A B C Electric Laundress—"the Packard of Electric Washers"



You see a handsome cabinet; you hear no noise; you feel no vibration

Valuable A B C Agencies to be soon Allotted!

An A B C **Exclusive Agency** is more than a mere name. It is a valuable asset to any progressive store. For it carries with it the right to the exclusive sale, in the locality allotted, of the famously high-grade, complete A B C line of power and electric washers and electric ironers.

We intend to allot a limited number more of these valuable franchises in the very near future to dealers who wish to link up their business with a line that attracts the best patronage.

Applications should be made at once!

The A B C line covers the whole field of price demand with models that are of highest quality. Starting with the A B C "Alco" dolly-type washers, single and twin tub, power or electric, the line includes galvanized and copper tub, maple or zinc cylinder models in semi-cabinet A B C Super Electric Washers, as well as the full cabinet model above shown. Also there are the A B C Electric Ironers, supplied either with independent motors or with attachments to enable any A B C electric washer to operate them.

In all, there are ten different models. Continent-wide distribution and quick service back up the dealer who is so fortunate as to secure one of these A B C exclusive agencies. Sincere co-operation in advertising and selling is also given by distributors and by the factory. The proposition is well worth entertaining, without delay, if you desire to build for the future as well as for the present on a line of washers and ironers that will mean satisfied customers and excellent profits.

Write at once for full particulars concerning these valuable A B C agencies that are soon to be added.

CHRISTMAS 1921

With the coming of another Christmas we send you our Heartiest Greetings and Best Wishes for the New Year.

NEW YEAR 1922

H. S. HOWLAND, SONS & CO.
LIMITED
TORONTO

If interested tear out this page and place with letters to be answered.

UNIVERSAL

Prepare for Early and Late Buyers of

Universal Useful Gifts

EVEN last minute buyers of Christmas gifts believe it is never too late to spend. Many who rush to stores on Christmas eve will be all out of breath and nearly out of money. Those who buy in feverish haste after "Universal" goods are sold out are apt to select gifts that are as inappropriate as a coffin at a wooden wedding.

Universal Bread Maker
Three Sizes

Universal Roundheel
Electric Iron No.
E9091

TAKE the tip and have enough "Universal" stock for the early comers and late rushers. This year the gift buyer's slogan will be—"Practical things for sensible people who live useful lives." There will be less money in selling useless gimcracks than there is gold in goldfish. Sell what your trade wants and you won't want for trade.

Universal Aluminum
Percolator No. 476

"UNIVERSAL" Electric Appliances, Vacuum Bottles, Casseroles, and Cutlery fit human needs like the skin on an apple. At no time in the history of "Universal" products have so many opportunities been presented to make profitable sales. If you think business has been too dull for too long, experience a change for the better. It will come quickly by stocking and pushing "Universal" Useful Gifts.

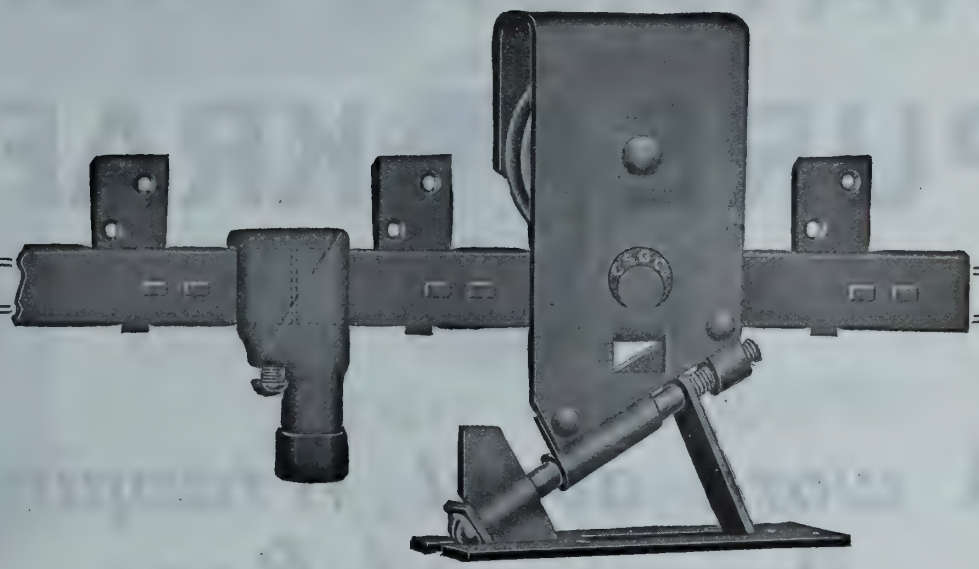
THE "SUPERIOR" Parlor Door Hanger



All That the Name Implies—"Superior"

This noiseless parlor door hanger has the simplest adjustment principle known. The adjustment screw is fully dependable and reliable—it always works.

This effective hanger is fitted with fibre wheels operating on case-hardened roller bearings. The bumpers are specially manufactured, they are bound with rubber of extra heavy thickness.

They are packed complete with screw, stops, and guides; 14 feet of track with double sets; 8 feet of track with single sets.

WAYAGAMACK PURE KRAFT

A word about Wrapping Papers and Bags

According to Shakespeare

"The Apparel oft proclaims the Man"

It is equally true that the appearance of a parcel often indicates the standing of a merchant. An inferior quality of paper or paper bag creates a bad impression amongst customers, especially if the parcel should arrive at its destination in a damaged condition, which is so often the case where inferior grades of wrapping paper and bags are used.
The best is always the cheapest in the end. As a wrapping paper

Wayagamack Pure Kraft

is unrivalled. It is fifty per cent. stronger than other qualities of paper and bags of equal weight and consequently is cheaper. This can be easily proved through practical demonstration by the wholesaler from whom you obtain your supplies. There are, of course, imitations, therefore when ordering wrapping paper,, bags, envelopes, notion bags, etc., always insist on being supplied with

Wayagamack Pure Kraft

which means

Strength and Security

If interested tear out this page and place with letters to be answered.

Dependable and Effective

1914 Door Hangers and Track

This is a good line to sell as you can see from a careful examination of the illustration.

Your customers will be interested in the special hardened steel bearings, the enclosed carriage in its weather-proof track and the flexible joint that allows the door to swing.

The enclosed carriage assures freedom from ice and packed snow troubles. The weather-proof track, in the same way, assures a clean, unobstructed runway. It is easy to sell S-B Door Hangers because of their advantages. The 1914 Hangers are packed one pair in a carton, complete with bolts; 1915 Track and 1915 Brackets, and directions how to apply.

Westinghouse

Washing Machine Motors

A Good Motor Betters The Best Machine

There isn't room to say anything more except that we have designed a motor that is particularly and definitely adapted to run appliances used by women.

The main object in the manufacture of this motor has been to make it *trouble-proof in every way*. It is so certain that this purpose has been achieved that it is really worth while for any woman to be sure she gets a Westinghouse Motor on any appliance she buys.

Magazine windows and yours

EVERY Westclox magazine advertisement is in effect a big national show window of Westclox goods—and your goods.

It is building good will, the thing that sales are made of.

When you put Westclox in your own show window you complete the link in the chain between the great national magazine show window and your own cash register.

You remind folks that your store carries these goods.

Try it again this week and see how surely it works. Arrange a Westclox window and watch it pull in customers and dollars.

We are investing thousands of dollars in magazine show windows every month. Will you invest the price of your own window space, now and then, to make this advertising pay you bigger returns?

Western Clock Co., Limited, makers of Westclox
Peterborough, Canada

If interested tear out this page and place with letters to be answered.

"A TOUGH old customer is the goose and I know I've got to hit him *hard* and hit him *frequent* or he's going to get away. That's why I always order my shells direct from the chart of Du Pont Standard Loads because I know the load wouldn't be on the chart unless it was *right*."

STANDARD DU PONT 12 GAUGE LOADS

	DU PONT SMOKELESS Drams	OUNCES Shot	SIZE Shot
Large Ducks	3¼ or 3½	1⅛ or 1¼	4-5 or 6
Small and Medium Ducks	3 3¼	1⅛ 1⅛ or 1¼	5-6 or 7½ 5-6 or 7½
Grouse, Partridge, Prairie Chicken	3 or 3¼	1⅛	6 or 7½
Pheasants	3	1⅛	5-6 or 7½
Geese	3¼ or 3½	1⅛	4-2 or BB
Wild Turkey	3¼ or 3½	1⅛	4 or 2
Squirrel, Rabbits	3	1⅛	6-7 or 7½
Doves, Pigeons	3 or 3¼	1⅛	6-7-7½ or 8
Quail	3 3¼	1 or 1⅛ 1⅛	7½ or 8 7½ or 8
Snipe, Woodcock	2¾ 3	1 1⅛	8 or 10 8 or 10
Shore Birds	2¾ 3	1 1⅛	8 or 10 8 or 10
Sora Rail	2¾ 3	1 1⅛	8 or 10 8 or 10
Trap Loads	3 or 3⅛	1⅛ or 1¼	7½

STANDARD GOOSE LOADS:

Powders: Dupont, 3¼ or 3½ drs.

Shot: Ounces—1⅛
Size—2, 4 or BB

Give me *that* load for Geese

THE shooter has confidence in Du Pont Standard Loads. He knows that when he picks a goose load from the above chart, he is buying the best combination of powder and shot that the country's expert sportsmen could determine.

And the same holds true with each load in the list. It is exactly right for the type of bird and small game shooting for which it is specified.

Moreover, by condensing the thousands of former loads into this small table of standard loads through eliminating all unnecessary combinations, you can now meet the demand of every shooter with a smaller and less expensive stock. With a stock of Du Pont Standard Loads there are no "dead ones"—just a few fast selling loads for each type of shooting. The result is larger and quicker turnover and increased profits.

If you haven't received a counter display and a steel-bound card (for use by your clerks) both of which feature the list of Du Pont Standard Loads, write us today. They will be sent free of charge.

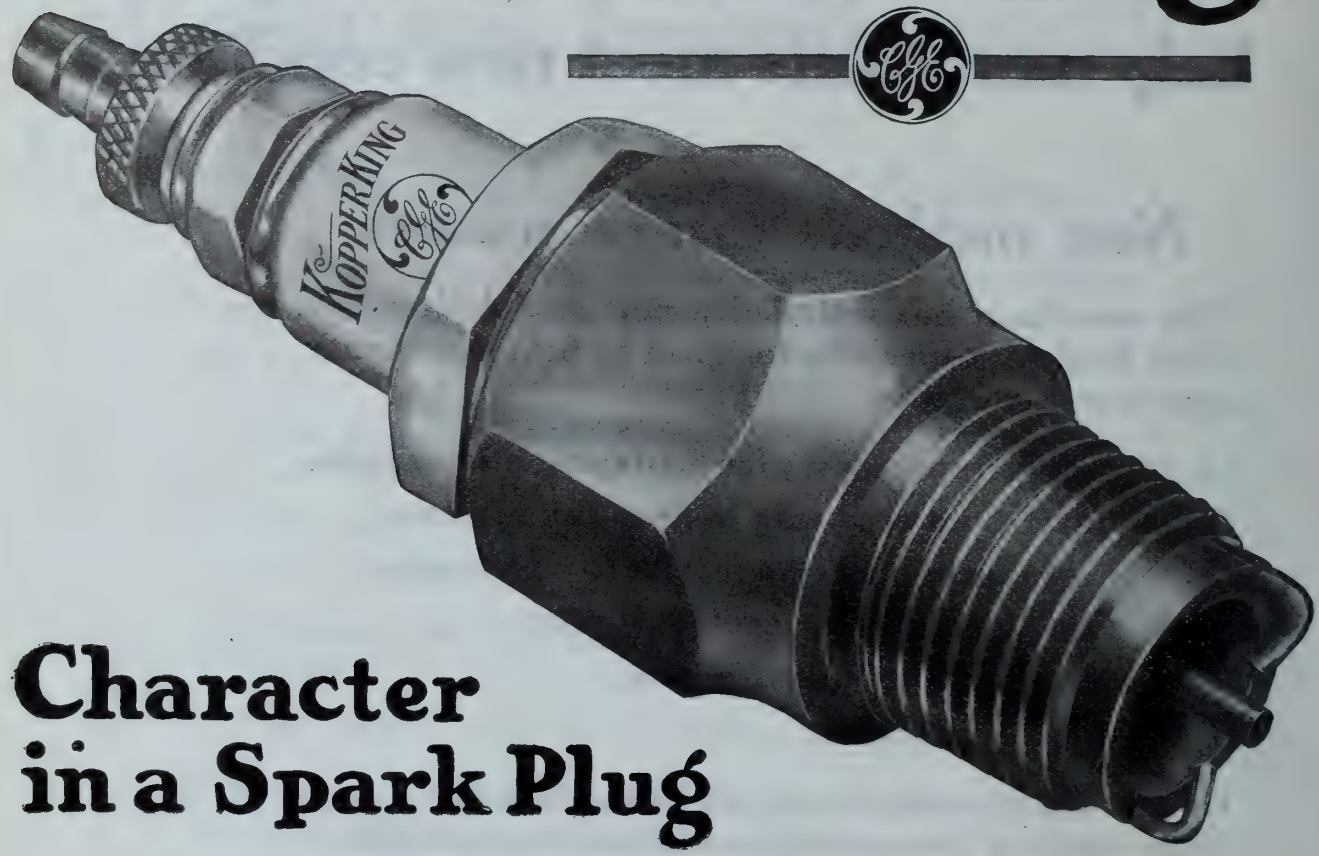
Kopper King



Character in a Spark Plug

FIRING the gas vapor, driving down the piston-head hour after hour with an exploding sheet of flame, demands character—not mere metal and insulation—character expressed in design, in construction methods and workmanship.

The Kopper King is a prestige builder. Incidentally, it shows the Dealer a greater margin of profit than any competing plug. The Rust-proof Copper Surface prevents Carbon deposits; carbon will not adhere to copper under Electrical Heat. The Kopper King is without a peer among Spark Plugs. It is a quality plug from first to last.

The Economy of QUALITY.

Frost Fence for Economy

The Frost Hold-Tight Lock

Grips like a vise.

Farmers to-day want economy and it is economy to pull up weed breeding snake fences.

By "economy" we mean the true economy of quality —the worth while saving of expense, due to many years of extra service your farmer customers enjoy from the superior quality of Frost Fence.

We do **NOT** mean the kind of "economy" due to cheap wire, so poorly drawn as to be brittle, so thinly galvanized it peels and lets rust ruin a fence. That is not economy at all—even if the price be lower for that kind of fence.

Every rod of Frost Fence is made, in our own plant, of extra heavy galvanized No. 9 wire in both laterals and uprights. It has the proper temper, pliancy and powerful strength. The wave takes care of every weather change, compensating like a spring to contraction or expansion. Frost Fence keeps taut and tidy in all weathers years after other fences have sagged or broken down. That is **real economy!**—and that is what your customers are looking for—and Frost Fence costs no more than others!

If you want to meet the farmers' desire for **real** economy—**handle** Frost Fence. Big fence business coming in 1922. Let us tell you all the particulars. Write to-day.

Canada's Problems Reviewed by Officials of Bank of Montreal

The addresses of the President and General Manager of the Bank of Montreal, at the annual meeting of shareholders of that institution, were the authoritative pronouncements of men of international standing in matters of finance, and as such they will undoubtedly be followed with much interest both in this country and abroad. Every year the addresses at this annual meeting are looked forward to with keen anticipation by merchants and manufacturers because of the comprehensive analysis that they provide of financial conditions in Canada, and because they afford guidance in the general business policy to be followed during the coming year.

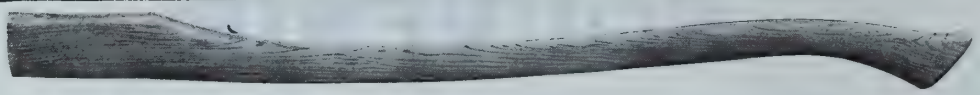
Must Deal With Railway Situation

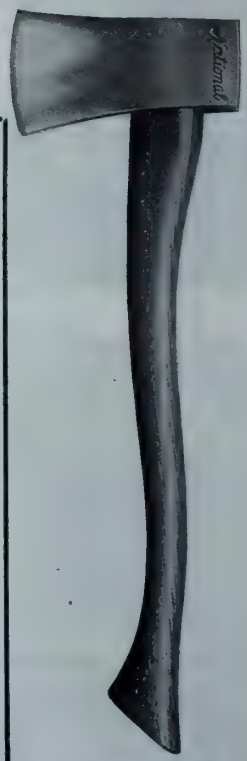
In the view of Sir Vincent Meredith, the way to sustained improvement in trade is not yet clear, but that improvement will be hastened when labor realizes that war inflated wages cannot continue, and that more efficiency and greater production are absolutely necessary in order to bring prices down to a level that will stimulate consumption and thus provide increased employment. His warning as to the evil effects of heavy taxation in stifling industry and enterprise is one that will be cordially endorsed by all thinking men, and one which those who direct our public affairs surely will not dare to ignore. And Sir Vincent merits public thanks for the courageous way in which he dealt with the railway problem; in particular for his uncompromising declaration that no marked improvement can be expected in the present burdensome conditions so long as the roads continue under public—which, as he said means political—ownership and operation. Both Great Britain and the United States have realized the financial chaos inseparable from such ownership and operation, and have adopted the only remedy. Let us hope that Canada will profit by their example before the country is plunged still deeper into debt.

Retail Forces Out of Line

Sir Frederick Williams-Taylor undoubtedly placed his finger on one of the weak spots in our present trade condition when he said that while on the one hand the purchasing power of the products of our natural resources was at the lowest level reached for several years past, in other directions we still had high prices, and retail prices were conspicuously out of line. It is on the purchasing power of the products of our natural resources that we must place our main dependence for a revival in trade, and it is obvious that there can be no sustained improvement until the prices of other commodities are commensurate with that purchasing power.

Summed up, the most obvious needs of Canada at the present time, in the opinion of these two eminent financiers, are drastic economy in the conduct of public affairs, a solution of the railway problem on the basis of private as against political ownership and operation, a vigorous immigration policy for the peopling of our waste spaces by diverting to Canada the stream of immigrants that formerly flowed elsewhere, and deflation in the cost of labor.





NATIONAL

Guaranteed Axes and Tools

We make our own steel in our own vast plant covering 40 acres of ground! During the war we had one of the most extensive, best equipped and successfully operated munition plants in Canada.
We have devoted a year to perfecting the adaption of this plant to the making of the best Canadian axes and tools. We are now ready to sell these.
Few, if any, axe and tool manufacturers in Canada have our expert tool-making facilities, tempering processes and tests, inspection or shipping facilities. Our special metallurgists and chemists, and our specially constructed forging, temper ing and annealing furnaces, and chemical vats, assure you properly tempered tools. Making our own steel relieves us of the many handicaps existing where material has to be obtained in open market.

Last Minute Xmas Sorting Trade

Thought of Low Stocks at Inventory Period Means Bringing Stock of Christmas Wares to Minimum.—Danger of Missing Late Sales.—Sorting Order Carefully Made Out to Catch Christmas Eve Shoppers.

THE Christmas season is now well at hand. Yuletide greetings are conveying the spirit of goodwill. The atmosphere itself seems charged, everyone realizing the approach of our greatest annual holiday. Hardware stores are decked with garlands, wreaths, bunting and evergreen. Store windows show brilliant displays, offering suggestions for suitable gifts of electrical goods, household utensils, etc. People are now in the midst of their shopping tours, seeking gifts for other members of the household. Merchants have already reaped a certain amount of their harvest through earlier purchases, and from all appearances the Christmas season for 1921 will be productive of favorable results from a sales point of view. Gifts of a more useful character are in greater demand than in past years, and the hardware store is in a better position to give to their customers many lines, the purchase of which is "money well spent."

Stocks of holiday lines are comparatively lighter than in other years, buying having been carried out with caution. There are many articles that sell at Christmas time, while immediately after they may almost be termed "dead" stock. The call of the June bride marks the next period when these goods again become active, and this means the passing of some months before they will again commence to move. Dealers, too, have not forgotten that inventory figures in the opening weeks of January must be kept as low as possible, this thought also having been borne in mind at time of purchase. Many merchants state that their stock of holiday lines are from 25 to 50 per cent. lighter than they are in the habit of carrying for reasons stated above.

"We have every reason to believe that we will enjoy an active season," said a prominent hardware merchant to Hardware and Metal. "Enquiries from the shopping tours of the people, usual in the few weeks in advance of Christmas, are speeding up from day to day, and sales are being made in an encouraging number."

"We will benefit, too, by our lighter stocks this year. We are carrying only about 50 to 60 per cent. as much stock as we did in former years, and are depending on our jobbing house to supply us up until the more active period in the last week before Christmas."

This method can be adopted by those located close to the supply centres, but it is hardly applicable to merchants in the outlying districts. City stores may, by telephone, replenish their stocks from day to day, while those in neighboring towns

Says Marking Act Advertises Imports

Representatives of U.S., British and European Manufacturers Says Marking Regulations Force Effective Advertising Measures Upon Foreign Manufacturers—Suggests No Imports Be Marked With Any Identification—Canadian Distributor's Name On Imports as Well as Maker's

AS THE time for the enforcement of the Marking Act draws nearer, the storm of protests forthcoming from various sources concerning the difficulties of complying with this legislation become more pronounced. An interesting opinion on the subject is that expressed in the following statement made to Hardware and Metal by the general manager of a prominent Toronto manufacturers' agency, which represents a number of United States, British and European manufacturers of hardware, cutlery, auto accessories, etc.:

"It is very hard to understand the motive, or imagine what the father of this regulation had in his mind when he advocated its adoption. To the ordinary business man it looks like insidious propaganda. The idea of penalizing foreign manufacturers who do not know enough to advertise their goods, in opposition to Canadian manufacturers in Canada, is something new to us all.

Effective Advertising

"The idea of marking goods showing the country of their origin was instituted in European countries years ago, and we Canadians were taught by bitter experience just how effectually this advertising worked. The Hun got his foothold in Canada through the 'Made in Germany' mark that was placed on every article made in that country.

"We were asked to spend our money, and much money has been spent, in advertising campaigns to boost the 'Made in Canada' mark, now the question arises who is responsible for the idea of forcing European and all foreign manufacturers to advertise their wares, and their origin, in competition with our own Canadian-made goods? Who is so anxious to have the foreign goods placed in our consumers' hands, branded in such a way that they will be able to go back to the dealer and ask for that particular brand of goods?

"The proper thing to do, from a Canadian standpoint, would be to penalize the Canadian manufacturer who failed to mark his products 'Made in Canada,' and to refuse to admit to this country any foreign products bearing the makers' name, or the name of the country of origin. Then let our highly protected Canadian manufacturers try honestly to make every article bearing the 'Made in Canada' mark worthy of the country of its origin.

Deprive Imports of Guarantee

"This would make Home-made goods the only goods offered in Canada that would be backed up by the guarantee, which is given by the name of a reputable manufacturer being stamped on them. Every other line of goods, from every other country, would thus be deprived of the guarantee of the maker's name, and the Canadian consumer who would otherwise buy foreign made goods in preference to those made in his own country, would not be able to gloat over the superiority of foreign-made goods. Take the 'Made in ——,' and the manufacturer's name off all foreign products, and throw them in a common heap and you will more effectually remove the sting, than by any other method.

"People will not buy goods which do not bear the name of the maker or a brand of some sort. They will say: 'Well, if the man who made it was afraid to put his name on it, I guess it is not up to much.'

"Some dealers cannot sell goods that are not highly advertised and, in some instance, only sell the things that are asked for. If all foreign goods are only allowed to enter this country when they bear no mark or name, and the consumer who buys them does not know where they come from, how are these goods ever to become known, or popular?

"There is no possible ground for argument when the statement is made that advertising familiarizes the public with a line of goods, then, what argument can be offered when I state, that if the advertising of foreign goods is prohibited, that will effectually kill the sale of them in Canada?

"Once put this regulation into effect and thereby legalize, in the eyes of the public, the sale of 'Made in Germany' marked goods, and see how long it will be before this market is flooded with German cutlery, which is already stored in many wholesalers' warehouses at the present moment.

Put Canadian Distributors' Name On

"If these regulations are aimed at the 'Hun', the idea is all wrong. Why blame the 'Hun' or anyone else, for selling his goods where he can find eager buyers? If there is any stigma, place it where it belongs by passing a law that any Canadian jobber, who markets German-made goods in Canada, must have the

How About Your Entry?

The Hardware and Metal **CHRISTMAS WINDOW CONTEST** for 1921 is now well under way. Many hardware merchants and retail salesmen are taking part for the honor of being a prize-winner or runner-up in the contest.

Read the details in this issue, then send along your entry.

DO IT NOW.

Aiding Rural And City Shoppers In Selecting Hardware For Xmas Gifts

A FOUR page "Store News" leaflet as used by Brockville Hardware Co., Brockville, Ont., was turned to good advantage in connection with the stimulating of Christmas trade this year. An illustration of the first page and one of the inside pages of this leaflet is shown herewith, indicating the general layout and showing how illustrations, descriptive matter, prices, etc., have been arranged to good advantage.

Going into the homes on a selected mailing list within a few days of Christmas when many people are in an undecided mood as to what to buy for gifts, this leaflet fills a need and has been found effective both for pulling in business directly and in supporting the local newspaper advertising, window displays and other effort put forth. This paper was mailed direct to the homes of two thousand farmers in the district. It is found that with limited time in which to look around for gifts the farmers appreciate such effort on the part of the hardware merchant to provide them with suggestions of suitable gifts.

Christmas Spirit

On the first page of the leaflet appear illustrations of pyrex ware, mops, cutlery, etc., all with prices plainly marked. A suitable editorial concerning Christmas on this page reads as follows:

"Christmas is the greatest time of all the year, because it is the time of good cheer, a time of peace and good will between each and everyone. Its wonderful influence keeps alive those finer and higher qualities of friendliness and good fellowship which are sometimes forgotten in the hustle and bustle of every day business and earning our daily bread.

"And without Christmas what would the year mean to the children—Christmas is the high light in their little lives—it brings delight, answers childish dreams, makes millions of children dance with glee every year and makes us all happier to see such cheering sights.

"This store has that Christmas spirit in full measure and holiday shoppers will find it a pleasant, cheerful, profitable place to purchase gifts."

On the other page as illustrated, appear illustrations of lamps and lanterns, irons, alarm clocks, skates, bread mixers, razors, coffee percolators, knives, oil heaters, etc. Another page is devoted to illustrations of suitable gifts of aluminum, etc. A note on this page says:

Suggestions for All

"Dear Friends,—At Christmas time most everyone is puzzled with the problem of deciding what gifts would be

PERFECTION OIL HEATERS

Blue enamelled $11.50
Nickel plated trimmings $8.90
Black japanned trimmings $7.90

One of these will help warm the house.

Two pages of the four page leaflet issued by Brockville Hardware Co., Brockville, Ont., and mailed to a selected list of 2000 farmer prospects in the district. Note the generous use made of illustrations, the prominence given prices and the brief but adequate descriptions. This publicity used in connection with the other advertising and window displays was very effective.

best and most suitable to give to Father, to Mother, to Sister and Brother, to little folks and others that are usually remembered at Christmas. The gifts we have listed here are of a very high standard and anything you buy that does not suit may be returned and your money will be refunded without question. Hoping this will be the Merriest Christmas you have ever had, Brockville Hardware."

The fourth page of the leaflet deals with silverware giving full description of various lines of cutlery. Under the heading "Dandy Sleds for Christmas" a number of sleighs of varying sizes are listed, and prices prominently shown.

Throughout the advertising and other effort put forth by this firm in connection with seasonable trade, the Christmas spirit has been much in evidence, and to this is credited much of the volume of business which is being enjoyed. Shoppers of Christmas gifts like to buy where the Christmas spirit prevails.

The leaflet which has been described measured approximately 8" x 11" for each of the four pages, type size. An addressed envelope was enclosed with each one sent out, for the convenience of readers who might desire to order direct or ask for certain articles to be held pending a visit to the city.

WATCH FOR THE NEXT ISSUE

In the December 24 (next) issue of Hardware and Metal there will be a very helpful article dealing with the forthcoming inventory, showing forms which have been established after an extensive survey of various stocktaking methods adopted by hardware merchants in Canada and the United States.

The application of the ideas outlined in this article can be made by most hardware merchants to good advantage and so relieve much of the distastefulness which is associated with this annual undertaking, in addition to providing information of great value for planning 1922 business. Do not overlook this article.

U. S. IMPORTS OF IRON AND STEEL FROM CANADA

United States imports of iron and steel from Canada in October were as follows:—Scrap iron 7,827 tons; rails 1,126 tons; pig iron 106 tons, together with small shipments of various other products except tin plates and wire rods. Scrap iron receipts for the ten month period of 1920 and 1921 amounted to 130,871 and 36,773 tons respectively of which Canada supplied the greater part.

LAST MINUTE XMAS SORTING

(Continued from Page 45)

canot rely on this daily delivery. However, it does apply in a way to all dealers up until the closing days before Christmas, as rush mail orders generally cover the situation.

The most active period in the Christmas trade is the last two days, and particularly the last with its Christmas Eve. People may have decided on their purchases, but wait until Christmas Eve before taking them home. It is almost necessary to sort up very carefully at this stage of the shopping season, to eliminate the danger of missing these late sales. The merchant therefore is confronted with the problem of supplying the last minute demand without being forced to carry over the goods not sold, and the only way out of the difficulty seems to be a sorting order, carefully made out, and forwarded to wholesaler in the closing days. Merchants will have had time to study the trend of the demand, what lines are selling this year, and the order can be made out accordingly.

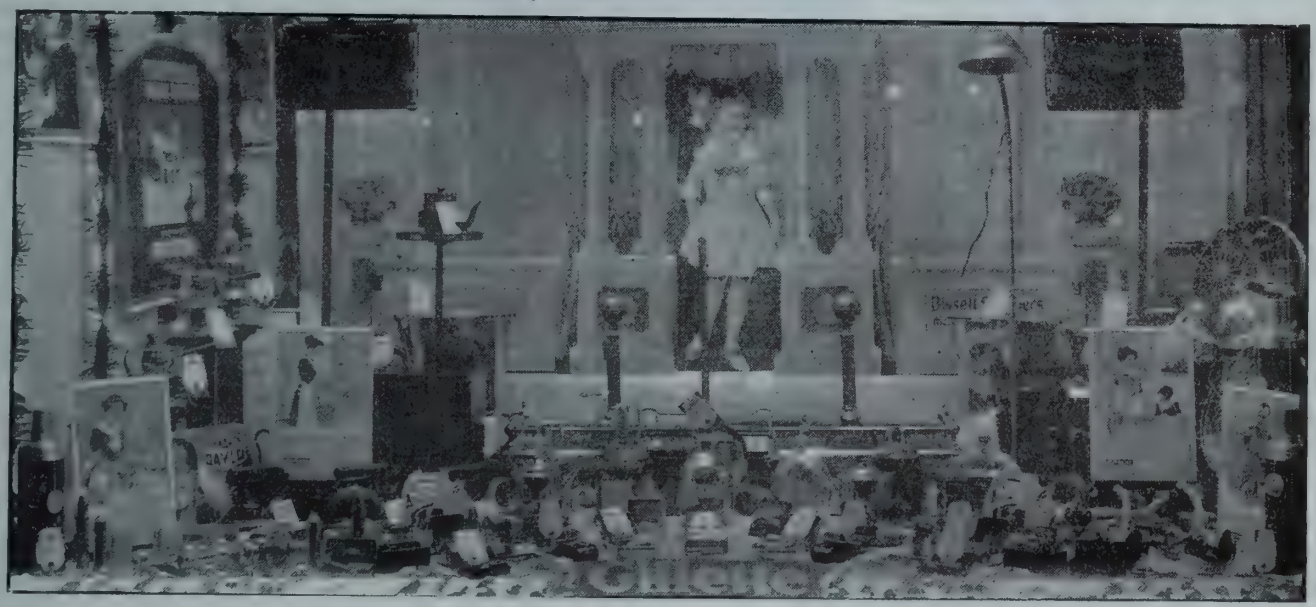
This can be done to take care of last minute buyers, and still comply with the wishes of every merchant; to keep the stocks to a minimum for the opening of the New Year.

Auto Accessories in Xmas Trade

The approach of cold weather brings several lines of automobile accessories into seasonable demand. The motorist who will drive his car all winter, and these now constitute the majority, requires chains, robes, gauntlets, heaters, curtains, windshield cleaners, batteries, flashlights, oil, anti-freeze, etc. These and other accessories make very acceptable gifts for Christmas as well, and in a year when more practical presents will be given such gifts will be much appreciated by the car owner.

Household Electrical Goods As Practical Gifts For Xmas

Electrical goods predominate in this Christmas display by Plummer Ferguson Hardware Co. Ltd., Sault Ste. Marie, Ont., as dressed by J. N. Rush. Electric heaters, irons, toasters, percolators, flashlights, grills, etc., are shown prominently in the raised part of the display in the centre, and surrounding this are other suggestions including safety razors, thermos bottles, bread mixers, watches, clocks, etc. This firm have found an increasing tendency toward the purchase of some useful electrical lines as presents, because of their utility and convenience.



Electric heaters, reading lamps, toasters, irons, percolators, flashlights, etc., are arranged in this display of Christmas gift lines in a somewhat different manner to that shown in the other display on this page. Here the various suggestions are spread across the display and are shown in company with fire irons, razors, thermos bottles, hot water bottles, bread mixers, etc. Note that price tickets are shown on each article.

News of Western Canada

Close Attention to Collections in B.C.

Retailers Find It Necessary to Keep Prodding Buyers for Payment — Election Results Do Not Worry Hardware Trade — Featuring Bird Cages in Xmas Trade

VANCOUVER, B. C.—With the advent of the Christmas season conditions in the hardware trade on the British Columbia coast are said by the distributing trade to be satisfactory. It is said that the volume of business compares very favorably with last year.

In retail circles collections are said to be slow and to keep within bounds at all, dealers are steadily prodding the buyers. From a wholesale standpoint the Okanagan is still meeting its payments with regularity but in the northern part of the province—Prince Rupert and east—retailers are slow in meeting commitments. On Vancouver Island a very satisfactory trade condition is said to exist.

Price changes this week include coppered iron wire used in making wire baskets which has been lowered by 55c to a dollar per hundred pounds according to gauge.

In retail circles several of the Vancouver dealers are making a specialty again of the handling of canaries which they are displaying to advantage. This brings cages into prominence. One prominent retailer stated that he had brought a carload from the east by boat at a rate of around $4.80 as against $18 by rail and these will soon be on the market at a little over $35. There is a good demand and the output goes a good way in helping to swell the totals of the holiday trade.

As is usually the case at this period cutlery is in fair demand but deliveries on new stock are said to be poor. Advices were received this week that an order, placed in July, left Liverpool or was supposed to leave that port on the first of November. It has not yet arrived and orders have gone forth cancelling it.

Election changes—the defeat of the Meighen administration—have caused no particular worry to the hardware trade as it is believed there will be no drastic changes in the tariff for a considerable period. It is also too early yet to figure the effect of the freight reductions effective on the first of the month and no price adjustments have been made on this account.

The trade is paying quite a little attention to silverware and some attractive displays may be seen. One retailer is making a special of a set of six each of knives, forks, teaspoons and dessertspoons together with a butter knife and sugar shell in a handsome oak cabinet with two drawers at $13.75. Copperware and aluminumware are among the heaviest sellers at present.

WESTERN CANADA NOTES

Winnipeg.—C. I. Bukton, Secretary and F. C. Kenyon, Assistant Treasurer of the Minnedosa Implement Mutual Fire Insurance Company, were visitors to Winnipeg last week and called on C. L. Clark, manager of the Canadian Hardware & Implements Underwriters' Association.

Winnipeg.—C. H. S. Bamford, Sales Manager of the J. H. Ashdown Hardware Company, Limited, has recovered from his illness and returned to business.

Harry Rickleson, district sales-manager, Dominion Cartridge Co., Ltd., Victoria, B.C., is dead. Mr. Rickleson was recently struck with gun-shot from the gun of a companion and contracted blood poisoning.

NEW RAIL ORDER FOR ALGOMA STEEL

Algoma Steel Corporation has been awarded a contract for 6,000 tons of standard rails for the T. & N. O. railway, in connection with its extension. Tenders were called for. This latest order comes in addition to the Grand Trunk rail business announced a week ago, and together with the C. N. R. and C. P. R. placings, gives a substantial tonnage on the books of the Algoma Corporation, guaranteeing fairly active production for the balance of the winter season.

FAREWELL FUNCTION FOR C. H. GILL

Vancouver, B.C.—An interesting social gathering was held here on the eve of the departure for England to spend the Christmas holidays with his family, of Chas. H. Gill, director of the Britannia Wire Rope Co. The affair was a great success. Mr. Gill was presented with two beautiful steamer trunks made in Vancouver and a gold mounted fountain pen suitably inscribed.

Robert Gibson, president of Gibson's Limited and managing director of the Britannia company which are closely allied, acted as chairman. In the course of his remarks Mr. Gill referred to the splendid feeling which existed between the staffs of the two companies and said that a closer working arrangement between the companies had been arrived at.

EXPECTS SPRING BUSSINESS IN WEST WILL BE GOOD

B. M. Hill of the B. M. Hill & Company, Ltd., Winnipeg, has just returned from a visit to his retail store at Pennant, Sask., and reports that while conditions are not good he cannot see any need for the wave of pessimism that seems to prevail in this City and although crops are not large in the district where his store is located in no case are the farmers leaving the district. Each farmer is putting in more time on his land and is preparing for a bigger acreage and with the advent of sowing fall rye, which distributes the work for a greater period of the year, he is able to do with less hired help, and consequently he is working with a smaller overhead expense. These conditions point to a revival of business in the early Spring and while the volume may not be as large as in other years Mr. Hill believes business will be better, because the Country merchants and farmers are both preparing to do business on a cash basis.

GRAND TRUNK DIVIDES ORDER OF 29,000 TONS OF RAILS

The G. T. R. has placed an order covering its rail requirements for 1922. Business was closed for 29,000 tons of rails, of which Dominion Iron & Steel received 15,000 tons for production at its Sydney plant, and Algoma Steel Corporation 14,000 tons at Sault Ste. Marie.

Retailers At Coast Score Point

Looks Like a Partial Victory for British Columbia Merchants Who Have Been Putting Up a Spirited Fight Against Another Personal Property Tax—J. T. Crowder, R.M.A. Head, Has Been Prominent in the Movement.

VANCOUVER, B. C.—At this date, it looks like, at least, a partial victory for the organized retailers in British Columbia who are putting up spirited fight against another personal property tax.

Readers will recall that the British Colombia government, besieged by the union of B. C. municipalities for financial relief, hit upon the idea of taxing all those engaged in trading or business of any kind, one per cent. on the value of their stock and fixtures—this to go to the municipalities concerned.

Penalty On Business

This proposed method of raising school and hospital revenue from this one class of the community raised the biggest furore of any taxation proposal yet made. It was pointed out that this new imposition would penalize every commercial undertaking of any kind for carrying on at this time, that it would prevent big or small mining companies from carrying on any improvement and prospecting work that could possibly be avoided. It would cost the shipyards immense sums of money on their work while in progress. It would discourage the oil companies in undertaking any refining in British Columbia, and would impose an additional impost on many retail and wholesale businesses that at present were merely hanging on.

A delegation from the organized merchants and manufacturers waited upon the Committee of the House that was dealing with the problem of Municipal Finance. Quite obviously the private citizens opposing this measure cannot go on the floor of the House and plead their case. In convincing the Committee of the House, they did as well as it is possible to do.

Now the budget has come down.

The personal property tax rate was reduced to half of one per cent. This is a clear saving of $100 to any firm with $20,000 stock. Then the unorganized districts have been eliminated. This lets out the great interior lumber and mining districts where the tax might have discouraged any effort that might not prove immediately profitable.

Another point is this:

The Government relinquished the personal property tax entirely for Provincial Revenue. This, taken in connection with the reduced tax for municipal purposes, places the merchant in a much better position. For instance, in Chilliwack a business carrying a stock of $100,000, previously would have been taxed in one of two ways. If the profits did not make the income tax productive enough, the personal property tax would have been imposed and a $1,000 tax taken at least. If the business had shown enough profit to make the income tax the most productive, this would have been applied.

Now if the business had not shown a profit, the income tax will be assessed anyway, on what is applicable, and if the personal property tax is imposed for the benefit of the municipality, the amount will be only $500. The other big point scored is that the matter of

J. T. CROWDER
Who Heads B. C. Branch of R. M. A.

assessing this tax on the business in each municipality is optional on the part of the municipality. If Coquitlam does not care to handicap the business and industries in this way, it may so elect. If it does, and Port Haney does not, Port Haney will have the advantage in bidding for industries, an advantage of half one per cent. of the stock and fixtures of the business.

The matter of abolishing the exemption on the income tax was proposed by those opposing the personal property tax. It was argued that all, no matter how small their income, should contribute some small percentage toward their school and hospital. But when the Government got into caucus and figured how this would appeal to the "voter" the song of "Where Do We Go From Here" was struck up, according to Mr. Crowder, president of the Retail Merchants' Association, and the matter of adjusting the income tax was dropped.

Up To Municipalities Now

The relief that the municipalities secured amounts to permission to assess their local industries one half per cent. for the benefit of the local schools and hospitals. The manufacturers and merchants will now lay before their respective municipal authorities the points that make this local assessment disadvantageous to the business community, which is, of course, responsible for the prosperity of the community as a whole.

WESTERN CANADA NOTES

Elbow, Sask.—L. P. Woodham has discontinued the hardware business.

Regina, Sask.—Peart & Co., Ltd., have commenced hardware business here.

Vanscoy, Sask.—R. Williams, hardware, is selling out.

N. G. Neil, manager of the Employers' Association, addressing the Electric Club at the Hotel Vancouver this week on the subject of unemployment, said that unemployment was a charge upon industry rather than upon the state the unemployment problem was handled by organized industry efficiency methods would soon abolish this problem, he declared.

At the meeting this week of the Vancouver Association of Electrical Contractors and Dealers the following officers were elected: president, C. C. Carter; secretary-treasurer, P. F. Letts; executive committee: Sidney Darnborough, S. E. Jarvis, J. C. Reston, W. W. Fraser and E. Brettell.

Harry Martin, of Martin Finlayson & Mather, Ltd., of Vancouver, spent the past week on Vancouver Island visiting the trade. He also packed along a kit of golf clubs but they remained in the bag, the excessive moisture being uninviting to even such a keen golfer as Mr. Martin.

Winnipeg.—H. C. Ashdown, vice-president of the J. H. Ashdown Hardware Company, Limited, left on the 6 inst., for California to join Mrs. H. C. Ashdown for the balance of the winter.

Winnipeg.—T. G. McCracken, Secretary of the Retail Hardware Mutual Fire Insurance Company, Minnedosa, spent a few days last week in Winnipeg with C. L. Clark, manager of the Canadian Hardware & Implement Underwriters' Association.

Hardware and Metal

Canada's National Hardware Weekly

Member Audit Bureau of Circulations Member Associated Busines Papers

The Only Weekly Hardware Paper in Canada

PUBLISHED EVERY SATURDAY SINCE 1888 BY

The MacLean Publishing Company, Limited

Montreal TORONTO Winnipeg

TORONTO, SATURDAY, DECEMBER 17, 1921.

AT THE general meeting of the Canadian Credit Men's Trust Association held in Toronto this week, W. E. Coulter, Booth-Coulter Brass Co., Toronto, representing the Ontario Board C. M. A., stated that manufacturers in general were now operating at about 60 per cent. of normal. Replying to a questionnaire, five hundred and three manufacturers in Ontario had stated that present inventories were priced at present replacement values. It was the opinion that from this statement credit men should not be too much concerned when statements of firms showed reduced inventories. Reduction in accounts receivable might well be brought about by more careful placing of credit even more than reduced sales.

What Will Follow?

WIDESPREAD interest will be aroused in connection with the announcement made elsewhere in this issue concerning the location of a factory in Germany by a lock manufacturer of Canada and the U. S. This follows similar action recently taken by another large manufacturer, and the reason given in both instances has been the necessity of lowering production costs in order to compete for business in the export markets of the world.

In view of the sentiment which has existed on this continent since the war, in regard to German goods, this action on the part of two leading manufacturers has considerable significance. Both capital and labor will be interested in what developments may follow this removal of industrial activity to foreign fields.

The Metal Markets

THE NEAR approach of inventory time is having its effect upon the iron and steel trades. Some unusual price concessions are being made by certain producers to improve their financial standing and as a general tendency buying is being curtailed in order that inventories may show little surplus. This condition makes it difficult to form an idea of the approximate prices at which the big business which is expected next year, will be booked. November iron and steel production showed an increase both by U. S. and British mills.

It is significant that with the exception of the Central European powers and Russia, non-ferrous metals are dearer in Canada to-day than in any other country in the world. Copper has shown more activity in the last two weeks than at any time during the year and in certain quarters it is expected that after the recent steady rise, present prices will be maintained. Tin is, of course, a highly speculative market, the forces controlling the output and marketing of tin being ruled by one of the most exclusive rings in existence and having strong financial backing. Spelter is showning signs of strength but no noticeable advance is expected for some time. Zinc producers appear to have the situation well in hand and higher prices early in the new year would not be unexpected. Lead is in a somewhat uncertain position, and it is interesting to note that while December is generally considered a quiet month that within the past two weeks more lead has been sold in Canada than during the entire month of November. It is evident that the metal markets present an interesting study at the present time and a close watch should be kept on market tendencies in view of the fact that there are so many unusual influences at work.

Settlement of Accounts

THE INTEREST and excitement which immediately precedes and follows a general election such as that which has just been completed, generally detracts some very necessary interest and attention from other matters which it is dangerous to neglect. During the recent election campaign a tendency developed among certain branches of the hardware trade to neglect payment of their outstanding accounts. One of the reasons given for this tardiness was inability to secure payments from customers, particularly farmers.

The election is over and every branch of trade should devote its attention to getting back to business in earnest. In this connection one of the first things which should receive immediate attention at the hands of retail hardware merchants is the collection of outstanding accounts. As many collections as possible should be made during the month of December in order to start the new year with a clean slate. It will be found that many farmers who are lax in paying accounts at this time, have considerable balances in the savings banks and it would prove no hardship to press them for payment of accounts to the retailer. True there are districts where it may be difficult for farmers to pay the full portion of their debts, but these are the exceptions rather than the rule.

It should be kept in mind that laxity on the part of the retailer in collecting accounts compels the wholesaler to wait for his money and in turn curtails the extent of his purchases from the manufacturer. The retailer is the keystone of the structure; if he fails in his duty other branches of trade suffer, the extent of industrial activity is curtailed and much capital is left "frozen" when it could be helping to stimulate business by being in circulation.

The Sales Tax

THE CANADIAN sales tax, as compared with the little mourned luxury tax, has proved so satisfactory that a group of U. S. business men are visiting this country to study this form of taxation. The Canadian sales tax now yields approximately $6,000,000 a month revenue, and this is secured with little restraint upon trade. It has been the experience of manufacturers that where prices are more or less standardized that at least one per cent. of this tax must be absorbed in the process of distribution, but where prices are not standardized there is a loophole through which the consumer may be made to pay the amount of the tax. The success of this form of taxation probably is due, as previously pointed out in Hardware and Metal, to the fact that it is a tax upon production rather than upon consumption. It bears equally upon the rich and the poor man because it represents a proportion of what is expended, and it does not fall heavily upon the needy because of the long list of exemptions of necessary lines which it provides for.

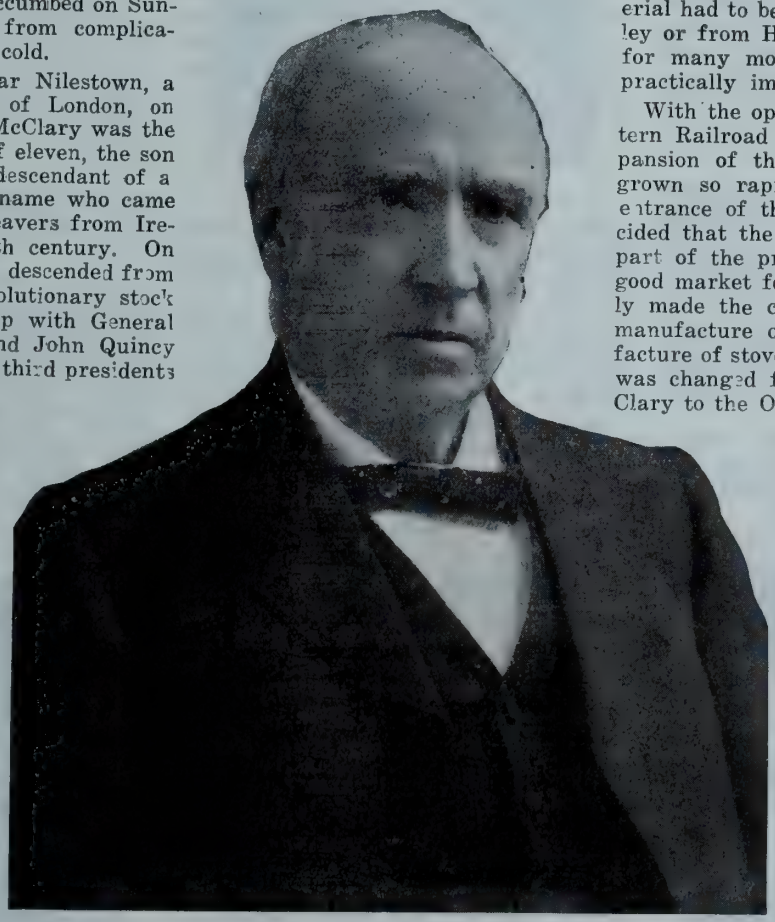
Death of John McClary, London, Ont.

Founder of McClary Manufacturing Co. Passes Away Suddenly at the Age of Ninety-Three Years—Historic Figure in the Stove and General Foundry Business of Canada—Thrilling Adventures in California "Gold Rush" Precedes Early Business Trials in Canada

THE DEATH this week in London, Ont., of John McClary, founder and president of the McClary Manufacturing Company, removes an outstanding captain of Canadian industry who has been prominently identified with the stove and foundry business for many years. Mr. McClary was ninety-three years of age at his death and despite this advanced age had continued actively as president of his company. On Friday of last week he paid his usual visit to the head office, taking ill the same night and being confined until with his heart gradually growing weaker, he succumbed on Sunday. Death resulted from complications which followed a cold.

Born on a farm near Nilestown, a few miles south east of London, on January 2, 1829, Mr. McClary was the youngest of a family of eleven, the son of John McClary, the descendant of a long line of the same name who came to Canada as linen weavers from Ireland in the seventeenth century. On his mother's side he was descended from famous American Revolutionary stock and could trace kinship with General Stark, John Adams and John Quincy Adams, the second and third presidents of the United States.

Mr. McClary went to London in 1847 at the age of eighteen years and engaged in the tinsmithing business. Seized with the gold fever of 1849 at the age of twenty he left for California and many a thrilling tale was he able to tell in succeeding years concerning his experiences in the gold rush. After a brief career as a gold prospector, Mr. McClary opened a small tinshop in California which was subsequently wiped out by fire and within two years returned to London where he has lived since.



LATE JOHN McCLARY

Founder and President of McClary Mfg. Co., London, Ont., who died this week at the age of ninety-three years.

With his elder brother Oliver he established the firm of J. and O. McClary, which was destined to spread from coast to coast and develop into the present McClary Mfg. Co., said to be one of the largest stove industries in the British Empire, occupying large premises in London, Ont., and employing a large number of workers.

The first lines of their manufacture were plows and tinware. The house in which they opened their factory stood on one small portion of the block on which the tinware and enamelware department is now situated. At first they employed half a dozen workmen. John was then what would now be termed manager and Oliver was sales manager.

Their customers were the hardy pioneers that were settled between Windsor, Woodstock and Brantford, and Stratford and Lake Erie. Their manufactured goods were delivered by salesmen in wagons driven over the trails that served for roads at that time. All of their raw material had to be teamed from Port Stanley or from Hamilton, over roads that for many months in the year were practically impassable.

With the opening of the Great Western Railroad in 1853-4 began the expansion of the business which has grown so rapidly. Shortly after the entrance of the railroad the firm decided that the rush of settlers to this part of the province would provide a good market for stoves and accordingly made the change. It dropped the manufacture of plows for the manufacture of stoves. The name of the firm was changed from the J. and O. McClary to the Ontario Stove Works, but the management continued as before. Later the partners decided to add other products and started in the manufacture of furnaces and enamelled wares and also commenced a jobbing trade in sheet metals.

Incorporation

The business continued to grow and in 1871 it was incorporated in Ontario under the name The McClary Mfg. Co. In 1882 Dominion charter was taken out, thus enabling the firm to do business in any part of Canada.

Toronto was the first place chosen for a branch office. In 1879 one was opened in that city with David McKillop in charge. A second branch was soon opened in Montreal under the management of Andrew A. Brown. In 1880 the first Western branch was opened in charge of J. W. Driscoll. Vancouver was entered in 1894 and in 1901 and 1902 branches were opened in St. John, N. B., and Hamilton respectively.

(Continued on page 58)

Events in the Trade

NEW FIRMS

Toronto.—Waller Bros. have commenced a hardware business at 1293 St. Clair Ave.

CANOE FACTORY AND STOCK AT FREDERICTON DESTROYED

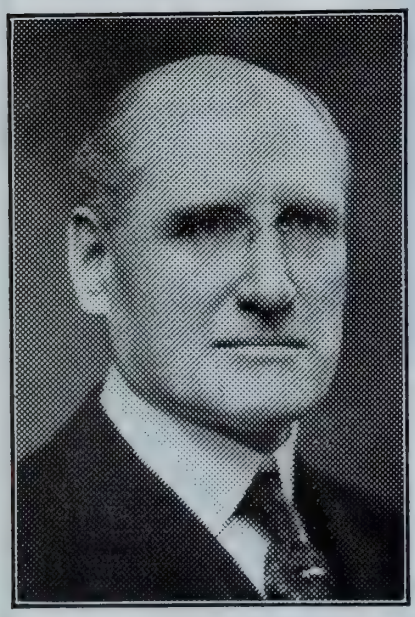
Fredericton, N. B.—The entire plant of the Chestnut Canoe Company, Limited, was destroyed by fire here, together with 300 completed canoes and all the machinery of the plant, the models and rough material. The loss is estimated at $100,000 or more. The insurance, so far as known, was said to be only $20,000.

PERSONAL

W. S. Fallis, vice-president and managing director, the Sherwin-Williams Co. of Canada, Montreal, is on a ten day trip to the Maritime Provinces, calling on the company's offices in Halifax and St. John, N. B.

W. H. Cottingham, president, the Sherwin-Williams Co., of Canada, sailed from New York on Tuesday of this week for England.

George Henderson, president, Brandram-Henderson, Limited, Montreal, left early in the week for New York, and will return by way of Toronto.



E. B. RYCKMAN, K. C.
Vice-President The Dunlop Tire and Rubber Co., Toronto, who was elected Conservative member for East Toronto at the Federal election.

Jno. C. Newman, Montreal branch manager, McClary Mfg. Co., Ltd., attended the funeral of their president in London, Ontario, this week.

Willis H. Simpson, New York, representing certain lines of tools including Maydole hammers, Westcott chucks and Russell-Jennings auger bits; and J. Hossack, of the Lufkin Rule Co., were among those calling on the Montreal trade this week.

Major Anthes, president of the Anthes Foundry, Limited, Toronto, Ont., has just returned from a two-month's business trip through Western Canada. Major Anthes reports there is business to be had for those who go after it.

OBITUARY

Mrs. Jane McGinn Philbin, wife of the late Michael Philbin, president of The Philbin Hardware Company, Montreal, died at her home in that city.

R. L. Lindstrom, superintendent of the Point St. Charles works of the Canadian Steel Foundries, Limited, died at his home in Montreal.

David J. Williams, former superintendent of the Open Hearth furnaces of the Algoma Steel Company, Sault Ste. Marie, Ont., died suddenly from heart failure.

William A. Davies a native of Wales, died in Grimsby, Ont., aged 64. He lived until recently in Detroit, where he was president of the Acme White Lead and Color Works. He went to Grimsby in April of this year, and built a beautiful home, into which the family moved only a few weeks ago. He was stricken with pneumonia last week and rapidly succumbed.

SUDDEN DEATH OF H. M. BOLGER

Montreal.—The sudden death of H. M Bolger, sales-manager of the Montreal branch, McClary Mfg. Co., Ltd., occurred at his home in this city this week. The deceased had been in ill health for some time but was able to carry on his duties, being in his office the day previous to his death.

Mr. Bolger joined the firm in 1910 as traveler for the Eastern Townships which position he held until 1917 when he was appointed to his present post. During his time on the road, and later in his Montreal office Mr. Bolger, through his genial and friendly disposition, won many friends throughout the trade in this district.

MONTREAL MERCHANTS BANQUET CITY FATHERS

The Montreal Merchants' Association were hosts at a dinner recently, tendered to the mayor and aldermen of the city. Mayor Martin spoke of international affairs, of federal and municipal developments, and painted a glowing picture of future prosperity.

CONFERENCE ON CONSTRUCTION

Ottawa.—A conference of members of the building construction fraternity of Canada and the general public will be held at the Royal Connaught Hotel, Hamilton, Ontario, on January 17 to 20 next.

COLIN McARTHUR & CO. TRAVELERS ENTERTAIN SALES-MANAGER

L. A. Wilkinson, advertising and sales-manager of Colin McArthur & Co., Ltd., Montreal, wall paper manufacturers, who recently returned from a four months' trip through Latin America, was tendered a dinner by the salesmen of the company on Friday evening last. The dinner was presided over by W. Williamson, president. Colin McArthur vice-president, and most of the Ontario and Quebec travellers were present.

J. C. CHAPLIN
President The Welland Vale Mfg. Co., St. Catharines, Ont., who was elected Conservative member for Lincoln, Ont., at the Federal election

Montreal Metal and Hardware Ass'n Meets

Colonel Robert Starke Succeeds Edward Goodwill as President—Marking Imports, Sales Tax and Customs Forms Come in for Discussion

MONTREAL.—The Annual Meeting of the Metal & Hardware Association, Montreal Board of Trade, was held this week. In the absence of the president, Edward Goodwill who was called to London, Ontario, to attend the funeral of the late John McClary, the chair was taken by the vice-president, Col. Robert Starke, Starke-Seybold Co., Montreal.

Owing to continued ill-health, Mr. Goodwill is compelled to retire both from the presidency and as representative of the Metal & Hardware Association on the Council of the Board of Trade.

Col. Robert Starke was unanimously elected to succeed Mr. Goodwill as president, and also as the Association's nominee for election to represent the Association on the Council of the Board of Trade. Other officers elected were; vice-president, T. M. Hutchison, Drummond McCall & Company, Ltd.; treasurer, Harry Diplock, Steel Company of Canada, Ltd.; secretary, C. Beatty; directors, W. Beverley Robinson, A. A. Robertson, A. Jeannotte and T. H. Jordan.

Considerable discussion took place as to whether the members should resume their custom of holding an annual banquet, which was dropped during the war and subsequent period and the money devoted to charity. It was becided to assess each member $5.00 for the benefit of some charitable organization, to be decided upon by the executive, and a resolution was adopted covering same.

The Annual Report

In his Annual Report the past president dealt at some length with the customs regulations regarding the marking of importations with the country of origin. The Association, he wrote, while making no objection to the general principal of the Marking Act, had urged at least its postponement until January 1st 1922, in order that importers might be given sufficient time to advise manufacturers in other countries. "While this Association has made no official protest against the general principles on which the regulations were based, it is felt that any Government action which restricts open trading in the markets of the world cannot be termed otherwise than lamentable, particularly under present business conditions," continued the report.

The Sales Tax next came under discussion with particular attention drawn to the new form of certificates of value of invoices required by Canadian Customs for import goods. The recent reduction in Freight Rates was also approved, as dealt with in the Report.

Those present at the meeting included, Messrs. Alex. Gibb, A. Prudhomme, Col. Robert Starke, W. J Hayes, George J. Crowdy, T. H. Jordan, W. Beverley Robinson and others.

COLONEL ROBERT STARKE
Starke, Seybold Co., Montreal, who this week was elected president of the Montreal Metal and Hardware Association.

GUELPH MERCHANTS FAVOR HALF HOLIDAY

Guelph, Ont.—At the annual meeting of the Guelph Retail Merchants' Association reports presented showed that the past year was one of the best in the history of the organization. The financial statement also recorded a substantial balance, while those in attendance were pleased to learn that the membership during 1921 was the largest in several years past.

Considerable business was transacted at the meeting following the dinner, one of the chief questions being with reference to continuing the Wednesday afternoon half-holiday the year round. When the matter came up for discussion, those in favor of closing were by far in the majority, and as a result the Wednesday closing will be observed as usual next year, with but few exceptions.

Officers and certain trade section representatives for next year were elected as follows:—

Hon. Pres., John Armstrong; Pres., W. G. Hawell; 1st Vice-Pres., C. L. Nelles; 2nd Vice-Pres., H. E. Cosford; Rec. Secretary, A. McNiven; Chairman of Trade Sections, Hardware, T. Penfold; Tinsmith, A. Cain.

Winnipeg.—Meakins & Sons, Ltd., brush manufacturers, have moved from their former quarters and are now located in a brighter and more spacious warehouse and office on the 2nd floor of the Galt Building, Cor. Princess and Bannatyne Ave., Winnipeg. Max. M. Smith is Western representative for Manitoba and Saskatchewan.

Yale & Towne To Start In Germany

Yale Locks to be Made in Germany—Company States This is Necessary to Compete in Export Markets—Lower Labor Costs in Germany a Big Factor.

YALE and Towne Mfg. Company, Stamford, Conn., and St. Catharines, Ont., have announced the establishment of a plant in Germany for the manufacture of Yale & Towne products. This is the second announcement of large United States companies establishing German plants, the former being the National Cash Register Company. The Yale & Towne Co., give their reasons as follows:

"In view of the serious decline of our export business, due to the disturbed conditions of international finance and commerce, and in large measure to the lower costs of production obtaining in European countries, we have decided to establish and operate a branch plant in Germany, to avail of the low production costs of that country, and to aid us in regaining and maintaining our former position in export markets. P. F. Augenbraum has been relieved from his duties as Superintendent of Design and Product, and appointed manager of the branch factory to be established in Germany. A recent investigation has indicated that the cost of production in Germany is so much lower than in the United States that it is hopeless at this time to compete in many export markets with goods of American manufacture."

"The company has concluded that until conditions more closely approximate those which existed before the war, they must either obtain the benefit of the lower costs of European manufacture or lose their export business to those who are able to make goods at much lower cost. The latter course would undoubtedly mean the permanent loss of its export business because those who are able to manufacture at lower costs would reap the benefit of the missionary work which has been done by The Yale & Towne Mfg. Company in export fields, and so firmly establish themelves that it would in all probability be impossible for the Company to regain the lost prestige."

"Hardware & Metal Christmas Window Contest"

Christmas Window Contest

EIGHT PRIZES are offered by **Hardware and Metal** for the best window displays of Christmas lines, as arranged for this year's trade by hardware merchants or their retail salesmen.

The contest is open to anyone engaged in the retail hardware business in Canada and the displays will be given a fair and authoritative judgment.

The essential point to keep in mind is that the display will be judged on its effectiveness as a business puller. Many points outlined in past contests of Hardware and Metal as to most effective window trims, should be kept in mind in arranging the contest display. Attractiveness without effectiveness is of little use in a window trim.

Arrange a window which will, literally, draw the passers-by right into your store, then send a photo of it to be entered in the contest.

THE EIGHT CASH PRIZES

Places under 5,000		Places 5,000 and Over	
First prize	$10.00	First prize	$10.00
Second prize	5.00	Second prize	5.00
Third prize	3.00	Third prize	3.00
Fourth prize	2.00	Fourth prize	2.00

Dealers in small communities have just as much chance under this arrangement as those in larger districts. Getting selling ideas into the display is what counts.

The contest closes on Monday, January 2. Photos placed in the mail after that date will not be entered.

All matter must be addressed to The Editor, Hardware and Metal, 143 University Avenue, Toronto, and marked "For Christmas Window Contest."

Don't overlook the prizes and the honor of winning one

Join With The Throng

THE climax of interest in the Hardware and Metal Christmas Window Contest has now been nearly reached. Hardware merchants in practically every city and many of the towns and villages in the various provinces from Atlantic to Pacific are showing great interest in this opportunity of testing out their window dressing ability in competition with merchants in the same trade in all parts of Canada. This is truly an unique opportunity from many standpoints. Many merchants realize this to be the case or this contest would not be attracting the increasing number of progressive merchants each year as it is doing.

The range of interest in the 1921 contest is increasing rapidly and in an ever widening circle. Don't forget, Mr. Reader, that

Time Is Getting Short

and we are counting on YOU for an entry. It will take but a minute or two of your time to arrange to have a photo taken of your Christmas goods display and send it to the Editor. Your entry will not only stamp you as a progressive retail hardware salesman but your co-operation in this regard will be of assistance to yourself and to hundreds of other hardware salesmen who are desirous of making their window dressing more effective.

An entry from every hardware store in Canada is wanted in the big 1921 contest. If the store proprietor is not anxious to enter, he would be conferring a distinct favor upon any one of his salesmen by suggesting that they make an entry.

Don't forget, all photos must be in the office of Hardware and Metal, or be mailed, by January 2.

Set Date of British Industries Fair

The eighth annual British Industries Fair which embraces a large number of the most important lines of British trade will be held in London and Birmingham from February 27 to March 10, 1922. This is purely a trade fair where buyer and seller meet, not an exhibition. This fair, whether regarded from the point of view of size, diversity of products shown or resultant business, is claimed to surpass in importance and value to the world's markets any other trade fair of similar purpose. A visit to the fair will, it is said, convince overseas buyers that the enormous strides have been made in British post-war production. A considerable number of Canadian buyers are said to be making arrangements to attend. Admittance is restricted to trade buyers on invitation of the British Government and business is not impeded by crowds of sightseers.

In organizing the Fair, the British Government Department of Overseas Trade pays particular attention to the comfort and convenience of buyers from various Dominions and other parts of the world. Special reading and writing rooms are available where buyers may consult qualified officers of the Department who will be able to indicate sources of supply of any goods required and to give information regarding tariffs, shipping and transport, trade conditions, etc., throughout the world.

The London Section of the Fair will, as in 1921, be housed in the White City, a large group of exhibition buildings within a few minutes of the centre of London, while the Birmingham Section will again be in the great buildings of the Castle Bromwich Aerodrome, which may now be regarded as permanent Exhibition buildings, within easy reach of the centre of the city. There is a floor area of more than 1,130,000 square feet which is admirably suited for the purpose, and it is interesting to note, that the gangways between the stalls total no less than 3½ miles in length. Not only are both sections of the Fair in London and Birmingham in each instance under one roof, but the various trades are grouped in separate but adjoining buildings, thus saving the time of the buyer.

Information can be secured from British Trade Commissioners in Canada at the following addresses; 248 St. James Street, Montreal, 260 Confederation Life Building, Toronto, and 610 Electric Railway Chambers, Winnipeg.

DEATH OF JOHN McCLARY

Continued from Page 53

It was about this time that the second large building was erected in London. The foundry was moved to the new building which now occupies nearly as much ground as the old plant where the tinware and enamelled ware shops are located together with storehouses.

In 1909 the Calgary branch and a subbranch at Saskatoon were opened and in 1910 the ninth branch was opened and Edmonton was the spot chosen.

Since the advent of Hydro Electric power in London and the use of it having become more general for cooking, the company has added the manufacture of electric heaters and ranges of all styles. During the early years of the war many field kitchens were manufactured for the Canadian army. Business, the favorable trade conditions of the country in general and of his own organization in particular was Mr. McClary's constant consideration. In this connection there was no problem too large for him to tackle nor any detail too small to interest him. To him the news of the day whether it was the proposal of some new foreign ship canal, political unrest in some distant kingdom or the price of garden stuff at home, were not simply unrelated facts to be allowed to pass unheeded but were looked upon as the cause of some corresponding effect upon transportation, immigration or living conditions within our country which would have effect upon the trade and welfare of the country. It was this habit of figuring out results that established his reputation for an almost uncanny foresight which was all the more remarkable in that it did not allow itself to be warped or obscured by the common defect of personal bias. It is due to his industry and foresight that the McClary Mfg. Co. has reached its present position.

In addition to his position at the head of the McClary Manufacturing Co., Mr. McClary was President of the Ontario Loan & Debenture Company, a Past President of the London Life Insurance Co., and a Director of the London & Western Trust Co. He was formerly a Justice of the Peace. In 1911 he was given a dinner by the London Board of Trade in recognition of his services as one of the pioneer business men of the district.

Mr. McClary married, in 1853, Ann Drake, who died many years ago. They had two daughters, Mrs. Theresa Gunn, whose husband, E. A. Gunn, now deceased, was a former secretary of the McClary Mfg. Co., and Mrs. Gartshore, wife of Lt.-Col. W. M. Gartshore, manager of the McClary Co. His second wife was Miss Mary Jane Pavey, who died in 1909.

The active pall-bearers, chosen from among the employees who had been with the firm for from 30 to 50 years, were: John Walton, Alex. Atcheson, Frank Barned, Thomas Harrison, J. M. Pirie, George Moll, F. J. Delaney and James Smith. The honorary pall-bearers were: Arthur T. Little, C. R. Somerville, Geo. M. Reid, Ed. Reid, J. R. Dillon, J. M. Moore, T. G. Meredith, K.C., and J. K. H. Pope.

All the branch managers, with one exception, were in attendance. The exception was H. M. Bolger, of Montreal, sales manager, who expired suddenly at his home.

What Wholesale Hardware Firm Can Beat This Record?

ON a recent visit to the Chinic Hardware Company, Quebec City, Hardware and Metal discovered that this firm boasted a comprehensive list of "long service" employees which constitutes almost a record among wholesale hardware firms. Following is a list of employees giving dates of their respective engagement and indicating the number of years' service. All are still in the employ of this firm except "X," who died quite recently:

Name	Date of engagement	Years of service
Grenier, J. Napoléon	March 1st, 1866	55
Pagé, Joseph	July 3rd, 1883	38
St. Pierre, Emile	March 1st, 1885	36
Patoine, G. A.	February 1st, 1888	33
Patton, Allan	February 1st, 1888	33
Wilson, J. McD.	May 1st, 1888	33
Poitras, Pierre	May 1st, 1891	30
Poitras, Joseph	December 1st, 1893	28
Lachance, J. A.	May 1st, 1896	25
Bernard, Honorius	April 1st, 1898	23
Langlais, Napoléon	April 1st, 1900	21
Lamontagne, Hector	February 1st, 1901	20
Frenette, Francois	July 1st, 1902	19
"x"Bégin, Joseph	May 1st, 1902	19
Morand, Elzéar	July 1st, 1905	16
LaRose, Wilfrid	April 2nd, 1906	15
Knight, C. P.	May 1st, 1908	13

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

Markets at a Glance

PRICE recessions appear this week on the J.M.T. line of screwed brass valves and also the Jenkins gate, straightway and globe valves. Another decline is noted in quotations on coke tin plates, while steel wool, Gem castors, cow bells cold shut links and plumbers' oakum are other lines showing current price reductions.

Another upward revision in solder prices attracts attention, this being the second consecutive week increases on these products have been recorded. The current rise in price is of varying extent on the different grades. Higher quotations now appear on brass rods and sheets, this change reflecting the firm tone in primary copper and brass markets. Manufacturers and distributors of cordage have withdrawn prices on jute rope and packings, this being principally due to the recent activity and upward trend in primary jute markets.

Reports of price shading on range boilers are still apparent and while no change has been made in the nominal list, quotations of $8.75 on the 30-gallon standard size are being generally recognized as the current basis in certain quarters. The domestic markets still await a revision in soil pipe and fittings, the wide variation in discounts continuing to be a noticeable feature. Signs of recent activity in the ingot markets have stimulated changes in such metals as copper, lead, tin and spelter; all these ingots recording slight price advances this week. Tin leads the way in this respect. On the other hand, aluminum records a marked recession in primary circles, with domestic quotations reflecting this downward tendency.

The trend of business improvement which developed during the fall season has now halted perceptibly. This condition generally applies to the wholesale phase of the hardware industry, the current trade in retail circles being of a brisk nature due to the added stimulation of Christmas activity.

Montreal Markets

MONTREAL, Dec. 15.—Price changes of varying extent again feature the hardware markets this week. Advances and declines are both recorded, the advances developing from the continuing strength of metals on the primary markets. Solders are further increased, only last week higher prices appearing on these products. Copper and brass scrap in all weights are also quoted at higher figures in sympathy with copper in the ingot stage.

A new lower list on range boilers attracts attention, the 30-gallon boiler again brought to $8.75, with other sizes reduced accordingly. This is said to have developed from the continued unstable conditions on the local market. Jenkins valves are another important line recorded with lower prices, while plumbers' oakum is now quoted at $7.35 per 100 lbs., a slight reduction being made. Cow bells and repair links are also included in the list of reductions.

Christmas trade becomes more active from day to day among the jobbing houses, and while many lines are now quieter owing to the approach of the holiday season, a good amount of activity is everywhere apparent.

NEW LIST APPEARS ON RANGE BOILERS

Montreal.

Distributors of range boilers are now using a new lower list of prices, although manufacturers state no general lowering has been announced. The 30 gallon boiler will now sell for $8.75, with other sizes reduced accordingly. The condition of the market for some time past has been such that the new prices now given have been quoted in past weeks, through concessions made to obtain orders, but it was not thought that a revision would be generally announced, considering replacement costs maintained by the manufacturers. It is hoped a more stable condition will now prevail, although some express doubt as to this even with the lower prices. Following is new list quoted:

RANGE BOILERS—	Standard.	Ex. Heavy
30 gallon	$8 75	$11 25
35 gallon	11 25	13 50
40 gallon	13.50	16 00
52 gallon	20 00	24 50
66 gallon	28 00	34 00
82 gallon	35 00	46 50
100 gallon	45 00	55 00
120 gallon	54 00	63 25

REDUCTION MADE IN COW BELL PRICES

Montreal.

A reductinon is announced in quotations on the various sizes of cow bells, and following are the new prices·

COW BELLS—		Per Dozen.	
No. 7	$3 60	No. 3	$6 20
No. 6	4 00	No. 2	7 80
No. 5	4 80	No. 1	9 50
No. 4	5 40	No. 0	11 75

SOLDER QUOTATIONS ARE AGAIN ADVANCED

Montreal

A further slight advance is made in quotations on all grades of solders again this week. Metals on the ingot markets continue to show strength, especially tin this week. Traps and bends remain unchanged, although with the continuing of the firmer tone in the market, it would not be surprising if these advanced in the near future. Following are present prices:

LEAD AND ZINC PRODUCTS

Lead pipe, per 100 lbs.	12 50
Lead waste, per 100 lbs.	13 50
Note—Lead pipe is subject to a discount of 10 per cent.	
Lead traps and bends	10% off
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10½
Lead sheets, 3 to 3* lbs., sq. ft., lb.	$ 10¼
Do., 4 to 8 lbs., sq. ft.	0 09½
Cut sheets ¼c lb. extra, and cut sheets to size, ¾c lb. extra.	
Solder, guaranteed, lb.	0 27¾
Do., strictly ,lb.	0 25¾
Do., commercial, lb.	0 22¾
Do., wiping, lb.	0 22¾
Do., wire, lb.	0 37¼
Zinc sheets, casks	0 11½
Do., broken lots	0 12

LOWER PRICES ON COLD SHUT LINKS

Montreal.

Japanned Cold Shut repair links are now quoted at lower figures, and following are the new prices on the various sizes:

COLD SHUT LINKS—¼ in., $7.60; 5-16 in., $9.40; ⅜ in., $9.75; 7-16 in., $12.40; ½ in., $16.50 gross.

PLUMBERS' OAKUM SLIGHTLY REDUCED IN PRICE

Montreal.

Slightly lower quotations are made on plumbers' oakum, and the local price is now $7.35 per 100 lbs. Former quotation was $7.50.

HIGHER PRICES ON BRASS AND COPPER SCRAP

Montreal.

Non-ferrous scrap metals, insofar as brass and copper are concerned, have new higher quotations. The continued firmer tone of copper on the metal markets has improved the tone of the scrap market on these metals in the past few weeks, and the advance in prices has been expected. Prices are in general one-half cent per pound higher. Other lines remain at former figures with the market still very dull. With the closed winter weather now at hand, little improvement can be expected until the earlier months of the new year. Following are present quotations:

Automobile tires	....	0 75
Rubber shoes	....	0 03
Yellow brass	....	0 05
Red brass	....	0 09
Light brass	....	0 03¼
Scrap zinc	0 03	0 03¼

No. 2 busheling,	....	4 00
Boiler plate	....	8 00
No. 1 machinery cast	....	21 50

LOWER PRICES ON JENKINS' VALVES

Montreal

Through a change in discounts, many lines of Jenkins' valves are now quoted at lower figures. Other lines are remaining unchanged at former discounts. Sorting orders of fair proportion are reported among jobbing circles, with the following revised quotations:

COMPRESSION WORK—

Compression work, standard	43%
Fuller work, standard	30%
Bath cocks, compression	30%
Basin cocks, Fuller No. 0	30%
Do., Nos. 1 and 2	30%

Jenkins Globe, angle, check and swing check	19%
Jenkins gate or straight way	25%
Jenkins iron body, globe and angle	15%
Jenkins Iron body gate	33%

SOME NEW LOWER PRICES ON OIL STOVES

Montreal.

Bookings are now being taken for next Spring's requirements of oil cook stoves and ovens, and some manufacturers have their new prices issued showing a reduction of varying extent on the different sizes. It is yet early to determine the interest that will be shown for next season's business as the holiday season will delay the bookings until after the New Year. Orders for gas stoves will not be taken until the early months of next year, and new prices will be announced at that time. There is a rumor that manufacturers are also contemplating still lower prices on these lines. Following are lists of the McClary lines of oil stoves and ovens.

OIL STOVES AND OVENS—

No. 221 2 Burner Florence Automatic	$20 00
No. 321 3 Burner Florence Automatic	24 00

Less 25 per cent.

CUTLERY AND SKATES NOW SELLING WELL

Montreal.

Cutlery, which up until the present has not been selling as well as might have been expected, is said to be much more active in the past week. Jobbers are now of the opinion that within the next week, sales will have reached a satisfactory volume. Much the same can be said of skate sales, the past few days being particularly active. Colder weather and snow is really required to increase the Christmas trade in general, and both wholesalers and retailers would welcome this change in the weather.

BUSINESS IN SHEETS NOW QUIET

Montreal.

Nominal sheet quotations remain unchanged at the revision of two weeks ago and little change is now expected until after the first of the year at least. The sheet market in general shows little activity at present, the usual December quietness everywhere evident. The call for Canada plate and galvanized iron, has not subsided with the advanced stage of furnace and stove pipe works.

Interest is commencing to be shown in connection with any development that might take place with the opening of the New Year. It is generally conceded that a more active demand will firm the situation, but the extent of increased business, and the time that such is likely to take place, is problematic at present. Undoubtedly mill prices are at rock bottom with present productive costs considered, and in this connection it is stated that the recent revision to lower levels on the local market was the result of local current conditions rather than any development at the sources of supply.

PRICES ON FITTINGS REMAIN AT RECENT REVISIONS

Montreal.

Quotations on the various lines of pipe fittings are remaining unchanged since the easier tone in pound goods last week, when quotations were reduced in some quarters. Sorting demands cause a fair movement in fittings, although the usual quieter period at present is reflecting on these goods in the past two weeks or two. Present prices are as follows;

FITTINGS—

Cast Iron fittings		25%
Bushings, cast		27½%
Do., malleable		25%
Flanges		37%
Plugs		27½%
Flange unions		22½%
Malleable unions		42½%
Dart unions, black		33%
Do., galvanized		13%
Nipples, ⅛ to 4 in, close and short		50%
Do., long		60%
Do., 4½ to 8 in., close and short		40%
Do., long		50%
Couplings, 4 in. and under		30%
Do., 4 in. and longer		10%
POUND GOODS—	Black.	Galv.
Class A	0 53	0 65
Class B	0 21½	0 28¼
Class C	0 14	0 21½

NO FURTHER CHANGE IN SOIL PIPE QUOTATIONS

Montreal.

No further change has developed in the market for soil pipe and fittings since the revision of two weeks ago. Prevailing prices remain steady on the local market, notwithstanding these are considerably lower than in other markets. Western markets report that their distributors are hoping for an early improvement in Montreal trade conditions, placing the responsibility for the variation in quotations on an unsettled market. Local dealers, however, maintain there is no indication of a revision in prices from the marked reduction made last month, and general market conditions in heavier iron goods would have to show a general improvement before any great change could take place. Following are local quotations;

SOIL PIPE—

2 and 3 inch	47½%
4 inch	50%
5 and 6 inch	47½%
Fittings—	
2 to 6 inch	50-10%

FAIR DEMAND IN WROUGHT PIPE

Montreal

Wrought iron and steel pipe continue to sell under list No. 53, with the demand continuing fair for this season of the year. With the approach of the New Year, the movement is expected to show little further activity as December and January are usually the quiet months in goods of this class. Producers are operating to fair capacity, but here too a slackening in the present output is looked for in the months immediately to follow.

SLOWER BUYING MOVEMENT IN BOILER TUBES

Montreal.

The buying movement in boiler tubes is now seasonably slow, with prices remaining unchanged. The usual winter demand for repair work is anticipated, but little increased activity of a marked nature is expected until after the quiet months in the earlier part of the New Year. Following are quotations:

BOILER TUBES—	Seamless	Lapweld
1 inch	24 70	.....
1¼ inch	24 50	.....
1½ inch	24 00	.....
1¾ inch	26 00	26 00
2 inch	24 50	20 50
2¼ inch	27 75	23 50
2½ inch	32 50	24 50
3 inch	40 00	30 50
3½ inch	52 50	34 75
4 inch	65 00	44 00

TIN FEATURES INGOT METAL MARKETS

Montreal.

The metal markets have all been firm during the past week with some showing more strength than others. The chief feature has been the advance in tin, and sharp advance in all foreign exchanges, which has tended to give a very firm tone to the markets. Locally conditions have been rather quiet and buyers generally have not been keen on following the advance.

TIN—The London market is very strong and has advanced over £20 from the low point. The pace has been rather rapid and a re-action would not be surprising. At the same time those in control are quite capable of pushing prices still higher. The local market is strong at 39½ cents.

COPPER—New York seems to have reached the top on the present movement, but business remains good. London is slightly easier owing to the advance in exchange. The market will probably be quieter until after the turn of the year. Local quotations unchanged at 18 cts. for electro, 17¾ cts. for casting.

LEAD—Both London and East St. Louis are steady with little change in price. Demand remains fairly good and there is no surplus of prompt lead. It is possible that the market may not hold at to-day's level, but there is no sign of weakness as yet. Local price 7½ cents.

SPELTER—There is not much change in this metal, although the demand on this side is probably lighter than has been the case recently. It is expected, however, that demand will improve after the first of the year, and producers are not cutting their prices. Local market slightly lower at 7¾ cents.

ANTIMONY—There are no new features to this metal, and business is dull with prices unchanged at 7 cents for Chinese, 8 cents for high grade English.

ALUMINIUM—This metal continues dull on the market, with quotations also unchanged at 27 cents.

SLACKENING IN CORRUGATED SALES

Montreal

With the season practically closed for this year sales of corrugated sheets have shown a decided slackening in recent weeks. Little increased activity is now looked for until after the turn of the year at least. Quotations are continuing unchanged since the revision of a few weeks ago as follows;

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 7½ per cent.

Lighter than 24 gauge and wider than 27 ins., 75c a square extra.

Toronto Markets

TORONTO, December 15.—Price increases on brass rods and sheets continue to reflect the firmer tendency in certain primary metal markets which has been already indicated in previous reports by higher price levels on copper products. Another upward revision is given this week in solders, quotations on all grades having been further advanced between one and two cents per lb. Changes of varying extent now appear in ingot prices, signs of activity in some metal markets resulting in higher levels.

Recessions have been announced in prices on the J.M.T. line of screwed brass valves and also the Jenkins gate, straightway and globe valves. Another price decline is noted on coke tin plates, with quotations on charcoal tin and terne plates remaining unchanged. Manufacturers and distributors of cordage have withdrawn prices on jute rope and packings, this being principally due to the recent activity and upward trend of jute markets generally. Local dealers still await a revision in the soil pipe markets, the variation in discounts still being noticeable. A slight improvement is recorded in non-ferrous scrap materials, with recent price gains still in effect. Only minor inquiries are apparent for boiler tubes. Reports are still prevalent of price shading on range boilers, the quotation of $8.75 for the 30-gallon standard size having developed in some quarters. There is a quiet volume of trade in sheets and plates, with the iron and steel markets remaining at average levels.

PRICE INCREASE ON BRASS RODS AND SHEETS

Toronto.

Following the higher price levels recently announced on copper sheets, rods and tubing, a corresponding increase has now developed on certain brass goods. This change affects brass sheets and rods both these lines registering quotations which are 1-cent per lb. higher than formerly. Other price levels are remaining at recent new revisions.

In discussing these latest market developments in brass and copper products with one manufacturer, Hardware & Metal was informed that such increases reflect the trend of prices on basic products. The raw material markets have been through a period of depression, and prices on semi-finished goods were comparatively low as a result of these conditions. However, it was pointed out that quotations are not generally expected to go much higher, at present, because of the fact that the recent upward movement in copper has eased a little. The current increase already reflect the extent of the gains recorded in primary circles. It is noted that brass tubing prices are unchanged. Following are the new quotations:

BRASS—	
Sheets, base, per lb.	$ 0 23
Rods, base, per lb.	0 21
Tubing, base, per lb.	0 25
COPPER—	
Rods, base, per lb.	0 28
Soft sheets, plain, 16 oz. and heavier, lb.	0 30
Do., plain tinned 16 oz. and heavier, lb.	0 37
Do., polished and tinned 16 oz. and heavier, lb.	0 42
Tubing	0 29

PRICE REVISIONS APPEAR ON BRASS VALVES

Toronto.

Another downward revision has been announced in quotations on certain brass valves. This change is chiefly attributed to the fact that manufacturers have decided to meet competition, while basic market conditions do not call for additional price lowering on the finished products at the present time. The trend of both copper and brass in the raw material and semi-finished stage, is of an upward nature However, the current recessions appear on the J.M.T. line of screwed valves and also the Jenkins gate or straightway and globe valves. Following are the new discount quotations.

COMPRESSION GOODS	
Compression work, standard	43%
Fuller work, standard	30%
Bath cocks, compression	32%
do., Fuller	25%
Flat way stop and waste cocks, standard	54%
Round-way stop and waste cocks, standard	46%

Do., Do., Do., 2½" to 3"	20%
BASIN COCKS—	
No. 0 and 1, Fuller pattern	30%
Quick opening No. 3633	43%

ANOTHER UPWARD REVISION IN SOLDER PRICES

Toronto.

Following on the upward revision in prices on all solders announced in last week's issue of Hardware & Metal another change of a similar nature has since developed. This further increase is also attributed to the higher prices of basic materials entering into the manufacture of solders and is of varying extent on the different grades. Wire solder is increased another 2 cents per lb., from 30½ to 32½. The quotation on guaranteed is also advanced another two cents, while the other solders are higher in price by one cent per lb. Quotations on other lead and zinc goods remain unchanged. Following is the revised list:

LEAD AND ZINC GOODS—	
Lead pipe, list, per lb.	0 12½
Lead waste pipe, list, per lb.	0 13½
Do., over 8 in., list, per lb.	0 14½
Lead pipe is subjected to a discount of	10%
Lead traps and bends	10%
Lead sheets, 4 to 6 lbs. sq. ft. in rolls, lb.	09½
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, per lb.	0 32½
Do., strictly, lb.	0 24½
Do., commercial, lb.	0 22½
Do., guaranteed, lb.	0 27½
Do., wiping, lb.	0 22½
Zinc sheets, per lb.	0 12

ANOTHER PRICE DECLINE ON COKE TIN PLATE

Toronto.

Further reductions of a substantial nature have been announced in prices on coke tin plates. The extent of the decline is approximately 15 per cent., applying to both IC and IX grades. Other quotations covering tin and terne plates, remain unchanged at prevailing levels. The list prices on Canada plates, however, are reported as subject to slight variation where an attractive inquiry develops, from time to time. Following are the current revisions:

PLATES, CANADA—	
Dull 60 sheets	$5 65
Ordinary, 52 sheets	5 60
PLATES, COKE TIN—	
I.C., 20 x 28, 112 shets	13 50
IX, 20 x 28, 112 sheets	16 50
IX, 20 x 28, 56 shets	9 00
PLATES, CHARCOAL TIN—	
1X, 20 x 28, 56 sheets	14 00
1XX, 20 x 28, 56 sheets	16 00
PLATES, TERNE—	
1C, 14 x 20, 112 sheets	12 00

PRICES WITHDRAWN ON JUTE ROPE AND PACKINGS

Toronto.

Quotations on jute rope and packings have been withdrawn by manufacturers and distributors of rope and cordage. Current prices on these products may be obtained on application. This development reflects the firm tone recently apparent in primary jute markets and is an indication of the general strength of the raw material. Jute prices commenced to rise in conjunction with the increase in cotton circles, owing to the fact that higher levels on cotton created an improved demand for jute and jute products. A revision in prices on American lobster twine is also given, the new quotations being 21 cents for standard, and 22 cents for fine. Manilla, sisal, lathyarn and hemp cordage maintain unchanged price levels. Hemp markets, however, are developing a firmer tendency.

STILL WAIT REVISION IN SOIL PIPE MARKETS

Toronto.

"Eastern markets are meeting American soil pipe competition and in order to do so have been forced to quote prices which are below factory costs," stated a prominent manufacturer of soil pipe and fittings when discussing the present market situation on these products with Hardware and Metal. "The recent downward revision in Montreal was made to meet foreign competition, and as a consequence some manufacturers are selling their product cheaper than they can afford to do." The primary reason for the wide difference which has recently appeared in quotations between the two chief distributing centres for soil pipe in Canada, is as quoted above, coupled with the advantage of some easier labor costs. This latter factor is described as an important element in foreign markets at this time. In spite of the abnormal conditions apparent in the industry, no settlement has yet been made, and the various quotations are unchanged. Local prices have not been revised, and the nominal list still remains in effect. The fact that Montreal quotations continue to show the new discount levels, has given rise to the impression that change may not develop untill the new year. Whether the revision will be of an upward nature in the East, or of a downward nature locally in order to conform with other markets is difficult to ascertain. No prediction could be secured for the future, but another distributor was of the opinion that if Montreal markets adhere to their present levels, the local quotations may be gradually expected to meet their competition. The current local nominal lists are as follows:

SOIL PIPE—	
2 inch	25%
3 inch	30%
4-inch	30%
5 and 6 inch.	30%
8 inch.	net
FITTINGS—	
2 to 6 inch fittings	40-10%
8 inch fittings	net

ANOTHER REDUCTION ON WOOD SCREWS

As Hardware and Metal goes to press it is learned that another reduction has been made in prices on wood screws. Quotations are revised downward through increasing the discounts from 5 to 7½ points. The new prices, while effective immediately, are of varying extent. Flat head bright are now quoted at 82½, as compared with the previous level of 77½.

The new discounts are as follows:

WOOD SCREWS—	Formerly. %	Now. %
Flat Head Bright	77½	82½
Oval and Round	75	80
Flat Head Brass	70	77½
Oval and Round	67½	75
Flat Head Bronze	65	72½
Oval and round	62½	70

F. o. b. Montreal, Hamilton, Toronto.

SLIGHT IMPROVEMENT IN NON-FERROUS SCRAP

Toronto.

The local scrap material markets are maintaining the very slight improvement recorded recently. Non-ferrous scrap metals have been more active and the higher prices are remaining in effect. Other grades fail to record any variation in quotations, or change in general market conditions.

There is little demand at present for steel scrap, and iron and steel are practically the same as covered in the last report. There have been some indications of slightly higher prices being paid for heavy copper and wire, this reflecting the firmer tone of all grades. Following are local dealers' average buying prices for fairly large quantities:

Gross Tons— Scrap Iron		
Heavy melting steel (Hamilton)	$11 50	$12 00
Borings and turnings	2 50	3 50
Rerolling rails	10 50	11 50
Scrap pipe	6 00	7 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	6 50	7 50
Agricultural malleable	10 00	11 00
Railroad malleable	11 00	12 00
Net tons—		
No. 1 cast	15 00	16 00
Stove plate	11 00	12 00
Grate bars	10 00	11 00
Standard car wheels	13 50	14 00
Scrap Metals.		
Heavy copper and wire	10 50	11 50
Light copper	8 00	9 00
No. 1 composition	9 00	10 00
No. 1 comp. turnings	6 00	7 00
Light brass	3 25	3 75
Heavy yellow brass	5 50	6 50
Heavy lead	4 00	4 50
Tea lead	2 00	2 50
Scrap zinc	4 00	4 50
Scrap Rubber		
Boots and shoes	2 50	3 00
Lumbermen's rubber boots	2 00	2 50
Auto tires	0 50	1 00
Solid tires	0 75	1 25

LOWER BASE PRICES ON GALVANIZED SHEETS

Toronto.

Prevailing quotations on both black and galvanized sheets have been reduced 25 cents per 100 lbs. in certain quarters. This decrease brings the galvanized base price from $6.10 down to $5.85; while the new quotation for 28-gauge black sheets is $4.50. Other dealers are still adhering to the previous levels, and the spread in the market is indicated by the range shown on the lists quoted herewith.

The current volume of trade in sheets and plates has receded from the active levels recorded during the Fall period. The local market is now described as quiet, but fair for this time of the year. On the primary centres, the proportion of railroad buying is a factor serving to maintain a good proportion of orders for these products. Business in the

steel industry generally records a nominal basis of operation, with a further improvement looked for in the Spring.

BLUE ANNEALED—

10 gauge, base	4 00	4 50
12 gauge	4 05	4 55
14 gauge	4 10	4 60
16 gauge	4 15	4 65

BLACK—

18—20 gauge	4 30	5 05
22—24 gauge	4 35	5 10
26 gauge	4 40	5 15
28 gauge	4 50	5 25

Charge of from 25c per 100 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—

	Queen's Head	Fleur-de-lis.
28 gauge	8 25	7 75
26 gauge	8 00	7 50
24 gauge	7 60	7 10
22 gauge	7 25	6 75
18 and 20 gauge	7 10	6 60
Premier and Apollo.		
10¾ oz.	6 25	7 00
U. S. 28 base	5 85	6 60
U. S. 26	5 55	6 30
22 and 24	5 40	6 15
18 and 20	5 25	6 00
16	5 10	5 85
12 and 14	4 95	5 70

An extra 40c per 100 lbs. is charged for Keystone and Premier brands copper-bearing sheets. An extra is now charged on galvanized sheets, 10 3-4 oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

SIGNS OF ACTIVITY IN INGOT MARKETS

Toronto.

Lead, tin and spelter, are other ingot metals which have recently developed signs of activity, in addition to copper. Antimony stilll remains on a moderate basis, with the demand of a very quiet nature. Aluminum quotations sagged sharply on primary markets, and are probably touching bottom. In contrast to these tendencies, an upward movement has been recorded in prices on both tin and lead, while copper quotations are also advanced ½ cent in one quarter.

COPPER.—Although the rapid advance of copper on primary markets has recently shown slight moderation, the general firm tendency is reflected in local quotations. An increase of ½ cent is again recorded, while the price of 18 cents has also appeared. Whether the undertone will continue its present strength and even up at the higher levels, is stated as dependent upon the proportion of demand at the current market basis. Local prices now show a variation between 17½ and 18 cents.

TIN.—Further advance in tin prices are again recorded, this condition being apparent on both the primary and domestic markets. The strength of the general trend, and the improved position of this metal resulted in quotations being again advanced, this time to the extent of 2 cents. The level of 39 cents, is now generally in effect. Tin is described as having been down in the dumps for some time, and the present upward tendency is generally welcomed in metal circles, chiefly because of the reflection of a greater volume of activity.

LEAD.—The outlook for lead has also recently improved, and some local quotations have been slightly increased. The current demand, however, has not recorded any marked degree of improvement, but the undertone in this market is considerably firmer. The average local price has firmed up to the level of $6.75.

SPELTER.—The market for spelter has shown some recovery from the recent depression, and as a consequence, prices are also showing a firmer tone. The local quotation has generally advanced to $7.25.

ALUMINUM.—This metal has been marked by a sharp reduction in prices on the primary centres. Some local recessions are also apparent, this change reflecting the general easier tone. The market is described as continuing extremely dull; while prices on the domestic market have receded to 27 cents.

STILL REPORT PRICE SHADING ON RANGE BOILERS

Toronto.

Some indications of lower prices on range boilers continue to be apparent on the weekly markets. The nominal price of $9.25 on the 30-gallon standard size has been shaded in some quarters to $9.00 and then $8.75. Other reports confirm this quotation, and although the official list remains at present unchanged, this list is stated to be the recognized general nominal price list at which range boilers are now being offered. Current business in these products is described as quiet, and this condition is generally thought responsible for the desire to move stocks at the easier quotations. The following is the nominal unchanged list.

RANGE BOILERS—	Standard	Ex. Heavy
30 gallon	$ 9 25	$ 11 75
35 gallon	12 00	14 50
40 gallon	14 50	17 00
52 gallon	21 00	26 00
66 gallon	30 00	36 00
82 gallon	37 50	50 00
100 gallon	48 00	58 00
120 gallon	57 00	67 00

London Markets

LONDON, Dec. 15.—The new lower price levels recently announced on many lines of builders' hardware show a reduction of approximately 15 per cent. Quotations on steel wool are lower this week, while reduced prices are also given on castors.

Many Christmas lines are moving well and in fair proportion, but the regular cold weather goods have only recorded comparatively slow sales up to the present because of the mild weather recently experienced. Business during the past week, however, is reported as moderately good. Collections are in fair shape.

LOWER QUOTATIONS GIVEN ON STEEL WOOL

London, Ont.

New quotations now show considerable reduction in steel wool prices. The revised levels are as follows:

STEEL WOOL 1 lb. pkgs.:—No. 0—80 lb.; No. 1—60 lb.; No. 2—55 lb.

REVISED PRICES ON BUILDERS HARDWARE

London, Ont.

Many lines of builders' hardware have been reduced from 10 to 15 per cent. New quotations have been announced on door locks, knobs, door sets, latches, etc.

The revised discount on the Peterboro Lock Co., make of builders' hardware products is list less 20 per cent.

The lower prices on both the porcelain and jet styles of rim and mortise common door knobs are $2.75 per dozen.

The new net quotation on one grade of inside door sets is $7.50 per dozen.

LOWER PRICES ON CASTORS

London, Ont.

The recently revised quotations on the Gem line of furniture castors show the following lower levels:

GEM CASTERS:—

No. 351—40c. set.; No. 355—40 cts. set.; No. 451—44c. set.; No. 455—44c. set.; No. 651—53c. set.; No. 655—53c. set.; No. 751—57c. set.; No. 755—57c. set.; No. 352—34c. set.; No. 356—34c. set.; No. 452—38c. set.; No. 456—38c. set.; No. 652—45c. set.; No. 656—45c. set.; No. 752—52c. set.; No. 756—52c. set.

PUTTY MOVEMENT STILL REPORTED FAIR

London, Ont.

Current reports indicate that a fair movement is still evident in putty, although the seasonal movement has receded to some extent. Prices remain steady, at the following levels:

PUTTY—

Standards, 100-lb. drums, per 100 lbs.	6 30
Standard, 25 lbs., per 100 lbs.	6 55
Pure, 100 lb. drums, per 100 lbs.	7 80
Do., 25 lb drums, per 100 lbs.	8 05

CURRENT TURPENTINE NEEDS OF SMALL VOLUME

London, Ont.

There is a fair demand for turpentine considering the season of the year. Prevailing local quotations are now remaining at the revised levels recently announced, which are as follows:

TURPENTINE—

1 barrel lots, Imp. gal.	1 20
2 to 4 barrel lots, per Imp. Gal.	1 19
5 gallon lot, per Imp. Gal.	1 35

LOW PRICES ON LINSEED OIL REMAIN IN EFFECT

London, Ont.

The new lower prices recently announced on linseed oil, continue to remain in effect locally. There is only a fair inquiry at the present time for both raw and boiled. Unchanged quotations follow;

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrels, per gal.	0 84	0 87
2 to 5 barrels, per gal.	0 83	0 86
6 to 9 barrels, per gal.	0 81	0 84

Less barrels, add 15 cents gal.

HAND SLEIGHS AMONG SEASONAL ACTIVE LINES

London, Ont.

Among the various lines recording special Christmas popularity are hand sleighs. Orders are small but fairly numerous at present. The quotation on the Canadian Buffalo Sled Line remains at list less 35 per cent..

MODERATE SALE FOR BARN AND MANURE FORKS

London, Ont.

Winter lines of harvest tools are now selling in average proportions. This movement covers such products as manure forks, less 60 per cent.

FAIR SALES FOR WOODEN SNOW SHOVELS

London, Ont.

Wooden snow shovels are on the market again this season, and record a popular sale in fair proportions. Following are the current quotations:

WOOD SNOW SHOVELS:—

No. 76—18" x 20" With Wood "D" Handle—$10.50 doz.; No. 77—18" x 20" With Iron "D" Handle—$11.25 doz.

GOOD SEASONAL SALE FOR SAFETY RAZORS

London, Ont.

Dealers report that there is a good Christmas sale at present for Safety razors. The quotations on the regular models are as follows:

Gillette, each .....$3.75 each
Auto Strop, each .....$3.75 each

PREPARE FOR GOOD SEASON IN HOCKEY STICKS

London, Ont.

The current movement of hockey sticks is described as of average proportions. Merchants are stocking up in anticipation of a good season in this line. Prices are at the following levels:

HOCKEY STICKS:—

Boys' Red—$3.00 doz.; Boys' Expert White, $4.00 doz.; Dominion Special—$4.10 doz.; Spalding No. 0—$8.75 doz.; Munro Professional—$9.50 doz.; Munro Hand Made—$13.50 doz.; Munro Goal—$18.00 doz.

CUTLERY LINES ENJOYING CHRISTMAS POPULARITY

London, Ont.

A good seasonable sale is now reported for such lines as pocket cutlery, carving sets, scissors and straight razors. Prices on razors show very little variation. The current quotations follow:

RAZORS:—

I.X.L. Make.

No. 5000 Black Handle—$18.00 doz.; No. 1000 Black Handle—$21.00 doz.; No. 2000 White Handle $24.00 doz.

SEASON FOR SKATE STRAPS IS NOW AT HAND

London, Ont.

With the advent of the annual skating season, skate straps are now enjoying a good demand. The current prices on these products are as follows:

SKATE STRAPS:—

Solid Leather 21"—1.45 doz pair; Solid Leather 24"—1.75 doz. pair; Solid Leather 27"—2.00 doz. pair. Canvas—21"—1.60 doz. pr.; Canvas 24"—1.75 doz. pr.; Canvas 30"—2.00 doz. pr.

NEW LOWER QUOTATIONS ON GARDEN HOSE

Winnipeg.

Prices have declined on garden hose. This change is in keeping with the easier tone which has recently prevailed in the rubber market generally. The latest garden hose prices are as follows:

GARDEN HOSE:—

½" x 3 ply—$9.50 per 100 ft.; ⅝" x 3 ply—$11.00 per 10 ft.; ¾" x 3 ply—$13.00 per 100 ft.; ½" x 4 ply—$10.50 per 100 ft.; ⅝" x 4 ply—$12.00 per 100 ft.; ¾" x 4 ply—$14.00 per 100 feet.

DOWNWARD PRICE REVISION ON CLARKS' HEATERS

Winnipeg.

Included among the items recording prices recessions this week are the Clarke's heater. These quotations have now geen revised as follows:

CLARK'S HEATERS:—

No. 5B—$2.90 ea.; No. 3D—$3.25 ea.; No. 7D—$4.50 ea.

WINDOW GLASS LIST SHOWS SLIGHT INCREASE

Winnipeg.

Although there is no serious shortage in window glass, a 10 per cent. advance in price has been recorded this week. A strong tendency to relieve any shortage that might have developed is found in the expectation that glass from Canadian manufacturing sources is likely to appear on the domestic markets at any time. Following are the revised quotations:

WINDOW GLASS:—

16 oz. 10 ft. cases:—

No. 0 to 25—$7.50; No. 26 to 35—$9.25; No. 3 6to 40—$9.25; No. 41 to 50—$10.10; No. 51 to 54—$10.40; No. 55 to 60—$10.40; No. 61 to 70—$10.80.

21 oz. 100 ft. cases:

No. 25 to 34—$14.60; No. 35 to 40—$14.60; No. 41 to 50—$15.80; No. 51 to 54—$16.35; No. 55 t o60—$16.35; No. 61 to 70—$16.95; No. 71 to 80—$17.75; No. 81 to 85—$21.55; No. 86 to 90—$22.50; No. 91-95—$24.95; No. 96 t o100—$26.80.

Loose Lights:—

60 per cent. off list prices. Packing extra.

Winnipeg Markets

WINNIPEG, Dec. 15.—Changes in the hardware markets this week show both recessions and advances. Important reductions are recorded on garden hose and automobile tires. Other declines occur on Clark's heaters and agricultural wrenches.

Premier changes in the upward direction include copper wire and window glass.

A good business is being done in seasonable lines but on the other hand there is little general change. Jobbers are optimistic regarding trade for next year and expect to see business start to pick up gradually after the holiday season.

REVISED PRICE LEVELS ON COPPER WIRE

Winnipeg.

On account of the strength recently apparent in primary copper circles, and the increased price levels on this metal, domestic quotations have also a slight increase reported this week on copper wire and it is expected that higher prices will be forthcoming in a few days on rods and sheets. The price levels on similar brass products have remained the same. Following are the present quotations on copper wire.

COPPER WIRE:—

No. 8—30c. per lb.; No. 9—30c. per lb.; No. 10—30c. per lb.; No. 11—31c. per lb.; No. 12—31c. per lb.; No. 12—31c. per lb.; No. 14—31c. per lb.; No. 16—33c. per lb.; No. 18—35c. per lb.; No. 20—35c. per lb.; No. 22—36c. per lb.; No. 23—36c. per lb.; No. 24—37c. per lb.; No. 25—38c. per lb.; No. 26—40c. per lb.

ANOTHER PRICE DECLINE ON AGRICULTURAL WRENCHES

Winnipeg.

Another reduction in prices on agricultural wrenches is recorded this week. Following are the revised quotations:

AGRICULTURAL WRENCHES:—

6 in. $5.25 per doz.; 8 in.—$6.30 per doz.; 10 in.—$7.75 per doz.; 12 in. $9.45 per doz.; 15 in. $12.60 per doz.

LOWER PRICE LEVELS ON AUTOMOBILE TIRES

In accordance with the recent decline in the primary rubber markets, new lower quotations have been recorded on automobile tires and inner tubes. Revised price listslists covering these products have now been issued showing substantially lower levels.

Pittsburg Markets

PITTSBURG.—Production of steel ingots in November was at practically the same rate as October, 44 per cent. of capacity, as indicated by the report of the American Iron and Steel Institute giving the production of the 30 steel companies which made monthly reports.

These are simply averages for the respective months, and a closer analysis can be made. September had shown a rate of 32 per cent. against 30 per cent. in August. The figures, confirmed by current information obtained in the trade, indicate that production was rising during October and falling during most of November. Roughly speaking the rate rose from 40 per cent. October 1, to 50 per cent. November 1, and that fell to 40 per cent. December 1, and that is substantially the rate at present. There is no more than a slight declining tendency just now, but a few mills will likely close for the last week or two of this month, or the first couple weeks

To Our Friends
Everywhere.

Out of your friendship has arisen the success that has marked our progress; the pleasures we have sensed, and all the worth while experiences which have gone to elevate and humanize our business.

At this happy conclusion of the year it is but natural then for me to express my personal appreciation and hearty thanks to:

Our Agents, whose confidence and enthusiasm,
Our Patrons, whose good will and loyalty,
Our Competitors, whose courtesy and respect ..
.. it has always been our privilege to enjoy.

Earnestly we hope our ideals and practices may always merit your estimation. Heartily we reciprocate your sentiments, and sincerely we wish you and yours the happiest of Christmases and a continuity of the best that this Happy Season can bring.

Very cordially yours,

R. J. Trenowerth

Developing Trade In Specialty Lines

Good Margin of Profit on Specialties Should Maintain Revenue In Paint Department In Cold Weather—Selecting Various Specialty Lines for Special Treatment—Stimulating Sales of Auto Specialties—Pre-Christmas Business

CONTINUING the series of articles concerning means of pushing the sale of various specialty lines during the cold weather, it is suggested that as there is a considerable field for the sale of automobile finishes at this season of the year that a number of days or a week be set aside for a drive upon this particular line. Analyzing the possibilities it is evident that an increasing number of motorists are interested in re-painting their own cars. The extent of such work will be limited only by the amount of knowledge imparted to the amateur on the subject. Many automobile owners are reluctant to attempt the re-finishing of their cars because they are aware of the dangers involved if the proper course is not followed in preparing the surface and in applying and rubbing-in the various coats of paint and varnish. Before the special sale is planned a thorough study of the requirements of various automobile body surfaces should be made so that authoritative instructions can be given.

Reaches Both Types

Much of this kind of work is done at this time of the year, due to the fact that motorists who plan to drive their cars all winter know the dangers of an inadequately protected surface against the elements of winter and the ensuing spring. The motorist who lays up his car for the winter, and these are now in the minority in most parts of the country, will take advantage of the winter months to overhaul and re-paint his car. Both types are therefore prospects at this time of year. and possibly the business is automobile paint, but there are also required such lines as steel wool, brushes for painting, dusting and cleaning. Chamois and sponge will also be needed by the motorist.

The window will provide the merchant with an effective means of stirring up local interest for an "automobile week" and in this connection a plan adopted by one hardware merchant to good advantage, will be described. He secured a section of a dismantled automobile and showed in his window that section comprising the side, doors and back. Half of each section was painted and refinished with a highly attractive shade which showed in contrast with the worn, rusty part of each section. This merchant used the following sign card in this window. "He sold his flivver for junk when all it needed was a new coat of PAINT." Such a window undoubtedly requires some time to prepare but if arranged at the right time of year it should be very effective, and of course the automobile body can be kept for future displays in season.

Auto Painting

Some merchants have found it pays to advertise automobile painting along with such a display. This work can be turned over to a local painter who has the facilities and an understanding made on the subject whereby the hardware merchant provides the paints and other such lines required. In this way a greater volume of trade has been developed in some centres, taking the advantage of the reluctance of many automobile owners to attempt such a job themselves.

Kalsomine and wall paper cleaner are other lines which can be specially featured at this time due to the fact that many property owners take advantage of the indoor months to effect a cleaning up in their house interiors for which such lines are required. Many effective window trims can be made of kalsomine due to the attractive color combinations which can be shown. With the use of wall board or similar material many harmonious combinations can be shown as suggestions for home decorating. On another board samples of the various tints might be indicated. Letters to prospects and advertisements might be used to attract prospects to the store to see the color combination suggestions and learn how they may, at very little cost, greatly improve the appearance of their home interiors.

The window will provide the merchant opportunities of various kinds. Specialty lines also serve the purpose of bringing those to the store who will be prospects for paints, enamels, brushes, etc., at this and other seasons of the year and special note might be taken of the various prospects and their requirements for following up at other seasons.

TO ERECT MANY HOMES

London, Ont.—There is every indication that all past building records here will be shattered next year. The passing of a bylaw by the ratepayers on Monday, granting $250,000 to the Western University, means that construction work will be commenced as soon as possible on new university buildings that will cost $3,000,000.

Architects state that not in many years have so many people been inquiring about plans for homes and they are looking for unusual activity along this line in the spring, especially if materials reach more reasonable levels and labor costs are lower. Two large propositions in connection with home building are planned by Mahaffy Bros. and the London Wrecking Co. The first firm plans to erect forty homes in East London and the latter twenty. These will be medium priced dwellings, for which there is a big demand, as small houses have been at a premium for more than three years here.

HARDWARE STORE ROBBED

St. Thomas, Ont.—G. A. McMurtry, hardware, was entered by robbers and a number of small articles taken.

HILLCREST
A GUARANTEE OF QUALITY

A Merry, Merry Christmas —A Happy and Prosperous New Year.

This is the wish we extend to the hardware trade at this, the closing of the year.

To our many customers we offer our thanks for your whole-hearted co-operation in the distribution in Ontario of our several lines.
May prosperity be yours in your 1922 enterprises.

WHEN IT DOES NOT PAY TO RISE TOO FAR

It is irksome not to advance rapidly. It tries one's patience. It makes one sometimes feel discouraged. But the events of the last eighteen months have brought home to many that it is dangerous to rise too far, especially in abnormal times. What has happened in a great many concerns is this: During the boom period promotions were made pretty rapidly. Things moved so quickly and money was being made so easily that promotions and salary increases were not always scrutinized with care.

Then disaster came. Boards of directors ordered drastic retrenchment. In many instances outside experts were called in to recommend reorganization of forces. Their investigations revealed that certain men were drawing big salaries for doing comparatively little work and that these men often were not of calibre warranting the salaries received. When heads began to fall, the heads of such men were the first to drop. In a great many cases, their places were taken by assistants or others who had not basked in the favor of any higher-ups and who were doing a lot of work for relatively little money.

If a list could be compiled of the dismissals during the last year of men drawing salaries of from $10,000 to $50,000 a year, it would create a tremendous sensation.

During this same period not a few able, industrious, conscientious fellows have moved upwards to fill the places of those who rose too rapidly and too far. The law of compensation may often seem to us to operate heartbreakingly slowly, but it does operate. It is safer to be paid less than one is worth than more than one is worth. That's a thought worth keeping in mind.—Forbes Magazine.

TO HELP MOVE BUILDERS' HARDWARE

LONDON, Ont.—Local hardware merchants will probably cooperate with the Builders' Exchange here in a plan to be discussed at the next meeting of the builders to put on a "Building Week." It is planned to interest the large number of prospective home builders here who have been holding off building owing to labor conditions and prices of materials, in getting work under way and it is hoped that next season will be made a record breaker in construction work. It is estimated by those in close touch with the situation that at least $4,000,000 worth of building is held over and every effort will be made to get this under way.

SAYS MARKING ACT

(Continued from page 46)

goods marked in such a way as to show his name, the name of the maker and the country of origin, for example: 'Made in Germany by H. Buker, for Clevis Bros., Montreal.' A law of this sort would force the importer of these foreign goods to come from under, or behind, and assume the full responsibility for the said goods getting into Canada.

"If there is anything wrong about such goods being offered for sale in Canada, this is the chap who is responsible. If he did not buy them and bring them in, they would not be here, then why let him blame the 'Hun' or anyone else for what is absolutely his own fault.

"There seems to be something in human nature that forces some people to boost foreign-made goods as superior to domestic products, and all you have to do to create opposition for your Canadian manufacturers is to bring in these foreign goods, marked as made in some foreign country, and you will get thousands of people to buy them, in preference to home products, and the 'mark' will do the business."

The importance of having adequate stocks of paint is emphasized in the article appearing in this section. It is pointed out that only by having sufficient quantities of paint in the various shades required can the merchant give real service to customers. How to keep such a stock without becoming overloaded in slow moving lines is outlined in the article. The paint section shown in this hardware store is kept right up near the front of the store all year around and the shelves are kept well filled up to show customers that a complete stock is available and that good service can be given them.

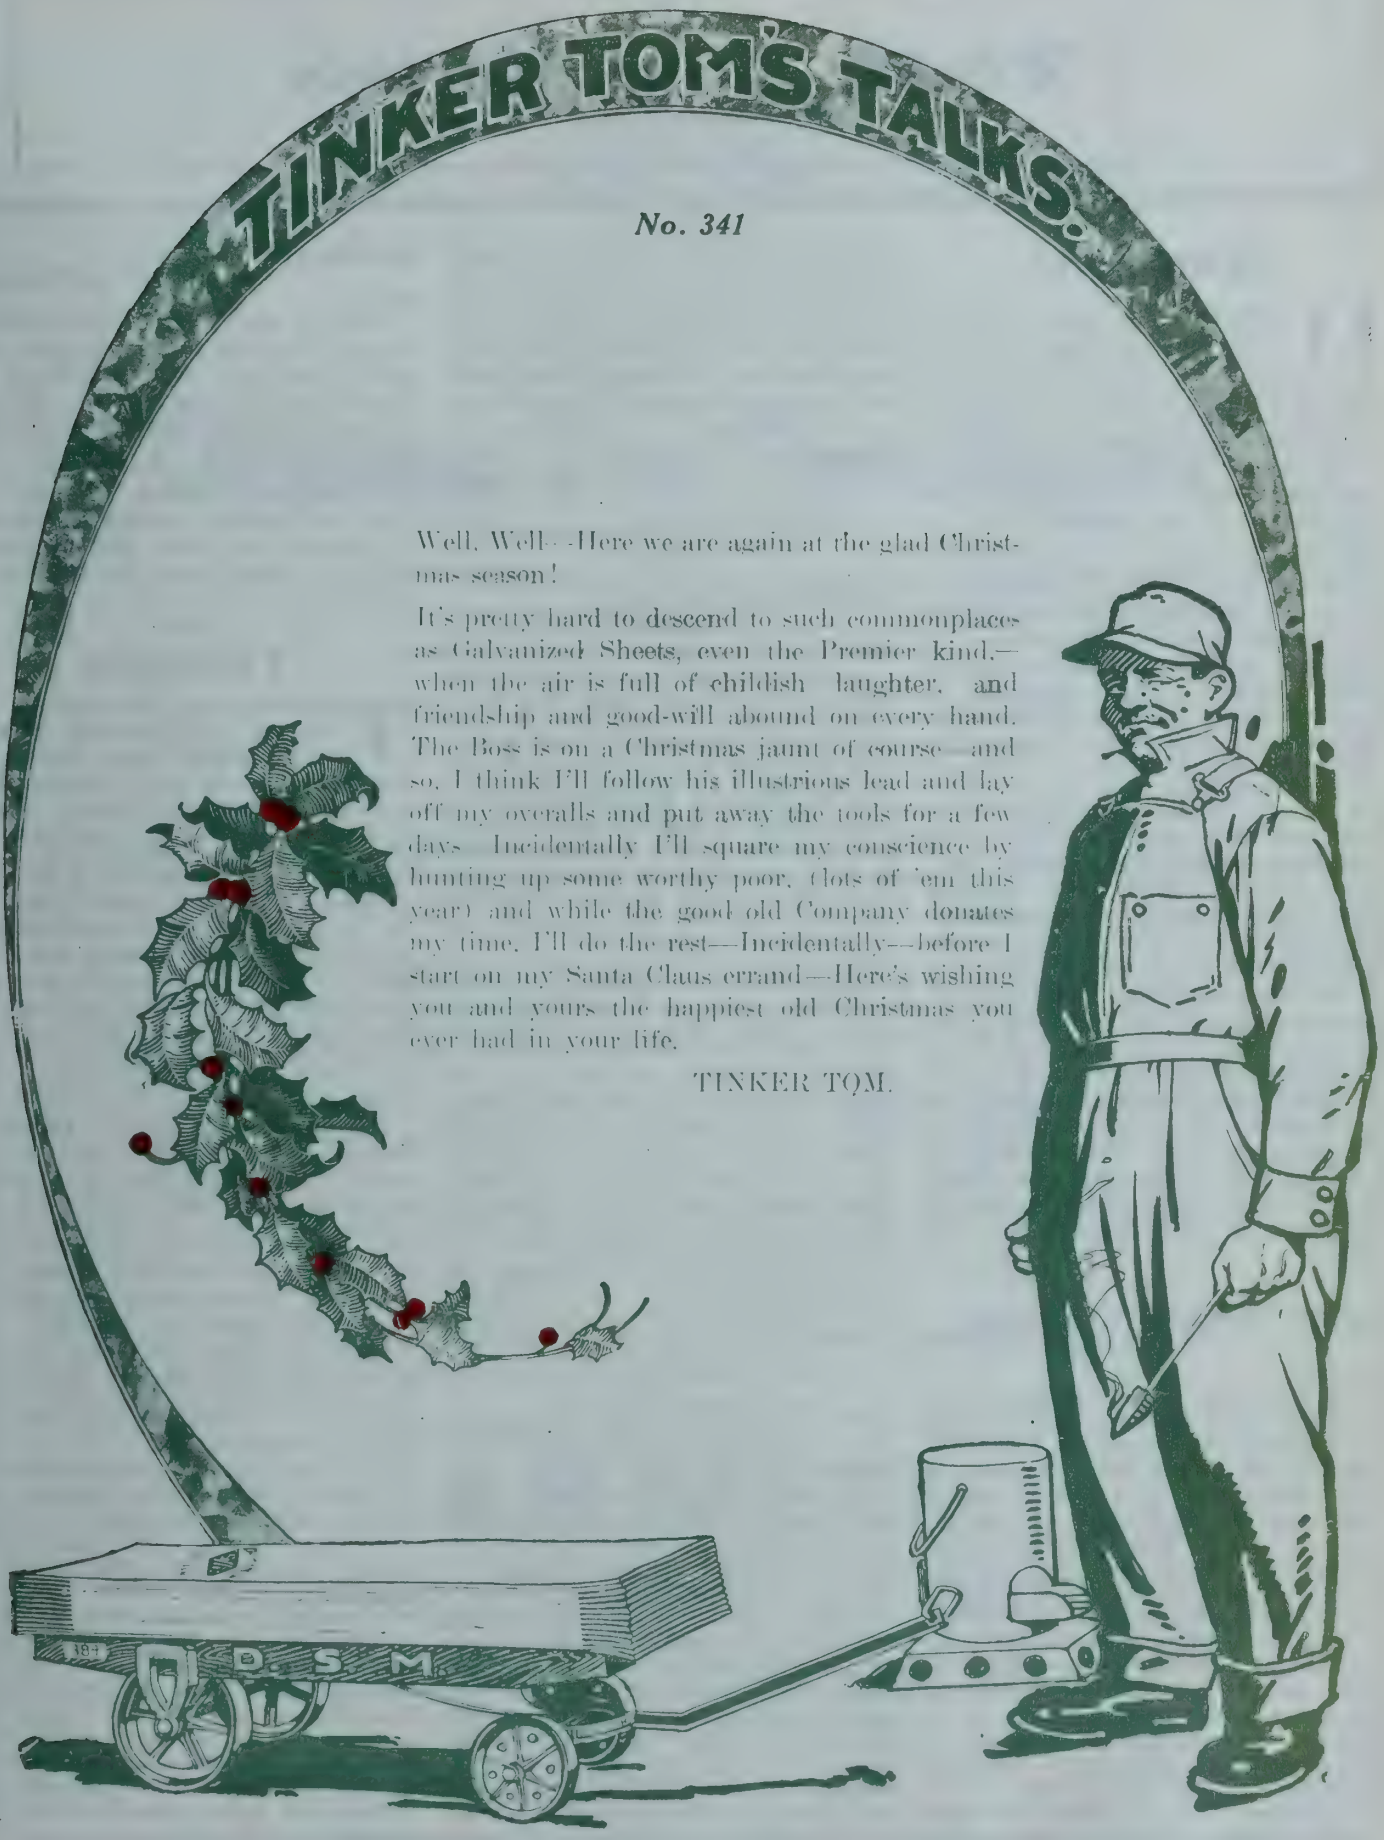
TINKER TOM'S TALKS.

No. 341

Well, Well—Here we are again at the glad Christmas season!

It's pretty hard to descend to such commonplaces as Galvanized Sheets, even the Premier kind,—when the air is full of childish laughter, and friendship and good-will abound on every hand. The Boss is on a Christmas jaunt of course—and so, I think I'll follow his illustrious lead and lay off my overalls and put away the tools for a few days. Incidentally I'll square my conscience by hunting up some worthy poor, (lots of 'em this year) and while the good old Company donates my time, I'll do the rest—Incidentally—before I start on my Santa Claus errand—Here's wishing you and yours the happiest old Christmas you ever had in your life.

TINKER TOM.



Weekly Paint Markets

Montreal

MONTREAL, December 15—Revisions in quotations on both linseed oil and turpentine again feature the current paint market. Linseed oil locally is now quoted 2 cents per gallon less, the trend being reverse to the tone of the market just one week ago when owing to a stronger tone in the flax market, oil was recorded with a firmer tendency. The present price decline is only considered another turn of the fluctuations prevalent in the oil situation for some time past, and not of any marked standing. Turpentine on the other hand is marked 2 cents per gallon higher. Closer following of market levels at primary centres, on the part of local distributors, is responsible for the present advance, as Southern markets this week show no price development of any proportion. Local quotations have for the past week been comparatively low with prevailing Savannah prices. A fairly steady situation, with a higher market accompanying the increased remand after the first of the year is looked for in this product.

Shellac prices are held with the undertone of the market still displaying a firm tendency. Window glass continues fairly active with quotations remaining unchanged. There is now a temporary lull in activities in paint manufacturing circles owing to the holiday season, but activities will be resumed immediately following the New Year. Prices on paint and all allied products are very steady.

SLIGHT DECREASE IN LINSEED OIL QUOTATIONS

Montreal.

Current quotations on linseed oil show a decrease of 2 cents per gallon, bringing present prices down to 81 and 83 cents in one barrel lots. The turn in the market was of a rather sudden nature, as last week there were indications of a firm tone owing to recent gains in the flax market. However, the present price easing is not of any serious consequence, and is only considered a turn of the fluctuations characteristic of the seed market for some time past. There is little change in outside centres, no easier prices appearing such as on the local market, and the strength, of the Argentine is expected to reflect in the near future if not at once.

A feature of the oil market this year is the continued strength shown in the closing months of the year. November and December are thought by many to be the months in which to buy oil as usually the low ebb is then reached. Not so this year, as the prices have been well maintained and all through a firm tendency has been displayed. The following are revised prices:

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrel lots, per gal ...	0 81	0 83
3 to 5 barrel lots, per gal ...	0 79	0 81

Less barrels, add 10 cents per gallon.

TURPENTINE PRICES REGISTER ADVANCE

Montreal.

Local quotations on turpentine were advanced 2 cents per gallon this week, and the market level is now on a more comparative basis with Savannah prices. Within the last few weeks current levels have not been on a par with replacement costs owing to cheaper supplies available, stocks of which were not exhausted quickly owing to the current light demand. The present increase in price is of more extent in some quarters, but $1.17 is the most general.

Southern markets report continued strength. Prices are firmly held and while a slight easing is anticipated in some quarters at a not far distant date, there seems little opportunity for turpentine to go back very far. Locally there is little business, the movement almost entirely confined to small lots, and those informed look for a continued steady market with higher prices, as soon as a brisker demand is felt. Prevailing prices are as follows:

TURPENTINE—	Imp. gal.
1 barrel lots	$1.17
2 to 4 barrel lots	1 15
Broken lots	1 27

VERY STEADY MARKET ON WHITE LEAD AND PUTTY

Montreal.

The undertone of the market for white lead in oil and putty is now very steady. Raw materials are furnishing the continued unchanged situation, these remaining at favorable levels in comparison with existing quotations on the manufactured product. Little change in either line may be expected for some time, and different manufacturers have again issued present prices in pamphlet form to the trade, with the booking season now open until April next. Following are putty prices, while white lead quotations will be found on current market pages:

TEMPORARY LULL IN PAINT ACTIVITIES

Montreal.

Owing to the approach of the holiday season, orders for paints, varnishes and sundry lines have temporarily fallen off in paint manufacturing circles. At this season of the year salesmen are off the road until after the New Year, but will resume their activities early in the year when continued briskness is looked for. Paint and varnish markets in general are holding very steady with no indication of a change in the opening months of the New Year.

Toronto

TORONTO, Dec. 15.—Both the linseed oil and turpentine markets record slightly easier undertones this week, but no price variation has developed in local distributing circles. Quotations generally are remaining unchanged at the recently revised lower levels on both products, but in the case of linseed oil, some easier prices on flax seed coupled with the dull attitude of the markets, have resulted in slightly lower oil quotations in certain quarters. This downward tendency has not yet been generally effective, but the existing movement on both domestic and foreign circles is described as of a very quiet nature.

The degree of inquiry for turpentine has also been greatly restricted, but quotations have continued fairly steady at primary distributing centres in the south, and as a consequence dealers claim that there is little room for easier prices, in spite of the slack season. Producers at Savannah claim that prevailing market values are justified at this season, but large consumers are conspicuous by their absence, the current business being chiefly purchases which cannot be withheld and represent immediate requirements.

While the paint and varnish circles are displaying a lull prior to resuming operations in the New Year on an even larger scale than previously, the brush markets are recording signs of activity. Manufacturers and distributors claim that wholesalers are placing orders for spring requirements in satisfactory volume, and present indications point to another brisk season of trade in these products. Household as well as paint brushes are included in this movement, which dealers claim has been materially assisted by the substantial price reductions instituted by brush manufacturers last summer.

REG. U.S. PAT. OFF.

Christmas Time Once Again!

A time to lay aside our busy tasks for a moment and peep into each other's hearts. A time to reveal that sentiment of which no man is ashamed and which makes the whole world kin.

It seems almost as if everything dates from one Christmas to another. Other days live in our recollection—Christmas lives in our hearts.

We began as children by believing in Santa Claus; we end, as grown-ups, in being Santa Claus. At this season of the year we vie with each other in bringing happiness to the children, even as our own fathers and mothers before us.

If we let this heart, this sentiment, and this love of humanity, go out of our lives, there is little left but the empty shell. To the extent that we feel and understand this we respond to the Christmas spirit.

Could any event other than the birth and life of the greatest Man who ever lived have inspired humanity to this spirit of good-will toward men?

This good-will is ours to use. We can make it felt in the gleam of the eye, the warmth of the handclasp, the good cheer of the voice—and the abundance of our good-will increases the more we give it.

The American Rolling Mill Company believes this and wishes you a very Merry Christmas and Happy New Year.

ARMCO

MIDDLETOWN, - OHIO.

Toronto Office, 51 Wellington St. East

TORONTO PAINT MARKETS

(Continued from page 70)

LITTLE INTEREST DISPLAYED IN TURPENTINE

Toronto.

Only a minor degree of interest has been recorded in turpentine, and both domestic and foreign markets show practically unchanged price levels. The degree of market activity is usually restricted at this season of the year, but with quotations remaining fairly steady at primary circles, local distributors state that prevailing replacement costs leave little room for reductions. One dealer expressed the opinion that while Savannah markets retain their present level, it was difficult to see how lower prices could be introduced. It was further pointed out that the absence of demand was a factor tending towards easier quotations, but on the other hand producers claim that a firm undertone is looked for in southern markets. Domestic unchanged levels are as follows:

TURPENTINE—	Imp. gal.
1 barrel lots	$ 1 20
2 to 4 barrel lots	1 19
5 gallon lots	1 35

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $15 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph Windsor, or Montreal but freight may be equalized from any of these points

Car load lots of 70 bbls. Price on application.

Less than 1 barrel lots 15 cents per gallon additional.

EASIER TENDENCY STILL EVIDENT IN LINSEED

Toronto.

Contributory factors in the linseed oil markets record little variation this week. An easier tone, if anything, has developed in flax seed, which coupled with the lack of interest in oil, has resulted in some easier prices on linseed in certain quarters. Whether this tone will be reflected in domestic markets generally, is dependent upon the current fluctuations in the seed markets, as well as the ratio of oil inquiry. No buying of note has been recorded, large consumers evidently still adhering to the waiting policy. As a consequence, the current markets lack interest and trade is of a dull nature. The local quotations are generally unchanged at the following levels, but it is claimed that an active inquiry would easily succeed in shading these prices.

LINSEED OIL—	Per Gallon.	
1 to 2 barrel lots	0 84	0 87
3 to 4 barrel lots	0 82	0 86
6 to 9 barrel lots	0 81	0 84

Less barrels, add 15 cents per gallon.

SPRING PAINT BOOKINGS ARE OF FAIR VOLUME

Toronto.

Spring bookings continue to provide interest in paint and varnish circles, with current prospects indicating many opportunities for increased business in paint and the allied products during the spring season. Quotations on all lines are unchanged, with both manufacturers and distributors stating that little price developments are looked for. Some dealers report that the proportion of bookings are satisfactory, and slightly in advance of the similar business recorded at this time last year.

EARLY BOOKINGS FOR SPRING BRUSH REQUIREMENTS

Toronto.

Brushes are now attracting attention, especially among manufacturers and wholesale houses. With orders now being placed for early spring requirements, preparations are under way for a brisk season in these products. No great volume of activity is expected however, until the annual inventory period is safely negotiated. With both collective and individual efforts concentrated upon making 1922 a new record in the history of the paint industry, a direct reflection of this anticipated activity is naturally looked for in the brush trade.

WINDOW GLASS MOVEMENT NOW OF QUIET NATURE

Toronto

Fair weather conditions have primarily assisted in prolonging the current movement of window glass, although the degree of activity in this product has greatly subsided from the brisk trade recorded during the months of October and November. The appearance of the domestic window glass on the markets has naturally relieved the situation, and no shortage is now referred to. While the closing of navigation tends to render Belgian shipments of minor importance, it is expected that the balance of the season's requirements will be easily available. Prices are continuing of a firm nature, but unchanged at the revised net list.

PITTSBURGH MARKETS

(Continued from page 64)

of January, producing a dip in production at that time. The point is that mills in general have been making a special effort to run for the purpose of providing their workmen with some holiday money.

What everyone is interested in, of course, is how production and consumption compare, with what may reasonably be expected for the future. There has been a good bit of loose thinking on the subject of whether business has been bad or good and how it is likely to be in the next six months. Right now there are predictions that steel business will be "good" by early spring, and other predictions that it will not be "good" before the middle of the year. When put in that form the predictions seem to be opposed, and yet investigation shows they are not so much opposed after all. The difference is not so much in the tonnage demand that men expect, as it is in the tonnage they take as a basis for making "good" business. This divergence arises from the fact that capacity has increased so greatly. In ingots, capacity is now about 52,500,000 gross tons a year. Prior to 1912 the largest production was the 25,200,000 tons made in 1910. Prior to that, 1906 and 1907 were years of great activity all around, and production in each year was about 22,000,000 tons. A 50 per cent. operation now, however, would make 26,000,000 tons. Considering how much construction work, railroad development and general steel consumption there was in 1906, 1907 and 1910, a 26,000,000 ton production in 1922 would look fairly large. On the other hand a 50 per cent. operation would look quite small. It is chiefly on account of this difference that some observers predict that business will be good and some predict that it will be poor. Both are thinking, probably, of about the same tonnage, a rate of production in the first half of next year of between 26,000,000 and 37,000,000 tons, which would be between 50 per cent and 70 per cent of capacity, big one way, small the other way.

A great deal of harm to business is being done by two things, first, the concept that "iron is the barometer of trade" and second, that business cannot be good until freight rates are reduced. Rates in general will hardly be reduced in less than about three months, and they will not be very greatly reduced even then. It is wasting time to wait on the reduction.

Channels of Consumption

The direct consumption of steel, in nails, tin plate, many forms of sheets, oil country goods, etc., is practically normal and is greater than in 1910. The consumption in construction is decidedly light, and that is the chief thing that makes such a hole in consumption in general. Consumption in machinery making is at the moment relatively light but plainly will increase since machinery, tools, etc., are essentials for the common everyday activities of the people. From this viewpoint the country can be decidedly active and prosperous in the first half of 1922 without giving steel producing industry anything like full employment. Automobile factories, foundries and machine shops, mines and factories generally can be very active, and get all the steel they need without the steel industry operating at more than between 50 and 75 per cent. and incidentally they may get it cheaper, which certainly will not be to their disadvantage.

The Markets

The finished steel markets generally have been very quiet in the past week, and that is the chief reason for the above digression. The quieter conditions began about the middle of October and the quietness increases as the year-end is approached. Tubular goods are an exception, there having been quite an active demand up to date, there being heavy demand for line pipe, moderately heavy demand for oil country goods generally, and a fair demand for standard pipe. The mills are operating on an average at between 70 and 75 per cent. the best rate shown for any of the finished steel products.

Finished steel prices show scarcely any change at all from week to week

reetings.

At a time when the spirit of Friendship "Covers The Earth" it is a pleasure on our part to extend to the Canadian Hardware Trade, collectively and individually, our sincerest wishes for a very Happy Christmas. And we greet in a particular way those dealers with whom we are directly associated in the distribution of the Paint Products that "Cover The Earth."

May the coming year witness a continuance of our good relations and prove a year of unprecedented prosperity for you all.

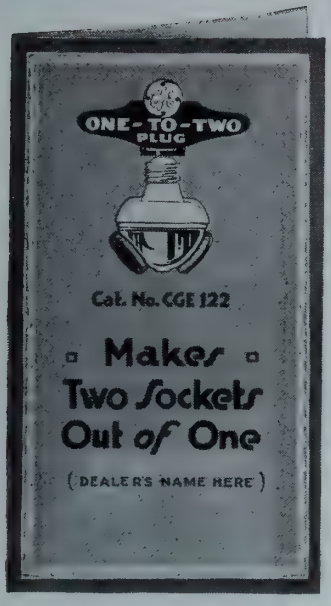
Attract Attention – Arouse Interest– Stimulate Desire



The Three Functions of a Good Display

The C.G.E. One-To-Two Plug, conforming to the C.G.E. merchandising policy of packing wiring devices in individual and artistically labelled cartons, is meeting with an enthusiastic reception everywhere.

C.G.E. Wiring Devices, with their dis inctive orange and blue labels, practically sell themselves. For example, by dressing your window with One-To-Two Plugs, you cannot help but develop an excellent display which will have its effect on your cash register. The striking design of the cartons showing the adaption of the plug to one or more of its many uses and the message that it makes "Two Plugs out of One" will attract attention—rouse interest and stimulate desire.

A supply of imprinted folders will be forwarded upon request.

Why has Hardware and Metal Such a Large Western Canada Circulation?

There are many reasons why Hardware and Metal covers Western Canada as thoroughly as the other parts of the Dominion. Some of the outstanding reasons are:—

Hardware and Metal is the *only* hardware paper giving a weekly market service from Winnipeg.

Hardware and Metal is the *only* hardware paper giving a weekly news section for Western Canada.

Hardware and Metal is the *only* hardware publication giving the trade in Western Canada a weekly market service from Montreal, Toronto, London and Pittsburgh — and Westerners are even more interested than any others in the activities in the primary markets of the East.

Hardware and Metal is the *only* publication in Canada giving the Western hardware trade a weekly service covering the activities of the hardware trade in a National way.

Hardware and Metal is the *only* hardware publication giving the Western Canada trade a weekly market service on paints, oils, varnishes, etc.

Hardware and Metal is the *only* hardware publication giving the trade any Western Canada weekly information regarding, "What Other Merchants Are Doing," Legislation, New Hardware Goods, Illustrated Articles on Display, Advertising, Etc.

Hardware and Metal during the twelve months of the year, supplies the Western Canada hardware trade with more market information, more new goods information, publishes more illustrations of window displays, store interiors, and retailers' advertisements than all the other Canadian hardware trade publications combined.

Incidentally, Hardware and Metal is the *only* hardware trade publication in Canada that will supply you with an Audit Bureau of Circulations statement, thus proving what it really has in the way of circulation in Western Canada.

MORAL—*If you are interested in Western Canada trade, advertise in the paper that is read by the Westerners and has gained its present dominating position in the West, as well as in other parts of Canada through 33 years of honest effort to give the trade each week the best in hardware trade newspaper service.*

HARDWARE AND METAL

"Canada's National Hardware Weekly"

143 University Avenue, Toronto, Canada

Montreal Branch, Southam Building **Winnipeg Branch, Union Trust Building**

Published every Saturday since 1888. The only weekly hardware paper in Canada and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.

To Western Hardware Dealers

Leading manufacturers and distributors listed on this page have advertised to 75,000 of the West's best farmers during 1921 through the Nor'-West Farmer. Their products are well and favorably known to your best customers and have been the best sellers this year—farmers buy 85% of the goods sold through retail stores in the West. Make sure of quicker turnover and bigger profits in 1922 by stocking goods advertised in The Nor--West Farmer.

Now is the time for builders to prepare for winter by placing their orders for Salamanders and hardware men should get this business. We make six styles and sizes and will be glad to quote prices upon request. Eavestrough, conductor pipe and elbows, corrugated iron roofing and siding, galvanized and black iron sheets, etc., also 4 in 1 shingles.

WHEELER & BAIN LTD.
TORONTO

C·C·M· Perfection Ankle Supports

Sell on Sight

EVERY skater who sees them will recognize their superiority and will want a pair.

So designed that by means of a hinge and sliding attachment the ankle may bend forward or backward but **cannot bend sideways.**

Made and Sold By

Canada Cycle & Motor Co., Ltd.

Montreal, Toronto, Weston, Ont., Winnipeg, Vancouver.

Also Makers Of

C. C. M. Automobile Skates and C. C. M. Bob Skates.

Thumb Screw No. 234

Stratford Brass Products grow in popularity, both with consumers who use them in Canada's best homes, and with hardware merchants who find a gratifying volume of sales for them in Canada's best stores.

We manufacture Furniture Trimmings of all kinds, Sash Locks, Sash Lifts, Casement Fasteners, Door Pulls, Hat Hooks, Transom Catches, Key Plates, Flush Bolts, Sash, Push and Pull Plates, House Numbers, Door Knockers, Casement Adjusters, etc.

The Stratford Brass Company
Limited
Stratford, Ontario

GLASS

Service and satisfaction is our only aim, and an increasing business gives tangible proof to this fact.

When we have served you—satisfied you—the deal is not forgotten or dismissed—but we extend our real appreciation of your patronage.

You cannot make cold type give full and adequate expression of appreciation, but the fellow who writes these ads has a very keen sense of appreciation of an increasing patronage which is phenomenal in its growth.

When we say "Thank you" We mean it.
When we say "We Serve" We mean it.
When we say "We Satisfy" We mean it.

SERVICE THAT SERVES

Ontario Plate Glass Ltd.

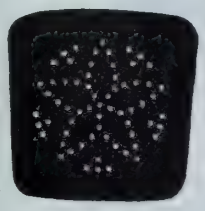
Hamilton, Ontario.

The British office of HARDWARE AND METAL is located at the office of the MacLean Publishing Co. of Great Britain, Limited, 88 Fleet Street, London, E.C., E. J. Dodd, director.

Real Profit in Canadian Veneer Chair and Toilet Seats

We are talking about real, tangible profit that co mes in particularly freely in the Fall months because there is a little extra demand now.

These splendid, three-ply veneer seats are made in a pleasing variety of patterns, carefully shaped, corners rounded, and fastened with genuine water-proof cement. They will not warp, curl, crack or come apart.



Everlasting 7- and 11-Ply Toilet Seats

These are expertly joined in 7 and 11-ply veneer. They cannot come apart and will outlast any other seat on the market.

Write to-day and let the extra profit come to you as soon as possible.

Canadian Veneering Company, Incorporated
ACTON VALE, QUE.

An Axe is as Strong as its Handle

STILL'S

—will give you a stronger working tool, for **STILL'S HANDLES** are made from the best of Canadian woods.

The sale of

STILL'S HANDLES

far exceeds all other makes.
There's a reason.
Axe, Pick, Sledge and Hammer Handles, Cant Hook and Peavie Handles.
It pays to sell **STILL'S.**

CURLING STONE

Headquarters

Mac's Special

Specially designed for us to suit our hard, keen ice. The weight is distributed in such a way as to give the running surface sufficient grip to hold whatever turn may be given, without any tendency to rock or roll.

Kay's Excelsior

Manufactured by Andrew Kay & Co., this stone has a world-wide reputation. An absolutely first-class stone that has given satisfaction wherever the game is played.

ACCESSORIES—We carry a full line of Accessories, Brooms and Boxes

Advertising in HARDWARE AND METAL is economical, because the advertiser reaches only a class of business men directly interested in his product. The readers of HARDWARE AND METAL are big buyers because they buy for business as well as for private consumption.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

For the Dealer's Convenience and Profit—

In ordering Columbia Dry Batteries it's so much easier to specify "C-1 Assortment" or "C-2 Assortment" or "C-3 Assortment," and at the same time secure

a wider margin of profit per battery

You thus get below the broken lot price and make a substantial saving. Ask us for these prices:

C-1 Assortment

50 No. 6 Ignitors
6 No. 1461 Hot Shots
3 No. 1561 Hot Shots
2 No. 1562 Hot Shots

C-2 Assortment

50 No. 6 Ignitors
12 No. 1461 Hot Shots

C-3 Assortment

50 No. 6 Ignitors
6 No. 1562 Hot Shots
4 No. 1561 Hot Shots

Made in Canada

A PIECE OF TABLEWARE

may be solid silver without the "sterling" stamp, the accepted "Hall Mark" of quality.

But you don't know.

A Bank might be honest and efficient without Government inspection.

But you don't know.

A business concern may be absolutely responsible without a commercial rating.

But you don't know.

A publication may have the circulation it claims without verification by the Audit Bureau of Circulations.

But you don't know.

Better be sure.

The circulation of Hardware and Metal is verified by the A. B. C. Hardware and Metal is the only hardware publication in Canada that will supply an A. B. C. Audit.

If interested tear out this page and place with letters to be answered.

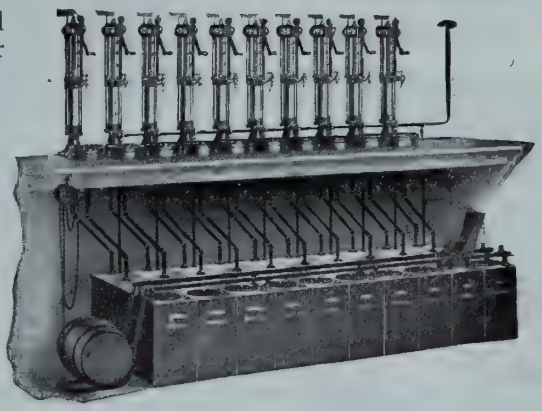
Sell All the Oils You Buy

There is worth-while profit in handling paint and lubricating oils. Do *you* get it *all* or do you lose a considerable part of it because of leaks, gumming and spilling?

Install Bowser Paint and Lubricating Oil Equipment and reap the *full* profits. The all-metal, evaporation-proof construction eliminates leaks and gumming.

This construction also keeps the oil clean. By delivering exactly the amount of oil required, the Piston-Type Measuring Pumps eliminate spillage in transfer.

You will be assured of *safety*, too, when you install Bowser Equipment, because it has never started or contributed to a fire.



Write for Illustrated Booklet *C-16*

Bowser Equipment is MADE IN CANADA by

S. F. BOWSER CO., LTD.

1668 Fraser Ave., Toronto, Ontario.

BOWSER ESTABLISHED 1885

PISTON-TYPE MEASURING PUMPS

Newell Hack Saw Frames

Adjustable from 8 to 12 inches

News of interest to hardwaremen lies in the Hack Saw Frame illustrated. These effective and dependable frames are made from extra heavy, cold rolled steel, heavily nickel plated. They are easily and conveniently adjusted from 8 to 12 inches. A screw in the handle sets the saw.

British Columbia Representative: Geo. Mather, Dominion Bank Bldg., Vancouver, B.C.

Ontario Representative: Geo. B. Jenkinson, 166 Bay St. Toronto, Ont. Phone, Adel. 1155.

This attractive saw illustrated is No. 1. It is included in a complete line of patterns now being brought out by the Newell Manufacturing Company, of Prescott, Ontario. It will pay you to investigate this line. Begin now with an enquiry about its prices and advantages to you.

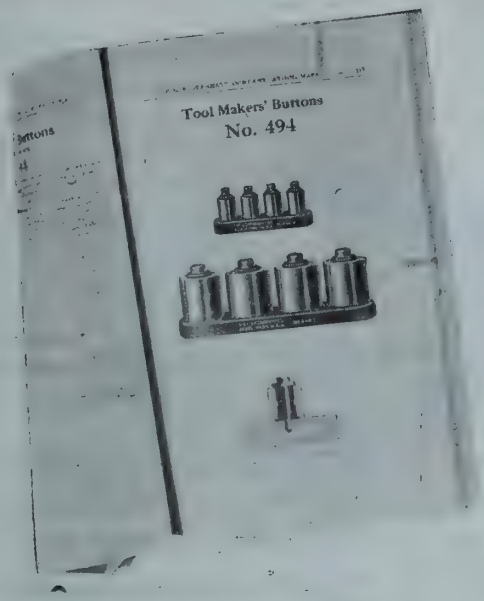
New Tools You Should Know



One-Inch Toolmakers' Buttons

No. 494 D

Starrett Toolmakers' Buttons are widely used for jig and die work in machine shops everywhere. A strong demand has been felt for these buttons in the one-inch size. In response to this call No. 494 D is now offered to the trade. A full description of these buttons, with illustrations, is given on pages 116 and 117 of the new Starrett Catalog, No. 22 "MA." Copy of this catalog—also extra copies for your customers—will be gladly furnished on request. Write for it now, and get, too, the Starrett Booklet—"The Tools Mechanics Buy."

THE L. S. STARRETT COMPANY
THE WORLD'S GREATEST TOOL MAKERS
Manufacturers of Hack Saws Unexcelled. - ATHOL, MASS.
42-239

Sell Starrett Tools

—all you need is this solder and heat"

That's what you tell your customer. Think what it means in getting and holding solder business. Fluxing—the hard part of soldering, the part that requires most expertness, the part that takes most of your time and requires most explanation when you sell solder to the layman—that part is eliminated by

KESTER ACID CORE WIRE SOLDER
FLUX IN POCKETS

The acid flux, scientifically prepared at the factory, is in the hollow core of this wire solder. Just before the solder is melted the flux is released and a perfect bond is the certain result.

Send for a sample—use it yourself. When you see how much easier it is to do better work with this self-fluxing, genuine tin-and-lead solder, you'll know why it is in such great demand. It stocks two items is one; flux and solder. So it's as easy to *handle* and *sell*, as to use.

Sold in one-pound cartons, and on one, five and ten pound spools.

Have you tried it?

Coal Oil

Brazing Lamp

Stoves, Blow Lamps and Furnaces

Very strongly made of Polished Brass. An efficient and powerful Lamp for Brazing, and similar operations on a big scale. Burner of improved type, giving a clean, blue flame covering a large surface. Portable and easily handled, can be used in any position with safety. Burns coal oil, 30% hotter and much cleaner than gasoline, can be used for pre-heating for oxy-welding.

The Perfect Grip

An ordinary hammer will slice the head off a nail because it gets a grip on the head and not on the nail. With the head off, it's all off.

Williams' perfectly balanced "W. & B" Hammer will grip the ***body*** of a nail and pull it, head and all, clear through a plank. All nails are trailers to "W. & B." hammers.

Heads on or heads off, for drive or pull, "W. & B." Hammers are the bosses in the nail world. Good workmen want them because they fit the hand, are perfectly balanced and are good all through. Literature?

"YANKEE" TOOL

PUSH DRILL No. 44

Saves Time at Every Turn

Here you have a rapid fire drill, with adjustable tension for hard or soft woods and the 8 different size Drill Points furnished with it.

A turn of the cap does the trick that saves time, labor and Drill Points. This drill is about as valuable to the average mechanic as any "Yankee" Tool we make. Built for hard service.

TWEED

SANITARY CLOSETS

will find a ready sale

Our No. 1 Tweed Sanitary Closet with mahogany finished seat and lid with nickel-plated hinges. Every Tweed is built on similar lines and guaranteed to give satisfactory service.

These Tweed Sanitary Closets will find ready customers among farmers, suburban dwellers, or any class of people who live in a locality without city conveniences and it is among these people that you can do a profitable business.

The Tweed is simple to install, absolutely dependable, sanitary and inoffensive, and can be used in any room in the house. The Special Tweed Chemical used in connection with the closet destroys all trace of odor. No plumbing of any description is needed. The Tweed solves the problem of putting city conveniences into country houses at a fraction of the cost.

Let us tell you more about the Tweed as a selling proposition. Write us for price lists and literature describing Tweed Sanitary Closets, Tweed Baths and other home conveniences manufactured by us.

"Hercules" Sash Cord

The reputation of this brand has been thoroughly established in the Canadian market for the last eighteen years. It compares in quality with the best imported brands, but is sold at a considerably lower price and can be safely recommended for any job.

All wholesale hardware dealers carry "Hercules" Sash Cord and can fill orders promptly.

Manufactured in Canada

JARDINE TOOLS

Tire Upsetter No. 5

This effective machine upsets tires up to 4 inches wide by one inch thick, and axles up to one and one-quarter inches. The jaws are faced with plates of crucible steel, having milled teeth, carefully tempered. Both upper jaws are operated by one lever, giving quick grip. This powerful machine is extra heavy and designed to stand the strain of upsetting the heaviest tires, up to four inches wide.

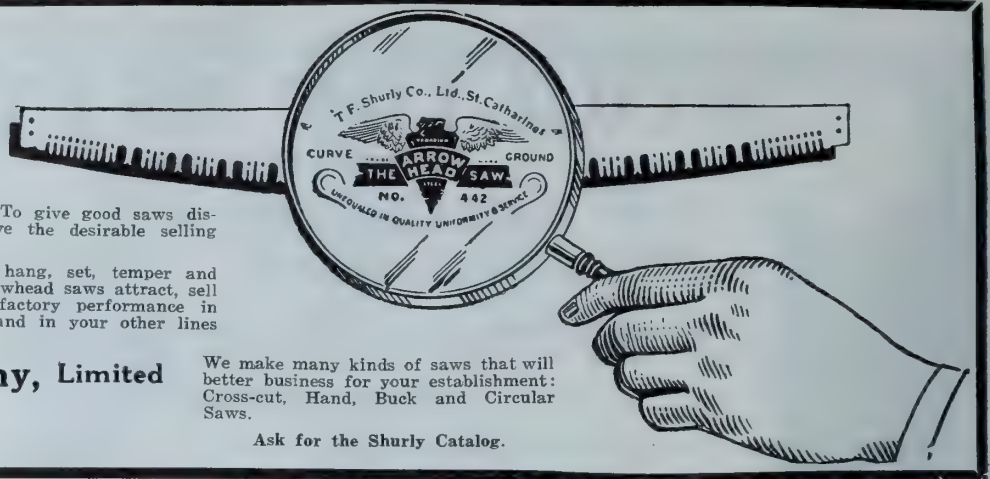
Arrowhead Saws

Vanadium Steel

How you sell saws depends partly on your salesmanship. You can sell a poor saw but once; to sell saws successfully and build yourself a permanent business you must sell good saws. To give good saws distinction and individuality they must have the desirable selling points of superior saws.

Arrowhead saws have those points; the hang, set, temper and finish are right, and they sell right. Arrowhead saws attract, sell and satisfy your customers. Their satisfactory performance in service creates confidence in your store, and in your other lines of goods.

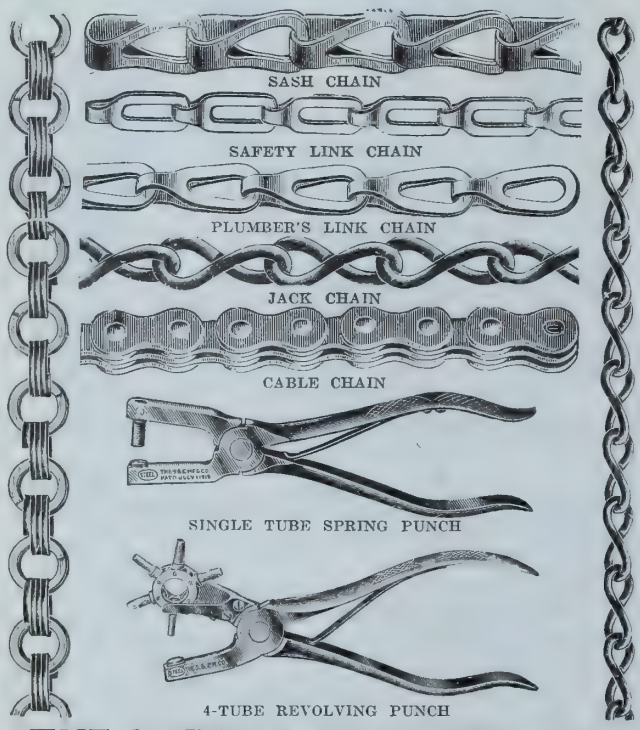


T. F. Shurly Company, Limited
St. Catharines
Ontario

We make many kinds of saws that will better business for your establishment: Cross-cut, Hand, Buck and Circular Saws.

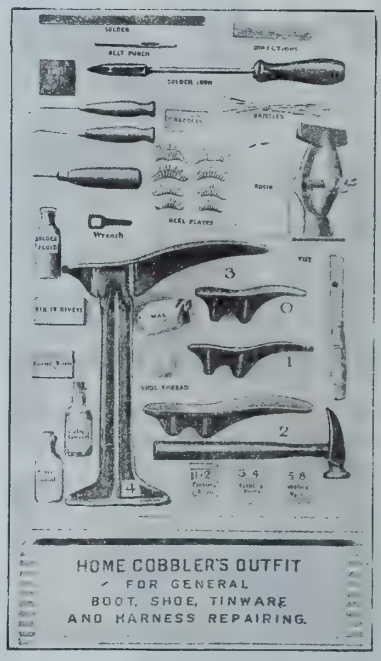
Ask for the Shurly Catalog.

CHAINS AND PUNCHES



THE SMITH & EGGE MFG. CO.
Bridgeport, Conn.
"ORIGINATORS OF SASH CHAIN"

"ECONOMIZERS"

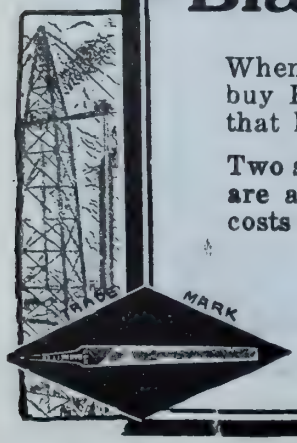


There are always some lines that sell better in quiet times. Analyze what these products are, and you'll invariably find they come under the category of "Economizers."

The line illustrated is particularly adaptable to the conditions of to-day. You will find a lively demand for this Outfit, because it means such a saving in footwear and footwear repairs — tinware and harness repairing. "Preferred Position" for this set in your Store and a "punch" from yourself will prove a fine investment.

MAXWELLS, LIMITED
St. Marys, Ont.

Black Diamond for Cutting



When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

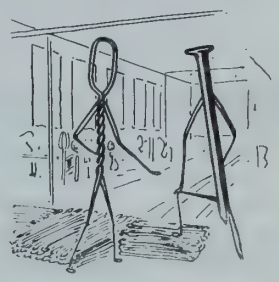
Laidlaw's Wire Boys

Their Chat No. 9

Clean Cut Nails



"You should have been through the mill with me this morning, W. N. The boss took me thru to see why Laidlaw Nails are always true to the Laidlaw standard no matter where you find them. The secret is in their own work shop where the dies are all kept in first class shape. No sloppy dies pass inspection in the Laidlaw plant."

"Guess that's why carpenters are beginning to insist on Laidlaw Nails and why many hardware dealers ask the jobbers to supply them. I'm not fond of noise, B. T., but I think I'll go through as you suggest."

Laidlaw Bale Tie Co. Ltd.

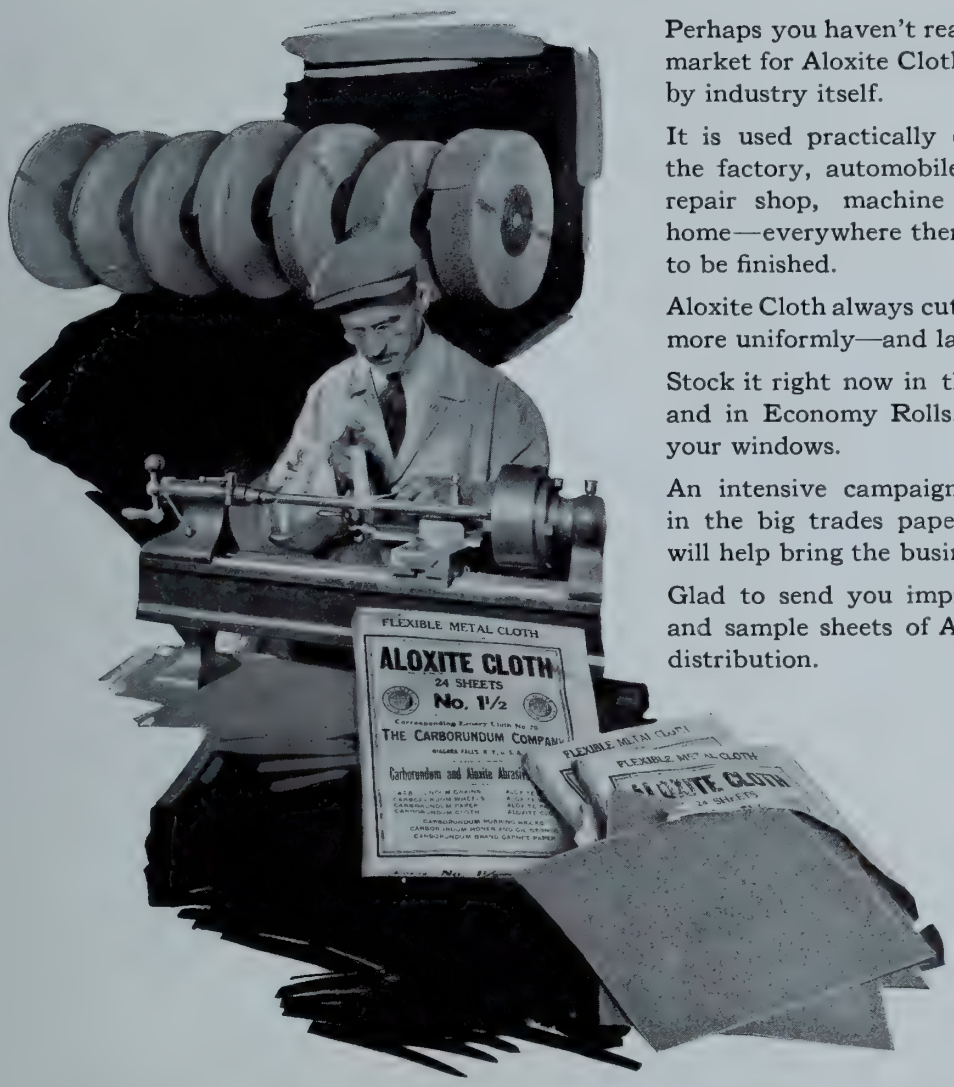
OVER FIFTEEN MILLIONS

THE total sales of abrasive paper and cloth in America last year were well over the fifteen million dollar mark.

And a goodly share of the profits went to the hardware dealer selling Aloxite Cloth—The Cloth that Cuts.



Perhaps you haven't realized it, but the market for Aloxite Cloth is limited only by industry itself.

It is used practically everywhere—in the factory, automobile plant, garage, repair shop, machine shop, and the home—everywhere there is metal work to be finished.

Aloxite Cloth always cuts cleaner, faster, more uniformly—and lasts longer.

Stock it right now in the 9 x 11 sheets and in Economy Rolls. Display it in your windows.

An intensive campaign of advertising in the big trades papers running now will help bring the business to you.

Glad to send you imprinted circulars and sample sheets of Aloxite Cloth for distribution.

Symbols of Service

HERE ARE four symbols of service which mean much in the satisfactory operation of the motor car. Of the four phases of service for which these symbols stand, consider how great is the automobilist's dependence on gasoline and oil service.

He is continually trusting to the retail vendor of gasoline. A slight inaccuracy in measure or an unnoticeable impurity in gas—and the effect is multiplied many times within the life of his car.

With Wayne Honest Measure Curb Gasoline and Oil Pumps working for you, you will have equipment standing for the highest type of service which can be given automobilists.

Wayne Honest Measure Pumps are accurate. Three independent guages constantly checking each other insure your customers against short measure and insure you against long measure. The clock-like dial shows each gallon after it is in the tank, not before.

Wayne Honest Measure Pumps are efficient. The vacuum bottle principle of construction means cool gallons full of power. Four screens and a positive filter assure pure gasoline. And the continuous forward motion of the crank saves your time and the customer's and enables you to sell more gasoline at each filling.

It will pay you to offer this kind of service. It will pay you, too, to take advantage of Wayne advertising which is telling automobile owners everywhere that Wayne equipment is a pledge of this clean, quick, honest service.

Bulletins Nos. 276HM 320HM and 364HM give you full information on Wayne Systems for the handling of gasoline and oils. Won't you write for them?

A Happy Christmas

Rice Lewis & Son Building in 1847

Three Quarters of a Century of Merry Christmases

The past seventy-four years have seen some wonderful developments and changes in Canada—Yet it's the same old Merry Christmas Spirit which fills the air at this the one best season of the year.

Let us all be thankful for the favors bestowed on us during the past twelve months and show it in our actions as well as our words.

We thank you, friends, and wish you the same old wish.

Rice Lewis & Son, Limited

Toronto, Canada

a Prosperous New Year

If interested tear out this page and place with letters to be answered.

ENAMELEDWARE

The CLEAN *Ware*

The superiority of enameled ware—its all-round utility as a standard kitchen ware—lies in its non-metallic surface. Housewives everywhere appreciate that when all is said and done the fine porcelain enamel surface of this ware—oven-baked to the hardness and texture of china—ensures the maximum of cleanliness and the greatest resistance to wastage during cooking. These points are all being strongly emphasized in a campaign of advertising directed to the consumer, and are a big factor in creating business for the dealer.

Another good selling point is that enameled ware is proof against all fruit acid stain—it is also impervious to vegetable odors and grease.

It is in every way cleaner and at the same time cheaper than other much advertised kitchen utensils.

Write us for a sample order of any or all of the following brands:

Britannic - Crown - All-White - Marathon - Premier
Colonial - Old Grey Ware

REVERSIBLE WRINGER. WASHES AND WRINGS AT SAME TIME OR SEPARATELY—ALL BY POWER.

1-4 H.P. Splash Proof Motor.

Style "B"—For Engine Drive.

Time proves whether confidence in an article is justified. Advertising will create a demand, and the more spent for publicity — undoubtedly the greater the demand. But unless the article advertised is truthfully presented to the buying public, and has real value and merit, it will not survive the test of time. This applies particularly to household utilities, which are expected to do the work demanded of them, efficiently and for a reasonable length of time, and to be free from intricate and delicate parts likely to get out of order.

Our thirty-five years' experience has taught us what home laundry equipment must be to sell and satisfy — to give value for every dollar spent. Washing machines are not parlor ornaments. They are labor-savers, and must be priced to be within the reach of the average householder.

Our assortment embraces washing machines for hand power, water power, electric power, engine drive—are designed to meet the demand of every purse — are common-sense, practical washers of established reputation. They are simple, durable and practically trouble-proof. Jobbers sell and recommend them.

Get after your local Painter and sell him

Decorative Wall Burlaps

The painter, Mr. Hardware Merchant, is the logical buyer of Decorative Wall Burlaps in a big way. That is to say, he needs large quantities within a few weeks' or a few months' time. As a prospect, therefore, he is the man to get after.
If properly cultivated he will buy.

Decorative Wall Burlaps—
The Wall Coverings Yielding Profit

By all means carry these in your paint department. Many times your customers will respond to your suggestion to cover a new wall, or an old one, with decorative wall burlap. It is easy to apply, convenient to handle, makes an excellent finish, and is not expensive.

TUNGSTEN

VACUUM AND GAS FILLED

LAMPS

LICENSED UNDER THE PATENTS OF THE C. G. E. CO., LTD.

The "AJAX" Line embodies everything in the art of Tungsten Lamp Manufacture that is necessary to produce a strictly high-grade A-one product via superior quality of materials and workmanship, uniformity of construction, maximum candle power output for a guaranteed average life performance of 1,000 burning hours at minimum current consumption, rigid inspection of all component parts and of the finished lamp, all being combined with the very latest scientific methods of manufacture.

Why fool with, or jeopardize your business by handling cheap imitations when there is such a large measure of lamp value and security to be had with "AJAX" lamps? Apply to our factory or nearest branch for prices.

NATIONAL

Guaranteed Axes and Tools

We make our own steel in our own vast plant covering 40 acres of ground! During the war we had one of the most extensive, best equipped and successfully operated munition plants in Canada.

We have devoted a year to perfecting the adaptation of this plant to the making of the best Canadian axes and tools. We are now ready to sell these.

Few, if any, axe and tool manufacturers in Canada have our expert tool-making facilities, tempering processes and tests, inspection or shipping facilities. Our special metallurgists and chemists, and our specially constructed forging, tempering and annealing furnaces, and chemical vats, assure you properly tempered tools. Making our own steel relieves us of the many handicaps existing where material has to be obtained in open market.

Ask for Catalogue No. 6 and supplements.

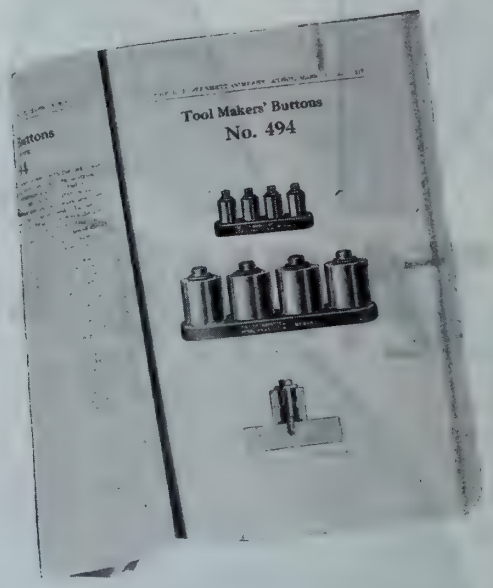
New Tools You Should Know



One-Inch
Toolmakers' Buttons
No. 494 D

Starrett Toolmakers' Buttons are widely used for jig and die work in machine shops everywhere. A strong demand has been felt for these buttons in the one-inch size. In response to this call No. 494 D is now offered to the trade. A full description of these buttons, with illustrations, is given on pages 116 and 117 of the new Starrett Catalog, No. 22 "MA." Copy of this catalog—also extra copies for your customers—will be gladly furnished on request. Write for it now, and get, too, the Starrett Booklet—"The Tools Mechanics Buy."

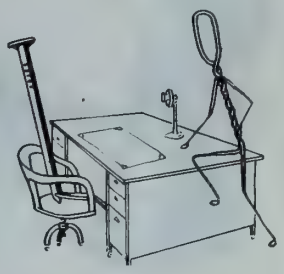
Their chat No. 10

Waste needs Good Bale Ties



"The waste people, B. T., are beginning to find out that it pays them to use Laidlaw Bale Ties. By the time a few bundles spread themselves out on the car tracks when being loaded, the advantage of buying the best is appreciated."

"I always tell those waste people, W. N., that Laidlaw Bale Ties are cheapest in the end even if they are not in the start which very often they are. The Laidlaw Bale Ties are made of wire of very great tensile strength. They do not break."

Laidlaw Bale Tie Co. Ltd.

Hamilton - - Canada

Again in Demand

The wooden tub is back—the high cost of the metal is largely responsible, but a wooden tub has other advantages.

There is no galvanizing or plating to fall off. No rust to spoil clothes, and hot water retains its heat longer.

Cane's wash tubs will be favored. They last a lifetime and are built with the workmanship that has made Cane's Woodenware popular for over thirty-five years.

Order a supply of Cane's Tubs from your dealer for a source of Good Revenue

The Wm. Cane & Sons Company, Ltd.

Manufacturers NEWMARKET, ONTARIO

Bigger Turnover for 1922

It is time business was clear of the war and the aftermath of war. With a falling market, consumers considering price a powerful factor, and stocks of slow-moving, high-priced goods on hand, retailers will wage a discouraging fight in 1922—unless they prepare well.

Every day, the old goods, bought at old prices, are running up a bill for interest on the investment. Each item also owes you its share of rent, taxes, light, clerk hire, delivery and your other expenses in addition to what you originally paid. Think what these old stocks are costing you to keep!

Get rid of the old stock by sales. Get your maximum available capital to work. Buy at present prices; sell quick, and turn your money over again as fast as you can.

It will be a hard race to keep up with, in 1922. It will need the right goods, at the right prices, and quick deliveries. Let us quote you; we can give you all three.

JARDINE TOOLS

TIRE UPSETTER NO. 2. This durable machine has a very quick grip, both the eccentrics being raised and lowered by one lever. It has a strong and sure grip. The eccentrics and jaws are faced with tempered steel. The tire cannot slip.

It is extremely durable, because it is made of heavy castings, strong enough to stand the very heavy work for which it is designed. All the pivot pins are of steel; the eccentric strap is a heavy forging. In fact, the whole machine is well and substantially made throughout.

This machine upsets tires up to four inches wide. We have on hand repair parts to replace those worn out in use on this and other Jardine Tools.

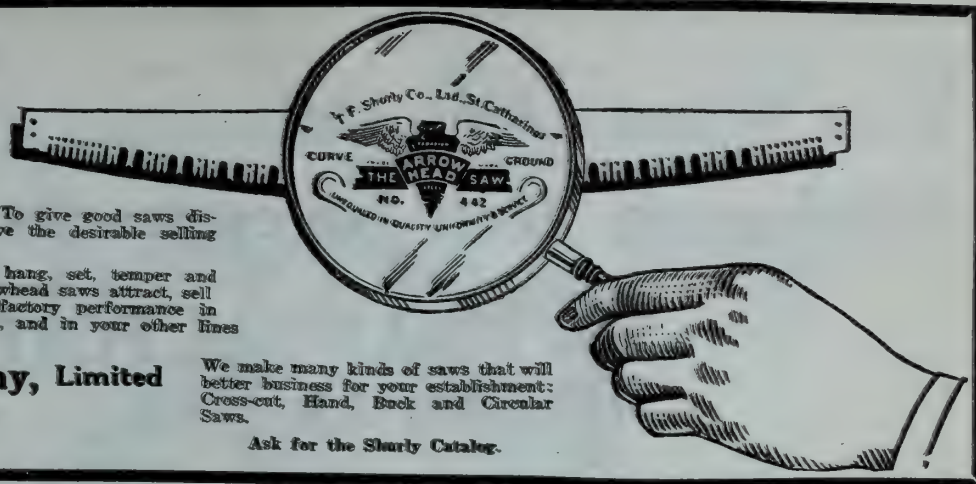
Arrowhead Saws

Vanadium Steel



How you sell saws depends partly on your salesmanship. You can sell a poor saw but once; to sell saws successfully and build yourself a permanent business you must sell good saws. To give good saws distinction and individuality they must have the desirable selling points of superior saws.

Arrowhead saws have those points; the hang, set, temper and finish are right, and they sell right. Arrowhead saws attract, sell and satisfy your customers. Their satisfactory performance in service creates confidence in your store, and in your other lines of goods.

You Want *Definite* Advice on Your Investments

The FINANCIAL POST will Give it to You

Buy Bonds Now

"—at the end of another year bond prices will be at a higher level than now."
"The comparatively high fixed income that one can buy by investing in bonds to-day is very desirable."
From FINANCIAL POST of November 25, 1921.

Foreign Exchange Gambles

"This offering—(of Russian roubles, Polish marks and Austrian crowns) is in reality one of the wildest gambles that has ever been flaunted before an innocent public. The chances of profit are so remote as to be negligible."
From FINANCIAL POST of December 2, 1921.

High Yield Bonds

Opportunity for profit pointed out in certain high yield industrial bonds that have good possibilities—with a list of such bonds.
In FINANCIAL POST of December 2, 1921.

A Profitable Trade

"Holders of 1937 War Loan bonds should exchange them for 1937 Victory Loan bonds." The reasons why.
From FINANCIAL POST of December 2, 1921.

The Good Preferred Stocks

"Investors may enter the market with a fair degree of assurance that the worst is over and that a gradual appreciation of price may be looked for as current interest rates decline." With a list of the good preferred stocks.
From FINANCIAL POST of December 2, 1921.

Systematic Investment

Methods and merits of investment on the partial payment plan described.
In FINANCIAL POST of December 10, 1921.

The Stock Markets

"The investment markets, discounting future, indicate that turn for better may not be long delayed."
From FINANCIAL POST of December 10, 1921

Sell Short Term Bonds

"Now is the time to sell bonds that mature during the next year or two and re-invest proceeds in long-term bonds at present coupon rates."
From FINANCIAL POST of December 16, 1921.

THE FINANCIAL POST discusses trends and enables the business man to analyze the factors that should influence his buying and selling policies. It discusses economic factors affecting investments and keeps the investor posted on new developments.

The POST goes further. It gives concrete advice on such points as are outlined above. But no statement is made and no advice given until all influencing considerations have been given sound thought. And while in these and other instances the movements forecast by THE FINANCIAL POST have already materialized, that is not the important point, for the POST'S real service is in telling of the long swings upward and downward in business or markets—not day to day, or week to week movements.

And then there is the Investors' Inquiries Service. Through it your own personal problems are analyzed and answered and advice is given you as to investments that are offered you.

Make sure of receiving the practical business paper. It will assist you in keeping your money working profitably and yet safely. Fill in the attached coupon.

Amended "Marking Act" More Favored by the Hardware Trade

Many of the Most Serious Objections Now Removed Say Manufacturers, Importers and Wholesalers of Hardware—Special Ruling Covering Glass Imports—Many Tools and Cutlery If Permanently Re-Stamped Would Be Damaged in Quality

CONSIDERABLY more satisfaction is expressed by manufacturers, importers, wholesalers and others in connection with the amendments announced this week to the Marking Act, which provides for the marking of country of origin on various imports. Many of the most seriuos objections have been removed according to opinions expressed to Hardware and Metal. The amendments are outlined in detail elsewhere in this issue.

S. J. Rutherford, President Toronto Plate Glass Importing Co., Ltd., in discussing the subject pointed out that the amendments make little difference in the case of glass importations because of the fact that a special ruling was obtained since the original regulations were issued. It was originally planned to have a label affixed to each sheet of glass in a box. The danger of breakage was pointed out and it was agreed that it would be sufficient to have country of origin marked on each case. Glass would be exempted from marking on each individual sheet by the amendments in any case as they provide that articles incapable of being marked without injury may be marked on the container only. Importations from Belgium are always in French anyway and so the cancellation of the regulation calling for the name to be in either English or French will not make any difference. There will be no difficulty over shipments in Customs after January 1 because the cases are already marked according to the amended regulations.

Make New Moulds

An official of the United States Steel Products Co., Ltd., Toronto, stated that the original regulations made necessary ome changes in the marking of the various metal products imported by this firm. The words "Made in U.S.A." have been added in the moulds to provide for raised lettering on rails, channels, beams, etc., in addition to the other words which have always appeared on these products, such as "Carnegie," "Lorraine," etc. The latter words would hardly comply with the regulations as they have been amended, however, and it was thought probable that these lines would continue to bear the mark "Made in U.S.A."

Business with this firm was stated to be developing more activity and, in anticipation of spring demands, considerable bookings of steel for building and bridge construction are being made. Present conditions justify an improved outlook as compared with this time last year.

Questioned as to the possibility of the incoming Government making changes in the amended regulations of the Marking Act, an official of the Canadian Manufacturers' Association, Toronto, stated that the Act itself would undergo no revision because this was beyond the power of the incoming Government. Amendments might be made but as the amended Act now seems to be as satisfactory as such legislation can be it was thought improbable that any further drastic amendments would be made. It was stated that the regulations as they now stand are considered to be very satisfactory and acceptable to all concerned. The temporary marking of goods in Customs which were shipped before manufacturers were able to make the necessary changes will be carried out, but there seems to be some doubt whether the regulations will be enforced for the half day on December 31 or wait over until January 2. Part of the Government literature on the subject gives the date December 31 and the balance mentions January 1, which is a Sunday.

Dodging the Issue

Dealing with the possibility of certain European goods being enabled to dodge the issue for which the Marking Act was designed in view of the amendments making it unnecessary to state that the goods were "Made in ———," it was thought that there was a possibility of this being done where goods might be manufactured in one country and shipped to another where the name and address of some agent might be placed on the goods. In this way exact information as to where the goods were manufactured would not be available. This would not be the case on goods coming through the United States for in that country there are regulations prescribing that imports must bear the wording "Made in ———" with country of origin marked.

Would Lower Quality

Discussing the subject with a manufacturers' agent who represents a number of foreign makers of tools, cutlery, etc., the opinion was expressed to Hardware and Metal that the amendments will greatly relieve the situation which has been produced among foreign manufacturers due to the drastic nature of the original regulations. The opinion was expressed that considerable latitude would have to be allowed due to the fact that thousands of dollars' worth of merchandise would be ruined if it was to be made necessary to permanently mark cutlery and tools which have already been made up for this market. Arrangements can be made for temporary marking of goods in Customs but the point is that many foreign manufacturers of cutlery and tools have large stocks already made up for this market and to attempt to re-stamp these goods now that they have been made would

be practically out of the question. If any blur is made in the stamping the line is now regarded with some question and frequently has to be classed as a "second." The seriousness of the regulation which demanded the words "Made in ———" on each article can therefore be appreciated. Fortunately practically all such goods now bear the maker's name and address and this will be sufficient.

On some of the cheaper grades of tools merely the brand name of the maker appears, though on the more expensive grades of the same firm's product the full name and address is given. In such cases the cheaper lines will be forced to bear the same mark as the others.

Under the heading of lines incapable of being marked on the individual article and which will have to be marked on the container, come hydrometers.

Should Allow Latitude

It was the opinion of this agent that goods shown to have been shipped by January 1 should be allowed through Customs without marking, due to the late date on which the amendments have been issued.

It was emphasized that replacements are oftentimes repairs, and as such are exempted from marking. Automobile parts will play an important part under this heading if it is shown that they are being brought in as repairs.

Discussing the fact that the United States Government still makes it necessary for imports to bear the words "Made in ———" whereas this has been abolished now in Canada, this manufacturers' agent pointed out that more complete lines are made in the United States than in Canada and that such protection is therefore more necessary. He cited the case of carpenters' tools for instance, of which there are some 140 in a full range. He stated that not one-third of this range of tools is made in Canada. Hence the need for greater protection in the United States.

Wholesaler Speaks

In discussing the latest amendments to the import marking regulations, one hardware wholesaler was of the opinion that these revisions now practically nullify the Act as an important factor in trade affairs. "The whole aspect of the regulations is again changed, and it is now only likely to affect hardware lines in a minor way. The constant issuing and altering of such a measure places the exporter in a very difficult position. Manufacturers in other countries have undoubtedly gone to great expense in order to comply with the regulations, and, practically at the last minute, the substance of the measure is revoked."

One particular instance of this was given in connection with lawn mowers. Manufacturers in the United States, who have been exporting these goods into Canada, had new moulds made, a necessary part of their manufacturing processes which takes both time and money. "Of course, the stamp Made in U. S. A. will serve to meet the national appeal of the American markets, but the outlay has been rendered unnecessary. The cancellation and modification orders which have been issued tend to ridicule the original scheme."

"Appraisers will not likely be held greatly responsible for minor infringements of the new law, as it now means very little change in the present methods of marking such foreign goods, and the consensus of opinion is that the ruling is generally looked upon more favorably since it has been revised."

Another wholesaler voiced the opinion that much opposition and disapproval of the original regulations had developed, as the Marking Act in its rough form would have undoubtedl been the source of much tribulation to both manufacturers and distributors alike.

"We are glad to see the amendments come through," stated this wholesaler, "for the Act, as it stood, would have been a distinct handicap to the manufacturer of imported hardware goods. It would also have very likely caused much inconvenience among trade circles generally, because of its complicated nature, and the many obstacles to be overcome in complying with such a drastic ruling in every individual case. If, however, such an Act was universally adopted, no doubt all the countries would benefit thereby, but until international recognition had been given to such a scheme, trade restriction would be the solitary result."

The "Marking Act" as it Now Stands

Collectors Advised to Use Reasonable Discretion in Enforcement of New Regulations—Name and Address of Manufacturer Now Sufficient Without Marking "Made in ———"—Containers Imported to Contain Canadian Goods for Export Don't Need Marking

A NUMBER of important changes have been made in the Marking Act which was outlined in its original form as affecting hardware lines in the November 26 issue of Hardware and Metal. The changes remove many of the most serious objections which have been outlined by manufacturers, importers and wholesalers. The amended sections of the Act will be outlined herewith, giving the new ruling in black type.

In sending out the amendments, Collectors of Customs and Excise have been advised to use reasonable discretion in the enforcement of the regulations so as not to cause undue annoyance or irritation to importers.

The first amendment is to Section 13 which formerly provided that the name of a city, province, state, department or other division of a country of origin was not in compliance with the Act, that the words, "Made in....." were to be used, followed with the name of the country. This section has been cancelled and the substituted section reads:—

"The name of a manufacturer or his trade-mark accompanied by the name of the country or a place in a province, state or other division of a country where the goods have been manufactured or produced will be accepted as sufficient indication of country of origin."

Further exemptions are added to section 10 which provided that where articles themselves are incapable of being marked without injury and are imported in bands, wrappers or containers, or on cores or spools, such bands, wrappers, containers, cores or spools shall be marked to indicate country of origin. To this section have now been amended the words:

"Unless such articles are of a class or kind not made or produced in Canada in which case no marking is required."

Section 11 dealing with imported containers or wrappers intended to be filled with or used upon domestic products is cancelled and the following substituted:

"Imported containers, labels or wrappers intended to be filled with or used upon domestic products are to be marked as required by the act, but in order to avoid the possibility of origin other than Canadian being imputed to domestic products sold in such imported containers, labels or wrappers because of the marking of the latter, the words 'container, label or wrapper,' together with the indication of the country of origin required by the regulations, shall be used. It will not constitute a non-compliance with the Act, however, so as to involve the levying of the additional duty, if the words, 'container,' 'label,' or 'wrapper,' as provided in the preceding paragraph, be not used in the marking of the goods imported, but before the release from Customs this additional marking will require to be done. Provided that the containers imported to contain Canadian Produce and exported

Marking Act Changes in Brief

Name of manufacturer and address now sufficient instead of "Made in ———."

Where articles themselves cannot be marked without injury to the wrapper, container, etc., needs to be marked only where similar goods are made in Canada—if not also made in Canada imports don't need marking.

Containers imported to be filled with Canadian produce for export don't need mark of country on label but importer must certify.

All goods in crude, raw or rough state exempted unless specifically mentioned where formerly only metallic goods, crude rubber, clay, hides, skins, raw furs, corkwood, marble, stone in rough, broom corn and bristles, fibre, rags were exempted.

Partly manufactured goods still exempt.

English or French of name marked on goods cancelled. Can now be any mark indicating country of origin.

Watch movement regulation cancelled re specifically marking "Made in ———" and parts don't need separate marking.

may be admitted without being marked with the country of origin, conditional on the importer certifying on the face of entry for consumption that such containers are for use in the preparation of goods for exportation."

Section 18 of the regulations specified metallic goods not intended for sale to the consumer in the condition imported, crude rubber, crude clay, hides and skins, raw furs, corkwood unmanufactured, marble and stone in the rough, broom corn and bristles, fibre, rags, partly manufactured materials, completely manufactured parts for incorporation into articles of Canadian manufacture, repair parts, etc. as not being required to be marked. This has been amended to read as follows:—

"The following goods wi'l not be required to be marked with the indication of country of origin: Goods in a crude, raw or rough state, or goods which are not intended for sale to the consumer in the condition imported, but which are merely for use in the manufacture, construction or repair of articles in Canada. This does not apply, however, to goods elsewhere specifically provided for in these regulations. Provided that on every entry at Customs of goods as described in this section a statement shall be placed by the importer certifying to facts sufficient to classify the importation within the provisions of this section."

Section 12 providing that name of country of origin must be in English or French is cancelled.

Section 17, subsections c and e, dealing with the marking of watch movements are both cancelled.

"The statute requires that the country of origin be indicated in the marking. Hence the words 'made', 'produced' or 'grown' may be used in the marking to suit circumstances."

The Simplex Iron and Tool Co., has been incorporated to manufacture adjustable wrenches. They are located at 216 Adelaide St., W., Toronto, and Mr. Dunlop, president of Dunlop Coal Co., is also president of the above mentioned concern. Mr. Harrington of the Harbor Commission, is vice-president of the new firm.

Much Hunting Yet This Season

The hunting season is still in full swing in the Northwest T erritories for deer, moose, caribou, grouse, prairie chicken, ptarmigan. In Prince Edward Island the rabbit season is open. In Quebec, moose, rabbit, caribou, ptarmigan may still be shot. In Yukon, moose, caribou, grouse, prairie chicken, p tarmigan can still be hunted. In New Brunswick and Nova Scotia the season is open for duck, goose, brant, coot, gallinule and rail. In Saskatchewan the season is open for duck, goose, brant, coot, gallinule, black-bellied and golden plovers and yellowlegs, wilson snipe or jack snipe, and rail. With such a season yet open and in view of the comparative mildness of the winter there will yet be many hunting parties set forth. The above display was arranged with the idea of keeping up interest in hunting equipment and shows how effective a natural setting can be made.

Making the Inventory "Tell the Truth"

Basis of Valuation Should Be That Which Will Put Business in Best Position to Face the New Year—Should Be Cost or Replacement Value, Whichever Is Lower—Two Methods of Listing Stock

Written for Hardware and Metal by W. F. Macpherson, Secretary, Ontario Retail Hardware Association, Prescott, Ont.

THE OBJECT of an Inventory being to obtain definite information for use in determining the standing of a business at the close of the financial year, and the success of any business depending largely on the possession of accurate knowledge by the management, makes it imperative that the inventory when taken should tell the truth and nothing but the truth.

The basis of valuation should be one which will put the business in a right position to carry on for the coming year. This valuation should then be on a basis of actual cost, or replacement value whichever is lower. In listing stock, two methods may be used: first, by entering on stock sheets at invoice price laid down, and having a separate column for depreciation in which to enter declines in prices, or depreciation on account of damaged and slow selling articles, judged as undesirable stock. The total of depreciation column to be deducted from total of inventory.

The Other Method

The second method would be to take present or actual cost, whichever is lower and make extensions directly on that basis, making due allowance for unsalable lines. The final result would be practically the same but the depreciation column would give statistical information which might be of value. In listing stock I would suggest getting regular inventory sheets (procurable from various sources, with different rulings). Mark sheets by location, thus: Main store, East side or West side, etc., keeping each location together when filing to facilitate future reference. All lists should be carefully examined and all lines blue pencilled which *ought to move out*, and after stocktaking, assemble them and move them at some price, there being no money in keeping boarders who won't pay their way.

W. F. MACPHERSON

Secretary Ontario Retail Hardware Association, who emphasizes some important points for retailers to keep in mind in connection with the forthcoming annual inventory.

All lists should be carefully checked as to unit and price, extensions and additions. When this is all completed you have a real invoice of your stock, and are in a position to prepare your annual financial statement.

The next move should be to adjust your selling prices to conform to this invoice, just the same as if the goods had just been received from the manufacturer or jobber. This adjustment to market levels is absolutely necessary to secure the confidence of the buying public. At this time also it is advisable to ascertain what your average overhead expense is, based on the year's business just closed. The majority of business men determine this percentage by dividing the total annual expense by the total annual sales—thus with expenses of $8,000 and a turnover of $40,000, the overhead would be 20% of the sales. Then take your net profit and in a similar manner see what percentage it bears to your sales, and you will be in a position to judge if your markup is giving you a fair return for your services and investment.

Studying the Market

If an inventory when taken is used solely for the purpose of ascertaining the actual financial position of the business, and then filed away, a valuable part of the energy and care taken in its preparation is lost. Frequent reference and study of same will result in the moving of many lines liable to be overlooked in the daily grind, which tie up capital and are non-productive. The form of inventory sheet recommended by The National Retail Hardware Ass'n. (Fig. 1) provides columns for taking stock both on a basis of net cost and also at retail price. By subtracting the net cost column from the retail price column, you would have the gross profit obtainable through the turnover of the entire stock. The result would no doubt be a good object lesson, and an aid in determining whether the mark up you are using is adequate or otherwise. The extra work entailed, might point to increased profits next year. Fig. 2, is an inventory sheet used by certain hardware firms with good results. It shows clearly the per cent depreciation and the amount.

Take Inventory on the Correct Basis

Merchant Writing in Detail on the Subject of Tabulating Expenses, Sales, and Net Gain, Leads the Writer of This Article to Deal With Correct Inventory Taking in an Interesting Manner—Some Sound and Practical Advice.

By Henry Johnson, Jr.

THE annual day of reckoning is again near at hand. It is the time to face conditions, to know where you stand, to strip all the veneer of self-deception. I am moved to write this by the following letter:

Dear Sir:—We take the liberty to send you a tabulation of our expenses, sales and net gain, thinking perhaps it may be of some worth to you in gathering statistics. The wages expense includes $3148.60 drawn by the two partners. You will notice we charge off no shrinkage as that seems to be accounted for in difference between goods bought and goods sold anyway. We charge off no depreciation because we take care of all fixtures—no doubt improperly in a way—through our expense account. It amounts to the same thing in the end, however, and is much simpler to our minds. Averaging depreciation is pure guesswork as one man might make a certain fixture last 40 years and another 10 years. We therefore take care of it in expense and if of any value at time of replacement, deduct that value from the new expense item. Regarding interest on investment, we cannot see how it is proper to put in as expense, as there are no monies paid out. Of course, it is a good plan to figure aside on such subjects to see if it actually pays a man better to stay in business and invest, for instance, $10,000, to make $2400 or work for someone else for $2,000 salary and let the money earn $400 interest. Our figures seem to show 20% gross profit, 16.94% expense, 3.04% net gain—a little discrepancy probably in figuring. We would be glad to have you criticise these figures as it may help us to rectify some errors. We are wondering if you have taken into account "partners" salaries when tabulating salaries at 6.50%. No doubt you intended to, but did the people handing you the statistics do so? This tabulation shows a net gain of difference between goods bought and goods sold. Going into it deeper, a loss on value of our merchandise on hand Jan 1, '21 and Jan. 1 '20 would entirely wipe out our profit

Yours truly

STATEMENT:

Merchandise sold	$58876.26
Merchandise bought	47053.91
Gross gain	11822.35
Total expenses	9932.30
Net gain	1890.05

Shows net gain 3.04%

EXPENSES:

Wages	10.47%
Fuel, light, etc.	.18
Rentals	.68
Insurance	.37
Taxes	.31
Interest	.24
Freight	1.88
Advertising	.11
Repair auto	1.90
Telephone	.41
Ice	.28
Postage	.11
	16.94%

Amounts to Same Thing in the End

No charge for shrinkage—because it is there anyway. No charge for depreciation—because it is more in one store and less in another. No charge for interest (?)—because it is as broad as it is long. Shrinkage not taken in merchandise—why? Oh, because that would wipe out our profits!

Then why keep any records or write to me? Why not simply go as you please, hit-or-miss, take it or leave it as chance may rule, and keep our office in our hats?

Of course, this hard-headed, hard-working shrewd and careful merchant does not mean all that, but is not that how his letter sounds?

Normal shrinkage, based on experience is taken from every inventory of stocks or fixtures in advance so we may be sure not to deceive ourselves the wrong way. If what we write off January 1st happens to be excessive, it will come back and show up next year. Any such excess is not lost. The fact that we have faced it as a probable burden at the beginning of the year has made us extra cautious—so it is very likely to return at next inventory in added values.

It is true that a fixture will last one man 40 years and another man 10 years. But it is also true that a fixture bought new today can be sold to-morrow—even if not yet unpacked—only for a considerable shrinkage from its purchase cost. Experience has shown that it is conservative good business to assume that inside equipment will last ten years, so 10% is wiped out annually via Loss & Gain account. The best way is to mark off a fixed sum each year. Say you start with $1500 equipment. Wipe out $150 a year. If you add new fixtures, put in say, 25% as expense and 75% as fixtures. Take 10% off the total at the year-end. But assume that the total falls below $1,500 after a while. Take off $150 anyway. Soon you will have to run the fixture account in red—in a

The Marking Act

ONE OF THE last acts of the Meighen Administration has been the amending of the "Marking Act" which in its original form has been causing endless anxiety on the part of foreign manufacturers whose goods are marketed in Canada. The incoming government would probably have taken some steps to adjust this legislation but the action on the part of the old Government, belated as it is, is none the less welcome.

The Act as amended will be found elsewhere in this issue, along with the comments of various manufacturers, importers and wholesalers. It is evident from a reading of these comments that the Act as it now stands is much more acceptable to the trade than was the original form. Many lines of cutlery, tools, etc., which now bear the manufacturer's name and address, will not need to be changed as was the requirement of the former Act calling for the words "Made in ——" to be placed on each article. The latter requirement is still made by the Act in force in the United States.

If, as is claimed, the regulation governing marking of imports is to give more protection to domestic products, it is difficult to see why the law was not more particularly applied. Taking tools for instance, the Canadian manufacturer produces only about one-third of the range of tools required by the average carpenter, yet full protection on the whole range is given, to the detriment of young mechanics requiring these tools.

Had the original provision calling for the words "Made in ——" been upheld in the Canadian Act, large quantities of various lines of cutlery, tools, etc., made up for this market would have either been sent elsewhere or attempt made to re-stamp them, with great danger to their quality as even a slight blur is enough to class them as "seconds."

It is doubtful if the Act as amended will have the required effect in plainly indicating on certain goods the country of origin, when some sentiment is known to exist against such goods. It would be simple for one European manufacturer to make goods without a mark on them and then ship them to another country where an agent might place his name on the goods. In such case the true country of origin would not be indicated. This could not happen on goods coming through the U.S. because the Act of that country makes it necessary to mark the country in which the goods are made, but it might be done on goods shipped to Canada direct from other countries except the U. S.

When put into practice some minor questions such as these will undoubtedly crop up for solution, but it is to be hoped now that collectors have been allowed to use some discretion that many of the trivial points which are often raised by minor officials who wish to be authoritative will be eliminated, and everyone co-operate to have the Act administered with as little difficulty as possible.

Prospects For Building

ACTION OF THE Builders' Exchange of Toronto in securing an agreement with the building trades for a reduction of ten cents an hour should be followed by similar action on the part of the building trades throughout Canada in order that building activity may be stimulated. It would appear as though the prediction of the manufacturers and supply firms made at the meeting in Toronto in the early Fall is coming true and that the workmen would sooner or later be forced by the need of work to play their part in lowering costs to stimulate building. Though there has recently been some increase in prices of certain building materials, in most cases revisions have been downward and this combined with lower wages should help revive activity.

One firm which supplies steel for building construction work advised Hardware and Metal this week that bookings for Spring trade are much ahead of last year and that considerable building construction is expected to commence early next year. Similar optimistic reports are forthcoming in connection with anticipated house construction and a considerable reopening of business in builders' hardware should be possible early next year.

Steel Company Claim

AN ORDER in Council has been passed by the Federal Government to give $3,000,000 to the Dominion Iron and Steel Co. on account of its claims against the Government. This credit introduces an interesting situation which has a bearing on the iron and steel trade of Canada. The steel company's claim is for $7,964,000, but it is made clear by the Government that the payment already made is an advance and not to prejudice any amount which the company might get as result of litigation now in progress.

The claim of the Dominion Iron and Steel Co. originally arose over a plate mill contract when the Government is said to have agreed that if this company built a steel plate mill it would contract to buy 250,000 tons of ship plates at the rate of 50,000 tons per annum with the option to increase to 375,000 tons at the rate of 75,000 tons per annum. The Government is said to have agreed to pay $85 a ton for these plates depending on ingots remaining at $25 a ton. Later, steel prices began to sag and it was apparent that the contract price was high. It was therefore amended on December, 10, 1919, to provide for payment at the rate of $73 a ton for plates. On February 21, 1921, the company is said to have been notified by the Government that the contract could not be carried out and it was suggested that compensation would be made the company for the breaking of the agreement. A claim was filed by the Dominion Iron and Steel Co. in June of this year, it being indicated that the mill alone erected for the purpose of carrying out the contract cost $7,500,000 and that this with other sums expended made up a total of nearly eight million dollars.

These are the facts of the case which is soon to be argued in the Exchequer Court at Ottawa, and it is taken to be significant of the Government's viewpoint that a payment of $3,000,000 has been made to the company before the case has been given a hearing. Apparently no allowance is mentioned in the claim covering the buildings and machinery, and it will be iteresting to see whether this Canadian company will be able to undertake the producing of ship plates in competition with U. S. mills, now that it has available a plant suitable for the purpose.

Pointers For The Glass Department

Some Helpful Data to Facilitate Work in the Glass Department—Breaks, Qualities, Thicknesses of Glass Outlined Fully in Reply to Questions From Hardware Merchants.

IN ANSWER to enquiries recently received by Hardware and Metal from some hardware merchants concerning the making, qualities, breaks, etc., of glass, the following data are being given concerning these and other points of interest in this industry. This information might well be kept in convenient form in the glass departments of any hardware stores.

As to the breaks, in order to ascertain into what break a certain size of glass would be placed it is necessary to add up the length and width. That is, 10x12 equalling 22" would come in what is known as the break up to 25 united inches. A 20x22 equalling 42" would come in the break 40 to 50" and in the same way 32x42 would come in the break 70" to 80". These same remarks apply to both single and double strength glass but do not apply to 32 oz. and other specialties heavier than Double Strength as these are usually sold in what are known as billets or stock size sheets. Billets consist of an assortment of sizes and are generally put up in 200 and 300 ft. cases and are sold only in large sizes. A case of billets may contain two or three lights of, say 32x70 one or two lights of 30x72, one or two lights of 40x60 etc.

Qualities of Glass

In regard to qualities, window glass of American manufacture may be described as photo glass, "A.A." "A," "B," or "C" qualities, photo glass being a special grade and "A.A." being the next highest grade. "B" quality is the grade generally used in this country, but in certain districts a limited quantity of "C" glass is used for factory glazing. Glass of Belgian manufacture is known as first, seconds, thirds and fourths qualities. Belgian glass imported into this country is usually purchased in fourths quality Single Strength and thirds quality Double Strength. The Belgians also make a fifths quality but this is exported to China and Japan and other countries.

Thickness

In regard to thickness, the standard grades are 16-oz. for Single Strength and 24-oz. for Double Strength, and 32-oz and 39-oz. The term ounce usually applies to the weight of the glass per square foot and while the above mentioned weights are standard, at the same time, by reason of trade usages, there are a great many intermediate weights on the market. The standard Belgian weights are 16, 24, 32 and 39-oz. The American standards are from 16 to 18-oz. for Single Strength, 24, 29, 34, and 39-oz. Canadian standards as used by one Canadian firm are 18-oz. for Single Strength, 21-oz. for Double Strength and 26 and 32-oz. The Canadian standards as will be turned out by the new factory at Hamilton are 17-oz. for Single Strength, 24-oz. for Double Strength, 32-oz. and 39-oz. They will also turn out 29-oz. glass if the trade demands it.

Reduced Prices Are Stimulating Building

Fourteen Thousand New Buildings This Year as Against 11,000 Last Year—Expect Big Year in 1922.

LONDON, Ont.—A number of decidedly interesting features in connection with the building situation were discussed here this week at the annual convention of the Mason Contractors' Association of the United States and Canada. Prices of materials, prices demanded by labor, freight rates, the apprentice problem and the general outlook were among the leading questions discussed. The opinion was general that reduced prices of materials are having a stimulating effect on building and this year will see 14,000 new buildings constructed as against only 11,000 last year. It was pointed out that there is every prospect, that 1922 will make new records in construction work. There is no doubt of the very large amount of work held over owing to the general public having the view that both labor costs and materials costs must come down. Various speakers gave figures showing how material costs have been steadily coming down. The report of Secretary McGarvey regarding investigations into labor costs in fifty-one cities was not so encouraging. In some places he said the men have seen the wisdom of accepting lower wages in an effort to restore normal business. In many others however, they have flatly refused to accept any reductions with the result that only 72 per cent of them had secured employment.

In this connection it was pointed out to Hardware and Metal by several delegates that had the mechanics been willing to accept even a ten per cent cut in

(Continued on page 54)

How About Your Entry?

The Hardware and Metal **CHRISTMAS WINDOW CONTEST** for 1921 is now well under way. Many hardware merchants and retail salesmen are taking part for the honor of being a prize-winner or runner-up in the contest.

Read the details in this issue, then send along your entry by January 2.

DO IT NOW.

News of Western Canada

Hardware Advances in B. C. Balance Declines

Criminal Prosecution of Britannia Mining & Smelting Co. Causing Comment in Heavy Hardware Circles—November Trade Shows a Decline

VANCOUVER, B. C.—Perhaps the main topic of disucssion among wholesale hardware distributors, particularly those handling the heavier lines, is the action of the attorney-general of British Columbia in instituting criminal prosecution against the Britannia Mining and Smelting Co. on Howe Sound which was the scene of the flood disaster on October 29 when thirty-six persons lost their lives. The general manager and superintendent have been placed under arrest and are now out on bail of $10,000 each.

The company had previously announced that it would go ahead at once in the rebuilding of the town at Britannia Beach together with the immediate reconstruction of the concentrator which was destroyed by fire last year. To this end tenders have been called for the structural steel. It is stated that the plant together with the mill will mean an expendiure of a million dollars and it is understood that as far as possible all materials will be purchased in this province. Now the question is, will the company go on if a case is proven against them. Hardware and steel men say it will be a very serious matter if, by any chance, construction were not proceeded with.

Bids for the structural steel, called a fortnight ago, have been closed and tenders have been put in by leading firms in Vancouver and Western Canada. The contract, it is expected, will be awarded by Christmas. It is probable that the steel will have to be fabricated in the east as no mill in B. C. can turn out the large beams required. The order for the equipment has already been placed with a large plant at Allentown, Pa., and includes eighteen tube mills 7 x 10, a set of 72 x 20 inch rolls and four sets of 54 x 20 inch rolls.

In the general hardware trade, distributors are united in saying that while trade was good in September and October, there has been a sharp decline in November and December and that the Christmas demand has not helped to any great extent. No reason has been advanced for the dearth of buyers and prices are generally lower than last year.

Some of the larger concerns here say that business may be twenty per cent. less than a year ago. Price changes have been of no importance and five and ten per cent. advances are coming through about as regularly as declines, so that it is believed the bottom has been reached. Brass goods are up about ten per cent. and copper lines are expected to follow.

Trade this week continues in fair volume from the upper country and collections are up to the average. Credit men are, however, taking no chances and are keeping on the trail of tardy accounts.

A couple of weeks ago your correspondent mentioned an offer by a retailer of a half a ton of coal or goods to the value of $10 to any purchaser of a range. The inducement did not bring the expected rush although in the preceding week with no special offer, stove sales had been good. This week another firm is making an offer of $10 in merchandise to those who purchase ranges. These are the only two instances noticed as to premium offers to induce sales. At the same time, one retail firm is offering a free balloon to any child who will clip a coupon out of the paper, sign his name, age and address and bring it to the store. This firm is making a specialty of wagons, kiddie cars, scooters, dolls, model automobiles and other lines which will catch the eye of the children.

J. F. McMULLEN, VICE-PRESIDENT MARSHALL WELLS ALBERTA CO., LTD.

A news item appearing in Dec. 3 issue of Hardware and Metal referred to J. F. McMullen as Edmonton Manager of Marshall Wells Ltd., of Winnipeg. This was incorrect as Mr. McMullen is Vice-President and Manager of Marshall Wells Alberta Co., Ltd., Edmonton, Alta.

WESTERN CANADA NOTES

Charles H. Tewksbury, Vice-President of the Boston Varnish Company was a business visitor to Winnipeg.

Winnipeg.—Gordon H. McRobie, traveler for the J. H. Ashdown Hardware Co., Ltd., was married at Moose Jaw, Sask. Mr. McRobie was presented with a cabinet of silver from the traveling staff of the J H. Ashdown Hardware Co., Limited, Winnipeg.

Vancouver, B. C.—The current issue of the British Columbia Gazette contains notice of incorporation of the Okanagan Hardware Ltd., with capitalization of $30,000 and head office at Vernon.

Nanaimo.—A. Sampson, head of the Sampson Hardware, one of the city's most highly respected citizens passed away this week. He is survived by his widow, three sons and five daughters. In the early days, Mr. Sampson, who was 67 years old, helped drill and locate coal in nearly all of the Vancouver Island fields.

Mission City, B.C.—Representative retailers of the city and district met here at a banquet this week and following a number of addresses it was decided to form a branch of the Retail Merchants Association under whose auspices the gathering was called. Mr. Allanson of the Allanson Hardware Company took a prominent part in the proceedings and acted as chairman of the meeting. Officers of the new branch will be appointed as soon as the membership drive has been completed.

Vancouver, B. C.—With head office in Vancouver the Canadian Oil Burners, Ltd., has been incorporated with a capital of $50,000. The company has acquired patent rights for inventions of oil burners for stoves, and lamps.

Vancouver, B C.—Interest is being taken in North Vancouver in the damage action of John Paine, merchant of North Vancouver against P. G. E. Railway for $15,035 as the result of an accident.

Vancouver, B. C.—Cassidy's Limited, wholesale china and glassware have bought Gray Bros. warehouse at Davie and Hamilton streets for $62,000 into which they will move within a week.

Vancouver, B. C.—With the departure of the steamer "Lewis Luckenback" next week will go the first shipment of magnesite from British Columbia. B. D. White, general manager of the Pacific Roofing Co., announces that there is a big demand in eastern Canada and the United States for blending with magnesium choride in the manufacture of composition floorings and stucco. The Pacific Roofing Company has for three years been endeavoring to perfect a furnace for treatment of magnesite which this company discovered along the P. G. E. Ry. The experiments have proven successful and in the near future, cars will be forwarded to Toronto and Chicago. It is stated that it will take ten years to deplete the deposit.

Knife Sales Increased 300% in 60 Days

Use of Special Stand Showing Pocket Knives Graduated in Quality Increase Pocket Knife Sales of Bowers Bros., North Battleford, Sask., From $48.60 to $153.40 For Two Sixty Day Periods—Drawing Trade From Radius of 75 Miles—Current Events in the Store Advertisements.

AFTER trying for a considerable time to establish some selling plan for pocket knives, Bowers Bros., North Battleford, Sask., have recently adopted an idea which has already well justified its adoption. A glance at the picture of the store front shown herewith will reveal a rack or stand located in front of the main entrance. That rack constitutes the idea which has sold pocket knives in this store. This stand is in the shape of an easel, 4 ft. high and 16 inches wide, with glass front hinged so it can be readily opened. It is also equipped with a lock.

In describing this fixture, Mr. Bowers states: "There are 10 rows of compartments which hold 1 knife each. The top row we use for 25 ct. knives the next row for 50 ct. knives and so on down each succeeding row being priced 25 cts. higher. We price all our knives in even figures so there are none which we cannot exhibit in this stand priced in the above manner. One large price ticket is placed in the centre of each row and it can be read by people passing on the opposite side of the street. One clerk can handle this stand taking it in every night when we lock the store at 6 o'clock. We kept a record of all pocket knives sold for 60 days after putting this outside our door and compared sales with preceding 60 days' business. The increase in sales was over 300%. From July 6th to September 6th, sales totalled 124 knives selling for $153.4 against the preceding 60 days' business of 36 knives totalling $48.60. This was tried out at the quietest time of the year and at the present time we are selling considerably more knives than when the first stand was placed outside our door. This stand we secured from a Winnipeg wholesaler for $10.00.

"We have a population in North Battleford of about 4000. We are situated on the Saskatchewan river, one of the most beautiful spots in the province. The surrounding district is ideal for mixed farming, being well supplied with small lakes and water is available in abundance for stock. These lakes all abound in fish. Many come from Saskatoon and the central part of the province to camp on the shores of these lakes. Many hunters also go out into the North country moose hunting in the late fall.

Hunting Supplies Active

"We find that hunters' supplies, ammunition, traps, guns, fishing tackle, and campers' equipment is an important branch of our business. Most of our trade, however, is with the farmers and ranchers of the surrounding district who come a distance of 75 miles to deal with us. We have no railroad north of here and yet have held this business for 12 years since we opened up business on King Street. We endeavor to keep always on hand an up-to-date stock of hardware and harness believing that it pays to watch our stock closely and always have what our customers ask for. We have built up a reputation for service which after all is what counts in the retail end of the business.

"A motor delivery is used for the town trade. Four clerks are employed in addition to the two partners who are usually on the job devoting their whole time to the building up of what is one of the best equipped hardware stores in this part of the province. Harness has been an important part of the business until recently. The advent of the small tractor has cut this end of the business considerably, but the hardware end is growing every year."

Current Events in Ads

W. M. Bowers who handles the advertising is a firm believer in using a

(Continued on page 54)

The glass fronted stand which has been responsible for largely increasing the pocket knife business of Bowers Bros., North Battleford, Sask., is shown in the doorway. This stand is fully described in the article. Moose and other big game is hunted in this district in the late Fall and a window of hunting equipment is kept in at this time of year. This display includes flashlights, ammunition, rifles, camp stove, kettle, etc. Stoves are also a popular line, particularly those of the type shown in the window display. Note that prices are plainly shown on the stoves, an important feature in the sale of this line. The gasoline pump shown in the foreground is responsible for bringing many motorists to the store where other wants are catered to.

Events in the Trade

BUSINESS CHANGES

Watford, Ont.—Thos Dodds & Son hardware, have sold to W. L. McCrae & Co.

FIRE LOSS

Ottawa, Ont.—Gray Harvey Co., Ltd., wholesale and retail hardware, has suffered fire loss to warehouse.

NEW FIRMS

A. W. Gayler & Company are opening a hardware store in St. Lambert, Quebec. Mr. Gayler, who heads the new company, is now the proprietor of the South Shore Tire Service, and the hardware stock will be added to his present business.

OBITUARY

Thomas Findley, president of the Massey-Harris Co., died this week in Toronto. Mr. Findley had been in poor health for some time. Some five weeks ago, he was compelled to discontinue his daily tuties.

Starting as a farm boy, Mr. Findley worked his way up to outstanding influence. He had won international reputation as a financier and business man, and at the time of his death was president of the Massey-Harris Co., director of the Johnston Harvester Co., vice-president of the Toronto Housing Co., director of the National Trust Co., director of the Verity Plow Co., and president of the Bain Waggon Co.

PERSONALS

Guy Higgins, managing-director, The Glidden Company, Limited, Toronto, has returned from a week's visit to the Winnipeg branch.

W. Beverley Robinson, president of B. & S. H. Thompson & Co., Ltd., Montreal, is visiting their principals in New York this week.

William Drysdale, Coristine Building, Montreal, Que., known among the wholesale hardware trade throughout the Dominion of Canada, announces that he has resigned the agency for John Shaw & Sons of Wolverhampton, England, to take effect December 31st. Mr. Drysdale has been connected with this company for the past eleven years and tendered his resignation to this company owing to ill-health. In the future Mr. Drysdale purposes to devote his attention to foreign imports including Swedish Enamelware.

JAMES SMART PLANT APPOINT TORONTO REPRESENTATIVE

The James Smart plant of the Canada Foundries & Forgings, Limited, Brockville, have announced the appointment of Tim. W. Rogers as their representative for Toronto and Western Ontario. Mr. Rogers has had a wide and varied experience in the metal trades and previous to this appointment was associated with Drummond, McCall & Company, Limited. The Smart Plant proposes to open an office in the city of Toronto the first of the year.

T. W. ROGERS

Appointed representative for Toronto and Western Ontario for the James Smart plant, Canada Foundries and Forgings Ltd., Brockville, Ontario.

F. B. KENNEDY JOINS KENNEDY HARDWARE CO.

F. B. Kennedy, formerly with Marshall-Wells Co., Ltd., Winnipeg, Man., will become associated with the Kennedy Hardware Co., Toronto, Ont., on January 1, 1922. Mr. Kennedy was formerly connected with the latter company, but resigned some eleven years ago. While with the Marshall-Wells Co. Mr. Kennedy has been in charge of the builders' hardware and electrical departments. It is announced that his new duties with the Kennedy Hardware Co., will be in connection with the city sales department, and sales promotion work generally.

MERGER OF COLLINS MFG. AND NEVER-FAIL PRODUCTS CO.

The Collins Manufacturing Company of Toronto and the Never-Fail Products, Limited, of Hamilton, have combined. The new organization will be known as the Collins Never-Fail Products, Limited, with C. W. Collins as president and general manager. They will carry on their new and enlarged operations in Hamilton at 1322 Burlington Street, East.

The new company it is said, will develop to a much greater degree the line of metal poultry supplies and fittings heretofore made by the Collins Manufacturing Company. The line of sprayers and force pumps will be continued as well as other novelties made at present and in prospect.

The Never-Fail Products, Limited, have for the last three years made and sold the "Never-Fail" five gallon oil and gasoline cans originally made by the J. A. Harps Company of Greenfield, Ohio. Never-Fail Products, Limited, obtained the Canadian rights for their manufacture in Canada.

RICHARDSON-PHENIX AND BOWSER COMPANIES CONSOLIDATE

A consolidation has been effected between the Richardson-Phenix Co. and S. F. Bowser & Co., Inc., Ft. Wayne, Ind., which is the parent company of the S. F. Bowser organization in Canada. H. Christie, manager, Toronto, stated to Hardware and Metal that any effect on the Canadian organization of the consolidation would be indirect as the Richardson-Phenix Division would deal more particularly with the filtration, and lubrication appliance business. J. W. Peterson, president of the latter company, will assume the vice-presidency of S. F. Bowser & Co., Inc. Assets of the consolidation are said to be valued at ten million dollars.

RUDDY MFG. CO. ORGANIZED IN BRANTFORD

The organization is announced of the Ruddy Mfg. Co., Brantford, Ontario, who are to take over the unit of the plant of Ham Bros. on January 1st, 1922. Kitchen cabinets, woven wire goods, and bee keepers' supplies are made. Joseph Ruddy, now vice-president of the Canada Starch Ltd., becomes the general manager of the new company. Ham Bros. are taking a large financial interest in the new company and their president, J. C. Ham, is one of the directors.

TABLEWARE INDUSTRY FOR OSHAWA, ONT.

Oshawa, Ont.—Oshawa is to have a new industry. The Ontario Potteries Company, Limited, which started in a small way in Bowmanville a few months ago, has decided to locate in this town. The company intends to manufacture tableware, a clay found in Bowmanville being used largely for this purpose. The officers are: President, Thomas S. Holgate, Bowmanville; Vice-President and General Manager, Thompson W. Black, Bowmanville. Directors—Thos. F. W. Bassinger, Bowmanville; Thomson D. Dunlop, President Dunlop Coal Co., Toronto; F. A. Elliott, Canadian Manager, International Clay Machinery Co., of Dayton, Ohio, Toronto. The company is capitalized at $300,000.

WESTERN ONTARIO NEWS

H. L. Martinson, hardware merchant at Cottam, Ont., who showed a number of his prize chickens at the Winter Fair in Guelph has a fine exhibit this week at the big annual show in Detroit.

The police at St. Thomes, Ont., this week solved the problem of the mysterious robberies which have been worrying business men recently. The thefts were the work of a gang of boys who claimed they were keeping the merchandise they stole until Christmas when there was to be a distribution made among the poor and needy. Among the places robbed was the hardware store of Geo. A. McMurtry.

The factory employees of the Hobbs Manufacturing Co. at London one day this week took up a collection in aid of a fund that is being raised to provide gifts for the poor children of the city and turned over $26.

Winnipeg.—R. J. Carnelius, Winnipeg, representative of Berry Bros., Inc., has been transferred to southern Illionois.

Catalogues and Booklets

Those interested in any of the catalogues described below can procure a copy of the same by writing direct to these firms. Mention that you noticed this in Hardware and Metal

DOWSWELL CATALOG No. 10

One of the most complete catalogs covering home industry appliances has recently been issued by the Dowswell-Lees & Co., Ltd., of Hamilton, Ont. This book comprises a very fine review of washing machines, wringers and similar products generally. It is illustrated in suitable colors, and the information is presented in an attractive and comprehensive manner.

There are over ninety pages of matter, featuring a wide range of washing machines, in electric, engine driven, water power and hand power styles. Wringers of various designs, and adaptable for use under different circumstances, also attract attention; while collapsible wash benches, folding clothes driers and similar lines are additional laundry accessories. Comprehensive lists of repair parts for these different products complete the Dowswell Catalog No. 10.

Letters to the Editor

PRESIDENT MILLS DEALS WITH CASE OF THE RETAILER

The Editor, Hardware and Metal,
Toronto, Canada.

Dear Sir:

An article appeared in your issue of December 10th, 1921, based on an interview with Mr. J. J. Foote, Sales Manager of McClary Manufacturing Company concerning the Business outlook.

As president of the Ontario Retail Hardware Association I feel it is my duty to comment on one or two points in the interview, which in my opinion might create a wrong impression regarding retail hardware merchants.

I do not know whether Mr. Foote has actual facts at his disposal or not. It is possible that he has run across some merchants who have claimed that business was bad. It is also possible that there were a few retailers who did not have the season's requirements of snow shovels by the 1st November, and that the sun was permitted to clean the snow, resulting in loss of profits and good will because the retailer and jobber did not anticipate his wants earlier. While this may have been the case in a few instances it was not by any means general and hundreds of retailers across Canada had sufficient stock on hand to meet requirements of this kind. There were also very few jobbers who were not in a position to supply goods on short notice. It would therefore seem unfair to class all retailers as being negligent in looking after the needs of the consumer, when only a comparatively small number had not anticipated the requirements of their customers.

Another point in the interview which does not altogether coincide with information which I have on hand, is the assertion that while the manufacturers have reduced their costs, the reductions have not been passed on to the public by the retailer. After reading the article in Hardware and Metal I made it my business to call up most of the hardware stores in Hamilton and asked their present prices on several McClary lines. This is what I found.

No. 52 Imperial Rice Boiler has been reduced in price by the manufacturer during the past twelve months about 20% while the selling price in the retail stores in this district has been reduced 28%.

No. 16 Imperial Lip Saucepan has been reduced by the manufacturer 21% and by the retailer 27%.

No. 40 Imperial Saucepan has been reduced by the manufacturer 21% and by the retailer 28%.

No. 54 Canada Rice boiler has been reduced by the manufacturer 23% and by the retailer 31%.

Mr. Foote states that looking back over the trend of business during the past six to nine months one sees a period in which there has been very little business for manufacturers. It is possible that Mr. Foote is referring to graniteware. While it is true that stocks of graniteware may be low, I think it will be found that stocks of aluminum ware are not so low. This is due in my opinion to the fact that manufacturers of the latter goods have shown how well planned selling campaigns will keep up the interest of retail merchants and the public and will keep a steady flow of business coming in. A demonstration in our own store four weeks ago will prove my claim. Referring again to price reductions on enamelware, I would say that a drop in price of 21% as against an advance of 167% since 1914 is one reason why the retailers are not buying in 1921 for 1922 business.

Information which I have from members of our Association shows that retail hardware men have enjoyed a good year's business and are not complaining. It is true that our stocks are low but we are disposing of a volume on a turnover basis. Retailers today are paying more attention to the question of turn-over and are buying in smaller quantities and are turning their stocks over more frequently.

In my opinion the conditions in retail stores have been greatly misrepresented in the press and in other ways during the past few months. In many cases the actual conditions as they exist in the majority of retail stores, have been greatly misrepresented and misunderstood.

In closing, I would like to state that our Association, under the guidance of Secretary McPherson has spent a great deal of time in getting out a price book which sets a uniform price throughout Ontario. This price is based on a small margin of profit for the retailer. Mr. McPherson is using new, up-to-date price lists each week based on costs as fast as the jobbers change their prices. Our Association has sold over 300 of these books which go a long way to standardize retail prices.

Yours very truly,
Nelson Mills,
President Ontario Hardware Association.

INDIA TO PRODUCE CHEAPEST STEEL

India it is claimed will soon be able to produce the cheapest steel in the world. Iron ore of high quality, fluxes of suitable character, and excellent coking coal occur close together in Bilhar and Orissa. A plant to be erected in India is designed to produce eventually 600,000 to 700,000 tons of pig iron, with steel works and rolling mills capable of producing 450,000 tons of finished steel a year.

"Hardware and Metal Christmas Window Contest"

Christmas Window Contest

EIGHT PRIZES are offered by **Hardware and Metal** for the best window displays of Christmas lines, as arranged for this year's trade by hardware merchants or their retail salesmen.

The contest is open to anyone engaged in the retail hardware business in Canada and the displays will be given a fair and authoritative judgment.

The essential point to keep in mind is that the display will be judged on its effectiveness as a business puller. Many points outlined in past contests of Hardware and Metal as to most effective window trims, should be kept in mind in arranging the contest display. Attractiveness without effectiveness is of little use in a window trim.

Arrange a window which will, literally, draw the passers-by right into your store, then send a photo of it to be entered in the contest.

THE EIGHT CASH PRIZES

Places under 5,000		Places 5,000 and Over	
First prize	$10.00	First prize	$10.00
Second prize	5.00	Second prize	5.00
Third prize	3.00	Third prize	3.00
Fourth prize	2.00	Fourth prize	2.00

Dealers in small communities have just as much chance under this arrangement as those in larger districts. Getting selling ideas into the display is what counts.

The contest closes on Monday, January 2. Photos placed in the mail after that date will not be entered.

All matter must be addressed to The Editor, Hardware and Metal, 143 University Avenue, Toronto, and marked "For Christmas Window Contest."

Don't overlook the prizes and the honor of winning one

"Hardware and Metal Christmas Window Contest"

Your Last Opportunity!

THIS is the final announcement in connection with the **Hardware and Metal Christmas Window Contest.**

For several issues there have been announcements setting forth the advantages to the retail hardware merchant of participating in this contest this year. Much interest has been awakened. A number of entries are already in and time is getting very short for the others which are expected.

Don't forget that Hardware and Metal is expecting a photo of YOUR best Christmas window by January 2 for entry in this contest. The whole hardware trade is anxious to watch the steady improvement in window dressing among the hardware merchants, and by everyone participating the most representative opinion can be formed.

If you want

To Win Honors

in the 1921 contest you should have a photo mailed to The Editor by January 2. It will be acceptable if the photo is in the mail by that date.

Possibly you have been postponing your entry to this contest until after the Christmas rush of trade is over. If so you will now have a breathing spell in which to give some attention to the securing of a photo of that Christmas goods window.

The value of having an entry in this contest lies in it showing you definitely how your window dressing compares with that of other merchants and the judge's report will bring out the strong points of the various entries. Besides this you will be proud to have your name placed before the trade of Canada as a prize winner or runner-up in this important contest.

Don't forget. This is the **final** announcement. Tear out these two pages as a reminder and act on it by **January 2.**

New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

BISSELL'S "LITTLE JEWEL"

The Bissell Carpet Sweeper Co., of Canada, Ltd., Niagara Falls, Ont., have already introduced to the trade another of their line of toy sweepers known as the "Little Jewel." This toy is primarily in the same class as the Little Queen and Little Daisy models. The new Jewel is described as being about 9 inches long, with uniform height and width. It is finished in dark mahogany, varnished, with gold border and lettering. The total weight is about 17 ounces.

SEVEN WRENCHES IN ONE

A new line of Canuck wrenches is being placed on the market by the Canuck Tool Co., of 1103 Temple Building, Toronto. The factory is located at 350 Sorauren Avenue. The title of "seven wrenches in one" is claimed for this product by the makers, because of the fact that they lock almost instantly into any desired position. Interlocking grooves, easy manipulation, and practical usefulness, are included among the many other improved features claimed for the Canuck wrench. This tool is cited as a real accessory to any mechanic's outfit.

VEST POCKET PISTOL

The Pieper Arms Co., of Liege, Belgium, are now marketing a vest-pocket size pistol. It is described as a small but very compact—and if necessary, useful—weapon, measuring only 4½ inches over all. The barrel is a mere two inches long. The magazine will hold five cartridges of .25 calibre. The small proportions of this weapon allow same to be carried either in the belt or the vest pocket.

NEWELL HACK SAW FRAME

Hack saw frames are now being manufactured by the Newell Manufacturing Co., of Prescott, Ont. This is a new line of products being placed on the markets by the above-mentioned firm, in addition to the other items made by the Newell Co., such as curtain rods, bath room fixtures and sundry supplies. A complete line of patterns will shortly be introduced to the trade. The makers state that they are made from extra heavy cold rolled steel, being heavily nickel-plated, and adjustable from 8 to 12 inches. Thus any size saw can be used. The blades are set by means of the screw in the handle.

MUNROE CALCULATOR

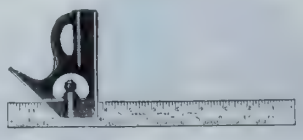
The Munroe Calculating Machine Co., New York City, U.S.A., have placed on the market an additional model to their line of calculating machines. This is classed as the model "K" calculator, and is built in three sizes, 20-place, 16-place, and 12-place. Among the outstanding features claimed for these machines are, the minimum of effort required to operate them, combined with great speed possibilities. Dial clearouts and interlocking devices to prevent errors—according to the manufacturers—all tend to make these machines of practical usefulness in any place where numbers are added or calculations made.

The Munroe Calculator

NEW TRY AND MITRE SQUARE

An improved Try and Mitre Square designer especially for carpenter's use, has been put on the market by The Lufkin Rule Co. of Canada, Ltd., Windsor, Ontario. It consists of a substantial steel blade marked both sides 8ths and 16ths, with figures and lines clear and distinct, fitted with a moveable head which can be securely clamped at any point.

It is a tool of the higher grade in every respect, according to the makers' description, and is accurate, durable and well designed. Primarily a Try and Mitre Square with blade adjustable in length, it serves also because of this adjustable feature as a marking gauge, for measuring mortises; and with head set at extreme end, as a height gauge for woodworkers. The blade can readily be removed and used as a separate rule.



Lufkin Try and Mitre Square

This square is known as Lufkin "Universal" No. 65 and made in the popular lengths—9 and 12 inch blade.

LIGHTNING ADJUSTMENT PIPE WRENCH

The Superior Wrench & Tool Co., of Widmer and Adelaide Streets, Toronto, Ont., announce that arrangements have been recently undertaken whereby they are now equipped to supply all five sizes of these products. The manufacturers were previously engaged in making the small sizes only, but are now prepared to supply sizes ranging from 8 to 24 inches. It is named the "Lightning adjustment" pipe wrench, claim the makers, because of its easy and simple manipulation.

LUGGAGE CARRIER

Richardson & Bureau, 55 St. Francois Xavier Street, Montrea, Quebec, have announced that they are placing on the market an adjustable running board luggage carrier. This carrier is made extra strong and the screws which attach the carrier to the running board are equipped with swivel caps to ensure a firm grip.

SITCO RATCHET WRENCH

The Simplex Iron & Tool Co., Ltd., of 216 Adelaide St., W., Toronto, are producing the Sitco adjustable ratchet wrench. Special features claimed for this product by the manufacturers are that they can be adjusted to almost any angle, thus enabling the operator to get practical use into corners or other difficult places. This ratchet wrench is a tool also designed to find a place in any automobile kit, mechanic's tool chest, or for general workshop and everyday use.

BUTLER'S NEW PEN KNIFE

George Butler & Co., Ltd., of Sheffield and London, England, recently produced a new Penknife de Luxe, which was presented to the Prince of Wales. The George Butler Co., have announced that they are reproducing the same pattern as one of their new seasonable lines, and point to the high workmanship and practical utility of the product. This knife is serpentine in shape, hafted in pearl, and mounted in gold. It can be supplied with or without diamonds, as desired.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

Markets at a Glance

FEATURING the price concessions this week are such products as enameled ware, galvanized ware, granite ware and similar lines.

Another downward revision has occurred in quotations on wrought piping, with a new list now in effect. Many lines of the "Yankee" make of tools are also quoted from 5 to 10 per cent. lower, while fuel oil prices also register a slight decline. New lower prices are noted on certain grades of packing, such as asbestos wick, square braided flax and trade packing. Slight reductions appear on spooled wire, including brass, copper, tinned and annealed. The manufacturers have announced a revision in the discounts on two models of the Nineteen Hundred electric washer, thus slightly lowering quotations. Skate screws have again been reduced in price, while whips of various grades register a decline between 10 and 15 per cent.

Solder quotations again attract attention, further advances on all grades having been recorded in some quarters. The situation regarding roofings remains unchanged, with further developments looked for in the New Year. There is no sign of any immediate revision in the discounts on oil pipe, the range in quotations being still apparent. Some easier prices on range boilers still prevail, with current trade in these products being of a minor character at present. Business in retail circles is reflecting the stimulation of seasonal buying, with the attention of manufacturers and distributors being centred upon inventory work and preparations for the New Year activities.

Montreal Markets

MONTREAL, December 22.—Important price revisions are again announced in the hardware markets, the lowering of many lines of "Yankee" tools, attracting particular attention. Through an increase in the discounts on wood screws, all kinds are now quoted lower. Brass, copper, tinned and annealed spooled wire have been reduced about 10 per cent., also some of the smaller packings, including asbestos wick, square braided flax, and trade packing. Solders again feature the lead products market with another slight increase in quotations. This is the third advance in solders in as many weeks. The undertone of this market continues firm, tin, lead, copper and spelter maintaining their former higher levels on the primary markets.

Another new list, No. 54, has been issued on wrought piping, prices again being revised to a lower basis. Enameled ware, tin ware, granite ware and similar products record a reduction of approximately 20 per cent.

Jobbing houses are now busy with the last minute orders for Christmas wares. The weather unfortunately has not been the best for this trade. However, by the end of the week, it is felt a good year will have been enjoyed. There was a temporary shortage of a few selling lines, but these are now fairly well overcome.

REVISION IN YANKEE TOOLS

Montreal.

A revision is announced in "Yankee" tools, and many lines will now sell from 5 to 10 per cent. lower than formerly.

SOLDER PRICES ARE AGAIN ADVANCED

Montreal

Solder quotations are again slightly advanced this week, this making the third increase in prices in as many weeks. These revisions are necessarily made through the continued strength of metals in primary markets, lead, tin, copper and spelter displaying a very firm tendency in a past number of weeks. A slight cessation of activity in these metals is shown in this week's reports, but this is considered only temporary, as the closing weeks of the year usually bring about a slackening to a degree. The turn of the year may yield further developments, and this will be watched with interest.

Other lead products remain unchanged in price, but the undertone in these also is very firm. It is surprising to some that the continued strength in the market has not developed higher prices in other directions than solders, and revisions to higher levels would not be surprising in the near future, if the firmness continues. Zinc sheets are also unchanged, but here too present quotations are very firm. It is stated that competition is the real factor in the maintenance of prevailing prices. Following are quotations, with the solder revision noted:

LEAD AND ZINC PRODUCTS

Lead pipe, per 100 lbs.	12 50
Lead waste, per 100 lbs.	13 50
Note—Lead pipe is subject to a discount of 10 per cent.	
Lead traps and bends	10% off
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10½
Lead sheets, 3 to 3* lbs., sq. ft., lb.	$ 10¼
Do., 4 to 8 lbs., sq. ft.	0 09½
Cut sheets ¼c lb. extra, and cut sheets to size, ¾c lb. extra.	
Solder, guaranteed, lb.	0 28½
Do., strictly, lb.	0 26½
Do., commercial, lb.	0 23½
Do., wiping, lb.	0 24½
Do., wire, lb.	0 38
Zinc sheets, casks	0 11½
Do., broken lots	0 12

NEW LOWER PRICE ON PACKINGS

Montreal

New lower prices are announced on some of the smaller packings, including asbestos wick, square braided flax and trade packing. Asbestos wick will now sell for 80 cents per pound, square braided flax 60 cents, and trade packing 30 cents a pound.

WOOD SCREWS HAVE NEW DISCOUNTS

Montreal.

A reduction is made in the prices of all kinds of wood screws through increasing the discounts off list prices. The amount of decline varies, but dis-

counts have been increased from 5 to 7½ points. Following are revised quotations;

WOOD SCREWS—	
F. H., bright	82½%
R. H., bright	80 %
O. H., bright	80 %
F. H. brass	77½%
R. H., brass	75 %
O. H., brass	75 %
F. H. bronze	72½%
R. H., bronze	70 %
O. H., bronze	70 %

SLIGHT REDUCTION ON SPOILED WIRE

Montreal

A reduction of approximately 10 per cent has been made in prices of spooled wire, including brass, copper, tinned and annealed wire.

BAR IRON AND STEEL PRICES ON STEADY BASIS

Montreal

The base price of common bar iron remains at $2.90 generally but a quotation slightly less is given in one quarter. Although there would appear to be an easier tendency in the market, distributors state there is little likelihood of a further change in a downward direction this year. The last revision, it is claimed, was made owing to local conditions, without any material change noted at the primary sources. One large local distributor stated to Hardware and Metal that their warehouse was now practically bare, and would remain so until a more active demand was evident in the early months of the New Year. Undoubtedly stocks are in the same position in all parts, and with slight indication of a firmer situation, the buying movement would commence. For this reason the trend for the New Year would seem of a steadier to firmer basis. Prevailing local quotations are as follows:

Common bar iron, 100 lbs.	2 90
Refined iron	4 40
Irish finish machinery steel	2 95
Mild steel	2 90
Single reeled machinery steel	4 75
Band steel	2 90
Spring steel	4 50
Slighshoe steel	2 90
Tire steel	3 10
Toe calk steel	3 80
Harrow tooth steel, per lb.	3 05
Mining tool steel per lb.	0 22
Black Diamond tool and cast steel, per lb.	0 22

NOTE.—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

ROPE STILL DISPLAYS FIRM UNDERTONE

Montreal

A firm undertone continues in the rope markets. Sisal hemp in Southern primary circles is strengthened with slightly higher quotations appearing. Further advances in this material would not be surprising. Manilla is holding fairly firm, and although there is no immediate sign of a revision to higher levels, increased consumption would in all probability produce this result. The local market on sisal and manilla rope is holding steady at present, with bookings showing a slight improvement over last year, but comparatively light with other past seasons. The recent withdrawal of jute rope and packing prices reflects the firm tone in primary markets, and distributors hope an improvement will be forthcoming in the market in general, as a certain unsettled feeling has existed recently with price concessions offered in some quarters on these products.

PIPE FITTINGS REMAIN UNCHANGED

Montreal

There has been a slightly easier tone in pipe fittings, when recently lower prices were given on malleable fittings in some quarters. No further price development is since recorded, and sales are now somewhat quieter owing to the holiday trade attracting attention in other directions. Following are prevailing prices and discounts;

FITTINGS—	
Cast Iron fittings	25%
Bushings, cast	27½%
Do., malleable	25%
Flanges	37%
Plugs	27½%
Flange unions	22½%
Malleable unions	42½%
Dart unions, black	33%
Do., galvanized	13%
Nipples, ⅛ to 4 in, close and short	50%
Do., long	60%
Do., 4½ to 8 in., close and short	40%
Do., long	50%
Couplings, 4 in. and under	30%
Do., 4 in. and longer	10%

POUND GOODS—	Black.	Galv.
Class A	0 53	0 65
Class B	0 21½	0 28¼
Class C	0 14	0 21½

SHEET QUOTATIONS NOMINALLY UNCHANGED

Montreal

There is no marked change in the quotations on sheets in general, although in all cases prices are very nominal. For some time past price levels have varied among the jobbing circles, and from time to time a reduction would be made in some quarter. For this reason it has been necessary to quote a range, especially would this apply to black and galanized sheets. With a variation of from 65 cents to $1.30 on the various weights, the market is very well covered. In the case of tin plate, where lower prices have appeared on certain western markets, local distributors state that while quotations are very nominal, and a concession would be made to secure large orders, prevailing levels are lower on other markets than replacement cost would warrant. Whether local prices will be revised to meet competition is hard to ascertain at present, but it is unlikely that much change will be made until after the first of the year. There is little change in the undertone of the sheet market in general. Business is seasonably quiet and until more activity is shown in the new year, no further price adjustment, at least to any extent, is looked for. Following are local nominal quotations;

BLACK SHEETS

10 gauge	4 00	4 65
12 gauge	4 10	4 75
14 gauge	4 40	4 85
16 gauge	4 50	4 95
18-20 gauge	4 55	5 20

RANGE BOILERS REMAIN AT REVISED LEVELS

Montreal

No further adjustment in range boiler quotations is recorded since the new lower prices were announced. There is still the unsettled feeling among manufacturers and distributors, and the higher prices are maintained in one quarter. The new lower quotations are more generally given, however, and from all sources the 30 gallon boiler can be bought for $8.75. Whether an improvement will develop on entering the new year is hard to determine, but some are of the opinion that the market will remain more or less unsettled until more activity is shown later in the spring months. Following is new list of prices, announced last week;

RANGE BOILERS—	Standard.	Ex. Heavy
30 gallon	$8 75	$11 25
35 gallon	11 25	13 50
40 gallon	13 50	16 00
52 gallon	20 00	24 50
66 gallon	28 00	34 00
82 gallon	35 00	46 50
100 gallon	45 00	55 00
120 gallon	54 00	63 25

CORRUGATED SHEETS ARE NOW QUIET

Montreal

The quiet season has now settled on corrugated sheets. Sales were very favorable until the colder weather this month, when the movement commenced to show a gradual slackening. Little improvement may now be expected until the early spring buying. Quotations remain at unchanged figures, and in this connection, it is thought that little change will take place until the trend of the plain galvanized sheet market is determined in the new year. Following are unchanged list prices and discounts;

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00

ROOFING SITUATION LIKELY TO REMAIN UNCHANGED UNTIL AFTER FIRST OF YEAR

Montreal.

Recent developments in the roofing industry, when a reduction of considerable proportion was made by certain manufacturers, while others are maintaining former levels, are still ruling, with no further change anticipated until after the first of the year. Manufacturers, who announced the decline in prices, are now awaiting the passing of the holiday season, and will again commence their bookings after the close of this month. Other manufacturers now anticipate a revision, but it is unlikely this will be announced until January next. The undertone of the market continues steady to firm, raw materials holding fairly firm.

NO IMMEDIATE SIGN OF REVISION IN SOIL PIPE

Montreal.

Although some controversy exists in other centres in connection with prevailing Montreal quotations on soil pipe, local dealers claim there is no immediate sign of a revision to higher levels. Current prices are undoubtedly lower than exist in Toronto markets, but there appear even chances of the revision appearing from the other end to bring quotations to a uniform level. In any case it would seem that little or no change will be made until the new year. Following are local discounts;

SOIL PIPE—	
2 and 3 inch	47½%
4 inch	50%
5 and 6 inch	47½%
Fittings—	
2 to 6 inch	50-10%

ACTIVE MOVEMENT OF ALUMINUM WARE

Montreal.

The Christmas holiday trade is reflected in the sales of aluminum ware, and during the past two weeks these utensils have been very brisk sellers. There was a price revision on different lines at the begining of the month, and this no doubt assisted in the recent improvement. Other wares are selling fairly well, particularly lines of enamelware used by the housewife at the holiday season. Prices are being generally maintained at present, although there are signs of a revision being made on various lines after the first of the new year.

NEW LOWER LIST ISSUED ON WROUGHT PIPING

Montreal.

Following the recent easier trend noted in the primary wrought piping markets, domestic quotations on both standard buttweld and lapweld pipe are now reduced. A new list, No. 54, has been issued, which shows a varying reduction of between 8 and 10 per cent on the different sizes. The latest quotations are contained in the current market price pages.

REDUCED PRICES ANNOUNCED ON WARE PRODUCTS

Montreal.

A substantial reduction has been announced on enameled ware, tin ware, galvanized ware, and similar products. The decline varies in extent on the different lines, but on staple goods is approximately 20 per cent. The complete new discount sheet is contained elsewhere in this issue.

METAL MARKETS ARE A LITTLE QUIETER

Montreal

The ingot metal markets have been somewhat quieter during the past week although the tone continues firm. Changes in prices have been made, but these are very slight. There will probably be a quiet period until after the turn of the year.

TIN.—After advancing to £174, the London market has receded to some extent, which is only natural in view of the recent sharp advance. Just how far this will extend is not easy to say. In the meantime the local market is quiet but firm at 39 cents.

COPPER.—New York continues strong with no change in quotations, although prompt electro is not very plentiful. The market holds out promise of sustained strength and stocks have been certainly lowered appreciably. London continues dull, and would be weaker were it not for the firm tone on this side. Electric is quoted at 18c., casting at 17¾c.

LEAD.—There is no new feature to this metal which is quietly firm in all markets. Demand is quiet locally, but in London and the U. S. A. there is no surplus of spot lead. Little change is looked for in the near future. Local quotations remain at 7½c.

SPELTER.—The tone of this metal is stronger both in London and East St. Louis, but prices have probably reached the top of this movement. Local market is quiet with prices unchanged at 7½c.

ANTIMONY.—Antimony continues featureless on the market, business being dull with prices unchanged at 7c. for Chinese, and 8c. for high grade English.

ALUMINUM.—This metal continues very dull on the market, and quotations are lowered this week to 26c.

Toronto Markets

TORONTO, Dec. 22.—Featuring the downward price changes this week are such products as enameled ware, tin ware and galvanized ware, these lines showing an approximate reduction of 20 per cent. Another recession has developed in prices on wrought piping and a new list now supersedes the quotations contained in list No. 53. Fuel oil prices also register a decline, this change reflecting a slightly easier tone in crude oil markets. The manufacturers have announced revised discounts on two models of the Nineteen Hundred electric washer. A slight reduction has also been recorded on the "Yankee" line of tools. Lower prices appear on skate screws in cartons, while whips of different styles and grades now register a varying recession of between 10 and 15 per cent.

Business in cold weather lines has recorded an improvement, with retail circles enjoying a fair proportion of seasonable trade. In wholesale centres, activity has subsided slightly, with much attention being given to inventory and planning for the New Year requirements. Many dealers record a noticeable improvement in the sale of cutlery and plated wares, electric goods and winter sport supplies.

NEW LOWER QUOTATION GIVEN ON SKATE SCREWS

Toronto.

Another price decline, effective this week, is announced in quotations on skate screws. The new level is 37½c. per carton, compared with the previous quotation of 46c. The extent of this reduction is approximately 20 per cent.

These skate screws are put up in cartons containing one dozen small packets. There are 24 screws in each package, 16 small and eight large. Each package, therefore, contains sufficient screws for one pair of skates. The oval head screws are supplied in two sizes, ⅜ ins. and ⅝ ins., while the round-head are also made in two sizes, but the difference appears as follows: 7/16 in. and ⅝ ins. The variation between the two is necessitated through the projecting head of the latter style, and the fact that the measurements are taken over all.

WHIPS NOW REGISTER REDUCED QUOTATIONS

Toronto.

Whips are included among the items registering price declines this week. The extent of the reduction on the various grades is approximately ten to fifteen per cent.

SLIGHT REDUCTION RECORDED ON "YANKEE" TOOLS

Toronto.

A reduction of approximately 10 per cent. has been announced on the various makes of "Yankee" tools.

REVISED DISCOUNTS GIVEN ON "1900" WASHERS

Toronto.

The Nineteen Hundred Washer Co., of this city, have announced a reduction in the prices on the "1900" electric washing machines. This revision in quotations particularly applies to the Agitator and Cataract models, and is made effective through changing the discount from 5 per cent. to 12½ per cent.

FUEL OIL QUOTATIONS REGISTER DECLINE

Toronto.

Fuel oil quotations have now been reduced ½c. per gallon. This change is in keeping with the recent easier tendency recorded in primary crude oil markets, although downward price revisions are not generally apparent. While there is still evident a fair volume of foreign inquiry for petroleum and refined products, no sales of consequence are reported. The prevailing price levels at production centres are said to be contrary to the development of extensive purchases. The sharpness of the recent advances in the oil markets has discouraged heavy trading to some extent. Lubricating oils are described as quiet, at present. The volume of gasoline consumption has naturally slackened at this season of the year. Prices on gasoline are maintained at the recent levels, but the firm undertone is no longer evident. Coal oils have failed to register any further improvement. The revised prices on fuel oil are as follows:

FUEL OIL—	Per Gal.
In barrels	$ 0.11.1
In tanks wagons	0.10.1
In tank cars	0.09.1

Above prices net.

STRONGER TONE NOTED IN FIBRE MARKETS

Toronto.

Current rope markets are reported as firming up, a condition which is becoming apparent in practically all phases of the cordage industry. Fibre has been one of the basic elements recording a strengthened tone, this degree of improvement being reflected in manufacturing circles. There has been no change in the nominal domestic quotations, and rope distributors state that no immediate revision is anticipated. The volume of business now prevailing is described as barely normal, with trade in a quiet condition at present. Base prices on rope and cordage are contained in the current market quotation pages.

ACTIVITY LESS MARKED IN SCRAP MATERIALS

Toronto.

The waste material markets are practically unchanged from a week ago as regards prices, but activity is less marked, most divisions having slowed down.

Non-ferrous scrap has been steady, but demand has dropped off a little. Nevertheless there has been a good turnover in copper-bearing metals. Dealers report little change in white metals.

Iron and steel scrap is difficult to sell at this time. Dealers are not press-

Substantial Price Reductions On Enameled Ware Products.

ONE of the most important of current price reductions in the hardware markets is the announcement this week of further downward revisions in prices on enamelled ware, granite ware, tin ware, galvanized ware and many similar lines. The average decrease on staple lines is approximately 20 per cent. The changes vary on the different products, the discounts on some wares recording substantial alterations, while other lines do not register quite such drastic revisions. The actual list remains unchanged, but the discounts have been changed all through on a more or less generous scale. Effective December 22, 1921.

Catalogue on January 3, 1916, June 1918, supplement and September, 1919 supplement. Terms 2-30 or 60 days net, f.o.b. Toronto or freight equalized with Montreal, Hamilton and London.

Prices and discounts are subject to change without notice.

TIN PLATE PRICES AT RECENT NEW LEVELS

Toronto

The recent brisk demand evident in the primary tin plate markets has been responsible for a corresponding increase in the volume of production. Some shading of quotations, however, is again reported from southern mill centres, this development being attributed to independent producers offering concessions in order to obtain a large ratio of business. In the local markets the quotations on coke tin plates are generally being maintained at the revised lower levels recently recorded. The nominal price level on Canada plates, however, is described as being subject to easier quotations on attractive orders, should they appear. Following are the current lists;

PLATES, CANADA—	
Dull 60 sheets	$5 65
Ordinary, 52 sheets	5 60
PLATES, COKE TIN—	
I.C., 20 x 28, 112 shets	13 50

1XX, 20 x 28, 56 sheets	16 00
PLATES, TERNE—	
1C, 14 x 20, 112 sheets	12 00

TROUGH BUSINESS FAIR FOR CURRENT SEASON

Toronto

Although eavestrough and conductor pipe are now entering the quiet period, current business of these products is discribed as very fair considering the present seasonal conditions. The brisk demand apparent during the Fall weeks has naturally subsided, but a number of small orders are still reported, which tend to keep alive interest in these markets. Quotations generally show no further revision since the discount change recorded early in November, but whether price developments will be witnessed in the new year, is stated as depending primarily upon conditions prevailing in the basic markets and the trend of raw materials and freight rates. Following are the nomina. prices and discounts:

TROUGH (Eave)—

O. G. Square Bead and half round. Size in girth:

	Per 100 ft.
8 in.	15 90
10 in.	17 70
12 in.	21 20
15 in.	28 80
18 in.	36 50

Less 70 per cent.

PIPE (Conductor).

Plain, round or corrugated.

	Per 100 ft. in 10 ft. lengths.
2 in., in 10 ft. lengths, list	18 40
3 in. in 10 ft. lengths, list	22 30
4 in. in 10 ft. lengths, list	29 60
5 in. in 10 ft. lengths, list	40 00
6 in. in 10 ft. lengths, list	49 00

Less 70 per cent.

ELBOWS (Conductor)

2 inch, list	5 25
3 inch. list	6 00
4 inch. list	10 50
5 inch, list	24 00
6 inch, list	29 00

Less 60 per cent.

NEW LIST SHOWS REDUCTION IN WROUGHT PIPING

Toronto.

A decline of approximately 8 per cent. has been made in prices on standard steel pipe. The new list, which is number 54, supersedes the previous list, which has been in effect since September 22. Some easier prices on piping were more or less anticipated at the commencement of the New Year, but the revision materialized a little earlier than was generally looked for. The pipe markets as a whole have registered a fair proportion of activity, with the movement slowing up during the present month. At the same time, production of steel piping has been on a fairly steady basis, with the result that some slight price shading developed in independent steel circles. To meet this competition, other producers have announced the new price levels, effective immediately. The domestic markets are now governed by List No. 54.

WROUGHT PIPE

Price List No. 54. December 22, 1921.

Standard Buttweld Pipe S/C

Per 100 feet.

	Steel		Gen. Wrot. Iron	
Size	Blk.	Galv.	Blk.	Galv.
1/8 in.	$ 6 00	$ 8 00	$	$ ....

ONLY MINOR INQUIRIES FOR BOILER TUBES

Toronto.

Prices on boiler tubes continue to remain at unchanged levels, the current volume of inquiry not being sufficient to bring out easier quotations. For some time past it has been thought in certain quarters that lower price levels on boiler tubes would not be surprising, but distributors state that at the existing minor proportion of business activity, the prevailing quotations on these products are well representative of current market costs. A strong demand might produce some future reductions, but no market costs. A strong demand might the present season of the year. Following is the nominal list:

BOILER TUBES—

	Seamless.	Lapweld.
1 inch	26 00	.....
1 1/4 inch	27 25	.....
1 1/2 inch	26 25	.....
1 3/4 inch	29 75	25 00
2 inch	28 00	22 00
2 1/4 inch	32 00	25 00
2 1/2 inch	40 00	27 00
3 inch	44 00	35 00
3 1/2 inch	60 00	40 00
4 inch	75 00	50 25

SEASONAL RECESSION IN DEMAND FOR SHEETS

Toronto.

The recent lowerings in the base quotations on blue annealed, black and galvanized sheets, are stated as resulting from the slackening demand at this season of the year, coupled with certain efforts in southern producing centers to maintain a fair proportion of mill operation in order to distribute production costs. Railroad buying has recently been the strong feature in the sheet markets, but the latter part of December registered a falling off in volume. The steel requirements in many branches of trade are generally expected to revive in the early months of the New Year. Distributors joint out that the usual winter dullness is expected to characterize the market during the next few weeks. Following are the average nominal quotations apparent on current markets;

BLUE ANNEALED—		
10 gauge, base	3 75	4 50
12 gauge	3 80	4 555
14 gauge	3 85	4 60
16 gauge	3 90	4 65
BLACK—		
18—20 gauge	4 30	5 05
22—24 gauge	4 35	5 10
26 gauge	4 40	5 15
28 gauge	4 50	5 25

Charge of from 25c per 100 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—

	Queen's Head	Fleur-de-lis.
28 gauge	8 25	7 75
26 gauge	8 00	7 50
24 gauge	7 60	7 10
22 gauge	7 25	6 75
18 and 20 gauge	7 10	6 60
Premier and Apollo.		
10 3/4 oz.	6 25	7 00
U. S. 28 base	5 85	6 60
U. S. 26	5 55	6 30
22 and 24	5 40	6 15
18 and 20	5 25	6 00
16	5 10	5 85
12 and 14	4 95	5 70

An extra 40c per 100 lbs. is charged for Keystone and Premier brands copper-bearing sheets.

An extra is now charged on galvanized sheets, 10 3-4 oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds.

London Markets

LONDON, December 22.—Wood screws, asbestos irons and sash weights, supply the price developments on the current hardware markets, all revisions being of a downward nature. The revision in discounts on enameled ware, granite war and similar products entails another reduction of around 20 per cent. on the different lines. A new lower list is also announced on wrought piping. Seasonable lines are enjoying a fair volume of sales, but the prevailing trend of business in this district is described as only fair. While orders are numerous, they are light and of small volume, and it takes a large quantity of such purchases to record a brisk movement. Collections are said to be holding up fairly well.

NEW DISCOUNTS ON WOOD SCREWS

London, Ont.

As announced in last week's issue of Hardware and Metal, further reivsions have now been recorded in the discounts on wood screws. This change is in the nature of a decline, and following the the new quotations:

WOOD SCREWS—
Flat head, bright, 82½ per cent. off list.
Oval head, bright, 80 per cent. off list.
Round head, bright, 77½ per cent. off list.
Flat head, brass, 77½ per cent. off list.
Oval head, brass, 75 per cent. off list.
Round head, brass, 75 per cent. off list.
Flat head, bronze, 72½ per cent. off list.
Oval head, bronze, 70 per cent. off list.
Round head, bronze, 70 per cent. off list.

EASIER TENDENCY STILL NOTED IN LINSEED OIL

London, Ont.

Contributory factors in the linseed oil markets record little variation this week. An easier tone, if anything, has developed in flax seed, which coupled with the lack of interest in oil, has resulted in some easier prices on linseed in certain quarters. The local quotations are generally unchanged at the following levels.

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrels, per gal.	0 84	0 87
2 to 5 barrels, per gal.	0 83	0 86
6 to 9 barrels, per gal.	0 81	0 84

Less barrels, add 15 cents gal.

LITTLE INTEREST DISPLAYED IN TURPENTINE

London, Ont.

Only a minor degree of interest has been recorded in turpentine, and both domestic and foreign markets show practically unchanged price levels. The degree of market activity is usually restricted at this season of the year, but quotations remain fairly steady at the following levels:

TURPENTINE—	
1 barrel lots, Imp. gal.	1 20
2 to 4 barrel lots, per Imp. Gal.	1 19
5 gallon lot, per Imp. Gal.	1 35

PUTTY MOVEMENT RECEDES FROM EARLIER ACTIVITY

London, Ont.

Putty sales continue to record a fair seasonal volume, although the movement has noticeably receded from the brisk activity recorded during recent weeks. Quotations are unchanged at the following levels:

PUTTY—	
Standards, 100-lb. drums, per 100 lbs.	6 30
Standard, 25 lbs., per 100 lbs.	6 55
Pure, 100 lb. drums, per 100 lbs.	7 80
Do., 25 lb drums, per 100 lbs.	8 05

REVISED QUOTATIONS GIVEN ON SASH WEIGHTS

London, Ont.

New lower prices are now in effect on both the solid and sectional styles of sash weights. The reduction is in accordance with lower levels which have prevailed on these products in other market circles. Following are the revised quotations:

SASH WEIGHTS—	
Solid, 3 lbs. and heavier, per 100 lbs.	2 50
Sections, 1 lb.	3 25
Sections, ½ lb.	3 75

LOWER PRICES APPEAR ON ASBESTOS IRONS

London, Ont.

Some new quotations recently effective on the sets of asbestos irons, register a decline of approximately 10 per cent. This revision applies to both the following makes:

ASBESTOS IRONS—	
No. 60 Dover, set	$ 2 25
No. 70 Asbestos, set	2 85

REDUCED PRICES ANNOUNCED ON WARE PRODUCTS

London, Ont.

A substantial reduction has been announced on enameled ware, tin ware, galvanized ware, and similar products. The decline varies in extent on the different lines, but on staple goods is approximately 20 per cent. The complete new discount sheets is contained elsewhere in this issue.

GOOD SEASONAL SALE FOR SILVER-PLATED WARE

London, Ont.

There is a good seasonal sale at present for such wares as 1847 Rodgers, and also the Community flat silver-plated lines. The price levels in effect on these products during the fall months remain unchanged.

PRICES ON WROUGHT PIPING AGAIN LOWERED

London, Ont.

Following the recent easier trend noted in the primary wrought piping markets, domestic quotations on both standard buttweld and lapweld pipe are now reduced. A new list, No. 54, has been issued, which shows a varying reduction of between 8 and 10 per cent. on the different sizes. The latest quotations are contained in the current market price pages.

GLASS OVENWARE SALES IN FAIR VOLUME

London, Ont.

A brisk volume of activity is still evident in Pyrex glass ovenware. Sales are seasonably good, with a steady demand being recorded for these products. Quotations remain unchanged at list less 30 per cent.

ELECTRIC GOODS IN FAIR SEASONAL MOVEMENT

London, Ont.

Electric irons, toasters, grills and electric heaters are commodities selling well at the present time. Current quotations on these products are as follows:

ELECTRIC GOODS—
Canadian Beauty Line—Irons, No. 90, $6.75; toasters, No. 210, $7.50; grills, No. 402, $13.50. Less 27½ per cent.
Heaters—Majestic, No. 7, $11 each; No. 8, $16 each. Less 27½ per cent.

BETTER MOVEMENT RECORDED IN ICE SKATES

London, Ont.

Dealers now report a fair movement of ice skates. During the past week, orders have been more numerous. Booking prices continue in effect on the Starr line at list less 30 per cent.

Winnipeg Markets

WINNIPEG, December 22.—Price declines appearing on the current hardware markets include Sieman's Mattin wire rope, cow bells, Kraft wrapping paper, lumbering tools such as peavies and cant hooks, step and extension ladders, Dart unions and rubber belting. Other basic markets covering bar iron and steel, black and galvanized sheets, and wrought iron piping, have registered a slightly unsettled condition, but no price developments have as yet been announced. A downward revision in pipe quotations is looked for in the near future. Current business is of a very steady nature, the influence of holiday trade being apparent in retail circles.

LUMBERING TOOL PRICES REDUCED 20 PER CENT

Winnipeg

A 20 per cent. reduction is announced this week on lumbering tools. Following are a few of the revised prices.

LUMBERING TOOLS—
Peavies—4½ ft., $33.15 per doz.; 5 ft., $33.80; Cant Hooks—4½ ft., $27.95 per doz.
Cant Hook Handles—4 ft., $5.85 per doz.; 4½ ft., $6.50; 5 ft., $7.15; 6½ ft., $7.80.

TURPENTINE REMAINS AT RECENT FIRM LEVEL

Winnipeg.

The price on turpentine has remained firm for some weeks, but a slight reduction is now looked for in certain quarters. The prevailing price is $1.35 per gal. in barrel lots. Less quantity 10 cents per gal. extra. Containers are reduced from 25 cents to 20 cents extra.

RUBBER BELTING FOLLOWS LOWER MARKET TREND

Winnipeg.

Following other products of rubber manufacture, rubber belting is now quoted lower. Western Rubber Belting or equal 6 in. and under is now selling at 58 per cent. off the list.

REVISED DISCOUNTS APPEAR ON DART UNIONS

Winnipeg.

A reduction has been made on Dart Unions. Sizes ¼ to 2 in. are now selling at 18 and 25 per cent. off list and sizes ⅛, 2½ to 4 at 5 and 25 per cent. off.

STEP AND EXTENSION LADDERS NOW HAVE LOWER QUOTATIONS

Winnipeg.

A reduction of approximately 10 per cent. is announced on step and extension ladders. Following are the revised net prices:

LADDERS—(Step)
Common—3 ft., $1.00 each; 4 ft., $1.35; 5 ft., $1.80; 6 ft., $2.05; 7 ft., $2.35; 8 ft., $2.70; 10 ft., $3.85.
Extension Ladders—20 ft., $5.80 each; 24 ft., $6.95; 28 ft., $8.10; 32 ft., $9.25; 36 ft., $11.80; 40 ft., $13.10.

LITTLE VARIATION IN LINSEED OIL MARKETS

Winnipeg.

Quotations on linseed oil have had no change for some time. The present prices are 95 cents per gal. for raw and 98 cents for boiled in barrel lots.

KRAFT WRAPPING PAPER REGISTERS DECLINE

Winnipeg

A reduction of one cent. per pound is announced on Kraft Wrapping Paper, and the selling price is now $11.00 per 100 lbs.

COW BELL PRICES NOW ON LOWER LEVEL

Winnipeg

A reduction in price is announced this week on Holstein cow bells. Following are the latest quotations:

COW BELLS—No. 0, $11.75 per doz.; No. 1, $9.55; No. 2, $7.85; No. 3, $6.10; No. 4, $5.20; No. 5, $4.80; No. 6, $3.90.

DECLINE IN QUOTATIONS ON WIRE ROPE

Winnipeg

A substantial reduction is made this week in the prices of wire rope. Following are the revised prices.

WIRE ROPE—
Siemens Martin—¼", $6 per 100 ft.; 5-16", $6.80; ⅜", $8.60.

REVISED LOWER PRICES ON BUILDERS HARDWARE

Winnipeg

According to a current announcement by the manufacturers, prices on builders hardware now show another reduction. The actual extent of the decline, affecting each particular product, records some variation, but is generally in the neighborhood of 10 per cent. Door locks, knobs, door sets and latches are affected.

Pittsburg Markets

PITTSBURGH, December 20th.—The National Tube Co., (Steel Corporation) issued new price lists dated December 15, increasing discounts on standard steel pipe and O. D. pipe 2½ points, and discounts on line pipe three points, effecting reductions of approximately $5 a ton respectively, oil country goods being also reduced $5 a ton. These lists supplant those of September 16, which also represented reductions, the basing discount on pipe changes from 69½ to 71 per cent. off list.

The steel corporation's action was prompted by continued shading on the part of independents. This shading began shortly after the reduced lists of September 16 were issued, the reduction at that time having also been caused by the shading of independents. The shading gradually spread until it became practically universal among the independents on all their business, but it did not go much deeper. In standard pipe the usual thing was to give customers an extra 5 per cent. discount, beyond the regular trimmings of the leading interest. Frequently the independents give an extra 2½ per cent., and they claim they must do so on account of the consignment method the leading interest follows so largely in marketing its product.

While a strongly competitive condition existed the independents were deterred from cutting prices more deeply because they had 60-day price guarantees outstanding. The reduction now made by the leading interest goes deeper than the shading in the case of standard pipe. In line the reduction is merely in the price at which small lots are sold, for on large lines there is practically always a large concession given by any seller. Recent large line pipe orders have gone at $20 to $25 a ton under list prices, whereas the list prices are now reduced only about $6 a ton.

Prices Almost Stationary

The decline in tubular goods is interesting in itself and interesting in the commentary it gives on the general steel market situation, which has been that of prices remaining practically stationary on account of buying being rather light as a whole, and orders individually being small in size. There has been little incentive to make further cuts in price, even though there is a strongly competitive spirit throughout the trade. Tubular goods constituted an exception to this rule of there being a light demand, hence prices yielded. It is not an unfair assumption that if there had been heavy demand in another line of finished steel products the price would probably have yielded likewise. Experienced market observers have been predicting for several weeks that should a general disposition to buy develop, particularly for forward delivery, fresh declines would occur in the products involved. The declines would not be large, only a very few dollars a ton, as there is not room for declines. Prices in general are approximately at cost of production, with the present operating rate. With a higher operating rate costs would be somewhat lower. In tubular goods it appears there was a fair margin, and with the expectation of a heavier operation in prospect, mills were more ready to make concessions. Pipe mills are now operating at various rates, say from 60 to 80 per cent. of capacity. Taking the rest of the steel industry as a whole, it is hardly operating at an average of 40 per cent.

Steel ingot production reached a maximum, about November 1st, of 25,000,000 tons a year or perhaps a trifle more. The steel corporation and independents were operating at very nearly the same percentages of their respective capacities, say 48 to 50 per cent. Since then independent mill operations have decreased very considerably, while the steel corporation maintains its operations fairly well. For the industry as a whole the rate is probably about 21,000,000 tons a year, against only about 10,000,000 tons a year, at the middle of last July.

Bars, shapes and plates remain quotable in general at a range of $1.50 to $1.60, but the $1.50 price is more generally in evidence than formerly, and $1.60 is rather exceptional. If particularly desirable orders were going, $1.50 would perhaps be shaded on such orders. The sheet market can usually be depended on for developing interesting news. Recently it was the most irregular of all the finished steel markets, there being deep cuts interspersed with attempted advances, some of them successful. Now sheets have gone to the opposite extreme, for the market is firmer than that of any other finished steel product. In fact, it appears that the prices of $3.00 on black sheets and $4.00 on galvanized sheets are now being held with absolute rigidity, no buyer being able to secure even the slightest concession.

Tin plate is easier. The shading done for several weeks by one or two mills has spread until now several of the independents are shading somewhat freely, selling at $4.65 or less when the regular price, maintained by the Steel Corporation, is $4.75.

Pig Iron

Foundry pig iron has been quotable for weeks past at $20.50, valley, the price lately becoming practically nominal as there were no transactions of importance to test by. In the past ten days a few relatively small inquiries have come into the market, and they developed a price of $19.50, at which the market is now quotable. Bessemer remains at $20 and basic at $19, both at valley furnaces. Whether these prices would be shaded on a nice order remains to be seen, the balance of probability being in favor of the buyer.

"Selling the Town" on Value of Paint

How Increased Sales of Varnishes and Enamels Can be Made in the Cold Weather—Demonstrating Value of Varnishing Linoleum and Enamelling Kitchen Furniture—Demonstration on a Large Scale Stimulates Paint Interest Throughout the Town.

GREAT possibilities are offered at this time of year for the sale of varnishes and enamels. Chairs tables, linoleums, bath rooms, automobiles, interior woodwork etc., can be much improved in appearance with the use of some of these products. A little study of ordinary home requirements indicates how much business can be developed from some educational work along the line of developing trade for these products. For instance there are few people realize the advantage of varnishing the linoleum in their homes. With the high price of linoleum, the need for protection against undue wear becomes even greater, and varnish offers splendid protection with a minimum of cost and labor to apply.

In suggesting varnish for this purpose it can be pointed out that varnish preserves the coloring of the linoleum. The pattern will be kept in its original condition for many years longer when protected with a coat of varnish. Worn spots will also be eliminated by this protection and this gives greater life to the floor covering because oftentimes when worn in only two or three places, the appearance of the whole piece is marred.

Easily Cleaned

Another argument is that linoleum is much more easily cleaned when coated with varnish. These two arguments will prove effective when suggested to the housewife because few of them are not of a sufficiently economical turn of mind to reject the purchase of a small tin of varnish which will add greatly to the length of service of expensive linoleum. Also from the standpoint of the labor saving in keeping the floor clean, the housewife will recognize an argument which justifies the buying of this line. The correct application of varnish on linoleum also calls for a certain type of brush and two sales can be made for the one sales talk.

Demonstrations can here again be used to good advantage. A section of linoleum can be shown, part of which is varnished and the other part unvarnished. A table might also be shown which has had a new coat of enamel painted over one half of it. The product in the cans can then be attractively arranged in connection with the display. The contrast which is made serves to remind onlookers that they have dingy looking articles at home which can be brightened up with the use of the specialties shown. The newspaper ads, circulars to mailing list etc., can be used to supplement the energy spent on special displays and so make the whole campaign more productive.

Helps Other Slow Movers

One hardware merchant who has been following out the ideas for specialty sales as outlined in recent issues of Hardware and Metal, has adopted a plan which has proved effective in selling otherwise "slow-moving" lines. This plan is to group a range of such lines on a table located near the door, mark them plainly at bargain prices and then bend every effort toward having every customer who enters the store, look carefully through the lines shown to see if there is anything which they could use to advantage. When properly displayed and priced it is the experience of this merchant that such goods move out with surprising rapidity.

Merchants centrally located in live towns and cities can depend largely upon their windows for attracting interest in such sales of specialty lines, but merchants on the outskirts of such centres and in smaller towns and villages where much of their trade is with people who do not pay such frequent visits to their store, should use ads and mailing lists to best advantage. Invitations can be extended to prospects to visit the store on such and such a day when a demonstration of interest to them will be held. The mailing list should be carefully weeded out and classified so that the maximum result may be secured from such effort.

Demonstrations

Demonstrations are becoming a more and more important feature of the paint selling plans. In this connection it is interesting to note a story related in a recent issue of the American Paint and Oil Dealer showing how a paint salesman who had it put up to him one day by a customer to show how the big potential business which he had pictured could be actually secured, went about achieving this end. This plan may give some selling suggestions to hardware merchants.

"You've been telling us for a long time that we could make money if we pushed paints and varnishes. Show us how and we'll do the pushing," the manager of the company said to Barton.

"Just leave that to me," the latter answered. "'Give me full sway and I'll open your eyes in the course of a week."

That sounded well to the hardware merchant as selling talk, but this firm possessed Missourian characteristics and said, "Show us!"

Barton, given the word to proceed, went to see the painter who did work for the wealthier families of the town. The latter was a good fellow and Barton had little trouble getting acquainted with him. After showing this painter how to obtain some new effects in wall decoration, he was so pleased that when Barton told him of his plans to increase the paint business of the merchant (which incidentally would be to the painter's advantage), he promised to help in any way he could.

Barton had planned on a demonstration as the best method to stimulate paint business. This was not to be the ordinary three or four hour demonstration but one to last five days.

The merchant didn't have a suitable place for holding this, so an empty building on the main street was rented for a week and advertisements were run in the local newspapers. A large part of the paint stock of the company was moved to the store and neatly arranged there, for Barton meant to do some selling on the spot. The company was also fortunate in having in stock panels and sheets of wall board which should be used for demonstrating purposes. A special platform was built where Barton and his friend the painter might work in full view of the crowd, and chairs were placed around the room for the convenience of the audience. All was in readiness for the demonstration and then, oh gosh, the first day it rained.

It was the same on the second day and also the third and the fourth. Scarcely a handful of people had attended the demonstration. The rain kept them away and it began to look as though the whole affair would be a grand fizzle. The merchant was quite discouraged and about to say, "I told you so." Barton himself was somewhat disheartened but kept up a bold front and cheery attitude and said, "If the sun comes out to-morrow, just watch things hum."

Sun Brings the Crowd

Saturday, the last day of the demonstration, dawned fair. The sun came out and with it the crowds. All morning, afternoon and evening the hall was full of people. There they received an education in paints and painting. They were told the difference between good paint and cheap paint, and then were shown the difference. Panels were painted by Barton and the painter right before their eyes. These were then placed around the edges of the room so that they could be closely examined. Panels of wall board were painted, stippled in pattern effects and stenciled, this work proving to be par-

FAIR DEALING

Business Building Material

"Day by day we become more like the thoughts within us."

IN business, as in every other Department of life, Ideals manifest themselves thru our conduct. That is to say, that upon the quality of our Ideals depends the nature of our practices.

The following experience serves to illustrate the natural results of high ideals in our business practices.

We had just submitted our entire proposition to a large firm whose manager, apparently, was skeptical about our ability to fulfill our claims. Happily he thought of an old friend and asked us to wait until he had spoken to him. This one-sided conversation ensued:

"That you, Bill? Alf speaking. Say, Bill, I am thinking of going into the Paint Business and want some advice from you. If *you* were just starting a Paint Department, what line would you stock?" From that time on, all we heard was "Yes . . . Yes . . . Well, why? . . . Is that so? . . . Thanks, Bill—come over and see me some time."

He hung up the receiver and turned to us. "All right, boys, make up a stock order—not too heavy. When a man like Platt says the things he said about Lowe's —*I'm sold.*"

The Brush Department

Ordering for Spring Brush Requirements

Current Volume of Business Described as Brisk With Purchases in Larger Quantity Than Last Year—Reduction in Brush Quotations Prominent Factor in Restoring Buyer's Confidence.

AN interesting phase of the present brush market is the brisk manner in which orders covering Spring brush requirements are reported coming into factories and manufacturer's agents. Wholesale houses are stated as placing extensive commitments with various sources of supply, the result being that activity reigns in brush circles generally. The current volume of business is described as far better than was evident at this time last year, the individual orders not only being slightly more numerous, but the different requirements are in larger quantity.

One of the principal reasons attributed to this movement in the brush industry by a prominent Toronto distributor, was the fact that an active campaign is being initiated to make 1922 the greatest year in the history of the paint industry, and the attainment of such an objective would naturally be reflected in brush consumption. For paint to be properly applied, brushes are absolutely necessary, stated this dealer to Hardware and Metal and the individual public effort to "paint-up" was undoubtedly responsible for increased brush sales. The paint trade is also considered as an active medium for brush requirements on a more extensive scale than ever before, all of which are factors calculated to be of direct interest to the brush department.

Improvement In All Lines

It was further pointed out that the current amount of business in dollars and cents was not expected to reach the former total owing to the reductions evident in brush prices. Some jobbers are stated to have opened new accounts, and the expectations for brisk activity in all phases of the industry is reflected in the volume of trade already recorded. The improvement is not alone confined to paint brushes, the many household lines and brush specialties also proving popular.

The fact that a substantial decline was announced in brush quotations by manufacturers last summer, is described as another stimulant towards the return of the buyers' confidence. Some distributors state that this liquidation occurred at a time when such a step was looked upon as courting disaster in certain quarters, but the anticipations of the producers for bigger spring business justified the extent of the reductions.

Previously, the retailer had adhered strictly to the policy of buying from hand to mouth, a habit which made it very difficult for the wholesaler to correctly estimate the season's brush requirements. The current business is, in turn, also reflected on manufacturers' stocks. The current business is said to be more satisfactory from this viewpoint, a condition which is attributed to prevailing brush quotations being looked upon as settled until well into the Spring of 1922. The better brush displays now evident in retail circles generally, is another fact serving to maintain a brisk market for brush lines of every description.

PRATT AND LAMBERT VETERAN PASSES ON

In June, 1880, over forty-one years ago, at Long Island City, Martin J. Hogan—the oldest employee in point of service—entered the employ of Pratt & Lambert-Inc. being engaged in various capacities. Although retired for a number of years on a service pension, his loyalty and faithfulness prompted him, during the war, to serve as a member of the plant police force at Buffalo. He died Tuesday, Dec. 6th, at his home, after having visited the plant the day previous. The Company flag was lowered half-mast on the day of his funeral, when officials and former associates paid their last respects to the oldest member of the P & L Family.

EXPORTS AND IMPORTS OF PAINTS, ETC., IN OCTOBER

Canada exported to the United States in October, 60,000 lbs. of zinc, oxide, sulphide and lithopone, valued at $143, and other paints to the value of $7,186.

In the same month Canada imported from the U. S. linseed oil to the extent of 1,483 gals. valued at $1,283; $26,706 worth of carbon, bone, lampblack; $22,-779 worth of other dry colors; Red lead 13,141 lbs. valued at $1,230; white lead 42.286 lbs. valued at $3,026.

Ready mixed paints to the extent of 10,910 gals. were imported by Canada from the U. S. in October. This was valued at $19,574; varnish, 2,482 gals. value $3,967; zinc oxide, 392,340 lbs. value $29,539; all other paints value, $81,693.

Canada's imports of naval stores from U. S. in October were:—Resin, 11,789 bbls., value, $60,346; turpentine, 91,-595 gals. value $62,179.

ADVOCATE PAINT-UP TO RELIEVE UNEMPLOYMENT

The principle of advocating Clean-up, Paint-Up and Fix-Up in order to relieve unemployment during the winter months has recently been adopted by the Unemployment Committee of an American city. The Mayor publicly approved of the scheme, and wide publicity is being given to the campaign, not only through the press, but also by means of posters in street cars and other public places. Business Men's associations have arranged to supplement this appeal by short addresses to gatherings in theatres, and similar meetings. The citizens are being asked to provide work along these plans, both individually and through their organizations. The various paint manufacturers and distributors have been firm boosters in the campaign, with excellent support accorded by the retail hardware interests.

SELLING THE TOWN ON VALUE OF PAINTS

(Continued from page 48)

ticularly interesting to the women in the audience. As the men worked, Barton explained everything in terms that could be understood by all. In a few words, the people were given a short course in paintmanship.

It was all new to them. Paints had never been demonstrated to them before. In fact, to most of them, paint was paint and they did not realize that there were many different kinds of paint, that each had its particular use and that there was the same difference in the quality of paints as in things they were more familiar with.

Their interest stimulated, they were moved to action when they saw the results that could be obtained and understood the protective value of paints and varnishes. More than five hundred people watched. Many of them bought—some, little things for touching up the bare spots about their homes; others, enough to paint their entire houses. When the sales for the day were tabulated that evening they amounted to something over $800, not a bad day's work. Besides, several business buildings, a restaurant, furniture store, motion picture theatre and barber shop which later bought wall finishes were really sold on them that day.

The painter, too, felt that his efforts were amply rewarded for he obtained many jobs on the spot. Last of all, it was a victory for Paint and Varnish.

BOECKH TRADE MARK EST^BD 1856 TORONTO

Boeckh's Brush News

Get New Business

It is astonishing how many apparently small lines there are in the hardware store, whose sale could be increased by a little extra effort on the part of the dealer and his clerks.

A case in point is furnished by the sale of brushes, which is neglected by some dealers, but pushed with remarkable success by others. There is not a factory which does not require a number of brushes and brooms, either for sweeping out, or for some of the processes of manufacture. Every butcher shop in the town must use wire brushes for cleaning the tables, and every barber shop consumes a fair quantity of shaving brushes.

In the majority of cases, these requirements are filled by supply houses who send around their travelers to take orders. There is no reason why the local hardware dealer should not capture this business, and there are many reasons why he should, if he goes after it. He will be able to offer just as good prices as the supply houses, and will have the additional argument that trading with him, means keeping the money in circulation at home.

If the hardwareman, or one of his clerks, would form the habit of making a weekly circuit of the mills, factories and stores of his town, soliciting orders, he would soon find his business growing in such supplies as are most frequently in demand and are nearly always carried in stock at the hardware store.

Special mention has been made of brushes, and this is a line in which a good business can be worked up, in the manner suggested. But there are hosts of other articles which might be sold if the business were solicited.

In this way the dealer will become better acquainted, and obtain a standing in the community. Needless to say he would also land business, which he had not in the past even thought of, and the men who give him orders in their business, also think of him first, when placing orders for their household.

The idea is not patented, and it is well worth a fair trial. Though it may be difficult to "get in" at once, it will pay to persevere, and good work will surely be rewarded in time.

Weekly Paint Markets

Montreal

MONTREAL, December 22.—Linseed oil is again reported on a firmer market, after the slight recession of last week when quotations dropped 2 cents per gallon, in sympathy with the easier tone which developed in the flax market. The slump in seed is now well overcome, for the present at least. During the present week the slackening continued in the early part, but stiffened towards the end, and in the past few days an appreciable gain has been made. Quotations while unchanged, are considerably firmer than one week ago.

Little change has developed in the turpentine market, the strength of a number of weeks past still being displayed. Demand for this product locally is very light at present, orders coming to hand still of a small nature, but a slight improvement is noted in this regard in Southern primary markets. Further activity is anticipated there following the New Year, which will likely have a further hand in firming the situation.

Although the season for window glass is practically at a close, distributors are still anxious for an improvement in deliveries, as stocks are exceptionally low on their hands at present, especially in double diamond cuts. The demand has naturally fallen off considerably with the presence of the recent cold weather, but there are still dealer offers awaiting fulfillment. Prices are remaining unchanged, with the higher transportation rates on imports, owing to the close of navigation, tending to firm the market to an extent. The holiday season has caused a slackening in paint and varnish activities, and this temporary lull will continue until after the first of the year. Quotations on all lines are holding with little or no change thought likely.

BETTER TONE AGAIN IN LINSEED OIL

Montreal.

Following the easier tone in the local oil market last week, the tendency is again firmer with the flax market now displaying more strength. For the early part of this week the seed situation continued on the easier trend, but towards the middle of the week a turn was forthcoming and in the past few days an appreciable gain was recovered. It will be remembered that local oil quotations dropped two cents last week in sympathy, and while the same figures are now holding, prices are again firmer. The demand is still of a very quiet nature, and while this may be expected of the dealer trade, it was thought that some activity would be shown among the large buyers at this time, but here too, a waiting attitude seems to rule. With the turn of the year now practically at hand, signs of improvement may develop, in which case a stiffening of oil prices would seem probable. On the other hand, competition, following a more active market would have the opposite effect, according to some well informed with the situation. For the present, quotations are as follows:

LINSEED OIL—

	Raw.	Boiled.
1 to 2 barrel lots, per gal ...	0 81	0 83
3 to 5 barrel lots, per gal ...	0 79	0 81

Less barrels, add 10 cents per gallon.

TURPENTINE FIRM: PRICES HOLD AT ADVANCE

Montreal.

Current quotations on turpentine remain at the advance of last week, namely $1.17 per gallon in one barrel lots. It was noticeable that the advance then recorded was not followed in general, some quarters quoting slightly lower, but prices now are generally ruling at above figures. The continued strength in the market for the past few weeks, shows no sign of subsiding, and a firm tone is still reported in Southern primary circles. The demand there, which has been seasonably dull in past weeks, has looked up a little and this should have a further strengthening effect in the situation. Foreign demand shows a slight slackening, but this is only considered temporary, and an improvement will likely be felt as soon as the holiday season is over.

Locally little interest is shown, and orders that are coming through are almost entirely of a small nature. The future of this product, however, from present indications, is likely to continue firm. With the quiet demand evident for some time past notable strength has been maintained, and the market might possibly further stiffen with increased activity. Prevailing prices are the following:

TURPENTINE—	Imp. gal.
1 barrel lots	$1.17
2 to 4 barrel lots	1 15
Broken lots	1 27

SHELLAC IS ON STEADY TO FIRM BASIS

Montreal.

Shellac prices are nominally unchanged locally, with a steady to firm undertone continuing. In primary circles, gum shellac displays more activity from week to week, this further tending to strengthen the market. Current business locally is at present dull, owing to the holiday season, but a revival of activity is looked for early in the New Year. Following are nominal local quotations:

SHELLAC—	
Orange shellac, in barels	$4 15
Do., in one gal. jugs	4 50
White, in barrels, or 5 gal. jugs	4 66
Do., in one gal. jugs	5 00

STOCKS OF WINDOW GLASS NONE TOO AMPLE

Montreal.

Although the activity in window glass is now of a minor nature, with the season advanced, importers and distributors are far from satisfied with deliveries and stocks on hand. It was thought that before this date the situation would have been clear insofar as a surplus of supplies was concerned. Such, however, is not the case and window glass is even yet none too ample on the local market, particularly in double diamond cuts. The season has been prolonged owing to the open weather up until the middle of the present month, and distributors were a little concerned, all through the season over stocks replacement. Stocks are therefore very light at present with no improvement showing in the arrival of further shipments.

Quotations are, if anything, of a firm tendency, the close of navigation which means higher transportation rates, tending to stiffen current prices. Montreal net list will be found on current market page.

Toronto

TORONTO, December 22.—Current quotations on both linseed oil and turpentine retain the recent nominal levels. Demand for both products is also very light at present, with little variation in primary circles. The close of the year dullness is apparent in turpentine, and domestic interest is described as very indifferent. Some prospects for increased foreign buying, are reported from southern production centres. The most noticeable fact in the current situation is the manner in which prices have been maintained in spite of the apparent apathy of consumers. The firm undertone in turpentine noted during recent weeks, is still in evidence.

Linseed oil requirements are still of a minor character, with large consumers adopting a waiting policy. The flax seed markets are fluctuating, last week recording a depression, and this week a recovery. These movements, how-

(Continued on Page 54)

This is a 5¾" brush of absolutely pure Chinese Bristles. There is absolutely no horse hair used, or other hair of any kind. As can be seen, it is a hard, full, generous brush, suitable in every way to get the best results from Muresco with consequent satisfaction to all concerned.

Muresco

And Its 5¾" Brush

Create a "Homey" Feeling When Applied to Wall or Ceiling

MURESCO, from the merchant's point of view, is a desirable and profitable addition to the store. "Nothing succeeds like success," they say, and certainly the merchants' sales of Muresco have increased wonderfully. Consumers are insistent on having Muresco, and quite naturally. Nothing else gives the artistic, soft, velvety finish of Muresco. Nothing else is so easily applied on so many kinds of surfaces with such invariably satisfactory results.

Yes, it pays merchants well to sell Muresco.

The Moore Line Consists of:

MURESCO: the best wall finish.
HOUSE COLORS: A pure linseed oil paint.
FLOOR PAINT: "Can't be beat for under feet."
TILE-LIKE: Varnish and stain combined.
MOORAMEL: Perfect flowing enamel.
SANI-FLAT: A non-poisonous flat oil paint.

Benjamin Moore & Co.

LIMITED

Paints, Varnishes and Muresco

(Continued from Page 52)

ever are stated as not being sufficient volume to affect linseed oil quotations at present. Demand is described as very slack.

FIRM TONE IN TURPENTINE DESPITE LIGHT DEMAND

Toronto.

Little variation has been noted in turpentine markets, both the primary and domestic distributing circles maintaining unchanged quotations. The firm levels evident during recent weeks is still a prominent feature at production centres, and in spite of the very light demand at present being recorded, the undertone is firm. Local markets are seasonably dull, with the movement of turpentine expected to brighten in the near future. Following are the nominal unchanged price levels:

TURPENTINE—	Imp. gal.
1 barrel lots	$ 1 20
2 to 4 barrel lots	1 19
5 gallon lots	1 35

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $15 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph Windsor, or Montreal but freight may be equalized from any of these points

Car load lots of 70 bbls. Price on application.

Less than 1 barrel lots 15 cents per gallon additional.

LINSEED OIL CONSUMER STILL APATHETIC

Toronto.

While domestic quotations on linseed oil again remain unchanged this week other markets have recorded a slightly firmer undertone to this product during the past few days, without, however, any price developments. Some slight strengthening has been attributed to flax seed recently overcoming the apathy evident in these circles. Seed prices recovered a few points, but the movement is described as of minor proportions only, and has failed to reflect in oil quotations. The current demand for linseed continues to be very quiet, and both domestic and primary markets note a lack of interest by large consumers. It is generally thought that a waiting policy is being adopted, which coupled with the usual slack season, will contribute to easier levels in this commodity. The following are the nominal unchanged levels, but some slightly lower prices are reported in evidence:

LINSEED OIL—	Per Gallon.	
1 to 2 barrel lots	0 84	0 87
3 to 4 barrel lots	0 82	0 86
6 to 9 barrel lots	0 81	0 84

Less barrels, add 15 cents per gallon.

REDUCED PRICES ARE STIMULATING TRADE

(Continued from page 33)

wages, contractors would have been enabled to put in figures on prospective work that would have insured it going ahead. In this way the men would have been money in pocket at the end of the season, would have lost no time at all, and indirectly would have benefited other industries by creating a demand for the materials required. Many of them it is believed are now seeing the mistake that was made and it is expected that next year's building program will be greatly helped by a more reasonable attitude on the part of the men in various trades.

The opinion was general that lower freight rates will also help greatly in getting business back on a normal basis again.

The apprentice problem is so serious at the present time that Vice-President Thomas Preece estimates that at least 40,000 more bricklayers are required all over the country. There is a serious shortage of apprentices in the plumbing and heating business. In the building trades a careful survey showed that 800 contractors have among them only twenty apprentices.

In connection with the building situation for 1922 it was pointed out to Hardware and Metal that all over the Dominion there is an acute shortage of homes. This is especially the case in connection with small houses suitable for workingmen to buy or rent. In many industrial centres such houses are now at a premium. Delegates agreed that there is a big field in this situation for profitable business, and also in home building generally, and inquiries that are being made among the contractors indicate that a large number of people who are tired of paying high rents for homes that are not suited to their requirements are planning to build. The crux of the situation according to several delegates centres around labor, and if the men in the building trades are willing to work for reasonable rates they are confident that 1922 will see all past records for building broken.

TAKE INVENTORY ON CORRECT BASIS

(Continued from page 31)

dozen or 15 years. But that red ink account will then be a fund out of which you can buy new fixtures without any new expense. And it is good business not to guess but to know.

Depreciation may be handled via the expense account, too, provided the man makes new purchases enough in a year to equal the normal depreciation of ten per cent—not otherwise. This plan I suggest is the only one whereon you may seasonably expect to clean up old fixtures, either while doing business or on a wind-up, and get for them as much as or more than the value at which they stand on your books. This prevents false valuations—made to yourself. Yourself is the last man you can afford to fool.

He says he does not believe in or "cannot see" the interest item because no money is paid out. He includes one fourth per cent for that or around $147 equivalent to normal interest on $2000 capital. I think he has more of an investment, so this may be for money really paid. But if "it is a good plan to figure aside on such subjects," it is a better plan to include all such charges. It costs not $400 but at least $700 to use $10,000 today whether the money is yours or another's: so figure it in expenses—it belongs there.

The figure of 6.50% given for salaries in my former article was the low ratio inclusive of proprietors' salaries. Many carry up to 10% nowadays. But allowance was made for such differences because I thus made a total of only 14% while in my general tabulation I stated that 16.66% was the average.

Lastly—I say it short because it should not require to be said long—if you have a shrinkage, face it! I mean face it to yourself. You may find it expedient not to sell on the basis of your inventory values, but don't get the idea that you may sustain no shrinkage because you blind yourself to it. And I may add that it is always doubtful wisdom not to sell on new values.

Freight Not in Expense

But the item of freight, running near to two per cent on sales, does not belong in expense. It is not expense. It is part of the original cost of the merchandise against which you paid it and must be recovered in your cost and selling prices. It is great folly to regard this as expense. If so handled, it may not go against goods and if it is not put there, you stand to lose it. In this case it means around $1100. That sum would make a difference in your showing if you had it—right. Note that expenses are a source of doubt and question because they are naturally indefinite and hard to fix on certain items. But freight is as definite as invoice cost. It belongs directly against the goods.

Some items of accounting may seem of doubtful value to you, but let me say they all arise from some distinct need and fulfil some duty. Use every one of them rigidly in your busniness and you will grow to see their value and to like them.

KNIFE SALES INCREASED 300

(Continued from Page 35)

store slogan. At the foot of all ads, we wind up by stating. 'You always get what you want at Bowers Bros. At the sign of the saw.' Our sign in front of the store is like a huge saw 8 ft. long painted blue color to imitate steel and has a wooden handle of right proportions altogether this saw is about 10 ft. long, handle is stained in a light oak color. Blade is made from galvanized iron, notched out to represent teeth. Our name is painted on both sides and we have it hung over the sidewalk as an electric sign is usually hung."

The advertising of this firm always reflects some tone of current interest. One ad dealing with farm supplies was headed "Farmers came out on top in the Alberta election, Why?" It then goes on to answer the question and subsequently outlines some details of various lines of interest to farmers whose attention has been secured by this heading.

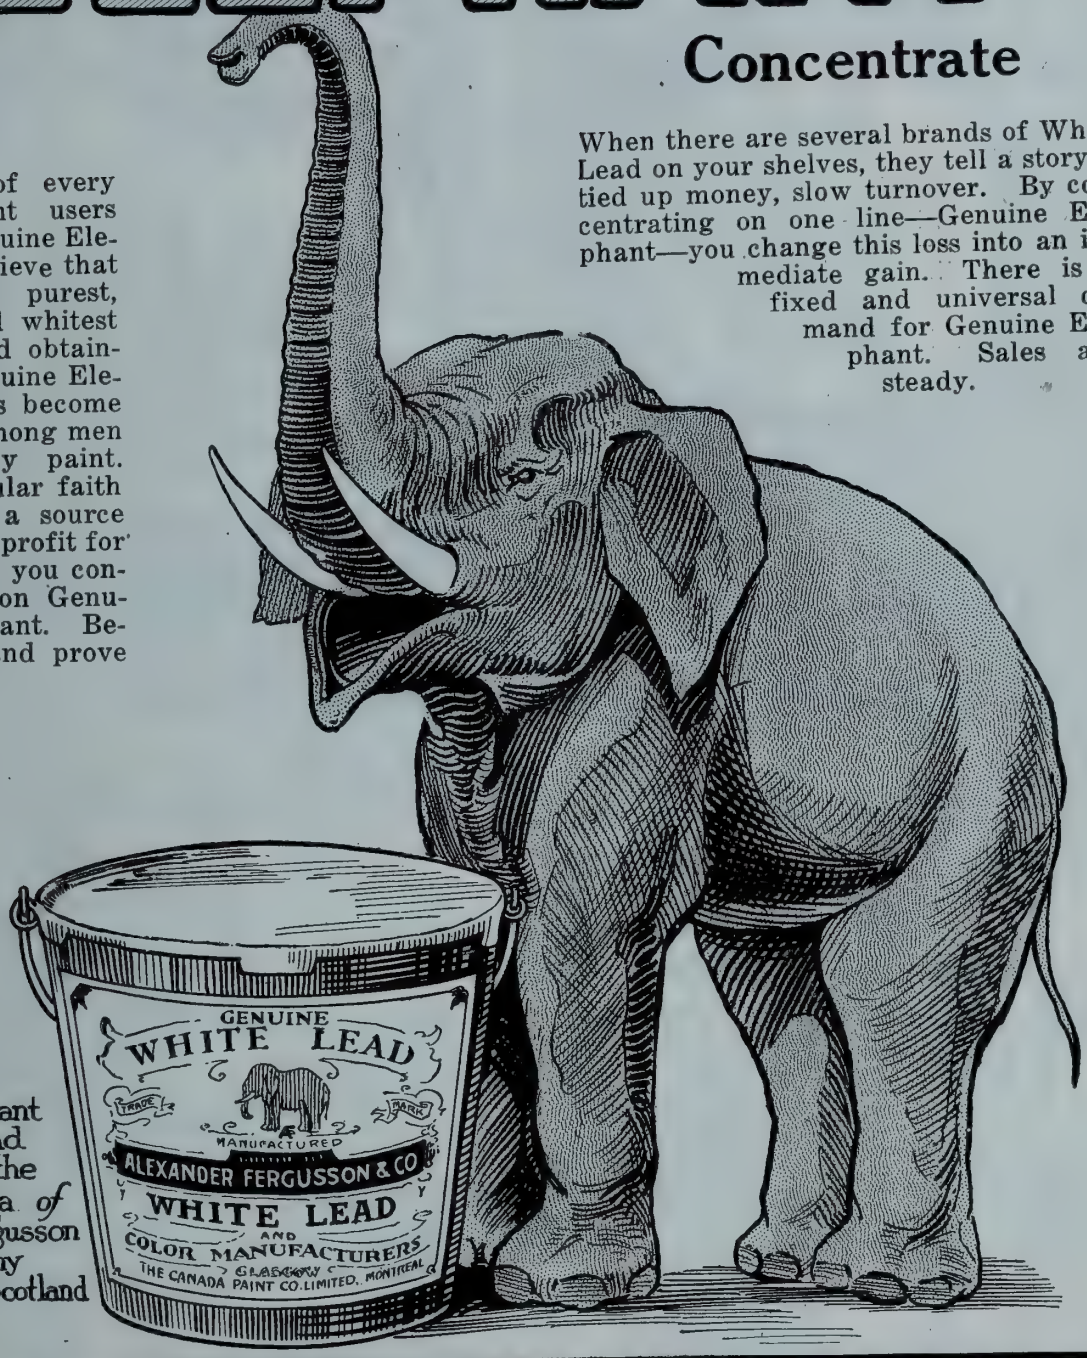
It is by the close study of local requirements which is evident in this review that Bowers Bros. have succeeded in maintaining an important place in the filling of local requirements of hardware.

GENUINE ELEPHANT

Concentrate

Six out of every ten paint users know Genuine Elephant--believe that it is the purest, finest and whitest white lead obtainable. Genuine Elephant has become a faith among men who buy paint. This popular faith develops a source of steady profit for you when you concentrate on Genuine Elephant. Believe it and prove it.

When there are several brands of White Lead on your shelves, they tell a story—tied up money, slow turnover. By concentrating on one line—Genuine Elephant—you change this loss into an immediate gain. There is a fixed and universal demand for Genuine Elephant. Sales are steady.



Genuine Elephant Pure White Lead is made from the original formula of Alexander Fergusson & Company of Glasgow, Scotland

—6 REASONS WHY THE BURROWES PATENTED—

No. 2 BANNER Trade Mark Registered

ASH SIFTER

Is The Best Low Priced Ash Sifter on the Market.

1. Easy rocker motion. Perfect balance. All weight carried by the pressed steel rockers.
2. Eliminates dusty, back-breaking, shaking or lifting.
3. The ashes spread freely in the large sifting tray.
4. The rocking or gravitating motion sifts quickly.
5. Practically dustproof, as all parts are made to fit tight.
6. Its simplicity appeals to all as the common-sense ash sifter.

In three parts—lid, sifting tray and ash can, the can is reinforced to stand the rough usage of the garbage man. Size 12 x 18 x 24 in. high. Packed two together.

Floglaze

The Finish that Endures

"Lac Shades"

(The can with the green and red label)

Stain and Varnish in One Operation

Universal varnish stains are big business getters in the paint department.

Floglaze Lac Shades can be used on floors, woodwork, furniture and wickerware.

Also finishes and refinishes many other surfaces about the home.

Its many uses produce big turnover.

It is a concentrated line of shades that increase paint department profits.

The brilliant finish and enduring qualities of Floglaze "Lac Shades" fixes the quality of the product in customers' minds, producing repeat sales.

Altogether Floglaze Lac Shades are bigger business builders and larger profit producers.

Our dealers' booklet, "A Guide to Larger Profits," gives the wide usefulness of Floglaze Lac Shades and the other six Flog'aze lines. Write for a copy.

LOOKING BACKWARDS

1921 IN YOUR PAINT DEPARTMENT

There is sometimes as much profit in looking backwards as forwards. 1921 is the parent of 1922.

Have you enjoyed the protection of an exclusive agency for paints, varnishes, stains, and enamels?

Have you had the full co-operation of the manufacturers?

Have the manufacturers met your ideas on quality and durability? How have the repeat orders come along? Will your 1921 customers buy from you, and you only, in 1922?

Our Paint Will "Save the Surface and You Save All." Paint & Varnish

And are you buying your paints and varnishes **right?**—at a cost that affords you an adequate return on a selling price that you can popularize? A paint line is only worth what you can make out of it.

Write us for the details of our proposition and make 1922 your biggest paint year yet.

These Viko Window Cards Bring Trade Into Your Store

Every dealer selling VIKO, The Popular Aluminum, should send at once for a set of these attractive, eight-color window cards. They portray the beauty of Viko Ware and lend life to any window display. The Viko cards may also be used as the feature of a counter display. The set of three handsome cards, with folding back supports, will be sent free to all Viko dealers who request it.

VIKO, The Popular Aluminum, is sturdily constructed from thick sheet aluminum which is 99% pure. It gives unusual wear, is finely designed, and beautifully finished. It is a good line for the retailer to handle, not only because it gives consumer satisfaction, but because it contains utensils for every kitchen need and retails profitably at a popular price. For full information—

SERVICE!

A Message of Importance Addressed Particularly to
Dealers in Glass

YOU have many customers who want glass you do not stock, or haven't in stock, and they want it quick! You take their orders, and it is up to you then to make good. Let us share your responsibility, and next time, write, telegraph or phone the orders in to our nearest warehouse and you will get real service—besides our prices are always right.

The resource and experience of men who know their job—an unequalled service and a spirit of cooperation: these are at your disposal.

HOBBS MFG. Company Limited

CARTER'S

Carter's Genuine Dry Red Lead

A pure, uniform and economical paint and preservative for metal work, steam pipes, etc.
Made from the highest grade of Canadian Pig Lead, highly oxidized and very finely ground. Used with pure Linseed Oil, it is very easy to apply and has unusual covering capacity.
Every sale of Carter's Genuine Dry Red Lead assures you a satisfied customer and a good profit.

Ask for price on this and the other Carter lines—Carter's Genuine Dry White Lead, Carter's Genuine Orange Lead and Carter's Litharge.

The Carter White Lead Co. of Canada, Limited, 91 Delorimier Ave., Montreal.

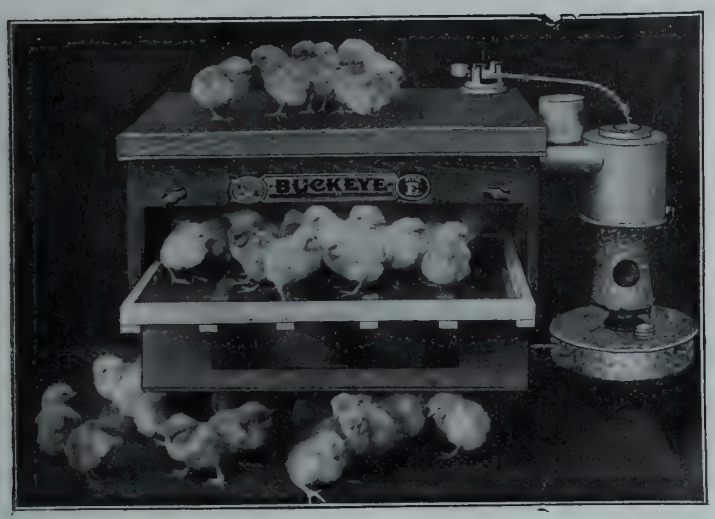
The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND
A
ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada



Buckeye Incubator and Fittings

Their Superiority Evident at a Glance

It will pay you to go after "poultry" business. By keeping Buckeye Incubators in sight, well displayed, and by local advertising, you can keep your store in the minds of your prospects as the place to go for poultry farm equipment.

The chicken-raising man takes in the good points of the Buckeye Incubator and fittings at a glance. Their superiority is self-evident. Proof that their success and great sales are founded on merit is shown by their continued use at Canadian institutions like Mac-Donald College, Ontario Agricultural College and by many Canadian poultry farms.

CURLING STONE

Headquarters

Mac's Special

Specially designed for us to suit our hard, keen ice. The weight is distributed in such a way as to give the running surface sufficient grip to hold whatever turn may be given, without any tendency to rock or roll.

Kay's Excelsior

Manufactured by Andrew Kay & Co., this stone has a world-wide reputation. An absolutely first-class stone that has given satisfaction wherever the game is played.

WINNIPEG, MANITOBA LIMITED

Why has Hardware and Metal Such a Large Western Canada Circulation?

There are many reasons why Hardware and Metal covers Western Canada as thoroughly as the other parts of the Dominion. Some of the outstanding reasons are:—

Hardware and Metal is the *only* hardware paper giving a weekly market service from Winnipeg.

Hardware and Metal is the *only* hardware paper giving a weekly news section for Western Canada.

Hardware and Metal is the *only* hardware publication giving the trade in Western Canada a weekly market service from Montreal, Toronto, London and Pittsburgh — and Westerners are even more interested than any others in the activities in the primary markets of the East.

Hardware and Metal is the *only* publication in Canada giving the Western hardware trade a weekly service covering the activities of the hardware trade in a National way.

Hardware and Metal is the *only* hardware publication giving the Western Canada trade a weekly market service on paints, oils, varnishes, etc.

Hardware and Metal is the *only* hardware publication giving the trade any Western Canada weekly information regarding, "What Other Merchants Are Doing," Legislation, New Hardware Goods, Illustrated Articles on Display, Advertising, Etc.

Hardware and Metal during the twelve months of the year, supplies the Western Canada hardware trade with more market information, more new goods information, publishes more illustrations of window displays, store interiors, and retailers' advertisements than all the other Canadian hardware trade publications combined.

Incidentally, Hardware and Metal is the *only* hardware trade publication in Canada that will supply you with an Audit Bureau of Circulations statement, thus proving what it really has in the way of circulation in Western Canada.

MORAL—*If you are interested in Western Canada trade, advertise in the paper that is read by the Westerners and has gained its present dominating position in the West, as well as in other parts of Canada through 33 years of honest effort to give the trade each week the best in hardware trade newspaper service.*

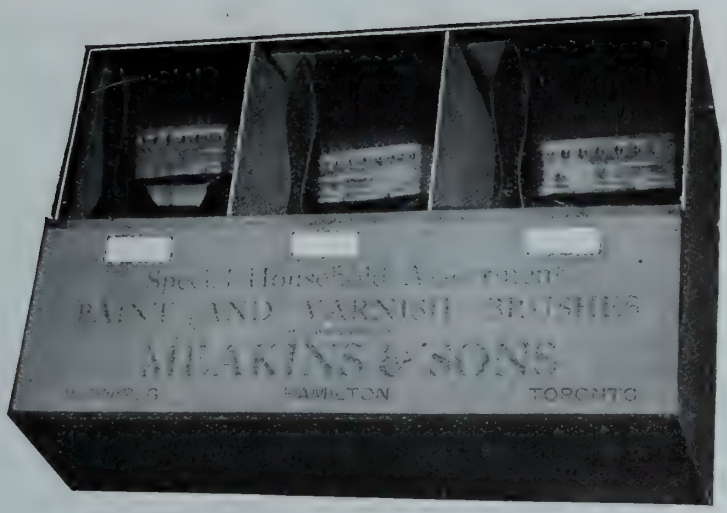
HARDWARE AND METAL

"Canada's National Hardware Weekly"

143 University Avenue, Toronto, Canada

Montreal Branch, Southam Building **Winnipeg Branch, Union Trust Building**

Published every Saturday since 1888. The only weekly hardware paper in Canada and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.



A Useful Sales Helper

This attractive counter display, of Meakins Special Household Assortment of Paint and Varnish Brushes, is illustrated here just to remind you of the definite, practical helps the Meakins organization offers its customers.

We have assortments of Cream Separator Brushes, Specially Boxed Varnish Brushes and Display Cards mounted with flat Varnish Brushes.

Ask about these little "sales-boosters."

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

The "Business Building Four"—

You cannot help but make a hit
With such an "All-Star" show.
The advertising's done its bit
To fill up every row.
The lights are gay. The house each day
Is crowded to the door,
To watch the big performance of the "Business Building Four."

Velvex Stains and Creonoid and Everjet so bright
Perform so well you're bound to sell the house out every night.
And with Everlastic Liquid Roofing Cement on the bill
It's no wonder that the money jams the ticket-seller's till.

So, as the crowds pass in and out you sit in honest pride
And count the crisp new dollars in the ticket booth outside.

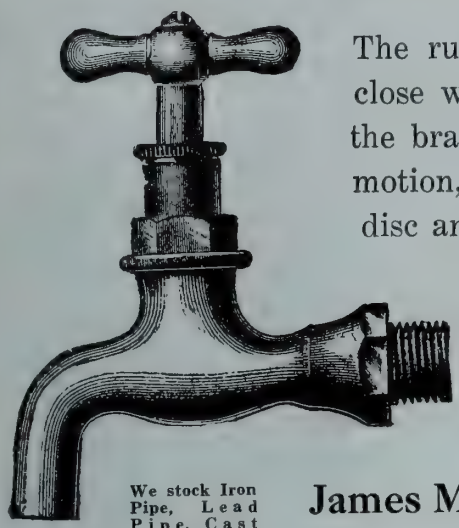
MORRISON

Cushion Disc Compression Work



The rubber cushion enables the valve to close with a minimum compression, while the brass washer takes care of the rotary motion, preventing friction between the disc and seat.

Specify Morrison Cushion Disc Compression Work.

We Stock Brass and Copper Pipe, Iron Pipe Fittings, Brass Pipe Fittings, Pipe Fitters' Tools, Stocks and Dies, Pipe Wrenches, Pipe Cutters, Pipe Vises, Etc., Etc.

We stock Iron Pipe, Lead Pipe, Cast Iron Soil Pipe and Fittings, Brass Tube ⅛" to 10" O. D., Brass Pipe,—Iron Pipe Sizes, Copper Pipe,—Iron Pipe Sizes, Brass Rod — Round and Hexagon, Copper Rod, Sheet Brass, Brass Wire.

James Morrison Brass Mfg. Co., Limited
93-97 Adelaide St. W., Toronto

Pipe Fittings

Cast Iron Fittings stamped with our trade-mark mean fittings made with iron of high tensile strength, proper proportions, and correct tappings.
Our Malleable Fittings are made from Air Furnace Refined Iron reamed and tapped to gauge, with perfect threads.
Also, we carry in stock a complete line of malleable silo lugs, washers, clevises, whiffletree hooks, and link chain and solicit your enquiries for the general run of malleable castings from customers' patterns.

HOYT METALS

PROOF!

Hoyt Metals are used by every shop and factory that prides itself on maximum production. That the sales of Hoyt Metals amount to $10,000,000 annually is convincing proof of the satisfaction in using or selling these efficient metals. Always cool running. Anti-friction quality and unequalled endurance are superior features of these popular metals.

Advice on Your Investments

The FINANCIAL POST will Give it to You

Buy Bonds Now

"—at the end of another year bond prices will be at a higher level than now."
"The comparatively high fixed income that one can buy by investing in bonds to-day is very desirable."
From FINANCIAL POST of November 25, 1921.

Foreign Exchange Gambles

"This offering—(of Russian roubles, Polish marks and Austrian crowns) is in reality one of the wildest gambles that has ever been flaunted before an innocent public. The chances of profit are so remote as to be negligible."
From FINANCIAL POST of December 2, 1921.

High Yield Bonds

Opportunity for profit pointed out in certain high yield industrial bonds that have good possibilities—with a list of such bonds.
In FINANCIAL POST of December 2, 1921.

A Profitable Trade

"Holders of 1937 War Loan bonds should exchange them for 1937 Victory Loan bonds." The reasons why.
From FINANCIAL POST of December 2, 1921.

The Good Preferred Stocks

"Investors may enter the market with a fair degree of assurance that the worst is over and that a gradual appreciation of price may be looked for as current interest rates decline." With a list of the good preferred stocks.
From FINANCIAL POST of December 19, 1921.

Systematic Investment

Methods and merits of investment on the partial payment plan described.
In FINANCIAL POST of December 10, 1921.

The Stock Markets

"The investment markets, discounting future, indicate that turn for better may not be long delayed."
From FINANCIAL POST of December 10, 1921

Sell Short Term Bonds

"Now is the time to sell bonds that mature during the next year or two and re-invest proceeds in long-term bonds at present coupon rates."
From FINANCIAL POST of December 16, 1921.

THE FINANCIAL POST discusses trends and enables the business man to analyze the factors that should influence his buying and selling policies.

It discusses economic factors affecting investments and keeps the investor posted on new developments.

The POST goes further. It gives concrete advice on such points as are outlined above. But no statement is made and no advice given until all influencing considerations have been given sound thought. And while in these and other instances the movements forecasted by THE FINANCIAL POST have already materialized, that is not the important point, for the POST'S real service is in telling of the long swings upward and downward in business or markets—not day to day, or week to week movements.

And then there is the Investors' Inquiries Service. Through it your own personal problems are analyzed and answered and advice is given you as to investments that are offered you.

Make sure of receiving this practical business paper. It will assistyou in keeping your money working profitably and yet safely. Fill in the attached coupon.

Look for the **NORTHLAND** Trade-mark

All Northland Skis bear our trade-mark—the guarantee of A-1 skis made from the finest edge-grained, well-seasoned woods obtainable.

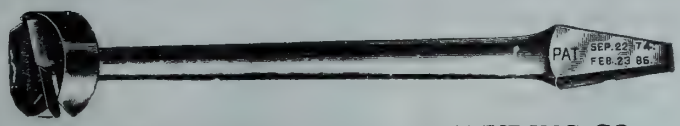
Immediate deliveries from our complete stock.

Send for catalog on Skis, Snowshoes, Toboggans and Accessories.

Northland Ski Manufacturing Co.

Largest Manufacturers of Skis in the World.

23 Merriam Park St. Paul, Minn.



FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.

Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

A PIECE OF TABLEWARE

may be solid silver without the "sterling" stamp, the accepted "Hall Mark" of quality.

But you don't know.

A Bank might be honest and efficient without Government inspection.

But you don't know.

A business concern may be absolutely responsible without a commercial rating.

But you don't know.

A publication may have the circulation it claims without verification by the Audit Bureau of Circulations.

But you don't know.

Better be sure.

The circulation of Hardware and Metal is verified by the A. B. C. Hardware and Metal is the only hardware publication in Canada that will supply an A. B. C. Audit.

WANT ADS

If you want a buyer, clerk, salesman, traveler, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $2.20 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

THE CAPTAIN KNOWS

"Men who go down to the sea in ships" have, since 1824, been using a rope, light, strong, flexible and almost wear-proof, that is made in Plymouth.

Made in the early days to exactly meet the needs of the times, Plymouth Rope today possesses just a little more wear, a little more strength, a little more flexibility than do other ropes.

That is why the ship captains of to-day, like the captains of those famous ships of the first American Merchant Marine, prefer that their ships be equipped with Plymouth.

Your customers will agree with these experts when you furnish them with Plymouth—The Rope You Can Trust.

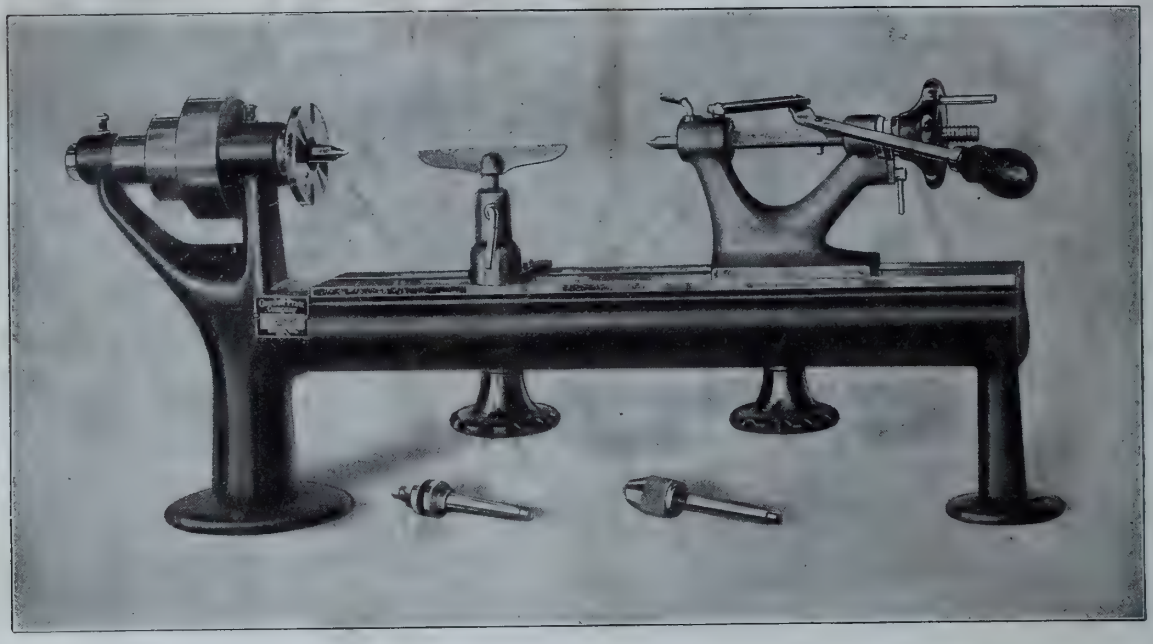
GOODELL-PRATT
1500 GOOD TOOLS



HARDWARE DEALERS
SELL THESE LATHES

This Lathe is a tool that is sold by hardware dealers, because it is designed primarily for the use of amateurs, and experimenters, and not as a piece of production equipment.

Thousands of boys and men like to make things in their own home shops. Hundreds of live hardware dealers are cashing in on this demand.

No Similar Tool At Anywhere Near The Price.

With this Lathe, and the various attachments that we manufacture for use in connection with it, it is possible to do any kind of machine shop operation. Yet the cost is so low that almost any man or boy can afford to buy it.

Steady Stream Of Repeat Orders For Attachments

Once you sell one of these lathes, you are sure of a steady customer for various other attachments and tools for use in connection with it. The retail price of the Lathe as shown above is $36.00. Your margin of profit is liberal.

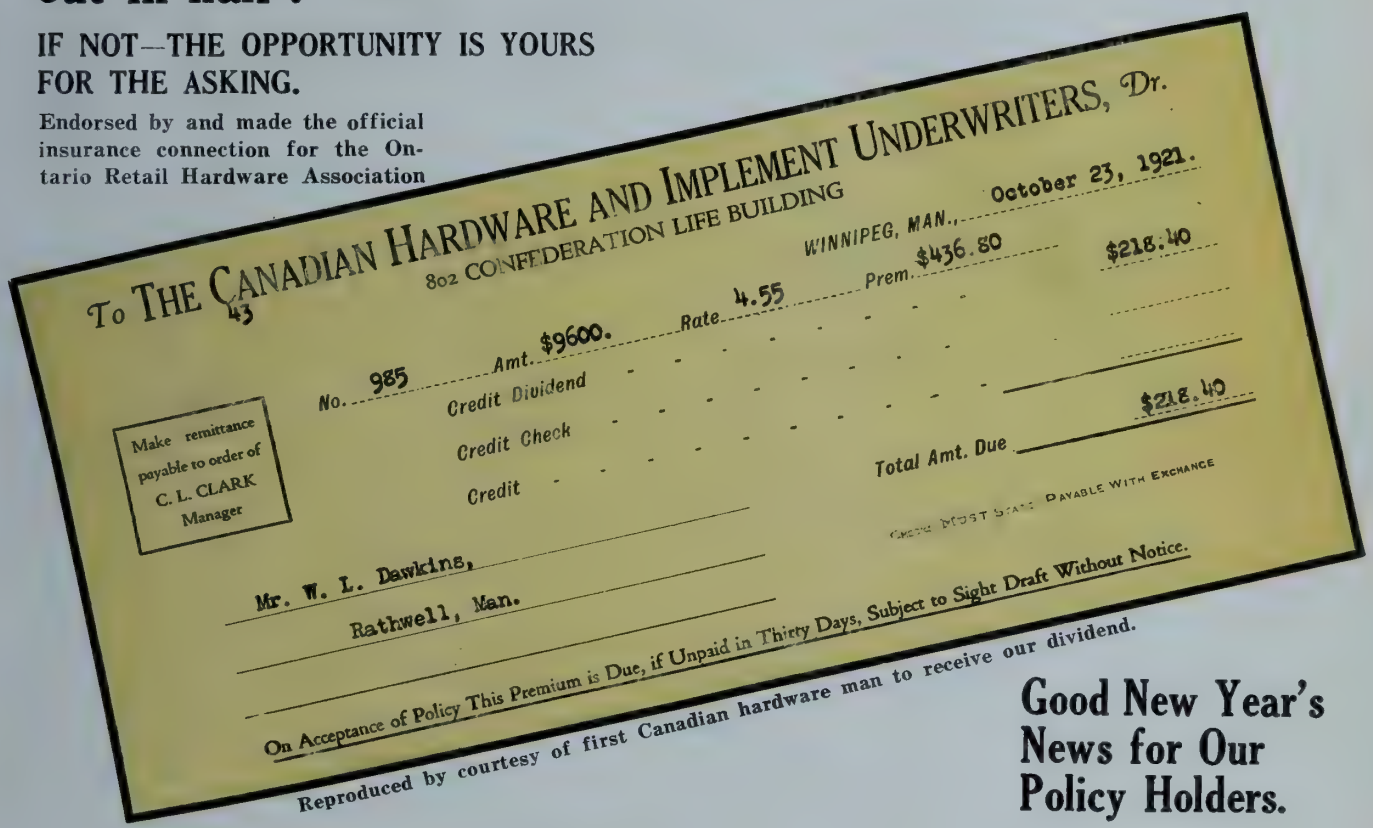
PUBLICATION OFFICE : TORONTO, CANADA

Can YOU show YOUR Fire Insurance Costs cut in half?

IF NOT—THE OPPORTUNITY IS YOURS FOR THE ASKING.

Endorsed by and made the official insurance connection for the Ontario Retail Hardware Association



Reproduced by courtesy of first Canadian hardware man to receive our dividend.

Good New Year's News for Our Policy Holders.

By action of our boards of directors every policy issued by us covering on a hardware and implement risk will be credited with a dividend of 50 per cent. upon its expiration in 1922.

This makes the 15th consecutive year our hardware companies have returned a 50% dividend to the hardware trade.

Still Our Surplus Increases—Now Exceeds $2,000,000 Over all Liabilities.

Why not place **YOUR** fire insurance with us **now?**

"It's No Trouble to Sell Your Tires, Sir"

It is a pleasure to hear one Hardware Man after another say he has no trouble selling "Gutta Percha" Tires. They have such a good reputation for "standing up," that they do not have to do much talking to close a sale. "Gutta Percha" Tires are practically "sold" already to the average motorist.

"Gutta Percha"

(CORD) **Tires** **(FABRIC)**

"Quality all Through"

Hardware Men do not sell one half the tires they might sell, if they would take the trouble to put the tire on, as an act of service to the customer. They help load up a waiting customer's vehicle with other goods as a regular courtesy. It's no more trouble to put on a tire—try it as a new policy.

Will You Write for our Prices and Terms?

Howland's Mail Order Service

Our Mail Order Department has been built up with the idea of giving to all our customers a service that will be found prompt and satisfactory.

It does not take the place of our salesmen---it assists them, it assists you.

We take a distinct pride in keeping it up to the demands made upon it, and always strive to give all orders the most careful attention; to see that they are securely packed, and to ship them with despatch.

If in need of goods, if you have any difficulty, don't hesitate to call on us. Your slightest wish will be given immediate attention.

And if there is any way we can serve you still better--we ask that you tell us when you next order.

"The Trade Mark known in Every Home"

UNIVERSAL
ELECTRIC
Heating Pad

"Universal" Electric Heating Pad
No. E. 9940

Equipped with Safety 3 Heat Cord Switch. Patented 4 Thermostat control maintains heat at any desired temperature.

THOSE afflicted with aches and pains no longer add to their suffering by using the old-fashioned water bottle. Too often it was as cold as an old maid's kiss or hot enough to blister a salamander in an asbestos overcoat.

WINTER ills and doctors' bills are things all people wish to avoid. The "Universal" Electric Pad performs invaluable service in warding off sickness and relieving suffering. The "Universal" is extremely soft and pliable. Above all, it maintains heat at even temperature. When the switch is set at Low, Medium or High, the heat is constant and unvarying.

THE "Universal" has done so much, so well and so long that it holds unchallenged the position it has won. It is made right to make good. It is a money-maker for you. Feature it as a preventive of winter ills, as a pain reliever, as a cozy, snuggly bed-warmer.

Sell Freedom from Ice and Snow

Ice and Snow cannot interfere with the reliable and easy working of Hatch Garage Door Outfits. Show your customers the advantage of being able, in any weather, to enter or leave the garage without delay. Who wants to shovel a lot of snow away to make room for doors to open, or stop to free moving parts from ice and snow?

With Hatch Garage Door Outfits

The doors slide easily out of the way and cannot blow or swing in the wind—and cause an expensive breakage of glass, headlights, windshield, etc.

Canada's total of motor cars still grows. Hardwaremen have assured business for Hatch Garage Door Outfits.

People Need
DECORATIVE BURLAPS
Can You Meet Their Needs?

Just as people need paint, wallpaper, varnish, etc., just to the same extent—sometime more so—do they need Decorative Wall Burlaps. And for the following reasons:

They Make Homes Comfortable.

They Make Walls Attractive.

They are Convenient to Handle; Easy to Apply.

They are of Moderate Cost.

There is a Size to Meet Every Need.

The Best Place to Carry Decorative Wall Burlaps is in the Paint Department.

Buy half a dozen rolls—It won't take much capital—and display them with your regular paint specialties. Get in touch with your local painter and tell him how it will pay him to push this line himself, for each customer will want him to decorate with Burlap when special room color schemes are decided upon.

Rolls 30 and 60 Yds. Long.
Widths 30, 36, 45, 54, 60, 72, 90 inches.
Shades, Oil-Coated Drab, Green, White.

Add this Line to Your Paint Department Now

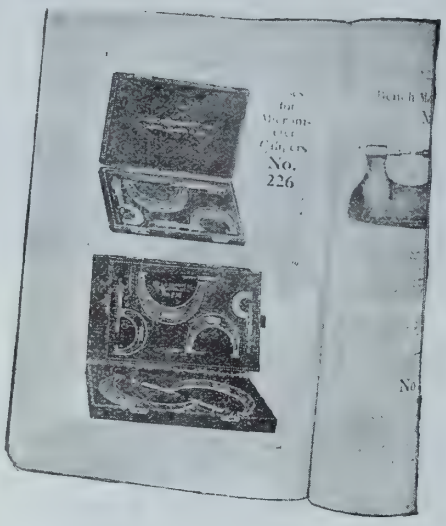
New Tools You Should Know



Micrometer Caliper Set

No. 226 L

Four Starrett Micrometer Calipers reading to ten-thousandths—sizes 1-inch, 2-inch, 3-inch and 4-inch. The sizes included afford sufficient capacity to cover a very wide range of work. Each of the four micrometers in the set is equipped with the Starrett lock nut and ratchet stop. Details of this and other sets of Starrett Micrometer Calipers are given on pages 172 and 173 of the new Starrett Catalog No. 22 "MA." If you have no copy of this catalog at hand, write for one—and also get the Starrett booklet—"The Tools Mechanics Buy."

Sell Starrett Tools

The dealer who stocks files that are accepted as the standard among file users avoids the necessity of active selling efforts.

Such files sell themselves.

File users ask for them, and accept them without question.

This is the experience of dealers who carry one of the following five brands, accepted as the standard of file quality for over fifty years:

Kearney & Foot
Great Western
American
Arcade
Globe

Made in Canada by

Nicholson File Company

Port Hope - - Ontario

NATIONAL

Guaranteed Axes and Tools

We make our own steel in our own vast plant covering 40 acres of ground! During the war we had one of the most extensive, best equipped and successfully operated munition plants in Canada.

We have devoted a year to perfecting the adaptation of this plant to the making of the best Canadian axes and tools. We are now ready to sell these.

Few, if any, axe and tool manufacturers in Canada have our expert tool-making facilities, tempering processes and tests, inspection or shipping facilities. Our special metallurgists and chemists, and our specially constructed forging, tempering and annealing furnaces, and chemical vats, assure you properly tempered tools. Making our own steel relieves us of the many handicaps existing where material has to be obtained in open market.

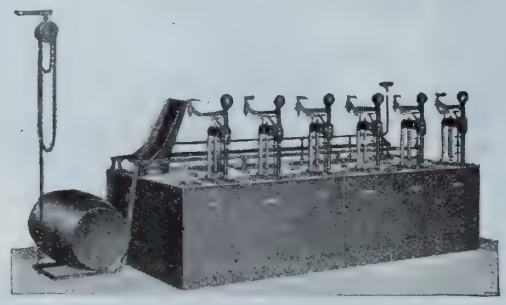
Getting More Profits From Paint Oils

Do you handle paint and lubricating oils in the oil fashioned way—in drums and barrels? If so, you are losing money.

Install a Battery of Bowser Fig. 109 Tanks—one Tank for each oil you handle. Line the Battery up against the wall, neatly and compactly. Get your oils out where customers can see them and you will sell more.

The Bowser Piston-Type Measuring Pumps deliver exactly the amount of oil required directly into the container, eliminating spillage. The evaporation-proof, all-metal construction eliminates leakage and gumming.



Thus Bowser Equipment reduces costs, increases profits and insures against fire.

AYER'S CLIFF, - - QUEBEC

A New Year and New Stock

Business in 1922 is an unknown quantity, although leading prophets predict that this new year will see us "around the corner," the time varying according to geographical location and the kind of industry concerned.

The Business press, generally, advises retailers to clear old stocks. While retail stocks are low, in general, so-called "luxury goods" are still a burden to many hardwaremen. Consumers now consider price in every purchase.

Our advice is to clear your shelves. Begin the New Year with the maximum capital available. Get your 1922 stock at present prices and start fresh with renewed confidence and a better business basis. Let us quote you on your 1922 stock.

Thos. Birkett & Son Co.

Shelf and Heavy Wholesale Hardware
OTTAWA, CANADA

Just a few words about Hardware and Metal

HARDWARE AND METAL is Canada's national hardware weekly and has been published every Saturday since 1888 by the MacLean Publishing Co., Toronto, who publish fifteen papers.

HARDWARE AND METAL'S circulation is national, and has been audited by the Audit Bureau of Circulations.

HARDWARE AND METAL is edited by a staff of editors who have had practical hardware experience.

HARDWARE AND METAL'S weekly market service is one of its strongest features. Our reports are used as a basis for Canadian Government's annual report on wholesale prices.

Write to any 100 retail hardware dealers in Canada, asking them "Do you subscribe to HARDWARE AND METAL?"

If you will do this, you will use HARDWARE AND METAL too, for it is better than any other medium in Canada, gets your proposals home to the men of value to you as sellers of your goods.

IN STOCK AT MONTREAL.

Coal prices are still up, and it pays your customers to stop all the drafts around windows and doors with Frost King Weatherstrip.

Frost King is not "just weatherstrip"; it is an efficient and reliable way to keep out the cold and conserve the warmth of the house. This desirable, quick-selling weatherstrip is made of felt that stops the wind and is extremely durable and neat.

Order from your Jobber

JARDINE TOOLS

In this reliable, dependable machine all the rollers are geared. These powerful rollers are grooved for two thicknesses of iron for bending edgewise. Unless otherwise ordered we supply grooves for 3-8 inch and 1-2 inch iron.

This useful machine will take iron up to six inches wide. It bends up to four inches by one inch, or it will bend wider iron of proportionate thicknesses. It gives service for circles by bending up to one and three-quarters by five-eighths inches edgewise. The top roller is removable. All Jardine Benders have the center roll removable.

We are enabled to offer this machine at an extremely low price, only because we produce them in large volume.

Why has Hardware and Metal Such a Large Western Canada Circulation?

There are many reasons why Hardware and Metal covers Western Canada as thoroughly as the other parts of the Dominion. Some of the outstanding reasons are:—

Hardware and Metal is the *only* hardware paper giving a weekly market service from Winnipeg.

Hardware and Metal is the *only* hardware paper giving a weekly news section for Western Canada.

Hardware and Metal is the *only* hardware publication giving the trade in Western Canada a weekly market service from Montreal, Toronto, London and Pittsburgh — and Westerners are even more interested than any others in the activities in the primary markets of the East.

Hardware and Metal is the *only* publication in Canada giving the Western hardware trade a weekly service covering the activities of the hardware trade in a National way.

Hardware and Metal is the *only* hardware publication giving the Western Canada trade a weekly market service on paints, oils, varnishes, etc.

Hardware and Metal is the *only* hardware publication giving the trade any Western Canada weekly information regarding, "What Other Merchants Are Doing," Legislation, New Hardware Goods, Illustrated Articles on Display, Advertising, Etc.

Hardware and Metal during the twelve months of the year, supplies the Western Canada hardware trade with more market information, more new goods information, publishes more illustrations of window displays, store interiors, and retailers' advertisements than all the other Canadian hardware trade publications combined.

Incidentally, Hardware and Metal is the *only* hardware trade publication in Canada that will supply you with an Audit Bureau of Circulations statement, thus proving what it really has in the way of circulation in Western Canada.

MORAL—*If you are interested in Western Canada trade, advertise in the paper that is read by the Westerners and has gained its present dominating position in the West, as well as in other parts of Canada through 33 years of honest effort to give the trade each week the best in hardware trade newspaper service.*

HARDWARE AND METAL

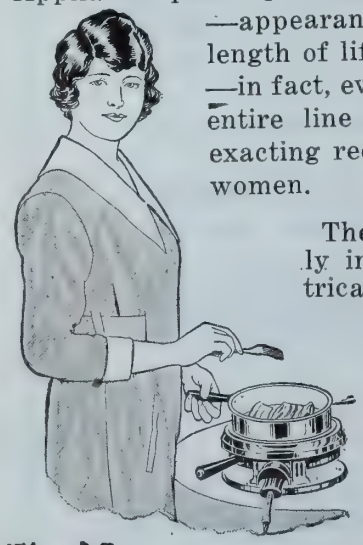
Appliances
That Are Judged By What They Can Do!

WOMEN judge stores most often by the lines that are carried in stock.

And they judge the lines by the satisfaction they give. Stores that carry the New Canadian Beauty Electrical Appliances (irons, toasters, grills, stoves, percolators, etc.) are better patronized—because Canadian Beauty Appliances have been bought by women, tested thoroughly and have given service **absolutely up to their highest expectations.**

The New Canadian Beauty Electrical Appliances please purchasers in every way—appearance, performance, length of life and usefulness—in fact, every article in the entire line meets the most exacting requirements of all women.



The public are keenly interested in electrical appliances. The public realize the immense advantages of the electric iron, the toaster, the grill, the heater, the percolator, etc.

Men and women are beginning to discriminate among the different brands of appliances, **and in this shuffle the Canadian Beauty line has received a very large share of the public preference.**

Have you benefited any? Or are you carrying a less popular line?

As you know, people are no longer buying in a haphazard fashion.

In the New Canadian Beauty Appliances the public get service, durability and smart appearance.

It is a line rich in selling talk—real, truly, honest-to-goodness selling talk. Order from your nearest jobber or write us direct—to-night.

The Great Tug-of-war is in Progress

Forces of Depression And Pessimism Are Pulling Against Sane Optimism, and Opportunity—Everyone is on One Side or The Other—Big Psychological Influence in Present Business Situation—Sound Reasons For Improved Outlook for 1922

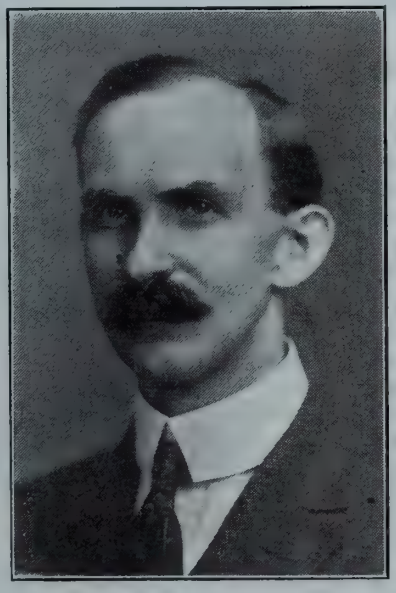
Written for Hardware and Metal by Frederick Moore, Vice-President and General Manager Benjamin Moore & Co., Ltd., Toronto.

WHEN Queen Victoria, at the beginning of her reign over the British Empire, made the following statement, "I will be good," she at once assured for herself a successful reign. Our confidence in ourselves with a full knowledge of our ability and the willingness to commit ourselves to a great task assures us of a measure of success. If ever there was a time in the history of Canada when optimism should be the watchword it is today, yet being optimistic without some definite reason is worse than being pessimistic. While it is true that the money in the Savings Banks and Trust Companies has been somewhat reduced in the last few months, there are still very large sums in the Savings Departments of Banks and Trust Companies. It is also true that there is a good deal of unemployment, particularly in large centres, yet taking it on the whole, conditions in this country are good, therefore there are some grounds for being optimistic but definite action is necessary to bring about the desired result. The good Queen stated that she was going to be good and immediately she set to work to perform good deeds. When we in our optimistic moods make the statement that business is going to be good, it is necessary that we begin to do business. Some of us sit down in our office or in our store and say, "I wish people would limber up and spend some money." A little later a salesman comes along and he says to this individual, "You need a new suit of clothes," or "You need a new automobile," or "You need a new piano," or "Your house needs painting." You sit back and say, "Yes, that is all very true but I do not think it is wise to spend the money at this time. We do not know what is ahead of us." You can see immediately that your optimism is no good because you are not acting the way you would wish others to act.

Do As You Would Have Others Do

Therefore, if business is going to be good the manufacturer and the merchant have to begin to do business. If the manufacturer is contemplating building, let him build, now is the best time to do it. If the merchant is contemplating extending his premises and business, let him do so, now is the time. That is the particular part that we as individuals must play in order to bring about the result we are looking for. When we begin to loosen up ourselves we immediately create a new atmosphere and we try by every means available to interest somebody else in spending money—whether it is necessary repairs or in new buildings, or in new decoration to improve the appearance of your property or your personal appearance. In other words, you say to yourself, "Well, I have spent my money and I am going to see the other fellow does the same thing." Naturally this necessitates your having a stock of goods on hand.

A salesman walks into your store and says, "Good morning, Mr. Jones," and after passing the usual remarks on the result of the election and the weather, he starts talking business. The merchant says, "Well, I do not think I will place my orders just now. Things do not look very good." The salesman says, "But your stock is very low and how can you do business if you do not have a reasonable stock?" and he says, "I know I have not got a good stock but there is not much encouragement for buying a large stock. We do not know what is going to happen and if the business comes in the Spring we can get our orders filled quickly." So after arguments advanced and refuted between the salesman and the merchant the salesman finally goes away with a chicken feed order or perhaps no order at all. He writes to the manufacturer stating the actual condition of things, and the manufacturer says, "We better curtail manufacture until we see how things are opening up, and that means we will have to lay off some men." Immediately you see streaks of blue all across the sky and ruin is inevitable. Many are feeling like this to-day and without fear of contradiction I claim that it is the wrong idea and the wrong principle.



FREDERICK MOORE
Vice-President and General Manager, Benjamin Moore & Co., Ltd., West Toronto, Ont., who in this article deals in an interesting manner with certain phases of the business situation.

The Optimist

Contrast this with an optimistic kind of fellow who believes that things are going to be good and he is going to do his part to make them good. A salesman comes in and says, "How do you do?" "Fine!" After the usual compliments are passed and the weather and result of the election are taken care of, the salesman

gets his order book out and says, "Now et's go through your stock," and the nerchant says, "All right! There is a certain amount of gloom over the country to-day and it is difficult to tell just what is going to take place, but I believe that things are going to be good and I am re-arranging my store and enarging it for greater business. I am going to buy my goods with confidence that I can sell them. I know that when I get them in stock and get them on my shelves they are going to move."

The very fact that this merchant believes that and works towards that end creates an atmosphere that demands attention, and the average man on the street appreciates it and is drawn into it, and as this optimistic merchant touches one man and another there is a willingness to loosen up and do something for the good of the country. The salesman brings back a big order, heartening the manufacturer, who hires more help and goes full steam ahead. The result of employing more men means that more money is going to be spent, and so it goes on from one to another until everybody begins to feel the pulse of business beating faster. That salesman goes out to inspire the next man he meets with the enthusiasm of confidence and better business; the merchant warms up his next door neighbor, perhaps in some other line of business; the manufacturer tells his brother manu-

(Continued on page 44)

Sheet Outlook for First Quarter 1922

"At the present time the production of sheets, black and galvanized, is at a low ebb, not only in Canada but in the United States as well. The practice generally, even in the busiest season, is to discontinue operations during the holidays and for inventory and repair purposes," said A. T. Enlow, President Dominion Sheet Metal Corporation, Hamilton, Ont., to Hardware and Metal.

"Sheets have a habit for coming back strongly and sometimes unexpectedly, but they will naturally have only a corresponding degree of activity in relation to the general prosperity in other lines of business and particularly manufacturing.

"The United States mills stabilized prices in the early fall and did quite a large volume of business and at prices which were an advance over those previously ruling, the same tendency being observed in Canada.

"There has been a reduction in freight rates in Canada but none in United States applying to general commodities and a very vigorous effort is being made in the line of a freight rate reduction there which, if successful, will mean somewhat reduced prices on all iron and steel products.

"The steel industry, which at first was somewhat slow in deflating, has in the end deflated to a very marked extent, second only to that of farm products, and has now reached the stage where any further reduction in prices must be based upon reduction in freight rates.

"Stocks, both galvanized and black sheets, throughout Canada are quite low and it is presumed that buyers will continue the same policy until a definite trend occurs in the market and this will probably develop in the first few weeks of the New Year and until that time 'easy is the word'.

"It will be well to bear in mind, however, that any changes which may occur in prices, either up or down, will be relatively small as compared with the fluctuation during the past two or three years."

"Price Cutting does not Increase Trade"

Sound Foundation Now Being Laid for 1922 Business—Export Trade Connections Improving—New Year Should See Big Readjustment in Many Important Factors—Hardware Retailers Pass On Price Reductions Quicker Than Many Other Trades

"ALL we in Canada now require is confidence in our country and in our manufacturers and trade will certainly improve from now on. It is essential that every merchant realize the necessity of preparing for an improvement," said H. G. Wright, President E. T. Wright Co., Limited, hardware manufacturers, Hamilton, Ont. to Hardware and Metal.

"Stocks are low both in this country and in the United States. Manufacturers are not piling up any great surpluses and unless merchants anticipate their future wants they are going to find a shortage of the goods they require.

"In the past few months there has been some improvement in business conditions. However, the general market is still somewhat spotty, which naturally tends to cause conservatism in buying on the part of the general public.

Sound Foundation Laid

"Nevertheless, a glance at fundamental economic conditions reveals that a sound foundation has been laid. Investment funds for legitimate enterprises are plentiful, and reduction in money rates is discernible. With the advent of the New Year greater progress will have been made toward readjustment of freight rates and other fundamental factors. These favorable factors are creating greater confidence, and plans are being laid for a considerable forward movement early in 1922.

"We also find that Export Trade is improving. We have had very favorable reports from Australia and New Zealand. Money rates are being reduced, the banks are loosening up on credits, and the merchants are preparing to buy more freely in these countries. They have given Canada quite a preference for the foreign trade, and we anticipate a good business from these countries, as well as a great improvement in our domestic market which after all, is our best market.

"We believe that if everyone would endeavor to create confidence in business, it would go a long way toward improving conditions in the near future. We have great fields before us, but must look after the trade closely."

Cutting Prices Doesn't Increase Business

Discussing the business situation with Adam Taylor, sec-treas., Taylor-Forbes Co., Ltd., Guelph, Ont., it was stated to Hardware and Metal that the great problem we have before us at the moment is to get orders as cutting prices does not seem to increase them.

"We have been reducing prices ever since January, 1921, and all lines are down to rock bottom, based on cost of labor and raw material, and some lines are selling at actual cost and below to enable us to meet American competition," said Mr. Taylor.

"Freight rates are high, of course, and it will help some when they are reduced, particularly on heavy material such as pig iron. The freight on a box of hardware distributed over all items does not amount to much.

"We don't know what effect a lower exchange will have. We will be able

to report after such an event happens. We would be only guessing to predict.

"One thing we know is that stocks of general lines are very low. We receive rush orders and the jobber expects us to ship the same day—a thing that is almost impossible where so many lines are manufactured, and to order only.

"Concerning the retailers there are a lot of them that are selling at replacement values and at near cost, but there are a whole lot of them that are not distributing the cuts given by the manufacturer to the jobber and the jobber to the retailer and the retailer to the consumer.

"We are glad to have noted the hardware retailers have distributed lower prices to a greater extent than any other line of the retail trade that we have come in contact with."

Trade Revival Expected

A Montreal hardware merchant, who from publication, in discussing the business outlook for 1922 states that conditions are still unsettled and that any surmise as to the future must be more or less guess work.

"There has been a considerable reduction in prices of all lines both in heavy and shelf hardware but there is still a considerable distance to go before pre-war levels are reached and there is no doubt whatever, that many lines of hardware are still too high in price," he said.

"We fully expect that after the first two months of the new year, there will be a considerable revival in trade. Stocks throughout the country are unusually low, both wholesale and retail, and as soon as buying shows any signs of revival, there will no doubt be some temporary appreciation in values, but this condition can only be temporary as the general trend must be downward until prices become more normal.

"However, in our opinion, any further declines will be very gradual and will not seriously interfere with business conditions."

(Continued on Page 48)

TOOLS FOR PRESENTS SEEM TO BE POPULAR

"Never in the history of the store have we sold so many tools for Christmas presents as we have done this season," said the manager of a Toronto store selling planes and saws, chisels, hammers and other tools.

He would not venture an opinion as to whether the unprecedented rush for gifts of this practical nature had been caused by the high price of building labor, which forces many a householder to do much of the necessary "fixing" round the home with his own hands, or whether it was caused by the greater interest being displayed in handicrafts and technical work.

Clearing out Odd Lines at Inventory Time

Just prior to inventory time every merchant is anxious to move out as large a volume of goods as possible in order to curtail the size of stocks on hand. This plan can also be carried out immediately after the inventory with good results. The annual stock-taking will reveal odds and ends of previous stocks, some of them bought at high prices, which should be put on the bargain counter and moved out as quickly as possible. Everyone is looking for bargains these days and such stocks if attractively arranged and priced should move readily. Note the splendid display features of this store which can be used to advantage for the purpose outlined. Pyramid tables and various types of stands are grouped in the centre where the goods may be handled with ease by customers. Tools and other small lines are also easily accessible on the side counters and prices are plainly shown on all items.

Hardware Merchants Discuss Inventory

Constructive Suggestions Forthcoming From Certain Hardware Merchants to Enable 1922 to be Entered With a Clean Sheet—Pricing Stock On Replacement Values — Reduction This Year Will Lighten the Load For Next Year

THE question of the annual inventory is now uppermost in the minds of most merchants. With the close of the holiday season, attention is directed to business for the ensuing year, and before this can be entered into, the financial standing must be ascertained, found only by the usual period of stock-taking. An effort has been put forth in the past year to reduce stocks to a minimum. It was essential that this be done because of a declining market, and the necessity for preparing for just such a time as will be felt in the opening weeks of the new year. The results obtained in this connection no doubt vary, but it is generally conceded that stocks are reasonably low in practically all cases throughout the country. For this reason, the problem of dealing with inventory this year will not be as great as otherwise. However, there is the question of taking a loss that must be overcome. Just how much must be taken, and can be taken, is the question in a few words.

Entering 1922 With a Clean Sheet

During the past week HARDWARE AND METAL has had the opportunity of learning just what methods will be adopted by a number of retail stores. Some propose taking present day values, or those existing the week of stock-taking, as a basis for all commodities and in so doing 1922 will be entered with a "clean sheet". Speaking of this method, the manager of one of Montreal's largest retail hardware stores stated that in the past twelve months they had closely followed the markets, and had put into effect each and every decline as it was announced by the manufacturers. The inventory taken the first week of January would take into consideration any changes up until that time, and would go no further. Already advices had been received from different manufacturers of a price reduction that would be announced immediately after the turn of the year, and these also would be taken into consideration. To work on an exact date they would use the 10th of the month as the closing day on which to establish existing values.

Replacement costs in the period of the rising market were always taken advantage of, goods on the shelf being immediately marked on the higher basis. By so doing they were now able to follow the reversed trend, and although at times, when stocks of some particular lines were heavy when a revision was announced, it seemed hard to undergo the loss, it was better to forget, and realize that ultimately the gain would be felt. In following this method they could show, without the necessity of inventory figures, that they had made money in the past year.

It was his opinion that most retail merchants could establish present replacement costs in their inventory this season. Whether large or small, the principle was the same, and a stock of $5,000 would show losses in proportion. He was convinced that many merchants believed they could not stand the depreciation, and were upholding values to the last possible moment. In this they were fooling themselves in three ways; first, because they were paying the goverment for paper profits which did not exist; second, they were paying insurance on stock values that was not on the shelves, and the insurance adjusters would soon check this in case of fire; lastly they were losing sales because their competitor is quoting lower prices.

Market For Builders' Supplies Chiefly Watched

A view point rather contradictory to the above, was expressed by another merchant who stated that the average retailer could not afford to use present-day costs in all lines at this inventory period. As far as they were concerned, there were many of the smaller lines of shelf hardware that would be taken at marked values. Other lines of heavier goods, such as nails and other builders' supplies, quoted with a trade discount, would have to be written off at today's replacement figures. Paints and varnishes would also come under this class.

Losses, by the average retailer, he said, must be taken gradual, otherwise the results would be drastic. All during the time of declining values in the past year or so, the selling prices with reasonable profits added to costs, were changed at time of new purchase. The method of buying, during this time, was such that the consumer reaped the benefit within reasonable time of the adjustment, therefore they were not accused of upholding prices. Stock-taking figures would not in many instances show exact replacement costs this year, but the necessary changes would be made in the new year as soon as new goods were bought.

Take as Much Loss as Possible

Most merchants seem to be guided by "we will take as much of the losses as we can possibly stand." When one merchant made this statement and was asked just what he meant, he drew attention to lock sets. These had been bought, not so long ago, at $17.00 per dozen, while today they could be replaced for $6.00. This store enjoys a good trade in builders' hardware and lock sets are bought in far more than dozen lots, thus the question was asked: "Can we reasonably place these on our inventory sheets at $6.00 per dozen?"

Instances of such marked reduction in prices are not common among hardware commmodities. The trend of the markets in general has been gradual during

(Continued on page 31)

Strong Price Arguments in January 7th Issue

After a great deal of research a number of very interesting and helpful articles have been prepared to appear in the January 7 issue of Hardware and Metal. These will show by means of charts and descriptive matter how hardware prices have fluctuated since the pre-war period and just how much deflation has taken place in this industry. The movements of basic materials will also be shown, and hardware price movements will be compared with those of farm produce. This latter chart will give rural hardware merchants some excellent arguments with which to offset the usual complaint of farmers that hardware prices have not declined sufficiently compared with their reduced earnings.

Price is such an important factor in present day merchandising that every merchant should thoroughly understand the relation of prices on his lines with general conditions. You will find this in concise form in the January 7 issue. Watch for it.

How to Price the Current Inventory

Turnover is The Key to Success—Everything That Increased in Price Must Return Over The Same Course, And Merchant Who Hesitates to Make Readjustment is Lost—Stock Returned to Regular Boxes After Christmas Trade

Written for Hardware and Metal by NELSON MILLS, Vice-President Mills Hardware Co., Ltd., Hamilton, Ont., and President Ontario Retail Hardware Association.

DURING the past five years retail hardware men have been puzzled as to the most correct method to taking off inventory. It has been difficult in the past to get a correct inventory because prices were changing so often, but it was generally conceded that inventories were priced at the cost to purchase level. Up to 1920 prices were on the advance but this year we find a change with prices on the decline. This situation should not change your course. It is just as essential that you follow the new purchase level and get back to solid rock as soon as possible.

The key to success is Turnover. Turnover is the one cure for all your ills. It spells profit instead of loss. Turnover will get you back home without a loss. Turnover is like a huge crane. It has two wings. One is purchase power, the other selling power, and when you get these wings into action, sailing is easy.

If you have a high priced stock on hand, take your medicine now and you will feel better later. You will find also that your high priced article will sell out at lower levels, a marketable value so to speak. We must all readjust. Every material thing that went up must come down, so, he who hesitates is lost.

Now to get back to my subject. You will find herein a printed copy of our own inventory sheet. The rulings and headings cover everything we require. It has been changed each year until now we seem to have reached an easy working form. We have discovered that our large retail stock can be counted and put on paper in ten days' time.

Immediately after Xmas we set to work by breaking up all counter and table displays and placing the merchandise back in their regular stock boxes. This method eliminates writing the articles twice or three times as the case may be. It is good housekeeping also. This work is done at leisure between Xmas and the New Year. On January 2nd. we start in earnest. The method used is to count all articles by day and list them by night, working each evening until 10 p. m. As the stock is placed on paper, the forms go to the pricer and from there to extension and addition clerks. This course, with our large number of sheets, takes another ten days, the final total being reached around the 20th of January. You will notice by this method that we operate a price-book instead of costing each article. You will also notice on the form that we have a column for store sell and book sell which needs explanation.

Store sell is the selling price on the article and book sell is the price book price which is costed and priced each week up to the market. This method has to be used to take care of factory trade. Our usual system is to issue a change sheet for new prices which goes to the retail stock, then when inventory is listed, we immediately compare these two columns to see that the retail prices compare exactly with the price-book, which is, at all times, up-to-date. We make a total of each sheet separately and a recapitulation to get our final total. The sheets are filed in a binder and placed in the vault for reference at all times.

A NEW YEAR'S MESSAGE FROM O. R. H. A. PRESIDENT

"It is pleasing in these driving days to pause; to forget the exactions of business; to remember that in the relations of men there is the personal side. Responding to the psychology of this atmosphere, may I extend to our Association members and non-members in this fair Dominion of ours, the Compliments of the Season? It is my further hope that your successes in 1922 may prove to be all that you would have them, and if in any exigencies of the New Year you feel that our counsel or personal services may specially meet your needs, we shall count it a privilege to be permitted to help. Wishing all a happy, peaceful and prosperous New Year."

HARDWARE MERCHANTS DISCUSS

(Continued from Page 30)

the period of deflation. However, there are cases, such as above, where the merchant will be forced to hit a "happy medium".

The retail merchant would appear, then, to have a problem at his inventory period this year that must be dealt with individually. Some dealers it is evident, can stand to take more of their losses at this time than others, but for their own benefit it is suggested that they write off as much as possible at the close of this year, thus enabling them to establish themselves on as firm a footing as possible for 1922. The new year will still hold a declining market, we are not yet to the bottom in some hardware lines, so that doing the utmost this season will lighten the load for the same period in the ensuing year.

Imports of electrical equipment into Canada from the United States in the month of October were as follows:

Batteries $48,884; carbons $23,578; heating and cooking apparatus $27,591; interior wiring supplies (including fixtures) $44,718; meters and measuring instruments $21,718; motors $76,602; switches and other accessories $57,307; telephones $23,972; miscellaneous imports of electrical goods amounted to approximately a quarter million dollars' worth.

The Only Weekly Hardware Paper in Canada

PUBLISHED EVERY SATURDAY SINCE 1888 BY

The MacLean Publishing Company, Limited

Montreal TORONTO Winnipeg

TORONTO, SATURDAY, DECEMBER 31, 1921

THIS IS the fifty-third issue of Hardware and Metal issued during the year 1921. Only the fact that the first day and the last day of this year fall upon a Saturday has made it possible to provide Hardware and Metal readers with the unusual opportunity of receiving fifty-three issues during one year.

Co-operative Retailing

IN MAKING his annual report to shareholders, H. B. Clemes, general manager of the United Farmers' Co-Operative Co. of Ontario, states that it was perhaps an ill advised venture to go into the general store business. The trading loss during the year on the retail stores amounts to $131,000. This official has had some experience with the difficulties of retailers and so he speaks with authority. It should be realized that if any co-operative business is to make a success the same sound business principles must be maintained that are used by successful individuals and joint stock companies. It is impossible to sell goods below cost and make a profit. Competition forces retail prices to a sane level and there is little room for any retail organization which attempts to get business on any other basis.

The Price Argument

WHILE PRICE is generally looked upon as an important factor in present day merchandising, there are some authorities who contend that price should be mentioned last and least in order that the sale of goods shall be on such a basis that there will be a reasonable profit. Recent developments have been of a very indefinite nature in this regard, some retailers holding up price recessions made by other branches of the trade while others are cutting prices to the lowest possible level in an endeavor to stimulate turnover. From the standpoint of economics it is evident that neither course is likely to be very much help in effecting a rapid readjustment of conditions. The first course shakes confidence among buyers and tends to increase the determination to hold off buying of everything, including many necessities. The latter course reminds one of the short-sighted merchant who thought he was doing a big business by constantly keeping his store filled with customers, but who was selling at such a narrow margin that when he came to figure up overhead expenses he found he had been selling at a loss, to say nothing of his waste of energy and time.

Retail experience proves that it is not mere cheapness that builds up any business, in fact with the recent declining market in evidence it has been shown that cutting prices does not necessarily increase trade. Is it not true that the largest shop in every town frequently has a reputation for being slightly dear?

As a general thing it is best to build up business on the basis of the desirability of the goods rather than low price, and every retail hardware merchant should keep this fact in mind in times like the present when the temptation is to offer goods at prices very close to the cost in order to try to stimulate turnover. There should be no slackening off in selling effort but it should be applied to the other phases of the question and not concentrated on price.

Better Tone In Steel

AS THE YEAR draws to a close activity in the iron and steel industry, with one or two exceptions, is being somewhat curtailed, though the outlook for business early in 1922 is said to be good. In the last few days there has been improved activity in pig iron though prices have not been held in such trading and an average of prices shows the lowest quotations experienced since early in 1916 on iron and steel. Operations of the largest U. S. producer in November were up to 52 per cent. capacity, the highest point attained since production turned upward last summer. Incoming business amounted to double the tonnage in November compared with that of October. A review of unfilled tonnage of this producer, which may be taken as fairly accurate indication of the trend of events in the industry, shows that the peak was reached in April, 1917, from which there was a steady decline until May, 1919, when bookings increased, ultimately advancing until in July, 1920, they nearly again reached the peak. Another decline set in which continued until September last, since when considerable increased tonnages are reported.

Outlook For 1922

THE YEAR which is now coming to a close will be one long remembered for the nature of the problems which it presented for the solution of retailers and other business men. These problems have been somewhat unique in many ways and while periods of depression have been passed through on previous occasions by many business men, the problems of the readjustment period were perhaps more acute than those previously experienced, this being due to a combination of circumstances which it was difficult to smooth out due to the general chaotic conditions prevailing throughout the world as a direct result of the great war.

No one will deny that considerable progress has been made in readjustment during 1921 and that there is now a better foundation for progress during the next year than was the case at this time last year. Hardware has declined approximately twenty-five per cent. during the year while some basic materials such as iron and steel have declined about thirty per cent. In most cases these declines have been passed on by retailers in the interests of a larger turnover. The result is that hardware merchants have suffered less from the readjustment than have many other branches of trade.

Stocks in the hands of manufacturers, wholesalers and retailers are now comparatively light. This is as it should be now that the Christmas trade is over and the annual inventory is about to be taken. The latter records should this year give some very helpful data on which the merchant can work during 1922. He will know what lines are moving best and which are the "dead ones," and can guide his buying more intelligently next year as a result. It is probable that declines will continue to be made on some hardware during 1922 and some increases are not unexpected.

News of Western Canada

B.C. Trade Expect Lower Tinplate Prices

Lower Shipping Rates by Water of British Tinplate Will Bring Lower Prices—Some Hardware Stocks Marked Down After Holiday Trade

VANCOUVER, B. C. — Christmas trade for 1921 is a thing of the past as far as wholesale hardware distributors in Vancouver and Victoria are concerned. The volume moved has not been up to the sales of last year though the dealers are not complaining. Varied opinions are given as to the condition of collections. As a general rule, it is believed they are reasonably satisfactory.

During the early fall months orders from the Okanagan were coming in in good volume as it was seen that a tremendous crop would be harvested without serious damage from frost or wind and the crop was being moved with greater speed than ever before. Now, however, the returns are coming in from apples shipped to the Chicago and New York markets. Farmers are very disappointed. The upshot of all this is that while buying has been fairly good, the prospect for extensions and consequent demand upon the hardware houses in the early spring is none too bright.

Travelers from the northen part of the province, in for the holidays and stock-taking say that while their business is fair at present, there are decided evidences of an improvement in the early months of the year.

During the last couple of days of last week and the first of this the coast was visited by a cold snap, the thermometer going to the lowest point on record, 11 degrees above zero, for a December. It had the effect of creating a temporary demand for both electric and iron heaters. Now the weather has moderated and the demand has likewise fallen off.

In the last couple of weeks attention was drawn to the plan of a number of large retailers in offering merchandise with ranges. This week, to stimulate trade, another dealer is offering "a fine big turkey" with every sale of a range, the price of which is not named.

The same firm announces the receipt of a large shipment of toys from an eastern Canadian manufacturer, the lot having been received too late for the regular trade. As these lines are of little use after the holiday and as they involve the tying up of a large amount of capital, they were bought at a sacrifice and are now on sale at wholesale prices or less.

The decision of the court relieving officials of the Britannia Mining and Smelting Co. from responsibility in connection with the Britannia Beach disaster of Oct. 29 has been received with gratification by the wholesale trade as it is believed that the building programme will now be proceeded with.

Rumors are abroad here that lower adjustments on tinplate and manufactures thereof and other lines produced in Britain will be announced shortly after the New Year. Tinplate has heretofore been imported from Pittsburg on a freight all rail rate of $31.70 per ton. The new water rate from the Old Country is $10 per ton and it is on this account, coupled with the saving on American exchange that will permit a reduction. To meet the water competition a rail rate of $20 has been announced but this will still keep the American product out of this market, it is stated.

WESTERN CANADA NOTES

Vancouver, B.C.—At the regular meeting of the Electric Club this week, the main address was delivered by Prof. Mack Eastman of the University of B. C. who spoke on the subject "Electricity and Politics." He showed how electric cables, wireless telephony and other developments of modern science had brought the nations together—and kept them apart. The wonderful power of electricity would be a real factor, he said, in the world's progress and happiness. Edward Walker of the B. C. Electric acted as chairman.

Winnipeg—H. J. Birch of McGregor Birch Co., retail hardware merchants Provost, Alberta, is on a business trip to Winnipeg. Mr. Birch formerly represented Wood-Vallance Co. Ltd., traveling out of Yorkton, Sask., and for the past 3 years has been connected with the hardware firm mentioned above. Mr. Birch, in an interview with Hardware & Metal stated that business was good during 1921 and they are looking forward to an even better business for the coming year. He states that he has over 50% of outstanding debts collected.

Roblin, Man.—Messrs. Swain & Roe have opened a new hardware store here.

Winnipeg—The annual convention of Wood-Vallance Ltd., Winnipeg, will start January 5, 1922.

Winnipeg—Frank J. O'Neill, representing Wood-Vallance Ltd., in the Dauphin district is spending Christmas holidays at Arnprior, Ont.

Winnipeg—S. H. Whyte Mfg. Co. senting Wood-Vallance Ltd., in the Brandon district is spending Christmas holidays at Edmonton, Alberta.

Winnipeg—S. H. Whyte, Mfg. Co. Ltd., hardware brokers, Winnipeg, have been appointed representatives for Western Canada for the Quality Tool Works of Montreal, manufacturers of screw drivers, chisels, punches, nail sets, small tools, etc.

Winnipeg—F. B. Stott, salesman for Wood-Vallance Ltd., Winnipeg, was married to Miss Alice Parker at the Central Congregational Church, Winnipeg, on December 14. Mr. and Mrs. Stott left for Toronto and other Eastern points and on their return will reside in Winnipeg.

Vancouver, B. C.—Wilkie G. Fowler, manager of the Pacific Division of the Gutta Percha Rubber Ltd., on his return this week from attending a meeting in Toronto of all the division managers said that a great load seemed to have been lifted from the minds of business men with the settlement of the Irish question. Mr. Fowler indicated that this ,with the satisfactory progress of the disarmament conference at Washington had had a favorable effect upon business in general. On the question of unemployment he expressed the opinion that in the east those out of work were slowly being absorbed into business and that the situation was becoming less acute.

He did not believe the business depression on he coast had ever been as bad as in the east. He anticipates a decided improvement within a very short time.

INVOICE FEES WOULD EMBARRASS FRENCH TRADE

The proposal made by the Department of Trade and Commerce, to collect invoice fees on imports from countries outside the British Empire as a means of raising revenue, wou'd prejudice Franco-Canadian trade according to a representative Canadian firm in London, England.

Events in the Trade

OBITUARY

The death occurred in Montreal of William Cox, superintendent of the varnish making department, R. C. Jamieson & Co., Ltd., after fifty years' service.

John J. Cunningham, President and General Manager of the Western Foundry Co., of Wingham, Ont., died suddenly at the residence of his sister, in Toronto. The deceased had been prominent in the manufacture of stoves for a number of years.

PERSONAL

Ray Richardson of Toronto is spending a week at his home in Essex, Ont.

Edward Goodwill, vice-president of Thos. Davidson Mfg. Co., Ltd., attended the funeral of John McClary in London, Ontario, this week.

Alex. H. Purdom of the Purdom Hardware Co., London, Ont., is leaving shortly for Denver and intends returning to Chicago in the spring to engage in manufacturing.

Keith Dodds, Watford, Ont., who is leaving shortly for California, was presented with a handsome set of cuff links at a farewell gathering held at the house of P. J. Dodds.

Lt.-Col. Robt. Starke, president Starke-Seybold, Limited, was elected president of the Metal and Hardware Association of the Montreal Board of Trade for the ensuing year.

In the nominations at Glencoe, Ont., this week, A. J. Wright was re-elected by acclamation as a member of the Hydro Commission. At Strathroy, Ont., W. H. Cuddy was nominated for councillor.

Vincent Massey has been elected president of Massey-Harris Co., Ltd., Toronto, succeeding the late Thos. Findley. Jos. N. Shenstone, vice-president, was elected chairman of the Board of Directors.

F. R. Whittall, managing director the A. R. Whittall Can Co., recently elected president of the Export Club of Montreal and district, is attending a meeting of the executive council of the Canadian Manufacturers' Association at their head offices in Toronto this week.

INCORPORATION

Beeby Range Co., Ltd., has been incorporated in Canada with capital of $500,000 and head office in Brockville, Ont., to manufacture and deal in stoves, furnaces and all kinds of heating apparatus. The incorporators are headed by J. H. Beeby, stove manufacturer.

DATE SET FOR KITCHENER ELECTRICAL SHOW

Kitchener, Ont.—The date for the Twin City Electrical Exhibition has been set for the week of May 1 to 6 inclusive. The manager and promoter states that already the idea has taken root among electrical interests of Canada and the United States and much space is said to have already been arranged for.

DOUBLES CAPACITY

Galt, Ont.—The Osborne Hardware on Ainslie street has completed alterations by which the capacity of the store has been doubled by adding the adjoining premises. The Osborne Hardware Store was established two years ago and it was in order to meet the demands of increasing trade that the enlargement was decided upon. The store is now a commodious and well appointed place of business and the stock can be displayed to better advantage than in the former quarters.

C. W. COLLINS

Who, as announced in last week's issue of Hardware and Metal, becomes president and general manager of Collins Never-Fail Products, Ltd., Hamilton, Ont., being an amalgamation of the Collins Mfg. Co., Toronto, and Never-Fail Products, Ltd., Hamilton.

HARDWARE FIRMS AT ST. CATHARINES EXHIBITION

St. Catharines, Ont.—Great interest was displayed in a recent demonstration arranged in this city in the interests of St. Catharines industries. A comprehensive display of products, made locally, caused considerable surprise among visitors and local citizens. Special demonstrations such as cooking were arranged to show the value of certain products. Among the hardware firms represented were, Warren Axe and Tool Co., McKinnon Industries, Ltd., T. F. Shurley, Ltd., Canadian Yale & Towne, Ltd., The Welland Vale Mfg. Co., Fuller Brush Co.

REGISTRATION OF MANUFACTURERS' LIENS

The Public Service Commission of Ontario is considering the advisability of recommending to the Government that it should be made compulsory for manufacturers to register lien notes taken for the purchase price of goods. This would mean among other things that no unregistered lien notes would be good against third parties. It would also mean, of course, that the expense of the registration and of the organization necessary to carry it out would be thrown upon manufacturers. It has also been proposed that in the case of goods against which there are liens the sheriffs should be empowered to sell the goods subject to such liens.

HOLD ANNUAL "AT HOME"

Quebec. — The annual "At Home" of the staff and employees of the Mechanics Supply Co., Limited took place this week at the office of the President, W. H. Wiggs, at five o'clock.

Following the refreshments a presentation of a gold watch, suitably inscribed, was made by the president on behalf of the Directors and Staff, to Walter R. Wilkinson, secretary of the company, with an accompanying testimonial bearing record to his twenty-five years faithful service and the high esteem in which he is held.

Another employee, Omer Carrier, was then presented with a handsome testimonial and gift by Capt. C. W. Wiggs in which reference was made to his long service of over thirty years with the company.

G. H. Simpson, Vice-President of the Company, then presented John Benson who has also been with the firm for over a quarter of a century with a suitable recognition of the same.

WESTERN ONTARIO NEWS

Work is in progress on a new store at Tecumseh, Ont., for Omer Trepanier, hardware merchant.

Thomas Bryan, founder of the Bryan Brush Mfg. Co., who died at London, Ont., recently left an estate valued at $70,000.

A good deal of interest is being taken at London, Ont., in the hardware trade in connection with rumors that Col. Thomas S Hobbs of the Hobbs Hardware Co. may be appointed to the Senate shortly.

The McClary Mfg. Co. was awarded contract for all combination gas and electric stoves required for the household science department of the new $300,000 collegiate institute at London, Ont.

The business of the Sarnia Paper Box Company, Limited, Sarnia, Ont., is to be moved to London, Ont., shortly. E. E. Hale and C. Richardson will be actively identified with the management.

Ray Waddle, who is opening a hardware store in the Roth Block at Tavistock, Ont., has moved from Woodstock and will be ready for business the first of the year.

Work is proceeding steadily on the improvements W. H. Goodhue is making to his hardware store at Ridgetown, Ont., and when completed Mr. Goodhue plans to have one of the most up-to-date stores in the district.

Thomas Dodds of Watford, Ont., who recently sold his hardware business to W. L. McCrae, of Trowbridge, is leaving shortly for California. Mr Dodds has been a resident of Watford for more than fifty years. At a family reunion held on Saturday, twenty-one relatives assembled and extended every wish for Mr. Dodd's prosperity in California.

ELECTRICAL EXHIBITION FOR KITCHENER

Kitchener, Ont.—An electrical exhibition will be opened in Kitchener at the auditorium on South Queen Street in May and will include exhibitors from every part of the North American continent, according to the announcement made by George O. Philip. The affair will be unique in that it will combine the idea of the power of Niagara Falls as applied to everything in the line of an electric device from the smallest to the largest. Preparations are at present under way on a large scale, headquarters having been secured by Mr. Philip in the Walper Block and other details of the preliminary arrangements for the affair being completed. The endorsation of Sir Adam Beck, who in all probability will open the exhibition, has been secured as well as the endorsation of the local Light Commission, the Waterloo Light Commission and the National Association of Electrical Contractors and Dealers. Other endorsations are being received.

TRAVELERS ASS'N. HOLDS ANNUAL BANQUET

Over 600 members were present at the second annual banquet of the Commercial Travelers Association of Canada, which was held in the King Edward Hotel, Toronto, on Wednesday night. Neither the flow of oratory from the ten speakers on the program, the cuisine, nor the musical part of the program left anything to be desired in the minds of those present.

Telegrams regretting their inability to be present were received by the President from Right Hon. David Lloyd George, Right Hon. A. J. Balfour, Lord Riddell, Sir George Foster, Hon. N. W. Rowell, Hon. W. S Fielding, Hon. E. C. Drury, Baron Shaughnessy, Mayor Coppley of Hamilton, and from Hon. Adam Brown of Hamilton, now in his 95th year, and the senior member of the Travelers' Brotherhood.

There is only one thing in trade and commerce that stands above all others. Honesty is above all," said his Honor, the Lieut-Governor, in a brief address, when replying to the toast "Our Guests."

GEORGE MAY, WORSHIPFUL MASTER TEMPLE LODGE, A. F. & A. M.

George E. May, head of May Brothers Hardware, West Toronto, and Vice-President Ontario Retail Hardware Association, who was installed as Worshipful Master of Temple Lodge A F. & A. M. No. 525, G.R.C., at the installation and investiture ceremonies this week.

COLD WEATHER LINES MOVING RAPIDLY

London, Ont.—The tendency on the part of the buying public to purchase really useful and practicable articles for Christmas has resulted in a splendid holiday business for hardware merchants. There has been a big sale for plated goods. cutlery and various electrical utilities. Great numbers of flashlights have also been disposed of.

The turn to cold weather is welcomed by merchants as it will mean the improvement of seasonable lines. One merchant stated to Hardware and Metal that owing to mild weather conditions last winter he carried over practically his entire stock of skates and winter sporting goods. Already as a result of the cold dip these goods are moving nicely.

Stock taking, retailers state, will find them with the lowest stocks they have ever carried in many lines. Wholesalers are looking for considerable replacement buying. Retailers are unanimously of the opinion that the outlook for business in 1922 is excellent. Those firms handling builders' supplies and hardware are looking for the largest business in these lines they have ever had.

R. M. A. PROGRESSES IN QUEBEC

Montreal—Considerable headway is now being made in the Quebec branch of the Retail Merchants' Association of Canada. Secretary M. Lapointe states the method of sub-dividing the Province into districts has proven a great help in furthering the efforts of the Association, and a rapid gain in membership is now being realized. Only recently the Quebec R. M. A. decided to affiliate with the Dominion organization, thus forming a new branch in the ancient city. Other branches recently formed include Sherbrooke, Three Rivers, Hull and St. Hyacinthe.

Each district looks after its own affairs, reporting through their secretary to the Provincial Board. A further subdivision is often carried out by the forming of a branch in an individual town, which elects its own executive and in turn conveys its reports to their district branch through which it reaches provincial headquarters. While a comparatively new scheme, the provincial executive is well pleased with the progress it is now making.

AUTO ACCESSORY TRADE ACTIVE

Ottawa, Ont.—The automobile, tire and accessory dealers of Ottawa have been following up the Central Canada exhibition with much vigor and with considerable success. Without exception, each of the many exhibitors in the motor show of the Ottawa fair has expressed satisfaction with results obtained through the exposition. Various dealers have reported this past week that they are busy on new business and the whole trade, generally, is far more active than it was during the week preceding the exhibition. This has reflected much increased activity in hardware stores handling automobile parts and accessories.

INCORPORATION

S. U. & W. Electrical Manufacturing Co., Ltd. has been incorporated in Ontario with capital of $40,000 and head office in Hamilton, Ont., to manufacture electrical appliances, accessories, etc.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

Markets at a Glance

SUBSTANTIAL reductions in bright and annealed wire, nails, and similar wire products, supply one of the features in the current hardware markets. Stove pipe wire, bale ties and fence staples are all lower in price. Recessions are also noted on many lines of tools. The Stanley make of levels and planes now have lower prices while Siegley planes record similar declines. Pliers, punches and Schollhorn dividers likewise register lower quotations, with revolving spring punches, both single, four and six tube, now costing less. Through increasing the discount from 25 to 30 per cent., screw hook and strap hinges have easier price levels. Other price recessions appear on the Mrs. Potts' line of japanned iron handles, while slight reductions are also announced on the Pyrex grade of glass ovenware. Quotations have been lowered on some brands of aluminum ware, and the manufacturers of Colt's firearms announce a price decline on their products.

Black and galvanized sheets have slightly easier prices in some quarters, but this change is chiefly among distributors whose quotations were previously on a higher range than the average. There is no change in the basic markets. Solders are maintaining the higher price levels recently recorded, with the undertone in the primary metal markets retaining its firmness in spite of the current quiet period. This recession is looked upon as seasonal. Business in jobbing circles is now quieter owing to the holiday activity being over for this season. A quieter session in trade circles is anticipated until after the completion of the inventory period.

Montreal Markets

MONTREAL, DECEMBER 29.—Price revisions in tools offer the feature in the hardware markets this week. Chief among these is the announcement of a revision in Stanley tools, when many lines, including levels and certain numbers of planes, apart from some of the smaller tools, show a reduction. Siegley planes are reduced throughout. Pliers, punches and dividers of the Schollhorn make are now priced lower, while revolving punches, single, four and six tube, have new lower prices. Through increasing the discount on screw hook and strap hinges from 25 per cent. to 30 per cent. these will now sell for less. Mrs. Pott's regular iron handles are reduced to $16.50 a gross, and sash weights are 50 cents lower on both solids and sectionals. Skate screws are again reduced.

Substantial reductions are also announced on wire, and wire products. Bright and annealed wire, fence staples, wire nails, stove pipe wire and bale ties are all quoted at lower levels.

Cement prices are for the present holding unchanged, but a revision is looked for immediately following the first of the year.

REVOLVING SPRING PUNCHES ARE REDUCED

Montreal.

Revolving spring punches will now sell for less. The new price on the single tube is $8.00 a dozen, four tube $12.00 dozen, and six tube $15.00 per dozen.

THE NEW "YANKEE" PRICES

Montreal

As announced in last week's issue of Hardware and Metal, a revision was recorded in "Yankee" tools. Following are the new prices on spiral screw drivers and automatic drills:

"YANKEE" TOOLS—

Spiral Screw Drivers—No. 30, $38 dozen; No. 31, $51.05; No. 35, $28.25; No. 130, $43.45; No. 131, $58.65.

Automatic Drills—No. 40, $36.95; No. 41, $33; No. 42, $26.05; No. 43, $16.50; No. 44, $39.70.

MRS. POTTS' IRON HANDLES ARE REDUCED

Montreal

New lower prices are announced on Mrs. Potts' regular iron handles, these now being quoted at $16.50 a gross.

LOWER PRICES ON S. & S. HINGES

A reduction of from 6 to 7 per cent. is made in screw, hook and strap hinges. These are now quoted at 30 per cent. off list prices, former discount being 25 per cent.

SASH WEIGHTS 50 CENTS LOWER

Montreal

Local quotations on sash weights, both solid and sectional, are reduced 50 cents per 100 pounds. Solids are now quoted at $3.00, one pound sections, $3.50, and half-pound sections at $4.00 per 100 pounds.

STANLEY TOOLS ARE REVISED

Montreal.

The Stanley Rule & Level Co., announce a revision in the prices of their line of tools. Some lines show a varying reduction, while others are unchanged. Braces are held in price, while a reduction is shown in levels and certain numbers of planes.

LOWER PRICES ANNOUNCED ON FENCE STAPLES

Montreal.

Easier price levels are also given on fence staples this week. A reduction of 45 cents has been announced in quotations on both bright and galvanized, this change bringing prices down to the following levels:

Bright, per 100 lb. kegs, ... $4.40
Galvanized, per 100 lb. kegs, ... $5.40

STOVE PIPE WIRE WILL NOW COST LESS

Montreal

Stove pipe wire prices are also lowered in keeping with the declines recorded in other wire goods. The extent of the decline is 25 cents per 100 lbs. The revised levels are as follows:

No. 18 gauge ..... $8.50 per cwt.
No. 19 gauge, ... $9.00 per cwt.

SUBSTANTIAL REDUCTION IN WIRE BASE QUOTATIONS

Montreal.

One of the feature reductions on the current hardware markets is the drop of fifty cents in the base quotations on bright and annealed wire. This decline brings prices down to the level of $3.80, and affects other wire products generally.

SHEET PRICES REDUCED IN SOME QUARTERS

Montreal

Lower quotations appear on both black and galvanized sheets in some quarters of the local market, although there is really little or no change in the undertone. For some time past it has been necessary to quote prevailing prices with a range, as a variation has existed among the different jobbing houses. Dealers who were previously quoting the higher prices have now announced a slight reduction, but the change is purely local, and other dealers are maintaining their former prices. The demand at present in both black and galvanized sheets is seasonably light, but there is some activity noted in the tin plate, although of a spasmodic nature. Little improvement in general is looked for until after the quiet weeks of next month, although one large local distributor stated that a better buying movement should develop after the inventory period, as undoubtedly stocks in all sections were very low. Following are local nominal quotations:

BLACK SHEETS

10 gauge	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 40	4 70
16 gauge	4 50	4 80
18-20 gauge	4 55	5 20
22-24 gauge	4 60	5 25
26 gauge	4 65	5 25
28 gauge	4 75	5 35

Sheets 3 in. wide, 20 cents per 100 lbs. extra.

GALVANIZED SHEETS.

U. S. Standard.		
10¾ oz.	6 75	7 60

DECLINE RECORDED IN BASE PRICE ON WIRE NAILS

Montreal.

The base price on wire nails is now reduced to $3.90, compared with the previous quotation of $4.30. This change is effective immediately, and reflects the easier tone recently apparent in wire and wire products generally. The extra for blued and coated nails has also been revised downward, from 50 cents to 35 cents.

REVISED LOWER PRICES NOTED ON BALE TIES

Montreal

Lower prices have been announced this week on bale ties. This revision corresponds with the changes recently effective on other wire products. The extent of the reduction varies with the different gauges, being between 65 and 70 cents.

PLIERS, PUNCHES AND DIVIDERS ARE REDUCED

Montreal

A reduction of approximately 10 per cent. is made in the Schollhorn line of Bernard pliers, punches and dividers.

SKATE SCREWS 42 CENTS PER DOZEN PACKAGES

Montreal.

Skate screws are further reduced this week. Packages containing sufficient screws for one pair of skates will now sell for 42 cents per dozen.

EARLY REVISION EXPECTED IN CEMENT PRICES

Montreal.

For the present, quotations on cement are unchanged, but a revision in the nature of a decline is expected with the opening of the New Year. The extent of the reduction is yet uncertain, but Hardware and Metal is informed that it will be of quite substantial proportion. With the holiday season now at hand business shows a slackening but an increased volume of trade is expected to be shown next month as there is still a fair amount of building under construction requiring supplies.

LEAD PRODUCTS UNCHANGED: MARKET STILL FIRM

Montreal

Following the repeated revision in solder prices, when increases have been recorded in the past three weeks, quotations on all lead products are this week holding unchanged, but firm. Although tin in the primary markets is this week a little easier, other metals retain their former strength, and the tone of the finished products is still one of firmness. Demand is at present light, this said to be the reason for other products, with the exception of solder, holding unchanged. A more active market would undoubtedly have resulted in higher prices being generally named. Prevailing quotations are as follows:

LEAD AND ZINC PRODUCTS

Lead pipe, per 100 lbs.	12 50
Lead waste, per 100 lbs.	13 50

Note—Lead pipe is subject to a discount of 10 per cent.

Lead traps and bends	10% off
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10½
Lead sheets, 3 to 3* lbs., sq. ft., lb.	$ 10¼
Do., 4 to 8 lbs., sq. ft.	0 09½

Cut sheets ¼c lb. extra, and cut sheets to size, ¾c lb. extra.

Solder, guaranteed, lb.	0 28½
Do., strictly, lb.	0 26½
Do., commercial, lb.	0 23½
Do., wiping, lb.	0 24½
Do., wire, lb.	0 38

RANGE BOILERS NOW VERY QUIE

Montreal

The buying movement in range boile is now of a minor nature, sales bein none too numerous and for small quan ities. This might be expected howeve at this season, and dealers look for quieter period until after the openin weeks of the new year. Notwithstan ing the dullness, the market attracts a tention through the still unsettled situ tion, and the variation in prices amon manufacturers and jobbers. The low list of prices, quoted below, is in effe in most quarters, but certain others sti hold the higher figures, maintaining th standard list has not been change However, competition is met from a sources, and present prices are very nom inal. There is expected to be som action taken early in the new year in th hope of stabilizing the situation, as pres ent figures leave little or no profit fo distributors.

RANGE BOILERS—	Standard.	Ex. Heav
30 gallon	$8 75	$11 25
35 gallon	11 25	13 50
40 gallon	13,50	16 00
52 gallon	20 00	24 50
66 gallon	28 00	34 00
82 gallon	35 00	46 50
100 gallon	45 00	55 00
120 gallon	54 00	63 25

LITTLE INTEREST NOW IN SCRA

Montreal

Waste material markets are generall quiet with the closed winter weathe now well at hand. The better feelin in the market of last month, especiall in non-ferrous metals, is now spent ow ing to the quieter demand. Prices o these scrap metals are however holdin fairly steady for the present, in sym pathy with the ingot markets, but a one dealer stated, prices are not factor that would likely assist towar increased activity at the present tim Iron and steel scrap remain very dul little business showing in these fo some time past. Following are presen nominal quotations:

Automobile tires	....	0 75
Rubber shoes	....	0 03
Yellow brass	....	0 05
Red brass	....	0 09
Light brass	....	0 03½
Scrap zinc	0 03	0 03½
Lead, heavy	....	0 04½
Lead, tea		0 02½
Light copper	....	0 08
Heavy copper	....	0 10½
Wrought iron, R. Rd., No. 1 per gr. ton	....	10 50
Malleable scrap (ton)	....	8 00
Pipe scrap (ton)	....	6 50
Heavy melting steel	7 50	8 00
No. 2 busheling,	....	4 00
Boiler plate	....	8 00
No. 1 machinery cast	....	21 50

SEASONABLE SLACKENING IN IRON AND STEEL DEMANI

Montreal.

With local stocks very low, and th buying movement now showing a sea sonable recession, the local situation o bar iron and steel is practically unchang ed this week. There is still the easie tone in the market owing to the quie demand, and prices are more or les nominal as lower quotations are give in almost all quarters for fair size orders. The position at primary sourc

es is said to be one of waiting. Prevailing levels are generally admitted to be at the bottom, with present replacement costs, and any spurt in demand with the opening of the new year months is expected to bring about a steady to firm market. Following are present local quotations:

Common bar iron, 100 lbs.	2 90
Refined iron	4 40
Irish finish machinery steel	2 95
Mild steel	2 90
Single reeled machinery steel	4 75
Band steel	2 90
Spring steel	4 50
Sleighshoe steel	2 90
Tire steel	3 10
Toe caulk steel	3 80
Harrow tooth steel, per lb.	3 05
Mining tool steel per lb.	0 22
Black Diamond tool and cast steel, per lb.	0 22

NOTE.—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

BOILER TUBE MARKET IS QUIET

Montreal.

There is little or no change in the market for boiler tubes, with the demand now receding to the usual quiet period at this season. Little improvement is looked for until after the opening weeks of the new year as these, as other heavier goods, are very inactive around the closing months of the year. Following are local prices on the various sizes:

BOILER TUBES—	Seamless	Lapweld
1 inch	24 70	.....
1¼ inch	24 50	.....
1½ inch	24 00	.....
1¾ inch	26 00	26 00
2 inch	24 50	20 50
2¼ inch	27 75	23 50
2½ inch	32 50	24 50
3 inch	40 00	30 50
3½ inch	52 50	34 75
4 inch	65 00	44 00

DISCOUNTS ON PIPE FITTINGS REMAIN UNCHANGED

Montreal.

Quotations on the various kinds of pipe fittings are held without change. A new list on wrought piping usually announces new quotations on nipples and couplings, but list No. 54 shows both these at unchanged discounts. Following are prevailing prices and discounts;

FITTINGS—	
Cast Iron fittings	25%
Bushings, cast	27½%
Do., malleable	25%
Flanges	37%
Plugs	27½%
Flange unions	22½%
Malleable unions	42½%
Dart unions, black	33%
Do., galvanized	13%
Nipples, ⅛ to 4 in, close and short	50%
Do., long	60%
Do., 4½ to 8 in., close and short	40%
Do., long	50%
Couplings, 4 in. and under	30%
Do., 4 in. and longer	10%

POUND GOODS—	Black.	Galv.
Class A	0 53	0 65
Class B	0 21½	0 28¼
Class C	0 14	0 21½

EASIER TONE IN SOME METALS

Montreal.

The metal markets have been quiet during the past week owing to the holiday season and changes in prices have been few, although lead shows slightly lower quotations and spelter is a little easier. Buyers are generally busy with the inventory period and are not much interested in market prices.

TIN—Tin is holding fairly well in London although future movements are somewhat uncertain at present. The bulls have had their turn for a time and it remains to be seen whether they can force prices still higher. In the meantime the local market is little changed at 39 cents.

COPPER—There is no change in he copper market on this side, and London is also comparatively quiet. The market is steady however, without any great change in quotations. There will probably be a period of quietness for a time. Local quotations are unchanged at 18 cents for electro, 17¾ cents for casting.

LEAD—London has at last commenced to decline in price, but this is not unexpected in view of the high prices prevailing there. This, however, has no effect on local figures as these have been well below the London levels. The local market is slightly easier at 7¼ cents.

SPELTER—There is a slightly easier tone in both the London and East St. Louis markets and in view of the decline in New York exchange, there is also an easier feeling here. Quotations, however, hold at previous quotation of 7½ cents.

ANTIMONY—This metal continues quiet on the local market and the tone is slightly easier with quotations shaded at 6¾ cents for Chinese, and 7¾ cents for high grade English.

ALIUMINUM—Aluminum is still featureless on the market with prices holding at 26 cents.

Toronto Markets

TORONTO, December 29.—Price recessions again feature the current hardware markets. All wire products record substantial reductions, this change affecting bright and annealed wire, fence staples, stove pipe wire, bale ties and wire nails. Many tools of the Stanley make are now recorded with lower quotations, levels and planes being generally revised. The Pott's line of japanned iron handles also register a 20 per cent. decline, while the manufacturers of Colt's firearms also announce a downward revision. Easier prices are recorded on some makes of aluminum kitchen utensils.

A readjustment in the roofing situation is still being looked for, with the soil pipe situation also remaining unchanged. Shading in range boiler prices has now almost become general. Marked activity is noted in the tin plate industry, with the undertone in primary steel centres being one of cheerful sentiment in spite of the current quietness. The existing tone in copper products retains its firmness, although the markets are less active at this season. Solders maintain the recent higher quotations, while business in compression goods is described as quiet. The holiday dullness is evident in both the ingot metal and scrap material markets.

REDUCTION IN BASE PRICE ON WIRE NAILS

Toronto.

A reduction of 35 cents in the base price on wire nails has now been announced. This charge follows on similar reductions which have occurred on primary markets, and reflects the easier tones now generally apparent in wire products. The new lower price is $3.90, compared with the recent quotation of $4.25. The extra for blued and coated nails has been changed from 50 cents to 35 cents. Following is the revised list:

WIRE NAILS—

Standard Steel Wire Nails, f.o.b., London. Hamilton, Milton, Toronto, $3.90 base.

Owen Sound or Collingwood, $3.90 base.

F.o.b., Montreal, $3.90 base.

Freight equalized on above points.

Windsor. Walkerville, Sandwich, f.o.b., factory prices, carload freight allowed, $4.00.

Sault Ste. Marie, Port Arthur. Fort William, $4.15 base, f.o.b., factory; no freight allowance.

REDUCTION IN PRICES ON COLT FIREARMS

Toronto.

A reduction is announced by the Colt Patent Firearms Manufacturing Co., in prices on the various makes of Colt revolvers and guns. The change will be made effective from January 3, 1922. The makers claim that this revision places quotations on these products within reasonable distance of pre-war price levels.

EASIER PRICE LEVELS NOTED ON FENCE STAPLES

Toronto

Fence staples, both bright and galvanized, record a reduction in price this week. The extent of the decline is approximately 45 cents per 100 lbs. The revised quotations follow:

Bright, per 100 lb. kegs $4.40
Galvanized, per 100 lb. kegs.... 5.40

DECLINE IN QUOTATIONS ON STOVE PIPE WIRE

Toronto

Quotations on stove pipe wire have been reduced in keeping with the recessions announced this week in prices on wire products generally. The extent of the decline is 25 cents per 100 lbs. The revisions are as follows:

No. 18-gauge ....$8.50 per cwt.
No. 19-gauge .... 9.00 per cwt.

POTTS' JAPANNED IRON HANDLES AT LOWER PRICES

Toronto.

A reduction of approximately 20 per cent has been announced on the Mrs. Potts' line of japanned iron handles. The revised quotation on these products is $16.50 per dozen.

ANNOUNCE FIFTY-CENT DROP ON WIRE BASE PRICE

Toronto.

A fifty cent decrease in the base price on bright and annealed wire is announced together with the current reduction in quotations on wire products generally. This revision brings the prevailing level down to $3.80, compared with the previous price of $4.30.

MARKED ACTIVITY NOTED IN TIN PLATE INDUSTRY

Toronto.

In spite of the recent quieter tone to the sheet markets locally, the undercurrent in primary circles is one of strong sentiment and cheerful expectancy of improvement during the early months of the year. There has been a recent slackening in demand in the primary centres, but this condition is usual at this season.

Shipments of plates from the Pittsburg mills are stated to be registering a fair proportion, while pronounced activity is shown in the tin plate industry, several of the producers having been running between 90 and 100 per cent. Prices on the local markets are fairly steady at the recently revised quotations, with the variation in market quotations being accentuated by some distributors adhering to the previous levels.

BLUE ANNEALED—		
10 gauge, base	3 75	4 50
12 gauge	3 80	4 55
14 gauge	3 85	4 60
16 gauge	3 90	4 65

STILL AWAIT REVISION IN ROOFING SITUATION

Toronto

There has been no material change, as yet, in the roofing situation; current prices still awaiting the looked for revision. Some reductions in quotations on these products are generally being anticipated early in the New Year, with one manufacturer already quoting lower prices, and another having virtually promised to follow suit at an early date.

ANNOUNCE PRICE DECLINE ON "MIRRO" ALUMINUM WARE

Toronto

Another reduction of approximately 15 per cent is announced on "Mirro" aluminum kitchen utensils, by the Aluminum Goods Manufacturing Company, of Manitowoc, Wis., U.S.A. This change is stated as affecting the entire line, with some products being reduced to a greater extent than other wares. The average decrease is given above.

BALE TIE PRICES ALSO RECORD DECLINE

Toronto

Lower prices on bale ties have been announced this week, in keeping with the declines given on wire and other fence products. The revised prices are as follows:

BALE TIES—	
13 gauge	$4 90
14 gauge	5 10
15 gauge	5 35
16 gauge	5 75

4 to 6 ft. lengths, 25 cents extra; shorter than 4 ft., 75 cents extra.

F.o.b., Toronto.

PRICES ARE GUARANTEED ON MARBLE'S OUTING EQUIPMENT

Toronto

The Marble Arms & Manufacturing Co., have announced that present list prices and discounts on all Marble goods are guaranteed against decline until December 31, 1922. The only exception to this being No. 10 camp axe, this being formerly listed at $3.00, but which is being reduced to $2.50, effective January 1, 1922.

TONE IN COPPER PRODUCTS RETAINS FIRMNESS

Toronto

The market on copper and brass products is at present quiet, after the price advances recently recorded, but the current inactivity is more or less expected at this season of the year. The undertone of the copper market continues fairly firm, and the trend of raw materials of this nature is being well maintained. Quotations on copper and brass tubing, rods and sheets, remain at the new higher levels as follows:

BRASS—	
Sheets, base, per lb.	$ 0 23
Rods, base, per lb.	0 21
Tubing, base, per lb.	0 25
COPPER—	
Rods, base, per lb.	0 28
Soft sheets, plain, 16 oz. and heavier, lb.	0 30
Do., plain tinned 16 oz. and heavier, lb.	0 37
Do., polished and tinned 16 oz. and heavier, lb.	0 42
Tubing	0 29

SOME STANLEY TOOLS NOW REGISTER DECREASE

Toronto

A reduction of approximately 10 per cent. has been recorded by the Stanley Rule & Level Co., on some of their lines. This change affects such tools as levels and certain numbers of planes.

FAIR TRADE RECORDED IN PIPE FITTINGS

Toronto.

Developments in the market for pipe fittings indicate that trade is slackening in these products, and a quieter period is anticipated during the next few weeks. Some revival is looked for as regards volume of orders with the turn of the new year, and the conclusion of inventory activities. The present trade, however, is described as fair for this season. Discounts are remaining unchanged at recent revisions. Following is the current list.

PIPE FITTINGS—	Per cent.
Cast iron fittings	25%
Plugs, cast iron	28%
Do., solid	28%
Do., countersunk	28%
Bushings, mall	28%
Bushings cast	28%
Unions ¼ in. to 2 in.	45%
Unions, ⅛ in., 2½ to 4 in.	45%

Class A	0 54	0 67
Class B	0 22	0 32
Class C	0 14	0 22

IRON AND STEEL MARKETS AT FAIR LEVELS

Toronto.

Quotations on bar iron and steel are generally being maintained at the nominal lists recently effective. A few minor instances are reported, however, where some slightly easier prices have been given. This condition is stated as applying solely to odd sizes and exceptional circumstances, with no general tendency in this direction. The basic market quotations are also reported to be on fairly firm levels at the present time, with conditions in the industry generally reported as favorable for the current season. The structural and bar iron markets are described as waiting the impetus expected from new business in the early months of the New Year. Tin plate and pipe mills supply the feature spots in current production activity. Following are the average local market prices on bar iron and steel:

IRON AND STEEL—		
Mild Steel bars, base	3 00	3 25
Mild steel bands, 3-16 in. base	3 50	3 75
Bar iron, base	3 00	3 25
Angle iron, base	3 10	3 35
Horseshoe iron	3 75	4 10
Tire steel	3 50	3 75
Spring steel	5 50	6 00
Sleigh shoe steel	3 00	3 25
Hoop steel	3 75	4 25
Norway iron	12 50	15 00
Toe caulk iron	4 00	4 50
Crucible cast sheet steel	30 00	35 00
Mining drill steel	.. ..	18 50
Cast tool steel, high grade	20 00	23 00
Cast tool steel, medium	30 00	36 00

SOLDERS MAINTAIN RECENT HIGHER QUOTATIONS

Toronto.

Quotations on solders and other lead and zinc goods are holding at the recent higher levels, while both manufacturers and distributors report that a fairly firm tone prevails in these markets. Current business has slightly receded in value, but this is attributed to the holiday season and inventory period. Unchanged prices are as follows:

LEAD AND ZINC GOODS—	
Lead pipe, list, per lb.	0 12½
Lead waste pipe, list, per lb.	0 13½
Do., over 8 in., list, per lb.	0 14½
Lead pipe is subjected to a discount of	10%
Lead traps and bends	10%
Lead sheets, 4 to 6 lbs. sq. ft. in rolls, lb.	09½
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, per lb.	0 32½
Do., strictly, lb.	0 24½
Do., commercial, lb.	0 22½
Do., guaranteed, lb.	0 27½
Do., wiping, lb.	0 22½
Zinc sheets, per lb.	0 12

BOILER TUBE MARKETS CONTINUE QUIET

Toronto.

Boiler tube market continues of a quiet nature, with very little variation in current demand. Quotations also remain unchanged. Dealers report the usual inactive period at this season of the year, with a better outlook for some improvements in the Spring months. Following are the prevailing nominal prices:

BOILER TUBES—	Seamless.	Lapweld.
1 inch	26 00	.....
1¼ inch	27 25	.....
1½ inch	26 25	.....
1¾ inch	29 75	25 00
2 inch	28 00	22 00
2¼ inch	32 00	25 00
2½ inch	40 00	27 00
3 inch	44 00	35 00
3½ inch	60 00	40 00
4 inch	75 00	50 25

BUSINESS IS QUIET IN CORRUGATED SHEETS

Toronto.

Trading in corrugated sheets is described as very quiet, at present, but this condition is usual during the current season of the year. One dealer described the situation in the following words: "All things considered, business is very fair, with the tendency to buy in small quantities being accentuated during the late season." It was also pointed out that some price developments of a minor nature are being looked for in some quarters as regards spring prices on corrugated. The tendency of these markets during recent months has undoubtedly been in the downward direction, and several recessions have been recorded. Future changes of this nature are stated as dependent upon primary market developments. The unchanged quotations follow:

Corrugated—	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 7 ½ per cent.

Lighter than 24 gauge and wider than 27 ins., 75c a square extra.

CURRENT TRADE IN RANGE BOILER MARKET QUIET

Toronto.

There is little variation to report in the range boiler situation. Some shading of the nominal price list is still being recorded, but current business in these products continues of a minor nature at this season. Local distributors still claim to be maintaining the level of $9.25 on the 30 gallon standard size, but this quotation has been lowered to $9.00 in some quarters, while another list commencing with the reduced price of $8.75 is now being generally recognized in other centres. The recent reductions in base prices on galvanized sheets, place raw material costs on a silghtly easier basis, but manufacturers point out that other production expenses have registered very little, if any, variation. Whether the new lower list will be nominally recognized in the near future, is stated as depending upon the general trend of the markets and future developments in the basic elements.

HOLIDAY DULLNESS EVIDENT IN METAL MARKETS

Toronto.

The current metal markets show very little change, the holiday season contributing to the general inactivity. Prices also record little variation, both primary and domestic quotations generally holding at the previous levels.

COPPER.—Buying of copper in domestic markets during the last few days is reported to be light. Continued purchasing of copper by foreign interests for export abroad, has been the chief feature of this metal. Primary markets report that domestic consumers have already covered requirements for the next month or two, consequently current business is light, with no pressure to sell on the part of producers. Prices have been almost steady, with the local quotations between 17½ and 18 cents.

TIN.—The tin market is described as holding very well, but the demand is undoubtedly listless. Recent arrivals on the primary markets have increased the available supply, and it can no longer be said that there is any scarcity. The fluctuations in Sterling exchange have caused slight variations in tin quotations, but the general price trend remains firm at the recent higher levels. The quotation of 39 cents is still in effect locally.

LEAD.—One feature of the lead markets at the present time is the report from southern centres that foreign prices continue to interest as affecting the anticipated possibility of exporting lead to Europe. While inquiries have been in evidence, these have not yet developed into actual business.

The price level is described as steady, with the domestic market unchanged. Local quotations remain at $6.75.

SPELTER.—The holiday dullness is particularly apparent in this market, and both offerings and sales have been of a minor character. Prices are nominally unchanged, the local quotation generally holding to $7.25.

ANTIMONY.—The current demand for antimony remains of a quiet nature, and there is little new to report in these markets. Between 8 and 10 cents remains the average local quotation.

ALUMINUM.—The inactivity of the automobile industry at this season of the year has contributed to the dullness in aluminum circles. With an improvement in automobile production, an increased demand for aluminum is looked for, but the present trend is very quiet. Prices locally are at the 27 cent level.

London Markets

LONDON, DECEMBER 29.—Price revisions on the current hardware markets cover such products as Thermos bottles and kits, the "Yankee" line of tools, Pyrex glass ovenware and Potts' japanned iron handles. All these goods are now quoted at lower price levels. A decline has also been registered on tinners' snips, pliers, carpenters' braces, calipers and wing dividers.

Substantial reductions are also announced on wire, and wire products. Bright and annealed wire, fence staples, wire nails, stove pipe wire and bale ties are all quoted at lower levels.

Holiday trade was exceptionally good in this district during the past week. Many seasonable lines were in brisk demand. Collections continue in very fair shape.

DECLINE RECORDED IN BASE PRICE ON WIRE NAILS

London, Ont.

The base price on wire nails is now reduced to $3.90, compared with the previous quotation of $4.30. This change is effective immediately, and reflects the easier tone recently apparent in wire and wire products generally. The extra for blued and coated nails has also been revised downward, from 50 cents to 35 cents.

LOWER PRICES ANNOUNCED ON FENCE STAPLES

London, Ont.

Easier price levels are also given on fence staples this week. A reduction of 45 cents has been announced in quotations on both bright and galvanized, this change bringing prices down to the following levels:

Bright, per 100 lb. kegs, ... $4.40
Galvanized, per 100 lb. kegs, ... $5.40

SUBSTANTIAL REDUCTIONS IN WIRE BASE QUOTATIONS

London, Ont.

One of the feature reductions on the current hardware markets is the drop of fifty cents in the base quotations on bright and annealed wire. This decline brings prices down to the level of $3.80, and affects other wire products generally.

STOVE PIPE WIRE WILL NOW COST LESS

London, Ont.

Stove pipe wire prices are also lowered in keeping with the declines recorded in other wire goods. The extent of the decline is 25 cents per 100 lbs. The revised levels are as follows:

No. 18 gauge, ... $8.50 per cwt.
No. 19 gauge, ... $9.00 per cwt.

REVISED LOWER PRICES NOTED ON BALE TIES

London, Ont.

Lower prices have been announced this week on bale ties. This revision corresponds with the changes recently effective on other wire products. The extent of the reduction varies with the different gauges, being between 65 and 70 cents.

"YANKEE" TOOLS REGISTER PRICE RECESSION

London, Ont.

A revision has been announced in quotations on the "Yankee" line of tools, and the new prices are approximately 8 per cent. lower than formerly. Following are some of the new prices:

"YANKEE" TOOLS—

Ratchet Screw Drivers—No. 11 x 2 in., $8.30 doz.; 3 inch, $10.20; 4 inch, $10.85; 5 inch, $11.95; 6 inch, $13.45; 8 inch, $15.20. No. 12, $11.85 doz. No. 15 x 3 inch, $9.50 doz.; 4 inch, $9.90; 5 inch, $10.30.

Spiral Screw Drivers—No. 30, $38 doz.; No. 31, $51.05; No. 35, $28.25; No. 135, $33.60; No. 130, $43.45; No. 131, $58.65.

Automatic Drills—No. 40, $36.95 doz.; No. 41, $33; No. 42, $26.05; No. 43, $16.50; No. 44, $39.70.

NEW LIST ISSUED ON THERMOS PRODUCTS

London, Ont.

Other products with lower prices going into effect on January 1, 1922, are the Thermos line of bottles, kits and similar goods. These new lists are from 10 to 20 per cent. lower than the quotations which have prevailed during the last few months. The discount remains at 25 and 10 per cent. off the new list. Following are revised list prices on some popular lines:

THERMOS PRODUCTS—

Bottles—No. 11, $2 each, list; No. 112, $3.50; No. 14, $2.50; No. 142, $4; No. 15, $3.50; No. 152, $5.

Refills—No. 61c, $1.25 each; No. 612c, $2.25.

Kits—No. 396, $4 each; No. 400, $4; No. 1396, $5.50; No. 1397, $6.

Less 25 and 10 per cent.

VARYING REDUCTIONS GIVEN ON CERTAIN TOOLS

London, Ont.

Reduced quotations have been announced on Peck, Stowe and Wilcox tools, including tinners' snips, pliers, carpenters' braces, calipers, and wing dividers. The reduction varies in extent on the different products from 5 to 20 per cent. Following are the new prices on some of the popular lines:

TOOLS—

Tinner Snips—No. 8, $2.95 pair; No. 9, $2.60; No. 10, $2.35; No. 49, $2.15; No. 108, $5.25 doz.

Inside Calipers—No. 105 x 3 inch, $2.10 doz.; 4 inch, $2.25; 5 inch, $2.55; 6 inch, $2.90; 8 inch, $3.90.

Outside Calipers—No. 110 x 3 inch, $2.10 doz.; 4 inch, $2.25; 5 inch, $2.55; 6 inch, $2.90; 8 inch, $3.90.

Wing Dividers—No. 35 x 5 inch, $7 doz.; 6 in., $7.40; 7 inch, $8.30; 8 inch, $9.20; 9 inch, $10.90; 10 inch, $12.30.

PYREX GLASS OVENWARE. DISCOUNTS ARE REVISED

London, Ont.

New lower prices go into effect on January 1, 1922, covering the Pyrex line of glass ovenware. The extent of the reduction figures out at about 5 per cent., the revised quotation being Canadian list less 33 1/3 per cent., compared with the previous discount of 30 per cent.

GOOD SALE CONTINUES FOR ASH SIFTERS

London, Ont.

The current sale of ash sifters continues good, and in seasonable proportions. Prices remain unchanged at the following levels:

ASH SIFTERS— Common wood, $3 doz; Banner, No. 2, $8 each; Banner No. 3, $2 each.

LINSEED OIL SALES STILL VERY LIGHT

London, Ont.

Domestic quotations on linseed oil again remain unchanged this week, with the current demand of a very light nature. Following are the prevailing price levels:

LINSEED OIL—	Raw.	Boiled.
1 to 2 barrels, per gal.	0 84	0 87
2 to 5 barrels, per gal.	0 83	0 86
6 to 9 barrels, per gal.	0 81	0 84

Less barrels, add 15 cents gal.

LITTLE VARIATION IN TURPENTINE MARKETS

London, Ont.

Little variation has been noted in the turpentine markets, both the primary and domestic distributing circles maintaining unchanged quotations There is a fair seasonal movement at present, but on the whole demand is light. Following are current prices:

TURPENTINE—

1 barrel lots, Imp. gal.	1 20
2 to 4 barrel lots, per Imp. Gal.	1 19
5 gallon lot, per Imp. Gal.	1 35

WINDOW GLASS SALES OF MINOR NATURE

London, Ont.

The current movement of window glass continues to be of an average nature, although orders are now limited to small quantities. There has been no revision in quotations, the price trend remaining firm at the following levels: Single and double diamond, net list. Cut lights, 75 per cent. of light list.

LOWER PRICES ON POTTS IRON HANDLES

London, Ont.

New lower prices are now in effect on the Mrs. Pott's line of iron handles. The revised quotation on the japanned handle is $1.40 per dozen.

FIRM TONE EVIDENT IN SHELLAC MARKETS

London, Ont.

Quotations on shellac are very firm, and prices in effect at present on both orange and white, are as follows:

SHELLAC—

	Pure white.	Pure Orange
Barrels,, per gal.	4 65	4 15
5 gallons, per gal.	4 90	4 40
1 gallon, per gal.	5 00	4 50
Half gallons, per gal.	5 15	4 65
Quarter gallons, per gal.	5 40	4 90
Pints, per doz.	9 00	8 00
Half pints, per doz.	4 75	4 25
Quarter pints, per doz.	2 85	2 65
One-eights pints, per doz.	1 65	1 50

Winnipeg Markets

WINNIPEG, DECEMBER 29.—A number of small shelf hardware lines are added this week to the list of lower prices. A feature in the current markets is the reduction in prices on bar iron and steel. Wood screws are also quoted lower through revised discounts. Other lines registering price declines this week are, ratchet screw drivers, Utica pliers, horseshoe nails, cow chains, and range boilers.

PRICES NOW LOWER ON HORSE SHOE NAILS

Winnipeg.

The price of Peerless Horseshoe Nails has been reduced this week. Following are the latest quotations:

HORSESHOE NAILS—

No. 4, $7.25 per 100 lbs.; No. 5, $5.25; No. 6, $5; No. 7, $4.75; No. 8, $4.75; No. 9, $4.50; No. 10, $4.50; No. 11, $4.50; No. 12, $4.50.

UTICA PLIERS REGISTER PRICE DECREASE

Winnipeg

In keeping with the reduction of other lines manufactured from iron and steel, Utica pliers have been added to the list of reductions and are now quoted at the following lower prices:

UTICA PLIERS—

No. 1950, 6 in., 20.40 per dozen; 7 in., $24.90; 8 in., $28.40; 9-in., $37.90.

No. 50, 4 in, $12.60; 5 in., $13.95; 6 in., $15.15; 7 in., $16.75; 8 in., $18.20.

No 2050—5 in., $23.15; 6 in., $24.75; 7 in., $29.45; 8 in, $34.25.

DOWNWARD REVISION NOTED IN WOOD SCREWS

Winnipeg.

Another reduction is made this week in the prices of bright and brass wood screws. Following are the latest discounts:

WOOD SCREWS—

Bright, flat head, 77½ and 5 per cent.
Do., round head, 75 and 5 per cent.
Do., oval head, 75 and 5 per cent.
Brass, flat head, 75 per cent.
Do., round head, 70 and 5 per cent.

BUILDERS HARDWARE PRICES ALSO RECORD DECLINES

Winnipeg

Many lines of builders' hardware, such as Lock Sets, Locks, Latches, Store Door Sets, Drawer Pulls, and Cupboard Turns, have been reduced in prices this week.

COW CHAINS AT LOWER LEVEL

Winnipeg

Quotations on cow chains have also registered a decline this week, and the revised price levels are as follows:

COW CHAINS—

Electric Weld—4-0, $5.90 per doz.; 3-0, $4.65; 2-0, $4.25; 1-0, $3.35.

Brown's—4-0, $5.90 per doz.; 3-0, $4.65; 2-0, $4.25; 1-0, $3.35.

Three Chain—4-0, $5.90 per doz.; 3-0, $4.65; 2-0, 4.25; 1-0, $3.35

Stall Fixture Pattern—4-0, $4.30 per dozen; 3-0, $3.75; 2-0, $3.20; 1-0, $2.95.

NEW LOWER LIST ISSUED ON WROUGHT PIPING

Winnipeg.

A new pipe list has now been issued which reduces quotations on wrought piping approximately 8 per cent. The revised list, No. 54, was not available at the time of going to press, but the lower quotations are effective at once.

LOWER PRICES ON RATCHET SCREW DRIVERS

Winnipeg

Ratchet screw drivers as well as a great many other small shelf hardware lines have been recorded lower in price this week. Following are the latest prices on these products:

RATCHET SCREW DRIVERS—

No. 10—2 in., $8.40 per dozen; 3 in., $10.30; 4 in., $11; 5 in., $12; 6 in., $13.60; 8 in., $15.40; 10 in, $18.50; 12 in., $20.

BAR IRON PRICES REVISED

Winnipeg

Although bar iron and steel has reduced in price just recently, another substantial reduction is recorded this week. The following are the current quotations

BAR IRON, Rounds and Squares, 3-16, ¼ and 5-16, $4.40 base.

Rounds and Squares, ⅜ to 2 and Flats up to and including 1 x 4, $4.25 base.

Rounds and Squares over 2 up to and including 2¾ and Flats over 1 x 4 up to 6 wide, $5.00 base.

Rounds over 2¾ to 6, $5.50 base.

STEEL—Soft or Mild; Rounds and Squares, 3-16, ¼ and 5-16, $4.40 base.

Rounds and Squares, ⅜ to 2 and Flats up to and including 1 x 4, $4.40 base.

Rounds and Squares over 2 up to and including 3 and Flats over 1 x 4 up to 5 wide, $4.90 base.

Rounds over 3, $5.40 base.

EASIER TENDENCY IN RANGE BOILER MARKET

Winnipeg.

The range boiler market is very unsteady and prices of a varied nature have been quoted during the past month. It is expected that a new list will shortly be issued, which will be lower than the present level. This week records a lower price on 30 gallon sizes which is very general. Following are current quotations for the different sizes:

RANGE BOILERS—	
30 gallons, each	13 25
40 gallons each	16 25
52 gallons, each	23 45
66 gallons each	33 15
82 gallons, each	40 60
100 gallons, each	62 50
120 gallons, each	75 00

Pittsburg Markets

PITTSBURGH, December 29.—As a result of frequent if not general price cutting by independent wire mills, the Steel Corporation interests last Wednesday, December 21, began quoting new prices on wire products, as follows: Plain wire, 2.25.; galvanized wire, 2.75c.; wire nails, 2.50; cement coated nails, 2.15c.; painted barb wire, 2,65; galvanized barb wire, 3.15c.; polished staples, 2.65c. Independents are of course forced to meet these prices while it is a question whether they will cut them. They will probably find them low enough, but if cutting continues the Steel Corporation will no doubt continue reducing its prices, according to its general policy in all lines, until it discovers a level that will not be cut.

No precise statement can be made as to how much reduction these new prices represent, because there was no clearly defined market level. They are no lower than some prices that have lately been made in active competition, while they are $7 a ton on plain wire and $8 a ton on other products below the prices that were nominally regarded as the market in October. There was an "advance" September 12, $2 on plain wire and $3 on nails and barb wire, and the advance seemed to hold for a time, while later prices slipped off. The new prices are exactly $5 a ton below the prices ruling before the September 12 advance, and since the early part of July.

Other Prices Fairly Steady

In the previous week the Steel Corporation had reduced tubular goods in somewhat similar manner. These two lines, wire products and tubular goods, are the only ones that have shown any price change of consequence for several weeks. Bars, shapes and plates remain quotable at 1.15c. to 1.60c., with the difference that 1.50c. is now rather common even on moderate sized orders, while a couple of months ago the price was made only on very desirable orders.

Probably 1.60c. is sometimes obtained, but hardly on business of any importance. There is some doubt as to whether 1.50c. would be shaded even on a very desirable order. Perhaps 1.50c. may be considered the bottom of the market, but it is improbable that this will be the case indefinitely. That is, the price is quite likely to be lower before it is higher. The market is now so steady that buyers have no incentive to wait for lower prices, as if they need material they would lose more by deferring operations than they would make up by a concession in prices. Should an active buying market develop, competition would probably force prices down a trifle. As the market now stands there is little incentive to cut prices farther.

Sheets are phenomenally firm at 3.00c. for black and 4.00c. for galvanized. Buyers have been quite unable to budge any of the mills from these figures, and the market is in a striking contrast to the market that obtained some time ago, when there was no regular price at all. These prices are $5 a ton higher than those ruling late in August and early in September, when a good bit of business for delivery to the end of the year was booked, while the cost of production is a trifle lower than in the latter part of August. It is claimed, however, that mills were losing money then.

Tin plate is quite steady at the regular price of $4.75, but it seems some independents are accasionally shading the price 10 to 15 cents a box, to secure particularly desirable orders.

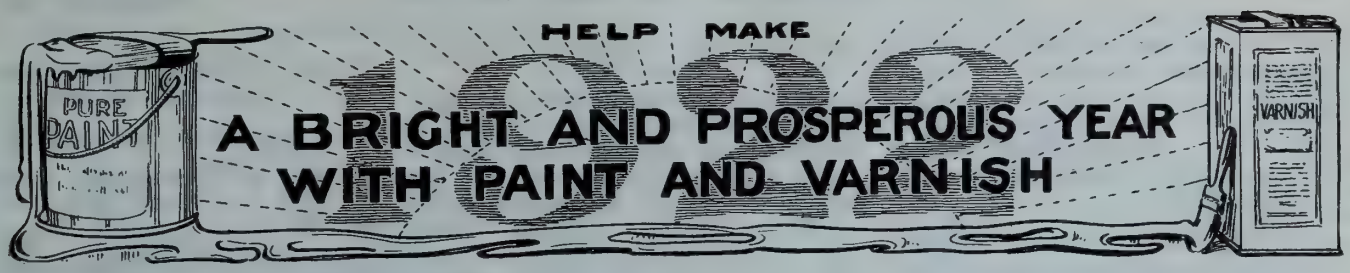
Liquidation in Steel

There is room for an almost unlimited amount of discussion on the subject of whether or not steel prices are thoroughly "liquidated" as well as on the subject of whether or not prices are below the cost of production. Merely to make one comparison, the Bureau of Labor index number of commodities at wholesale, taking 1913 average prices as 100, stands at 149 for November, having fluctuated only between 152 and 148 since last May, although the individual groups of commodities making up the general average have had fluctuations of considerable magnitude. On the same basis of computation, finished steel products would now stand at 126, and thus they appear to be much more thoroughly liquidated than commodities in general. Farm products, however, stood in November at 114, or still lower, while building materials stood at 197 and housefurnishing goods at 218.

On this basis steel products ought to advance, or several groups of commodities should come down. There is room for attacking this argument, however, on the basis that 1913 steel prices were fairly profitable, and were 21 per cent. higher than at the end of 1914, when there had been quite a decline. Steel prices now, while 26 per cent. above the 1913 average are 52 per cent. above the 1914 low point. Then, as to costs there is room for much argument, because the cost of production varies according to the rate of operation. A mill running at 30 or 40 per cent. might lose money at present prices and might have very comfortable profits if running at 90 per cent.

Future Prospects

Prospects are, as indicated in last report, that steel ingot production in the first eight months of next year will not pass below a rate of 20,000,000 gross tons a year or above a rate of 35,000,000 gross tons. This means one thing to the producer and another thing to the consumer, because steel capacity has so greatly increased, being one-half greater than in 1914 and double the capacity in 1910. A 20,000,000 ton rate would represent, on a conservative basis, a rather fair rate of steel consumption.



Making Paint Dept. Plans for 1922

Surveying Paint Business of 1921 Will Show Many Opportunities For Development—Neglected Painting Not Nearly All Done in 1921—Keeping a Folder For Helpful Suggestions—Much House Building Under Way and More Planned For Early Next Year

IN ORDER that 1922 may be made the banner paint year of prosperity and brightness which is depicted in the heading on this page, every merchant who wishes for this result is now making plans for enlarging the scope of his paint business next year. It is wise just at this time to take a brief survey of the year's developments in the paint department. It has been a good year for the sale of paint. Lower prices combined with the extension of the Save the Surface idea and the effort of merchants to bring prospects to a higher realization of the value of paint and varnish, have resulted in considerably increasing the sale of paint in many hardware stores. Most merchants have found new problems crop up during the year, new arguments proposed by customers, and advantage can be taken of the lessons learned thereby.

Big Opportunities in 1922

An idea seems to prevail in certain quarters that the active paint business of 1921 was largely due to the lack of painting which had been done in the years immediately preceding, and that most of this back-painting has now been done. The first part of this may be quite correct but the latter part is quite contrary to the facts. While considerable back-painting was done during 1921, there is yet a great amount of it to be done and every day sees new opportunities developing for the use of paint. A close survey of the building situation, for instance, reveals the fact that a great deal of house construction is under way. Building figure totals look slim because of the lack of industrial and office building construction, but houses offer probably a more comprehensive opportunity for developing paint business and should be developed as such.

The Christmas rush is now over and inventory time is just about here. For a while the merchant's time will be much taken up, but the first opportunity should be taken of summarizing plans for the paint department for 1922. It should be kept in mind that the paint department literally cannot "stand still." It must either move ahead or go back. The past year may have been a good one for paint, but 1922 can be a better one if plans are made for making it so.

Much Building Planned

All signs point to a considerable amount of building activity in the early spring and this combined with the great volume of refinishing business which will be done as a result of the educational effort being conducted recently by the merchants and other mediums, should make a big increase in paint trade in 1922.

In making plans for next year's paint business some dealers are keeping a folder in which to note all the selling ideas which they can secure. Some dealers are also keeping a close watch on those who have made the excuse this year that they would paint next year; there are others who are planning to build next spring, their plans having been postponed for some time due to high costs. In such cases as the latter ones these names of prospects could well be forwarded to the manufacturer whose line of paint is handled. This follows out the suggestion conveyed in a previous issue, viz., that the dealer should secure the closer co-operation of the manufacturer who has means of studying conditions and who can bring intelligent pressure to bear upon the prospect. This is looked upon as good business for it gives the dealers an early start on next year's trade, and an early start is a big help.

Plans for Early Start

The dealer's plans for an early start can take the form of advertising and other publicity ideas, the compiling of a mailing list of good prospects, plans for the rearrangement of the paint department, if necessary, in order that it

A Minister On "Save the Surface"

IN connection with the $1,000 Prize Contest in the 1922 Save the Surface Calendar, a preacher out in the West sent several suggested titles to the Norman Rockwell Painting and enclosed the following, which he says "is my own experience with paint and varnish."

I

"Painting a house adds beauty and charm
And saves it from decay,
'Twill do the same thing for your barn
Or fence on the highway.
I built a little bungalow
A year ago last May,
To paint would take a lot of 'dough,'
I'll let it go that way.

III

"I spent two days of hardest toil
To nail the siding down,
The while I inwardly did boil,
The biggest fool in town.
I got some paint and brushes, too,
And spread the paint on right,
And folks say, passing by to view,
It is a lovely sight.

II

"You see, I thought some 'dough' to save
Would paint some other day,
For being such a fool I rave,
'Twas money thrown away.
The house turned gray, did shabby look,
Its beauty passed away;
All because no pains I took
To save it from decay.

IV

"Now here's a lesson I have learned,
It's free for you to-day,
It sure is time and money earned
To use paint right away.
My experience also taught me this,
It's worth a lot to know,
That when you save the surface
You save all that is below.
And while you save your property
By using paint at once,
You'll be rated as a wise man,
Not as the city dunce."

will have the best attention; plans for pushing certain specialties at various times during the season; and plans for linking up the window displays of paints and varnishes with the local advertising.

A number of suggestions offered in these columns from time to time dealing with the possibilities of developing an all-year trade in the paint department by pushing certain specialties and encouraging exterior and interior painting and varnishing at all seasons of the year are being followed to good advantage by some dealers. As they are working out however they are even more effective than as outlined for a number of dealers are giving the ideas a more practical turn and thereby increasing their value.

Mid-Winter Trade

As an instance of how this is working out in connection with winter trade one dealer states that he recently introduced a wallpaper department in his business and he finds wallpaper, paints, varnishes, etc. go well together. This dealer had a set of 8 x 24 in. boards painted with enamel colors and varnish stains. When showing wallpapers he has these boards handy and sets up the most suitable shades against the paper. This gives the customer a good idea of the best color combinations for finishing the woodwork in the room being repapered. He finds that in nearly every case where it is found necessary to repaper a room that the customer is quite agreeable to paying some attention to the woodwork in the room as well. In many cases the dealer finds all that is necessary is to write down the order and deliver the goods. He is enthusiastic about the boards and intends to make the fullest use of them all winter. When he has a customer in the decorating notion he finds it very opportune to throw in a few suggestions.

The refinishing of house furniture during the winter months, especially in view of the increased value of furniture, is a point about which much has been written. Perhaps the most efficacious way of developing this class of trade is to do what another hardware dealer has done, viz., to reclaim an old piece of furniture and after sandpapering to give it a coat of varnish stain to make it look like new. The dealer who follows this plan on drawing attention to the chair which had received such treatment said: "That thing has set on that counter like a soldier and has sold a lot of varnish stain for me. You bet I am going to keep him working right through the winter and spring. I may change his coat once in a while but he'll bring the business." The chair in question bore a card reading: "See what ————varnish stain did to me." The plan may also be followed of leaving part of the article unfinished to indicate the comparison.

A review of recent paint articles in Hardware and Metal will show many helpful plans for 1922.

H. J. McADIE LEAVES A. RAMSAY & SON CO.

Montreal.—H. J. McAdie, sales-manager, A. Ramsay & Son, Company, is resigning his position with this firm to enter business for himself. On January 1 Mr. McAdie will open his office at Room 816 Power Building, 83 Craig St., West, Montreal, as direct agent and exporter, representing English, American and Canadian firms whose products

H. J. McADIE

are used by the paint, varnish, rubber, ink, paper and kindred industries.

Mr. McAdie's experience in the paint and varnish business has been a wide one. For the past twenty years he has been connected with the industry, eleven of which he has served with A. Ramsay & Son, Company, first as traveler, then as manager of the Toronto branch, and latterly as sales-manager in the head office and factory.

MARTIN-SENOUR, LTD., HOLD GET-TOGETHER CLUB DANCE

Montreal.—Monday night, of last week, opened up with a blare of trumpets, striking of cymbals and much jollification on the part of the Get-Together Club, under the auspices of Martin-Senour Co., Ltd., Victoria Hall, Westmount, was the scene of all this revelry.

Three hundred or more, members and friends, made up this Get-Together throng, and such a gathering of "fair lasses" and "manly youths" were there. The programme consisted of the most up-to-date 1922 dances, and a few of the "old-time flings." A "Novelty Dance" took place just before supper. Paper hats, whistles, and other noise producing instruments were given away. There was of course a "Moonlight Waltz" or so, and another feature of the evening came when Santa Claus, distributed envelopes to all the girls, with a lucky number in a few of them. These lucky number called for "lovely luscious chocolates." The programme was thoroughly enjoyed by all.

PRICE CUTTING DOES NOT INCREASE TRADE

(Continued from Page 28)

facturer or his competitor how things are and encourages him, and so it spreads.

Big Field for Business

In view of the fact that there has not been a great consumption of paint during the past few years as compared with the necessity for it, there is a very big field for the merchant in this line, and if he buys goods and makes up his mind to sell them by persistently talking paints to the householder, distributing advertising and educational literature of all kinds, he is going to create in the mind of the people that he comes in contact with a desire for beautifying their homes as well as preserving them. John Smith is going to paint his house or decorate it, and when he gets through and pays the bill he has an idea that his next door neighbor or his friend should do the same, and that man has an idea that his neighbor ought to do the same thing, and so the fever spreads.

What I am trying to drive at is that if we make up our minds that things are going to be bad, they are going to be bad as far as we are concerned, and probably in our immediate locality or if we make up our minds that things are going to be good and we begin doing good, putting our thoughts into action, things are going to be good to the extent that we make them good. This year will be the biggest paint year in the history of Canada if the merchant and manufacturers get close up together discussing the needs and the best way of supplying those needs, losing no opportunity of bringing to the attention of the property owner the need for painting, the comparatively low price of paints, the genuine value given for money received, and the merchant and manufacturer will reap a harvest beyond their expectations.

It is a tug-of-war, depression, unemployment, the fear of things being worse pulling against opportunity for service to humanity and improving conditions around us by talkng, by decorating our homes, and the fact that there is lots of money and that the country is young, energetic, full of life and vigor. Then let us get on the side of optimism, the side of good will, the side of advancement—the only side on which there can be any kind of success, and as we say in the tug-of-war—"Now altogether boys," and we are absolutely assured of success.

RECOMMEND CHEAPER ELECTRIC HEATING

The Ontario Provincial Hydro-Electric Commission is recommending to the Government a change in the basis of charge for electric hot-water heaters where the machine utilized is not of more than one horsepower capacity.

SERVICE

CONFIDENCE

FAIR DEALING

By Their Deeds---

SINCE September 1st, 1921—in less than nine weeks of actual solicitation—we have had the pleasure of welcoming to our Organization twenty-five New Agents.

This accomplishment, and the fact that our new friends represent Hardware Merchants of the highest type and standing, bespeaks, in a measure, the practical merits of our Agency Offer and the veracity of our claims.

Considering that our is an exclusive Agency proposition demanding the best representation procurable, we feel that twenty-five new agencies in so short a time establishes a record rendered possible only by conscientious service.

To our old friends whose earnest and fervent enthusiasm did more to bring about this achievement than any endeavor of our own — we extend our cordial thanks, and hope that such happy relationships will continue to provide the nourishment for our mutual growth during 1922.

Weekly Paint Markets

Montreal

MONTREAL, Dec. 29.—The continued strength of the undertone in shellac has resulted in considerably higher prices appearing in some quarters. Gum shellac in primary markets has displayed strength for some time past and local purchases at the higher prices, now ruling in this product, is responsible for the increase on the local market. Other dealers are holding their former prices, but the future of shellac, from present indications, is firm. Current quotations on both linseed oil and turpentine are unchanged with both products remaining on a steady to firm standing. The oil market is weak insofar as present demand would show, but the seed situation which holds exceptionally well, upholds the oil product. Some are now questioning supplies; whether there will be enough seed on the market until the new Argentine crop. Turpentine in Southern markets records a slight advance in some centres, with future advances thought likely when the demand becomes more active.

Raw materials allow white lead in oil to remain on a steady market, and while season's prices are usually announced early in the New Year, there seems no indication of a revision at that time, although some factor may develop which will have a deciding effect on the market at that time. With the holiday season now at hand business in paint and varnish manufacturing circles is somewhat lessened, but a resumption of activities is looked for following the early weeks of the New Year.

BETTER TONE IN LINSEED OIL CONTINUES

Montreal.

Current quotations on linseed oil remain at unchanged figures with the undertone of the market continuing firm. When the better tone in the market developed last week, the health of the gain was thought questionable by some, as the light demand would be the obstacle in the way of any marked change in this direction. However, flax seed upholds its higher standing this week, with no immediate sign of a recession. A factor assisting in this is the question of seed supply and some are now asking whether there will be enough seed on the market to hold until the new Argentine crop comes in.

Locally demand for linseed oil is very light, and will in all probability continue so for the few weeks in the opening of the New Year, after which paint manufacturers are expected to again resume buying on a more active scale. It is noticeable that in outside markets an improvement in this direction has already taken place, lending encouragement for business in the earlier period of next season. Following are unchanged local prices:

LINSEED OIL—

	Raw.	Boiled.
1 to 2 barrel lots, per gal ...	0 81	0 83
3 to 5 barrel lots, per gal ...	0 79	0 81

Less barrels, add 10 cents per gallon.

LIGHT DEMAND FOR TURPENTINE, BUT MARKET FIRM

Montreal.

There continues little activity on the local market for turpentine, but notwithstanding the situation remains at its former improved standing. Sales for some time have been almost entirely of a small nature, and with the closing weeks of the year at hand little improvement was expected. Some look for continued quietness in the opening weeks of the New Year, while others are of the opinion that the volume of business will greatly increase during next month, as stocks are undoubtedly low, and the market would indicate that present prices are good values. It is generally conceded that any spurt in demand would immediately further strengthen the situation and higher prices would immediately rule. During the week in Southern markets the demand was also light, but an advance was recorded at some centres. Although slight, it would indicate the trend of the market, and at these same primary centres a further advance is thought likely in the near future.

Prevailing quotations locally are as follows:

TURPENTINE—	Imp. gal.
1 barrel lots	$1.17
2 to 4 barrel lots	1 15
Broken lots	1 27

HIGHER SHELLAC PRICES IN SOME QUARTERS

Montreal

The continued firm tendency of gum shellac has resulted in higher quotations in some quarters locally. Some time ago it was stated that necessary buying from primary sources would bring about higher prices. Such is now the case, firms whose supplies are now replenished are quoting considerably higher prices. Others, however, are maintaining former lower figures, quoted below. Sales are seasonably slow at present and dealers do not look for much activity until after the opening weeks of the New Year, but with improved business and the undertone at primary sources continuing on its present standing, higher prices are thought to be altogether likely.

SHELLAC—

Orange shellac, in barrels	$4 15
Do., in one gal. jugs	4 50
White, in 5 gal. jugs	4 90
Do., in one gal. jugs	5 00

RAW MATERIALS UPHOLD WHITE LEAD

Montreal.

With the present quiet period for white lead in oil now at hand, the market remains steady. Raw materials have shown little variation in a past number of weeks, allowing the product to continue for next spring's business. In the earlier weeks of the New Year, the season's prices are generally announced, but as stated little change from present levels is looked for, although factors other than raw materials and manufacturing costs may at that time have a decided effect on next year's quotations.

Toronto

TORONTO, December 29—Both the linseed and turpentine markets record very little change this week. The usual holiday dullness at this season of the year is strongly apparent, while the slack period in these products is accentuated by the absence of current demand. Only small orders are evident for turpentine, indicating buying for immediate needs only. The undertone at primary production centres is practically unchanged, in spite of the lack of consumer interest. There has been practically no booking of note in linseed oil, with flax seed recording less fuctuations than usual.

REPORT PUTTY SALES FAIR FOR THIS SEASON

Toronto.

While the demand for putty has recently receded from the brisk activity recorded during the Fall season, some dealers still report current sales of this product to be fairly good for the present period of the year. Quotations on putty still remain at the following levels:

PUTTY—

Standard, per 100 lbs.	5-ton-lots	1-ton lots.	Less
Bulk bbls	$ 4 45	$4 95	$5 25
100-lb. drums	5 45	5 95	6 20
25-lb. irons	5 70	6 20	6 45
Bladders in bbls.	6 70	7 20	7 45
Do., less quantities	6 95	7 45	7 70

Pure Linseed Oil Putty, $1.50 per 100 lbs. advance over above prices for similar quantities

TORONTO PAINT MARKETS

(Continued from Page 46)

PRODUCERS MAINTAIN FIRM PRICES ON TURPENTINE

Toronto.

No change has been recorded in the turpentine markets, either locally or in primary centres. Trade at present, is very slack, with little interest being shown in offerings and few sales being recorded. The current quotations remain unchanged, the prevailing conditions at southern distributing circles being practically unaltered. This situation is accentuated by the usual holiday dullness at this period of the year. Nominal price levels follow:

TURPENTINE—	Imp. gal.
1 barrel lots	$ 1 20
2 to 4 barrel lots	1 19
5 gallon lots	1 35

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $15 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph Windsor, or Montreal but freight may be equalized from any of these points

Car load lots of 70 bbls. Price on application.

Less than 1 barrel lots 15 cents per gallon additional.

DULL SEASON EVIDENT IN LINSEED OIL

Toronto.

The linseed oil markets are extremely quiet at present. There is very little current business to record, and practically no booking worthy of note has materialized. Large consumers could probably shave the present nominal prices, although the current levels generally remain unchanged. There has been less variation in flax seed over the holiday period, with the undertone practically unaltered. Dealers point out that the linseed oil markets are now in the midst of the dull season. Following are current quotations on both raw and boiled:

LINSEED OIL—	Per Gallon.	
1 to 2 barrel lots	0 84	0 87
3 to 4 barrel lots	0 82	0 86
6 to 9 barrel lots	0 81	0 84

Less barrels, add 15 cents per gallon.

SMALL CURRENT DEMAND FOR WHITE LEAD

Toronto

The demand for white lead in oil is dull at present, but with plans now under way to make 1922 the greatest year in the history of the paint industry, an improved degree of activity is naturally expected to be reflected in the movement of this product. Following are current quotations:

WHITE LEAD IN OIL—	
In 5-ton lots	12 45
In 1-ton lots	13 20
Less quantities	13 55

EASIER UNDERTONE NOTED IN SHELLAC GUM

Toronto.

The shellac markets are nominally unchanged, with prices holding at recent levels. Shellac gum still retains the firm undertone noted during recent weeks, but price gains on this commodity have now ceased. This condition has relieved the current situation to a slight extent, and coupled with the moderate demand at present prevailing the upward tendency in local prices is not so apparent as formerly.

WINDOW GLASS SEASON LONGER THIS YEAR

Toronto.

The window glass season is now practically at a close, but interest is attracted by the fact that current stocks are still described as very low, this condition particularly applying to certain sizes of double-diamond. Distributors point out that the season for this product has been longer this year, this being probably due to the mild weather which has generally prevailed well into the month of December, coupled with some periodical anxiety as to further shipments. Supplies have since been replenished, however, and only little activity is now recorded.

LULL EVIDENT IN PAINT AND VARNISH SALES

Toronto.

A temporary lull is now evident in paint and varnish circles, which is principally attributed to the holiday season. Prospects still point toward another brisk season for these products in the spring of 1922, and both manufacturers and dealers report making preparations accordingly. While certain American paint manufacturers have recently announced a slight downward revision in prices on house paints, it is stated by domestic producers that such a condition merely reflects the tail-end of similar changes in values which were apparent since the Fall.

Manufacturers and distributors spoken to with regard to paint price levels, were firm in stating that they are not anticipating any further declines at present. "We don't see any chance in the world for reductions," said one manufacturer when discussing this factor with Hardware and Metal. It was pointed out that paint prices are generally firm because the basic elements entering into production costs have remained unchanged since the last concession was made.

"Manufacturers do not expect any price lowerings that may develop in future seasons to be of such a drastic nature as changes witnessed during the past year or so. This is due to the fact that all commodities are getting back to normal, but the process of recession is naturally slower and the variations of a minor and more gradual nature, because stocks have been well liquidated in the paint industry and changes must first occur in the various elements which make up production costs."

No one in Canada need carry money around in his pocket for want of a bank in which to deposit his surplus. There are eighteen chartered banks in the Dominion with over 45,000 branches.

CUTTING PRICES DOES NOT STIMULATE TRADE

(Continued from page 29)

In emphasizing the importance of optimism with care, as a justified sentiment with which to commence 1922, W. H. Lamont, financial Manager of H. S. Howland Sons & Co., Ltd., Toronto, pointed out that this policy following upon a good example of economy in administration upon the part of our governments would help greatly to improve business conditions in the coming year.

One of the chief difficulties in trading during the last year has been the great spread between the price of the products of the soil, and that of the factory. Either agricultural products must advance or manufactured commodities decline until the fairer proportion is reached, and it would seem in the opinion of Mr. Lamont that this readjustment can only be accomplished by the latter taking place.

One of the factors tending to maintain high production costs was said to be wages paid to labor, and it was the opinion that labor leaders should develop a broader appreciation of the general conditions prevailing and guide their affairs accordingly. Were this done it was felt that labor would not be holding out for a few cents an hour in wages while at the same time sacrificing continuous employment.

It was pointed out that retailers as well as manufacturers and wholesalers should carefully scrutinize accounts and attend vigorously to collections. The farmer and consumers generally had enjoyed several good years and it was not thought unreasonable that they pay their honest debts even if it did mean the consumption of savings. It was shown that the retailer by promptly collecting outstanding accounts helps business very materially by enabling the wholesaler to place orders with manufacturers and thereby resulting in more employment which subsequently returns to the advantage of the retailer by increasing buying power.

The possibilities of our natural resources are beyond comprehension, our huge wheat fields, the extent of our forests, mines and fisheries, together with the development of our hydro electric power, must result in prosperity if we will only all get together so as to enable intensified production. The assistance of our governments in directing trade to flow through its natural channels, unhampered by restrictions, is necessary. Reasonable protection of manufacturers is no doubt required, but could this not be accomplished by placing a definite rate of duty upon imports, and not by varying regulations which create uncertainty regarding costs of goods and in this manner tending to curtail trade?

"Save the surface and you save all" Paint & Varnish

Floglaze

Registered

"The finish that endures"

Velvet Finish

(The Can With the Orange and Black Label)

This line will develop big business in sales for wall and ceiling finishes in homes, churches, halls, stores, etc.

Gives an egg shell gloss finish without rubbing on plastered walls, wall board, woodwork, metal work, etc.

It can be used in or out of doors.

This flat finish is adapted to universal use, which increases its possibility for sales, greater turnover and larger profits.

Spreading, covering and wearing qualities are the same as all other Floglaze lines.

THE CANADA METAL CO., LTD.

TORONTO

Hamilton Montreal Winnipeg Vancouver

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U. S. A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.
Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

HARDWARE & METAL'S

unique circulation as proven by the A.B.C. Audit is due to 33 years of honest effort to give the retail trade the best possible service.

Name of Hardware Merchant and further details supplied upon request

The Answer is—He Didn't!

THE crowd was drawn by a hardware firm in an Ontario town of 700 population. This crowd of over 1,000 people represents customers of the store, drawn from miles around, to attend the picnic given by this firm to its customers. Surely this is evidence of the close relationship between this hardware firm and its customers.

The close relationship between retailer and customer in this instance is typical of conditions existing in hundreds of Canadian towns, villages and cities.

The average hardware merchant (particularly in the smaller cities and towns) has been established for many years. He has a big business connection built up through years of efficient service to his customers. He is well rated, and a desirable man with whom to do business. He influences the buying habits of the people in his community, and in over 90% of the sales made, he is the deciding factor. *"Which one do you recommend?"* is a question asked thousands of times each day in the hardware stores of Canada.

If you can get the effort and enthusiasm of the retail hardware merchants and their clerks, plus their window and interior displays and local advertising behind your goods, you will have secured the co-operation of one of the greatest available selling forces.

HARDWARE AND METAL is paid for, and read, by all the wholesale hardware buyers of Canada, and over 90% of the retailers from coast to coast. They are the men who control the sale of your products to the hardware consumers. HARDWARE AND METAL can put your story before, practically, the entire Canadian hardware trade. One of our representatives would be glad to give further details.

(Only hardware paper in Canada with membership in the Audit Bureau of Circulations).

HARDWARE & METAL

Canada's National Hardware Weekly since 1888

143-153 University Avenue - - Toronto, Canada

Published every Saturday since 1888. The only weekly hardware paper in Canada, and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations

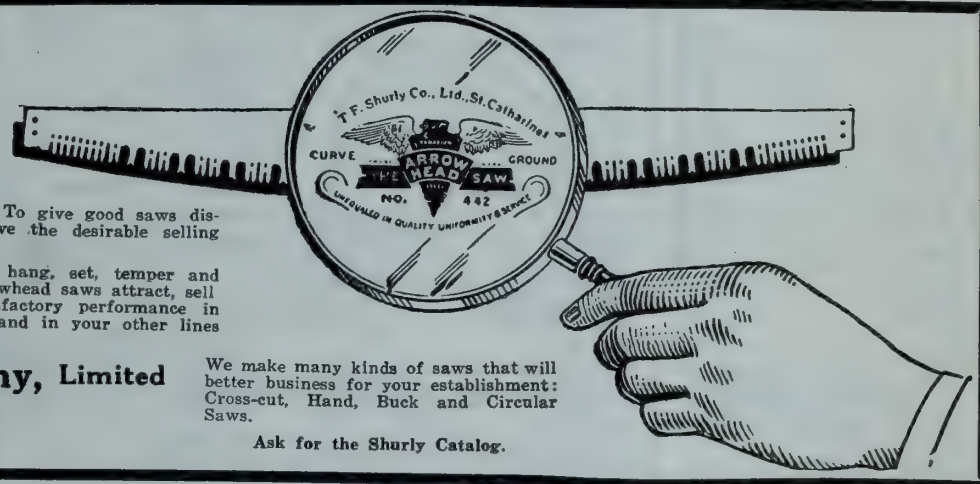
Arrowhead Saws

Vanadium Steel

How you sell saws depends partly on your salesmanship. You can sell a poor saw but once; to sell saws successfully and build yourself a permanent business you must sell good saws. To give good saws distinction and individuality they must have the desirable selling points of superior saws.

Arrowhead saws have those points; the hang, set, temper and finish are right, and they sell right. Arrowhead saws attract, sell and satisfy your customers. Their satisfactory performance in service creates confidence in your store, and in your other lines of goods.



T. F. Shurly Company, Limited
St. Catharines
Ontario

We make many kinds of saws that will better business for your establishment: Cross-cut, Hand, Buck and Circular Saws.

Ask for the Shurly Catalog.

THE CREDIT MAN of a manufacturing or commercial concern must know now the financial standing of the firms to whom his company extends credit. He has his Dun or Bradstreet.

The Purchasing Agent or the buyers of various departments must be convinced that the goods delivered are as represented in both weight and quality. They have their scales and testing apparatus.

The Advertising Man must know that the circulation claims of the papers with which he does business are justified by the facts. He has the reports of the Audit Bureau of Circulations.

Good firms invite investigation of their rating or their merchandise.

Good papers furnish A. B. C. reports to their advertisers.

Hardware and Metal is a member of the Audit Bureau of Circulations.

If interested tear out this page and place with letters to be answered.

Myers Tubular Well Stands

A special feature in connection with the Myers' Defiance Pumps is that the entire head or handle fulcrum and handle are made from the best annealed malleable iron, making the construction strong and eliminating all risk of breakage. Another feature is that instead of the old style set screws being used to hold the handle fulcrum at any particular point, a better and stronger plan has been adopted, using heavy lugs cast on the top and bottom of the air chamber at three separate points to which the head or handle fulcrum proper is bolted by means of heavy bolts. This permits of the spout being located at the right or left side or straight away from the handle. The handle fulcrum comes half way down on the pump body and connects at that point with a heavy wrought iron brace which extends to the floor, thus forming a triangular brace, and bringing the entire strain on the base of the pump instead of at the top as in other makes. The piston rod is 1 1-8 inch drawn polished steel, welded securely to the flat windmill bar, giving the greatest possible strength. The spout is bolted to the pump head and can be easily changed.

Myers Defiance Tubular Well Stand

Fig. 905 illustrates a Tubular Well Standard, either force or lift, cut in half, showing all parts in detail. All Myers' stands are constructed on the same lines. The reservoir head, which also serves as an air chamber, is fitted with syphon spout, which throws a continuous stream. This head is tapped for 2-inch pipe, as indicated at letter B. Into this head is screwed the reducer casting marked D. The lower end of D is tapped for 1¼ and 1½-inch pipe as indicated at C. When using the pump stand for 1¼ and 1½-inch pipe, it remains as shown. If it is desired to use 2-inch pipe, remove the casting D, which makes a Tubular Well Stand, through which a 2-inch plunger can be withdrawn through stand as in Fig. 648.

The illustration represents the force stand. The lift stand is the same in every respect, with the exception that instead of the stuffing box we use a tight cap, and on the force stand the reducer casting D is much shorter than shown in cut, this long casting is used only on lift pump.

The Cock Spout, used on these pumps, is of the compression pattern with the hand wheel located above the spout, convenient to the user. This spout is a new design, and we believe superior to any cock spout ever offered to the trade. It is fitted with rubber faced valve, and operated by means of a hand wheel, which makes a positive and quick shut-off. The entire mechanism can be removed through the top of the spout by the use of an ordinary wrench. It is fitted with a flange face which bolts directly to a faced surface on the side of the pump head, and is held in position by means of two cap screws. The plain and cock spouts interchange on the same pump.

Displays and local advertising will make it known that your store is headquarters for good pumps. This is good business and well worth going after.

White Mop Wringers

Quick Turnover - Wide Market

This wringer sells on sight because of its very evident merits. Has powerful squeeze, is built to last for many years. All the dirty tiresome drudgery of hand wringing is forever done away with. Several family and janitor sizes. Send for catalog. Your jobber's salesman will take your order for White Mop Wringers. Write us for illustrated circular of complete line. Made in Canada.

White Mop Wringer Co.
OF CANADA
Factory: Paris, Ont.
Office: Fultonville, N. Y.

When Writing to Advertisers Kindly Mention This Paper

NAILS

Heavy up to 12 inch.

WIRE

Hard, Soft, Tinned, Coppered.

BALE TIES

Any length--soft tough wire.

STRAIGHTENED RODS
WIRE HOOPS

BUSINESS

SHOULD BE GOOD

THE GRAHAM NAIL WORKS

Operated by

THE CANADA METAL CO., LIMITED
Toronto

IF YOUR MESSAGE TO THE TRADE

is advertised in Hardware and Metal it goes by paid subscription to every wholesale hardware buyer in Canada and over 90% of the retailers. An examination of hardware-store displays, or inquiries in the stores, will convince you that these men invariably prefer to buy goods made familiar in the advertising pages of Canada's only weekly hardware trade paper.

HARDWARE and METAL

"Canada's National Hardware Weekly"

143-153 University Avenue - Toronto, Canada

Montreal Branch, Southam Bldg. Winnipeg Branch, Union Trust Bldg.

Published every Saturday since 1888. The only weekly hardware paper in Canada and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.

WANT ADS

If you want a buyer, clerk, salesman, traveler, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $2.20 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

SITUATIONS WANTED

SALESMAN AND HARDWAREMAN WITH both Canadian and American experience, as manufacturers' salesman for hardware and mechanics' tools, also long experience in retail trade, wants employment. Box 104, Hardware and Metal.

FOR SALE

SPECIAL SALE PRICE TICKETS. SHOWcards. M. Moorby, Newmarket, Ont.

OLD ESTABLISHED BUSINESS. HAVE FOR sale patterns, tools and some material for hardware and auto specialty, now selling large quantities in Canada and export. Does not require large amount of money. Box 103 Hardware and Metal.

SNOWSHOES
Genuine Salmon Snowshoes
Sole Distributors,
A. E. McGREGOR & CO.
Huntsville, Ont.

Have you any small needs?

Do you want to sell anything?

If so advertise in this paper and watch Results.

HARDWARE AND METAL the logical medium to use if you have a message for the Canadian hardware trade.

HELP WANTED

WANTED — TINSMITH; YOUNG MAN WHO can estimate on work and install warm air furnaces. Present work out of factory at Brockville with opportunity of going out as travelling salesman. Give salary required and all particulars in first letter. Smart's Brockville Furnaces, Ltd., Brockville, Ont.

WHOLESALE HARDWARE

Traveler required. Important distributing company exclusively handling European cutlery, tool, aluminum-ware, etc., require live wire for Quebec and Maritime Provinces. Splendid opportunity. Only those with best wholesale connection need apply. Replies confidential. Apply Box 106, Hardware and Metal, 128 Bleury Street, Montreal.

HARDWARE & METAL is the only weekly hardware paper in Canada and is read by practically every worthwhile buyer, both wholesale and retail, in Canada. HARDWARE & METAL is the logical medium to use if you have a message for the Canadian hardware trade.

Classified Advertising

20 cents per word per issue

Rates for Classified Ads.—Insertions in this space twenty cents per word per issue. Each initial, four or less figures in one number, count as one word. Name and address is counted as part of the ad. All orders must be accompanied by cash. Forms for the issue close two weeks preceding each issue. Publication dates are 1st and 15th of the month.

IT PAYS TO READ THE ADVERTISEMENTS—The main thing an advertiser wants to do is to tell you plainly just how and why his goods are worthy of your consideration. You can learn a great deal from that alone, because many things you see advertised are the things you buy and use in your regular daily life. By reading advertisements you can learn the names and read descriptions of the things that are best and most satisfactory.

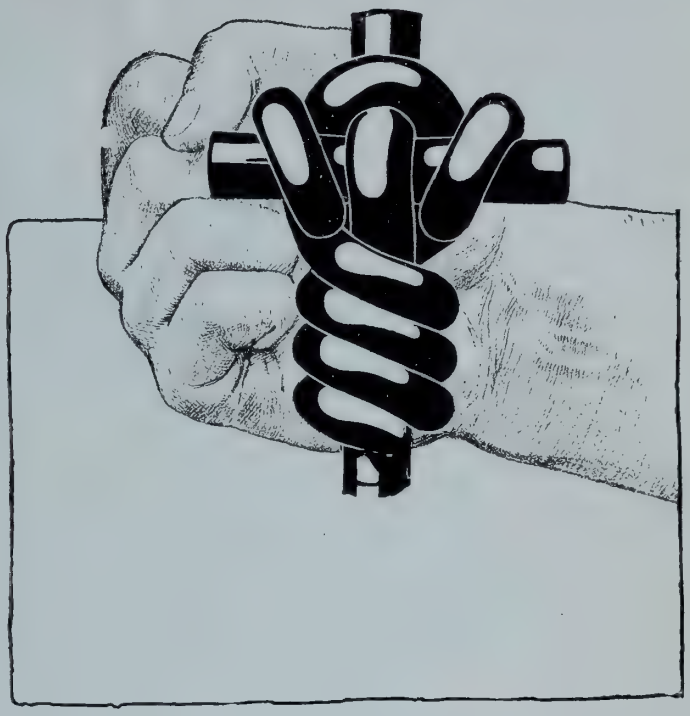
Frost Fence Has The Punch

that Will Stir Up

Bigger Business



The farmer is a keen and careful buyer nowadays. If you want his fence business you can win it by making him **see for himself** that Frost Fence has the strength, endurance and the economy warranting him to pull up his weed breeding snake fences. Here are a **few** of the **facts.**

Strength—Frost Fence is full gauge No. 9 wire both in laterals and uprights. Every inch of wire is of uniformly proper temper and pliancy; regardless of weather conditions it cannot get brittle and snap. The wave on the lateral takes care of every changing strain like a spring. It is extra heavily galvanized and fights rust many years longer than fences with the usual thin coat of spelter, which peels off.

Frost Fence Stands the Years

The Frost Hold-tight Lock grips like a vise. Once neatly stretched, Frost Fence never lets go at the locks.

We make Frost Fence complete. All wire is drawn and galvanized in our own plant. We KNOW it is right, every inch of it. You can't go wrong on Frost quality.

Economy—As Government reports show, the farmer is buying more and more wire fence. Are you getting your full share of his trade? You can deserve more fence business with Frost Fence. The many extra years of service it always gives makes it absolutely the most economical fence in Canada. Let Frost Fence quality stir up your fence business. Write us for the rest of the facts to-day.

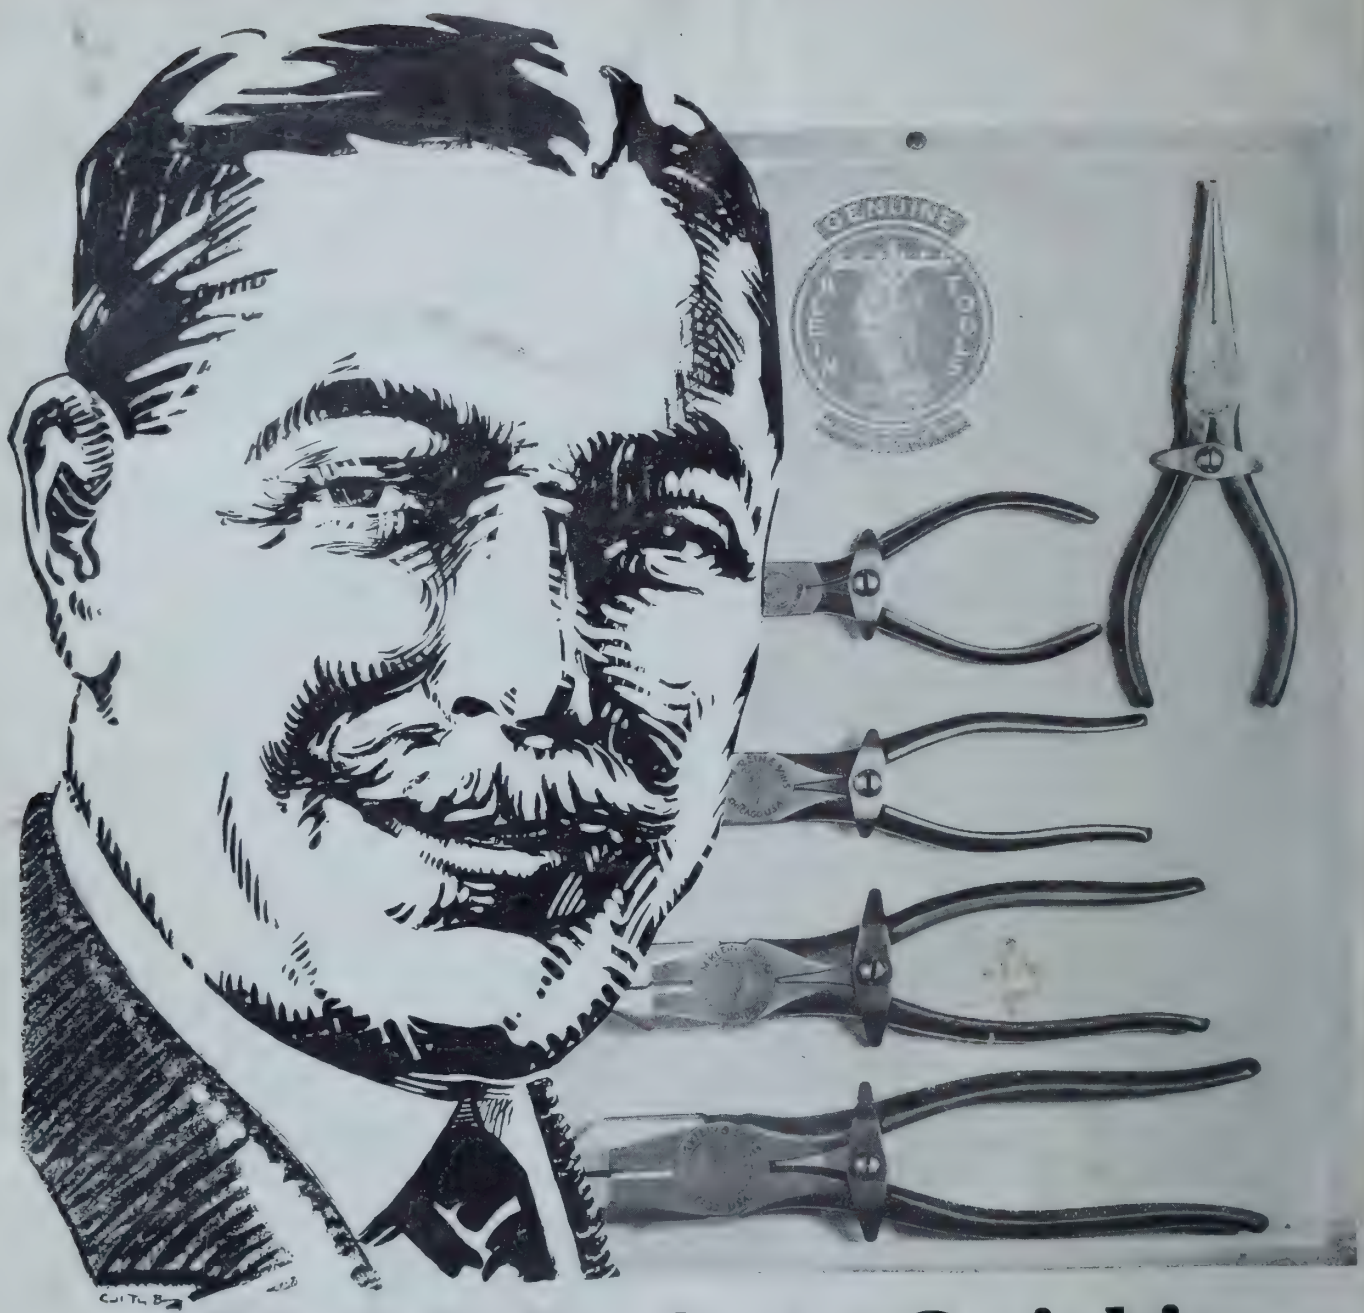
Hamilton - Canada

Galvanized and Bright Wire—Hay Wire and Bale Ties—Woven Wire—Farm, Factory and Ornamental Fences—Galvanized Gates—Manufacturers' Wire Supplies.



No. 4 Sells Out---Quick!

No. 4 Klein assortment is making sales—profits—for dealers, *now!*
We took the cream of the entire Klein line and made up this assortment of *sure sellers* three months ago.
We said it would sell and it has proved it would.
It comes to you packed away in a single box with enamel door signs, counter folders and a strikingly colored display board as pictured above.
Remember, only the quick-selling sizes and shapes—priced right to sell—priced to make a substantial profit—make up this small assortment of pliers.
And it is making sales and profits for dealers now!
